## INTRODUCTION

SOME books, like some persons, convey to us all that they will ever have to give at a single sitting. Others hold our attention profitably through two or three encounters. But the books to be shipwrecked with, the great books into which rich and substantial lives have been distilled and packed — the Dialogues of Plato, Montaigne's Essays, Boswell's Johnson, the Essays and Journals of Emerson — these are to be lived with and returned to and made the companions of hours and days and moods as various as those in which they were written. You cannot discover what Emerson has been to others or what he may be to you by any cursory turning of his pages. Still less can you "get him up" by studying any summary of his philosophical system. Philosophers tell us indeed that his philosophical system is hopelessly antiquated, and fancy that they have disposed of him. But Emerson himself remarked: "I need hardly say to anyone acquainted with my thoughts that I have no system." The value of his thoughts depends scarcely more upon the metaphysical filaments among them than the value of a string of alternating beads of gold and pearl depends upon the string. The figure has a momentary illustrative force but is very inadequate. Emerson lives, still speaks pertinently of our current affairs, and tomorrow we shall still find him commenting with equal pertinency on tomorrow's affairs. To know him is not mere knowledge. It is an experience; for he is a dynamic personality, addressing the will, the emotions, the imagination, no less than the intellect. His value escapes the merely intellectual appraiser. Analysis cannot deal properly with his pungent wit—it must be savored; nor with the impetus that he gives to the will—it must be felt; nor with the purgation and serene

rapture of the mind towards which his noble discipline tends—this rapture must be attained as a state of grace by imitation of those who have attained it, by lifelong intercourse with men whose tone and habit of life is noble.

## I

Since we are to consider him primarily as an unspent force in our own times, what it most concerns us to inquire about him is what he can do for us. If we approach him with that question, we need not tarry long over biographical details, interesting and rewarding as they may be to the student of literary history. We pretty well sum up his external career when we say that he was a New Englander of Boston, where he was born in 1803, and of Concord, where he died in 1882, after a studious life of irreproachable purity, dignity, and simplicity becoming the descendant of several generations of New England gentlemen and scholars. His formal education he received at the Boston Latin School and at Harvard College, from which he was graduated in 1821, with a well-formed bias towards an intellectual life. The son of a Unitarian minister, he inherited an ethical impulse which directed him to the Harvard Divinity School in 1825-6. In 1829 he was appointed pastor of the Second Unitarian Church of Boston. He was married in the same year to Ellen Tucker, who died two years later, leaving him a sweet and unfading memory of her fragile loveliness. After he had served his parish acceptably for three years, he felt obliged to announce, in 1832, that he was no longer able to administer the sacrament of communion in the general sense of his congregation, and resigned his charge. In December of that year he visited Europe and made acquaintance with three or four men whose residence in Europe constituted for him the chief reason for going abroad: Landor in Italy, Carlyle at Craigenputtock, and Coleridge and Wordsworth in England. He returned to America in October 1833, and in the following year settled permanently in Concord. In 1835 he married his second wife, Lydia Jackson. For three or four years he preached with some regularity in various pul-

bits, but he gradually abandoned the church for the lyceum, which invited him as far west as Wisconsin and Illinois. He made a second visit to England in 1848. He was an active participant in the anti-slavery movement. But, for the most part, barring his winter lecturing tours and an occasional excursion to deliver a commencement address or a Phi Beta Kappa oration, he lived placidly in Concord, reading, meditating, writing, editing the short-lived *Transcendental Dial*, looking amusedly askance upon the Brook Farm experiment, and walking and talking with his famous fellow-villagers, the Alcotts, the Hawthornes, Margaret Fuller, Ellery Channing, and Thoreau.

What ferment of radical thought went on beneath the decorous exterior of that quiet scholar's life we know with remarkable fullness and accuracy. From early boyhood Emerson kept a journal—a habit, in his case, denoting a mind disposed to make unusual exactions of the "hypocritic Days." At first, he is much occupied with what he has read or proposes to read; but presently his note-book becomes a kind of storehouse for mellowing the fruits of his daily meditations, and an experimental garden for planting the seeds of new thoughts gathered on his intellectual adventures. The Journals, now published in twelve volumes, give us an invaluable commentary upon the long-familiar essays, and they enrich greatly our sense of the personality behind them. Especially they illuminate the turning point in Emerson's life, when he abandoned the pulpit and became a wholly free thinker and speaker. With their help, one perceives that for years before the open break, the inner emancipation had been proceeding. One observes the young thinker expanding beyond the formulas of his parish, reaching out towards the life of his nation, feeling his way into the higher spirit of his times, daily becoming more eager to exchange messages and compare visions with the leaders of his generation.

It is a vulgar error of our day to think of Emerson and his friends as living in a rude and mentally poverty-stricken era. In his formative period, say from 1820 to 1832, society around the Golden Gate and along the southern

margin of Lake Michigan was indeed in a somewhat more primitive state than at present. But in compensation, such civilized society as the country possessed was concentrated in a smaller geographical area. To reside in Boston or New York was not then, as now, to live on the rim but at the center of population, within reach of the molding pressure of all the great Americans of one's time. The "moment," furthermore, was peculiarly rich in the presence of eminent men who had been shaped by the Revolution, and in the presence of men who were to become eminent in the movement which led to the Civil War. To a young man of Emerson's quality, the period of the Adamses, Jefferson, Randolph, and Jackson, the period of Webster, Clay, Calhoun, Everett, and Garrison, was not a dull period, not a dead interval, but a most stirring and exciting time between two epoch-making crises, with the thunder of a political Niagara at one's back, and the roar of wild rapids ahead. The air was full of promise and of peril and of conflicting measures for avoiding the one and fulfilling the other.

Politically-minded men, the Jacksons, the Clays, the Calhouns, brought to the problems of the hour political solutions. But the more sensitive spirits among the younger generation in New England had already experienced a certain reaction against the political faith and enthusiasms of their fathers. Already they heard the ominous creaking of democratic machinery under the manipulation of unskilful and unscrupulous hands. To them it began to appear that the next great improvement in the condition of society must depend less upon the alteration of laws and institutions than upon the intellectual and moral regeneration of men. The new movement was genuinely Puritan by its inwardness, by its earnest passion for cleansing the inside of the cup, and by its protest against external powers which thwarted or retarded the efforts of the individual soul to move forward and upward by light from within. Looking back in 1844 over the multifarious projects for "the salvation of the world" unfolded by reformers in his part of the country, Emerson remarks: "There was in all the practical activities of New England, for the last quarter of a century, a grad-

al withdrawal of tender consciences from the social organization. There is observable throughout, the contest between mechanical and spiritual methods, but with a steady tendency of the thoughtful and virtuous to a deeper belief and reliance on spiritual facts."

Those who place their reliance on spiritual facts have always been thought a little queer and rather dangerous by those who do not. Nor can it be denied that the radical protestantism of the Puritans, which Emerson inherited, was contained from the time of Wycliff an anarchical germ, a latent suspicion of church and state, a tendency towards "coming out," till one shall stand alone in utter freedom and count for one and nothing more. It is hardly possible to exaggerate the individualism which characterized the movement in New England. For Emerson above all, the very rapture of the time rose from its challenge to a perfectly independent, a perfectly fearless, scrutiny and testing of received values in every field—religion, philosophy, morals, politics, literature and art.

Emerson was preserved from the fanaticism of a secession from "the social organization" partly by his culture. A moral reformation which undertakes to investigate the bases of morals will develop and transform itself into an intellectual renaissance as soon as those who are conducting it perceive that everything in heaven and earth has a bearing on moral questions. Emerson discovered early that the first step towards thinking greatly and freely on moral matters was to consult the world's accumulated wisdom. Hasty writers speak of his "jaunty" attitude towards the past. If he is jaunty about the past, it is because he is very familiar with it. What impresses the thoughtful student of his journals is his steady effort to hold himself and his contemporaries under the searching cross-lights of human experience. He reads Plato, Cicero, Hafiz, Confucius, Buddha, Mahomet, Montaigne, Milton, Voltaire, Kant, Goethe, Napoleon, Coleridge, Carlyle, because that, he finds, is the effective way to set his own intelligence free, and because freedom, he finds, means ability to move at ease and as an equal among such minds as these.

But Emerson was also preserved from excessive individualism by a passion which, properly elevated and directed, may be a young man's guardian angel, the passion of ambition. "All young persons," he observes, "thirst for a real existence for a real object, — for something great and good which they shall do with their heart. Meanwhile they all pack gloves, or keep books, or travel, or draw indentures, or cajole old women." By habitual imaginative association with great men, he had assimilated their thoughts and virtues, and had accustomed himself to look forward with an almost Miltonic assurance to playing a part above the ordinary in the life of his country. At the age of twenty-one he is sketching a series of papers on the improvement of the nation. He thinks the demand for a moral education the best sign of the times, and deems the exploration of the field a task fit for a new Columbus. He queries whether it were not an "heroic adventure" for him to "insist on being a popular speaker." And with perceptible elation at the prospect he concludes: "To address a great nation risen from the dust and sitting in absolute judgment on the merits of men, ready to hear if any one offers good counsel, may rouse the ambition and exercise the judgment of a man."

## II

There is some disposition at present to look upon Emerson's ambition as extravagant and to regard his work as a closed chapter in the intellectual life of America. It is even asserted that he never much affected the thinking of his countrymen. Says a recent writer, "What one notices about him chiefly is his lack of influence upon the main stream of American thought, such as it is. He had admirers and even worshippers, but no apprentices." But this judgment will not stand examination. Emerson had Thoreau for an apprentice; and between them they established relations with the natural world, which successive poet-naturalists have maintained and broadened to the dimensions of a national tradition. He had Whitman for a disciple; and a large part of what passes with us as poetry today is ulti-

mately traceable to their inspiration. He left the imprint of his spirit upon Lowell, who said, "There is no man living to whom, as a writer, so many of us feel and thankfully acknowledge so great an indebtedness for ennobling impulses." Whatever is finely academic, highbred, and distinguished in our critical literature today has felt the influence of Emerson. "To him," according to Lowell, "more than to all other causes together did the young martyrs of our civil war owe the sustaining strength of thoughtful heroism that is so touching in every record of their lives." By his aid innumerable clergymen have found a way to translate the message of ancient scriptures into the language of modern men. Every American who pretends to know anything whatever of the American classics has at one time or another read the "Essays"; and the "idealism" which is thought to be characteristic of the American people is most readily formulated in a half dozen of his "familiar quotations," which every one knows, whether he has read a line of Emerson or not. Directly and indirectly Emerson probably did as much as any other writer in our history to establish what we mean by "a good American"; and that, in the long run, is the most important sort of influence that can be exerted by any writer in any country.

That his influence abroad has been considerable may be briefly suggested by the reminder that he touched deeply such various men as Carlyle, Matthew Arnold, Nietzsche, and M. Maeterlinck. When Arnold visited America in 1883, he lectured on Emerson, on whom thirty years earlier he had written a sonnet of ardent admiration and homage. The lecture, the fruit of his ripest critical reflection, was not altogether satisfactory to his American audience. It impressed them as quite inadequately appreciative of their chief literary luminary. For Arnold very firmly declared that Emerson is not to be ranked with the great poets, nor with the great writers of prose, nor with the great makers of philosophical systems. These limitations of Emerson's power are commonly quoted as if detraction were the main burden of Arnold's message. As a matter of fact they are preliminary to his deliberate and remarkable declaration

that in his judgment Emerson's Essays are the most important work done in prose in our language during the nineteenth century. This is high praise from an exacting critic who was little given to the use of superlatives in any case, least of all in the case of American authors.

For what merit does Emerson deserve this preëminent place? Because, says Arnold, in a phrase full of significance, because "he is the friend and aider of those who would live in the spirit." Let us unfold a little the implications of this phrase and make its application more precise. Important as Emerson may have been to young Englishmen in the first half of the last century, he was still more important to young Americans. Helpful as he may become to European minds, he will always remain peculiarly the friend and aider of those who would live in the spirit amid an environment which, as is generally thought, tends powerfully to confirm on the one hand the hard and merely practical genius of the Yankee and, on the other hand, the narrow and inflexible righteousness of the merely traditional Puritan, the Puritan who feels no longer the urgency and progressive force of new moral life within him. To the posterity of Franklin and Edwards, Emerson is the destined and appropriate counsellor because he brings them undiminished the vital force of their great traditions, while at the same time he emancipates them from the "dead hand," the cramping and lifeless part of their past. To children of the new world, Emerson is a particularly inspiring friend, because with deep indigenous voice he frees them from unmanly fear of their elders, lifts from their minds the overawing prestige of Europe, liberates the powers and faith of the individual man and makes him at home in his own time and place.

A great part of our lives, as we all recognize in what we call our educational period, is occupied with learning how to do and to be what others have been and have done before us. We come abreast of our predecessors by imitating them, and are grateful to the masters when they reveal to us their secrets, to the older men when they give us the benefit of their experience. But presently we discover that the world

is changing around us, and that the secrets of the masters and the experience of our elders do not wholly suffice — much though they aid us — to establish us effectively in our younger world. We discover within us needs, aspirations, powers of which the generation that educated us seems unaware, or towards which it appears to be indifferent, unsympathetic, or even actively hostile. We perceive gradually or with successive shocks of surprise that many things which our fathers declared were true and satisfactory are not at all satisfactory, are by no means true, for us. Then it dawns upon us, perhaps as an exhilarating opportunity, perhaps as a grave and sobering necessity, that in a little while we ourselves shall be the elders, the responsible generation. Our salvation in the day when we take command will depend, we are constrained to believe, upon our disentanglement from the lumber of heirlooms and hereditary devices, and upon the discovery and free wise use of our own faculties. The vital part of education begins in the hour when consciousness of self-dependence breaks upon the mind. That is the hour for Emerson.

He appeals to unfolding minds because he is profoundly in sympathy with the modern spirit. By this phrase we mean primarily the disposition to accept nothing on authority but to bring all reports to the test of experience. The modern spirit is first of all a free spirit, open on all sides to the influx of truth. But freedom is not its only characteristic. The modern spirit is marked further by an active curiosity which grows by what it feeds upon, and goes ever inquiring for fresher and sounder information, not content till it has the best information to be had anywhere. But since it seeks the best, it is, by necessity, also a critical spirit, constantly sifting, discriminating, rejecting, and holding fast that which is good, only till that which is better is within reach. This endless quest, when it becomes central in a life, requires labor, requires pain, requires a measure of courage; and so the modern spirit, with its other virtues is an heroic spirit. As a reward for difficulties gallantly undertaken, the gods bestow on the modern spirit a kind of eternal youth with unfailing powers of recuperation

and growth. This spirit—free, actively curious, upward-striving, critical, courageous, and self-renewing — Emerson richly possesses; and that is why he is so happily qualified to be a counsellor of youth in the period of intellectual emancipation.

There are many prophets abroad in the land today, offering themselves as emancipators, who have only very partially comprehended their task. By the incompleteness of their message they bring the modern spirit itself into disrepute. They understand and declare that the modern spirit is free and curious. They fail to recognize that it is also critical and upward-striving. When the well-born soul discards "old clothes," it seeks instinctively for fresh raiment; but these Adamites would persuade it to rejoice in nakedness and seek no further. They know that man is an animal; but it escapes their notice that man is an animal constituted and destined by his nature to make pilgrimages in search for a shrine, and to worship, till he finds it, the Unknown God. Because they understand so ill the needs and cravings of man, they go about eagerly hurrying him from a predicament into a disaster. They conceive that they have properly performed the emancipative function when they have cut the young generation loose from the old moorings, and set it adrift at the mercy of wind and tide.

It is these partial liberators who produce in our young people that false and bewildering sense of illumination, so eloquently described by John Henry Newman. Says that penetrating analyst of modern libertinism: "When the mind throws off as so much prejudice what it has hitherto held, and, as if waking from a dream, begins to realize to its imagination that there is no such thing as law and the transgression of law, that sin is a phantom, and punishment a bugbear, that it is free to sin, free to enjoy the world and the flesh; and still further, when it does enjoy them, and reflects that it may think and hold just what it will that 'the world is all before it where to choose,' and what system to build up as its own private persuasion; when this torrent of wilful thoughts rushes over and inundates

it, who will deny that the fruit of the tree of knowledge, or what the mind takes for knowledge, has made it one of the gods, with a sense of expansion and elevation, — an intoxication in reality, still, so far as the subjective state of the mind goes, an illumination?"

The true emancipator, the man who has entered fully into the modern spirit, is always a reconstructionist. The enlargement of mind which he offers is always, to modify slightly the words of Newman, an enlargement not of tumult and intoxication, but of clearer vision and fruitful peace. In our Civil War slaves set free by proclamation flung up their caps and shouted with a vague joy. But shortly afterwards, we are told, many of them returned to their old masters and sought re-employment at their former tasks. So little was their undirected freedom worth. The true liberator strikes off the old shackles but immediately he suggests new service, a fuller use of our powers. He cuts us loose from the old moorings; but then he comes aboard like a good pilot, and while we trim our sails, he takes the wheel and lays our course for a fresh voyage. His message when he leaves us is not, "Henceforth be masterless," but "Bear thou henceforth the sceptre of thine own control through life and the passion of life."

## III

Religious emancipation as conducted by Emerson makes a man not less but more religious. It frees the restless modern soul from ancient sectarian fetters, from ceremonial that has become empty, and from the litter of meaningless creeds. But straightway it re-establishes the soul in a new doctrine of "continuous revelation" and in works and conduct proper to those who have been freshly inspired. There is an element that looks like mystical experience underlying this fundamental part of Emerson's religious teaching. But since mysticism constitutes a difficulty and an obstacle to the average modern mind, let us reduce as much as possible the irrational or superrational element. Let us explain what we can.

Emerson's belief in continuous revelation is clearly ascrib-

able in large measure to the breadth of his spiritual culture. Throughout his life he was a student of the religions of the world. With free and open mind he compared the teachings of Plato, Confucius, Jesus, Buddha, Mahomet, seeking the spirit beneath the letter transmitted by each. This comparison did not bring him to the hasty thinker's conclusion that the Bible of Christians is an uninspired book but rather to the conclusion that all the bibles are inspired books. The further he pressed his studies in religion, in philosophy, in poetry, the more obvious it became to him that elevated thought and noble emotion are not the exclusive endowment of any special period or person but are common to the highest representatives of all great peoples in all the great ages.

How account for that undeniable and really very inspiring fact? Emerson explained it by what might be called the law of the conservation of spiritual energy. The mortal forms, momentarily fixed in the shape of Plato or Confucius, decay and are dispersed, yet their elemental force, as modern science teaches us, is not destroyed but resumed and conserved in the all-encompassing energy of the universe, and is recreated forever and ever in new shapes of men and things. In like fashion, as it appeared to Emerson, the thought and feeling of men, since thought and feeling are also forms of energy, must be resumed and conserved indestructibly in the general reservoir of moral energy, the "over-soul," from which they flow again into individuals, generations, races, with such sustaining recurrence as the vernal sap observes.

The vividness of his belief in this inflowing power may be ascribed to certain personal experiences, emotional and exalting, for which the entire discipline of his life had prepared him. From his youth up he had conversed in his reading with strong-souled men, with the saints, heroes, and sages. He had meditated on their counsels not occasionally but daily, persistently, for hours together, till the bounds between their minds and his disappeared, and their thoughts actually became his thoughts and their temper his temper. It is a discipline which breaks down the walls of personality

and merges the individual with the over-soul. By books, he writes in his journal in 1824 at the age of twenty-one, "my memory goes back to a past immortality, and I almost realize the perfection of a spiritual intercourse which gains all the good, and lacks all the inconvenience and disgust of close society of imperfect beings. We are then likeliest to the image of God, for in this grateful rapidity of thought a thousand years become one day."

A mind thus stored and sensitized will respond now and then to an apparently slight stimulus with an extraordinary excitement and something in the nature of "vision" and "illumination." The young man reads in quiet solitude one of the more poetical dialogues of Plato, or he walks in flowering fields communing with his thoughts, or he lifts his head from his sick-bed at sunrise and beholds "the spotless orange light of the morning streaming up from the dark hills into the wide Universe." Suddenly, to him unaccountably, there is a profound stirring of his emotional deeps. A sense of sublimity fills his consciousness. His will appears to him godlike, invincible. He is elate with benign resolution. In a delighted ecstasy he feels streaming through his being eternal forces, all the wisdom and all the virtues that have ever been in the world. However we may attempt to explain, or to explain away, his sensations, he himself is incontrovertibly convinced that he has been visited and breathed upon by a power-not-himself. He has been but a passive vessel filled to the brim by an inrush of energy from the Over-Soul, from the circumfluent seas of moral power.

Such inspiration, Emerson holds, is natural to man. It is probably open to everyone who will subject himself to the requisite preliminary discipline—who will live steadily with such thoughts as Emerson entertained. Record of these visitations one may find here and there in the Journals in such statements as this: "I am surrounded by messengers of God who send me credentials day by day"—statements which an intelligent reader may accept as substantially true and essentially verifiable by the method just indicated.

This personal and direct relationship which he cultivated with the Over-Soul had a two-fold effect. On the one hand,

it quite indisposed him to render allegiance to intermediate powers. Thus he declares in a poem of 1833, "Self-Reliance":

Henceforth, please God, forever I forego  
The yoke of men's opinions. I will be  
Light-hearted as a bird, and live with God.  
I find him in the bottom of my heart,  
I hear continually his voice therein.

On the other hand, this direct relationship with the source of moral power made him joyfully obedient to the impulses of what he at various times designated as the heavenly vision, the divine necessity, or the overlord of his soul. A certain levity, almost a frivolity, which he exhibits now and then in the presence of creeds, churches, pious organizations, is actually the consequence of his entire reverence in the presence of every unmistakable manifestation of spiritual life. Like his friend Carlyle, he feels that the religious edifices of the day are become uninhabitable; the religious spirit is seeking a new house. "Religion," he remarks, "does not seem to me to tend now to a cultus as heretofore but to a heroic life. We find extreme difficulty in conceiving any church, any liturgy, any rite that would be genuine."

This sounds like a radical utterance. It is radical with the root and branch thoroughness of Emerson's inherited Puritanism, a vital Puritanism urgent with fresh power, impatient of a corrupted tradition and a conformity that withholds one from the living truth. The tendency of the traditional religious culture, he criticizes as indifferent to aesthetic development; as narrowly and incompletely moral; and as averse from the wide reaches of living truth which are open to the modern mind in the domains of science. He holds that the founder of the faith in which most of his countrymen were bred was indeed a "pure beam of truth," whose ethical utterances cannot be overprized, yet that he exhibited a "very exclusive and partial development of the moral element. . . . A perfect man should exhibit all the traits of humanity. *and should expressly recognize intel-*

*lectual nature.* [Italics mine.] Socrates I call a complete, universal man."

That Emerson's is the radicalism of a conservative, bent upon holding fast that which is good, is indicated by many other references to the character and teaching of Jesus, to whom he returns again and again with perceptions quickened and sharpened by his secular culture. "How strange," he exclaims, "that Jesus should stand at the head of history, the first character of the world without doubt, but the unlikeliest of all men, one would say, to take such a rank in the world." Approaching the subject from a quite different quarter, he says, "I think the true poetry which mankind craves is that Moral Poem of which Jesus chanted to the ages stanzas so celestial, yet only stanzas." And finally from still another angle: "The heart of Christianity is the heart of all philosophy."

## IV

Much has been written of Emerson's philosophical indebtedness to Kant and his German followers, and to Coleridge and Carlyle and Madame de Staël, who were intermediaries between the German and the New England transcendentalists. It is not in my power, happily it is not much to our purpose, to enter into the details of this discussion. Briefly speaking, it may be said that the German thinkers and their interpreters by their combined influence did undoubtedly strengthen Emerson's instinctive reaction against the dry and incomplete rationalism of the eighteenth century and against the Utilitarians of the nineteenth century, who to his nostrils brought a peculiarly repugnant odor of "profit and loss." But Emerson was no systematic student of metaphysics, and most of such general impulses as he was capable of receiving from the German system-makers, he had perhaps encountered in Plato and Berkeley and the seventeenth century divines before he had much cultivated his German. He ultimately made his way through Goethe, but he never became intimately attached to him or even quite reconciled to him, finding him and his aesthetic friends, deficient in "moral life."

What is still more to the point, the vital features of Emerson's philosophy are due less immediately to his reading than to that religious illumination of which we have already spoken. He arrived at the center of his beliefs by intuition. From the mechanical conception of the universe which reduced Carlyle almost to despair, Emerson emancipated himself, or rather he perfected his emancipation, by a critical examination of his own experience. This scrutiny disclosed a real world, the world of things, moved by physical energies in accordance with the laws of things. But it disclosed also an equally real world; the world of ideas, moved by moral energies in accordance with the laws, perhaps less clearly understood, of ideas. One world is associated with the other as the eye is associated with seeing; yet seeing, not the instrument of sight, is the sovereign matter. An important continuator of the Emersonian influence in our times, Professor Irving Babbitt, takes as the point of departure for his own developments these lines from Emerson's Ode to W. H. Channing:

There are two laws discrete,  
Not reconciled, —  
Law for man, and law for thing;  
The last builds town and fleet,  
But it runs wild, and doth the man unking.

As philosopher, Emerson conceives it his chief business to explore the "law for man," to formulate it, and to obtain recognition of it as the supreme authority in human relationships. His entire effort aims at establishing human independence and a human mastership. Man liberates himself and exchanges servitude for mastery in proportion as he obeys the "law for man" and learns to make the "law for things" serve him. In thus firmly insisting upon a radical distinction between the two parallel planes of experience, Emerson is in accord with the wisdom of the ages and at variance with the folly of the times, which tended to obliterate distinctions and, surrendering to a physical fatalism, to accept the law for things as also the law for man. Those who still contend for the identity of the two laws, like to speak of their view as "realistic." It is a word to conjure

with. Emerson's view will prevail against theirs only when it is finally established as more realistic than theirs, as more accurately and adequately descriptive of the facts of nature, the experience of men.

It is important to note that what Emerson contends for as the realistic view is the "twoness" of the universe. He does not oppose a physical monism with a spiritual monism but with a fairly clean-cut dualism. It is a man asserting the equal realness but radical dissimilarity of things and ideas who remarks in his Journal, "Realist seems the true name for the movement party among our Scholars here. I at least endeavor to make the exchange evermore of a reality for a name." When the "solid men" of his day complain that his way of thinking neglects the fundamental facts, he replies that their way of thinking neglects the hypaethral facts, but that his way of thinking takes due cognizance of both: "Turnpike is one thing and blue sky another." "The poet complains that the solid men leave out the sky." This is the sunny mockery of one who was both a poet and a solid man. Emerson wove a net for casting in fathomless seas and brought home his catches by ways unknown to the fishermen; but this did not prevent his raising good apples in his Concord orchard and taking the customary road to market.

His philosophical emphasis is, however, of course upon the order of facts most likely to be ignored by the "solid men"; and because of his emphasis upon this order of facts we speak of him as an idealist and as a great fountain of American idealism. What idealism meant to him is expressed in his Journal in words which Molière's cook might have understood: "We are idealists whenever we prefer an idea to a sensation. . . . The physical sciences are only well studied when they are explored for ideas. . . . The book is always dear which has made us for moments idealists. That which can dissipate this block of earth into shining ether is genius. I have no hatred to the round earth and its grey mountains. I see well enough the sandhill opposite my window. Their phenomenal being I no more dispute than I do my own. . . . Religion makes us idealists.

Any strong passion does. The best, the happiest moments of life, are these delicious awakenings of the higher powers and the reverential withdrawing of nature before its God. . . . We are all aiming to be idealists, and covet the society of those who make us so, as the sweet singer, the orator, the ideal painter."

## v

It is commonly said that Emerson's interest in morals is his inheritance from the Puritans. In this connection it is interesting to find him in the Journals connecting himself consciously with the loftiest Puritan of the seventeenth century, John Milton, of whom he writes: "Milton describes himself to Diodati as enamored of moral perfection. He did not love it more than I." Here indeed is a visible link in what we have grown accustomed to call the Puritan tradition. But, as a matter of fact, were Emerson and Milton more in love with moral perfection than Spenser, or was Spenser more in love with it than Dante, or Dante than Augustine, or Augustine than the Emperor Marcus Aurelius, or the Emperor than Socrates? There is a great community of minds enamored of moral perfection. It is no novel passion originating in New England or among the English Puritans. How explain the antiquity of the tradition? Dante, following Aristotle, explains it by declaring that "all things, by an intuition of their own nature, seek perfection." Emerson then, rediscovered what Aristotle had observed, that the impulse to self-perfection is a tendency in the constitution of man.

In America, the most important predecessor of Emerson in this rediscovery was a free-thinking man of the world, entirely out of sympathy with strait-laced and stiff-necked performers of barren rites and observances. I refer to the greatest liberalizing force in eighteenth-century America, Benjamin Franklin. Was he a Puritan? No one thinks of him as such, yet in truth he represents the normal reaction of a radical protestantism, of a living Puritanism, to an "Age of Enlightenment." By the courage of his moral realism he prepares the way for Emerson. He, too, begins

his independent studies after a revolt against ecclesiastical authority, as narrow and unrealistic. The course of his emancipation is set forth in the Autobiography, where he relates his disgust at a sermon on the great text in Philipians: "Finally, brethren, whatsoever things are true, honest, just, pure, lovely, or of good report, if there be any virtue, or any praise, think on these things." In expounding this text, the clergyman confined himself to enjoining scrupulous Sabbath observances, respect to ministers, etc., etc. "These might," says Franklin, "be all good things; but, as they were not the kind of good things that I expected from the text, I despaired of ever meeting with them from any other, was disgusted, and attended his preaching no more."

Franklin attended that preaching no more. But note what follows, apparently as the consequence of his break with the church: "It was about this time that I conceived the bold and arduous project of arriving at *moral* perfection. I wished to live without committing any fault at any time, and to conquer all that either natural inclination, custom or company might lead me into." Everyone will recall how Franklin drew up his table of thirteen moral virtues, and how he studied the means for putting them into effect. But for us the most significant feature of this enterprise and of his proposed Art of Virtue was the realistic spirit in which they were conceived, the bold attempt to ground the virtues upon experience rather than upon authority, the assertion of the doctrine, "that vicious actions are not hurtful because they are forbidden, but forbidden because they are hurtful, *the nature of man alone considered.*"

Emerson as moralist takes up the work which Franklin's political duties prevented him from carrying out. He repeats Franklin's revolt in the name of sincerity, truth, actuality. "Whoso would be a man," he declares in "Self-Reliance," "must be a nonconformist. He who would gather immortal palms must not be hindered by the *name* of goodness, but must explore if it be goodness." He does not take up the virtues so methodically and exhaustively

as Franklin does. That is mainly because he conceives morality to lie in a right condition and attitude of the whole self, from which particular acts will result with a kind of instinctive and inevitable rightness. "The less a man thinks or knows about his virtues," he says in "Spiritual Laws," "the better we like him." He concerns himself less with particular acts than many less exacting moralists, because he demands as the evidence of goodness that one's entire life shall be "an alms, a battle, a conquest, a medicine." The grand business of the moral explorer, as he understands it, is to push past conduct to the springs of conduct, to blaze a path behind the virtues to that general moral power which is the source of all the virtues.

There is a familiar saying of Emerson's which would epitomize, if it were understood, most of what is important in all the Emersonian messages. Taken from its context in the essay on "Civilization," it has perhaps been more widely quoted than anything else that he uttered. Unfortunately, one never hears it quoted with any sense of what it means in the thought of Emerson, where its position is absolutely central. The saying is this: "Hitch your wagon to a star." If one asks a man from whose lips it has glibly slipped what "Hitch your wagon to a star" means, he replies "Aim high," a useful enough maxim of archery, but as a moral precept dreadfully trite and unproductive. What Emerson really means is: Put yourself in connection with irresistible power. In the physical world, let water turn your mill, let steam pull your cars, let the atmospheric electricity carry your words around the world. "That is the way we are strong, by borrowing the might of the elements." Likewise in the moral world, go where the gods are going, take the direction of all good men and let them bear you along, strike into the current of the great human traditions, discover the law of your higher nature and act with it. Presently you will notice that you are no longer fuming at obstacles and fretting at your personal impotence but are borne forward like one destined.

At just this point, many stern critics have cried out against Emerson as a moral teacher, and have charged him

with counselling an optimistic passivity. Emerson bids us go with the current. The stern critic snatches at a figure and comes away with an error. Have not all the orthodox doctors taught that the good man goes *against* the current? Such misapprehension is the penalty for being a poet — for not sticking faithfully to the technical jargon. Without resorting to that medium, however, it should be possible to clear Emerson of the charge of counselling a foolish optimism, an indiscreet or base passivity. It should, at any rate, be possible to clear him in the eyes of any one whose morals have, like his, a religious basis — for example, in the eyes of the sad and strenuous author of that great line: "*In la sua voluntade è nostra pace*—In his will is our peace." The point is, that Emerson does not urge us to confide in *all* currents, to yield to *all* tendencies. It is only after we have arrived by high thinking at a proud definition of man, that we are to take for our motto: "I dare do all that may become a man." It is only after we have discovered by severe inquisition the instincts of our higher nature, that we are to trust our instincts, and follow our nature. We are to be confident and passive. Yes: when we are doing the will of God.

What made Emerson's teaching take hold of his contemporaries, what should commend it to us today is just its unfailingly positive character, the way it supplements our gospel of long-suffering by the restoration of classical virtues. There is a welcome in it for life, even before the quality is disclosed: "Virtue is uneducated power." There is a place in it for manly resistance: "Be as beneficent as the sun or the sea, but if your rights as a rational being are trenched on, die on the first inch of your territory." There is the strong man's relish of difficulty and hostility: "We must have antagonisms in the tough world for all the variety of our spiritual faculties or they will not be born." There is precept for use of the spur: "He that rides his hobby gently must always give way to him that rides his hobby hard." There is warrant for choosing one's path: It is a man's "essential virtue to carry out into action his own dearest ends, to dare to do what he believes and loves.

If he thinks a sonnet the flower and result of the world, let him sacrifice all to the sonnet." Even in his definition of friendship, Emerson drives at action: "He is my friend who makes me do what I can." It is obvious that he restores ambition, an aspect of magnanimity, to its proper place in the formation of the manly character, ambition to bring one's life to its fullest fruit.

This accounts for his extraordinary emphasis upon the virtue of courage: "It may be safely trusted — God will not have his work made manifest by cowards." Read from that cue, and presently you fancy that all forms of virtue appeared to him as aspects and phases of courage. He has praise for the courage of non-conformity, the courage of inconsistency, the courage of veracity, the courage to mix with men, the courage to be alone, the courage to treat all men as equals — but at this thought, he remembers his proud conception of man, his imagination kindles, and he cries: "Shall I not treat all men as gods?" and, elsewhere, "God defend me from ever looking at a man as an animal." It sounds like extravagance. It may turn out to be a maxim of the higher prudence. Treating men like worms has been tried — without particularly gratifying results. Why not explore the consequences of assuming that men have a nobler destiny? If you are educating a prince, all the classical manuals enjoin it upon you to treat him like a prince. Why should not this hold of uncrowned sovereigns in general? Courage to do these extraordinary things Emerson learned of his aunt, Mary Moody Emerson, who taught him in his boyhood to face whatever he feared. Courage he praised in his last word on Carlyle, "He never feared the face of man."

Moralists present to us in general three distinguishable sanctions for the virtuous life, or as Emerson would have preferred to call it, the heroic life. They may commend conduct as conducive to happiness in the future world — the theological sanction. They may commend it as conducive to pleasure or happiness or convenience on earth — the utilitarian sanction. Or finally they may commend it as in accordance with the proper nature of man — the human-

istic sanction. This is the position taken by Marcus Aurelius in a passage extolled by Matthew Arnold. Which of these is Emerson's sanction? In the essay on "Compensation," which he thought one of his prime contributions, he argues that divine justice executes itself in this world in accordance with inevitable laws. It is essentially the argument of Franklin; one is still concerned with reward and punishment. But the general tenor of Emerson's life and teaching rise above this level. Habitually he speaks in the spirit of the Roman Emperor, so deeply appealing to the well-born soul: "A third in a manner does not even know what he has done, but he is like a vine which has produced grapes, and seeks for nothing more after it has once produced its proper fruit. As a horse when he has run, a dog when he has caught the game, a bee when it has made its honey, so a man when he has done a good act, does not call out for others to come and see, but he goes on to another act, as a vine goes on to produce again the grapes in season."

## VI

Though Emerson had thought much about the relation of the individual to society and to the state, he was not in any practical diurnal sense of the word a politically-minded man. Politics is the art and science of governing masses. The art and science which appealed to his ambition are those which enable the individual to govern himself. So far as he was concerned, he felt little need of external government. Indeed, like many of the saints and sages, conscious that he himself was actuated by the purest internal motives, he looked with wary and somewhat jealous eye upon the existence of an external controlling power in the state, which might be actuated by motives far less pure and, in the exercise of its constituted authority, warp him from the bias of his soul. In this respect, he was distinctly a child of the time-spirit which followed the Revolution and preceded the Civil War, that period when the first dire need of a powerful union had passed and the second dire need of it had not yet been fully manifested. He could sympathize

with his friend Thoreau, who withdrew from the social organization to the extent of refusing to pay his taxes. But Emerson's Yankee common sense preserved him from imitating this fanaticism of individualism. He perceived, as every intelligent lover of freedom does, that a decent conformity is the very secret of freedom.

He loved freedom too much to coquet with anarchy. The imaginative masters of his political speculations, Plato, More, Milton, Burke, Montesquieu, had confirmed him, furthermore, in the conviction that "politics rest on necessary foundations, and cannot be treated with levity." The foundation of government, he recognized, is in the constitution of man: "Every human society wants to be officered by the best class, who shall be masters instructed in all the great arts of life; shall be wise, temperate, brave, public men, adorned with dignity and accomplishments." He perceived that it was no true function of the philosopher to bring into contempt even imperfect instruments of order and liberty.

Like most Americans, however, he had pretty much lost respect for government by an hereditary aristocracy. He acknowledges the virtues of the hereditary principle but with a touch of disdain: it has "secured permanence of families, firmness of customs, a certain external culture and good taste; gratified the ear with historic names." Its defect was its failure to make the laws of nature serve it. Nature did not co-operate with the system: "the heroic father did not surely have heroic sons, and still less heroic grandsons; wealth and ease corrupted the race."

He goes a long way towards accepting the principles of the French Revolution. His respect for efficient power makes him betray, in "Representative Men," a great admiration for Napoleon Bonaparte, qualified by grave reservations. He desires, with Carlyle, to bring forward a natural aristocracy, an aristocracy of talent. He would like to believe that democracy is the means for recruiting that talent, for organizing the superior class by which society needs to be officered. But his study of the tyrannies of an "efficient state" administered by Napoleonic officers,

to whose talents a career was opened, has awakened in him, as it never did in Carlyle, a deep suspicion of the "natural method," has put him on a criticism of democracy, which is the most valuable element in his political writing.

Might with right, Emerson never confused as Carlyle confused them — hopelessly; as democracies may, at any time, under bad leadership, confuse them. "Our institutions," he declares in his "Politics," "though in coincidence with the spirit of the age, have not any exemption from the practical defects which have discredited other forms. Every actual State is corrupt. *Good men must not obey the laws too well.*" His patriotism was free, emancipated. In the year when he became of age, 1824, he wrote in his Journal: "I confess I am a little cynical on some topics, and when a whole nation is roaring Patriotism at the top of its voice, I am fain to explore the cleanness of its hands and the purity of its heart." In his Journal of 1833-5 he wrote: "The life of this world has a limited worth in my eyes, and really is not worth such a price as the toleration of slavery." He cried out at the land-grabbing of the Mexican War. He spoke repeatedly between 1837 and 1861 in behalf of free speech, in behalf of emancipating the slaves, and in favor of violating the Fugitive Slave Law. Against the howling of mobs, as Mr. Woodberry shows in an admirable summary of his participation in the anti-slavery movement, "his civic courage was flawless." He interrupted his lecture on Heroism in 1838 to praise the brave Lovejoy, "who gave his breast to the bullets of a mob, for the rights of free speech and opinion, and died when it was better not to live." He received John Brown in Concord, and when two years later the law doomed him to die, he declared publicly in Boston that the new saint would "make the gallows glorious like the cross."

Efficient nature herself requires to be checked. Where is the check to be found? "The wise man is to settle it immovably in his mind, that he only is fit to decide on his best action; he only is fit to praise it; his verdict is praise enough, and as to society, 'their hiss is thine applause'" (*Journals*, 1833-5.) The contention of parties cannot be

trusted to guard the interests of truth. Emerson has no naïve respect for numbers. He has looked with disillusioned eye upon the wisdom of majorities. He confides to his Journal, for example, that if Jackson is elected "we shall all feel dirty." He says that if he were unduly in love with life, he would attend a Jackson caucus, and "I doubt not the unmixed malignity, the withering selfishness, the impudent vulgarity, that mark those meetings would speedily cure me of my appetite for longevity." Yet despite this bitterness, the Jackson party was, as he himself recognized, that towards which his own principles and sympathies—in theory, broadly popular—should have inclined him. Speaking for publication, in his essay on "Politics," he reveals, with less asperity, the fact that he is not captivated by either party. The paragraph that follows might have been written by a disappointed independent of 1920:

"The vice of our leading parties in this country . . . is that they do not plant themselves on the deep and necessary grounds to which they are respectively entitled. . . . Of the two great parties which, at this hour, almost share the nation between them, I should say that the one has the best cause, and the other contains the best men. The philosopher, the poet, or the religious man will, of course, wish to cast his vote with the democrat, for free-trade, for wide suffrage, for the abolition of legal cruelties in the penal code, *and for facilitating in every manner the access of the young and the poor to the sources of wealth and power.* [My italics.] But he can rarely accept the persons whom the so-called popular party proposes to him as representatives of these liberalities. They have not at heart the ends which give to the name of democracy what hope and virtue are in it."

Possibly Emerson's concern for the "unwashed masses" forged a bit ahead of his sympathies as a man of flesh and blood. Theoretically, he was not afraid of dirt. Before Whitman bade us shun "delicacies," Emerson had perceived that the effective democrat must not be a "high priest of the kid-glove persuasion." Writing in his Journal at the age of thirty-two, he says: "I would not have a

man dainty in his conduct. Let him not be afraid of being besmirched by being advertised in the newspapers, or by going into Athenaeums or town-meetings or by making speeches in public. Let his chapel of private thoughts be so holy that it shall perfume and separate him unto the Lord, though he lay in a kennel."

It ought to be possible to feel "inwardly perfumed and separated unto the Lord" without either showing or feeling that Brahminical spirit of exclusiveness which men like Holmes and Lowell exhibited, and of which they were obviously proud. Emerson was quite earnestly opposed to the celebrated Brahminism of Boston and Cambridge. As Mr. Brownell has finely said: "A constituent of his refinement was an instinctive antipathy to ideas of dominance, dictation, patronage, caste, and material superiority whose essential grossness repelled him and whose ultimate origin in contemptuousness — probably the one moral state except cravenness that chiefly he deemed contemptible — was plain enough to his penetration." Henry Adams suggests, indeed, with a touch of characteristic humor, that Emerson, from the spiritual altitude of Concord, probably looked down on the Brahmins themselves, looked down, for instance, on the Adamses, as worldlings.

Now there is interesting evidence in the Journals that Emerson might have looked down on Henry Adams, but from a point of view remote from that indicated by Adams:

"I do not forgive in any man this forlorn pride, as if he were an *Ultimus Romanorum*. I am more American in my feelings. This country is full of people whose fathers were judges, generals, and bank presidents, and if all their boys should give themselves airs thereon and rest henceforth on the oars of their fathers' merit, we should be a sad hungry generation. Moreover, I esteem it my best birthright that our people are not crippled by family and official pride, that the best broadcloth coat in the country is put off to put on a blue frock, that the best man in town may steer his plough-tail or may drive a milk-cart. There is a great deal of work in our men, and a false pride has not yet made them idle or ashamed. Moreover I am more philosophical than

to love this retrospect. I believe in the being God, not in the God that has been. I work; my fathers may have wrought or rested. What have I to do with them, or with the Fellatahs, or the great Khan! I know a worthy man who walks the streets with silent indignation as a last of his race, quite contemptuously eyeing the passing multitude."

Emerson goes further than that in welcoming the "new man," the power without known antecedents. In a notable passage of his Journal for 1845, one sees him, as it were, shaking off the dust of the house of his fathers, breaking out of the old New England, in order to enter America, to participate in that national spirit which we know today must learn to enfold and assimilate men of all races:

"I hate the narrowness of the Native American Party. It is the dog in the manger. It is precisely opposite to all the dictates of love and magnanimity; and therefore, of course, opposite to true wisdom. . . . Man is the most composite of all creatures. . . . Well, as in the old burning of the Temple at Corinth, by the melting and intermixture of silver and gold and other metals a new compound more precious than any, called Corinthian brass, was formed; so in this continent, — asylum of all nations, — the energy of Irish, Germans, Swedes, Poles, and Cossacks, and all the European tribes, — of the Africans, and of the Polynesians, — will construct a new race, a new religion, a new state, a new literature, which will be as vigorous as the new Europe which came out of the smelting-pot of the Dark Ages, or that which earlier emerged from the Pelasgic and Etruscan barbarism. *La Nature aime les croisements.*"

No man who honestly and earnestly contemplates the making of a nation out of such heterogeneous elements as Emerson here enumerates, no man who truly cherishes the potentialities of human power, wherever they lie, is disposed to assign to political agencies an undue part in shaping the product of the melting-pot. Emerson did not. If we were to sum up his attitude towards the state in a single sentence, it would take some such form as this: The State exists for the benefit of all the individuals in it: and its stability and its welfare depend primarily on the effort

of each individual in it. All concrete advance towards social regeneration, he believed, is accomplished by minorities — by minorities of one! In a country with a strong inclination towards beginning all efforts for moral reformation by the election of a president and a secretary, he proposes this modest method: "Count from yourself in order the persons that have near relation to you up to ten or fifteen, and see if you can consider your whole relation to each without squirming. That will be something." Commenting, in "Life and Letters in New England," on a socialistic scheme for imposing economic salvation on the world from No. 200 Broadway, he surmises that it would be better to say: "Let us be lovers and servants of that which is just, and straightway every man becomes a center of a holy and beneficent republic, which he sees to include all men in its law, like that of Plato and Christ." Let the great state arch above us, but let it beware of pressing too near, lest it crush more natural and vital powers — the power of the individual over himself; the power of the family, the neighborhood, the town-meeting, the local enterprise; the "atmospheric" power of culture, the gradual and beneficent pressure of a natural society steadily growing stronger by the diffusion of science and humane learning.

The Emersonian doctrine of democratic individualism has its defects. In these days it appears rather homely and old-fashioned. Yet it has merits towards which one occasionally turns with nostalgic yearnings, merits which may yet restore it to some of its former favor. After many a popular election, is it not still the chief available consolation to go quietly home and close the door and reflect that the wise man "occupies all the space between God and the mob?" And in spite of all the allurements of centralized power, with its promise of prompt and "nation-wide" progress in the sense of the men at Washington, shall we not find in the years to come that the preservation of individuality in the private citizen and of pride and initiative in the "parish," the province, and the separate states, are as vital to the health of the far-flung nation as the use of hands and feet?

## VII

It has ordinarily been assumed and asserted that Emerson was very little developed on the aesthetic side. This assumption is intimately associated with two other popular errors, which, in the light of our examination, we may now dismiss. We may first dismiss the popular error which holds that the center of his being was ethical; for we have seen that the center of his being was religious. We may dismiss, also, the popular error of regarding him as a representative of Puritan decadence; for we have seen that he represents rather a renaissance and fresh flowering of the ancient passion for perfection. We think rightly of Emerson when we think of him as a humanist bent upon liberating and developing not some but all of the properly human powers. He builds his many-chambered house of life around a private oratory, because, like every successfully exploring humanist, he finds a private oratory at the center of his heart. But this innermost shrine of religious inspiration is emphatically not a Calvinistic chapel, hostile to the arts. It is a retreat friendly to all the Muses that ever haunted "Siloa's brook" or Heliconian springs.

Emerson believed, indeed, like his great predecessor of the seventeenth century, that the pulsing spirit which "voluntary moves harmonious numbers" prefers before all temples "the upright heart and pure." But no one who has approached that inner shrine will ever picture him as summoning the Sacred Nine about him in order to give them a lesson in conduct. No one understands Emerson who fails to perceive that he trusts his inspiration, like a Pythian prophet, like a celebrant of Dionysian mysteries. "If I am the devil's child," he defiantly retorted in his youth to one who had urged him to beware of his instincts, "I will live from the devil." Well assured that he was not the devil's child, he opened communication with his sources of power, resolute to receive and utter whatever they sent, though it might sound like blasphemy, though it might whiff received ethics down the wind. Through a great part of his prose and verse, there is the peculiar beat and throb which marks work conceived in creative heat, under the sway of the

"divine madness." Some of the friends who came closest to him testified to receiving from him not counsel but a sheer access of vital energy exhilarating to the verge of intoxication. It is above all a generative and fecundating impulse that he seeks for himself. It is above all that he desires to impart to others.

We all tend to slip at times into colorless and meaningless routine, into lives of grey commonplace and insignificance. Emerson seems to have apprehended this as a peril to which our democratic society is peculiarly exposed. He cultivates the means of combating it. He cultivates, for example, the color of Oriental poetry. He follows Hafiz, this Unitarian in revolt against the tedium and dead level of the cold New England virtue, and cries: "Let us be crowned with roses, let us drink wine, and break up the tiresome old roof of heaven into new forms." He writes an essay on "Inspiration," which is a study under ten headings of the technique of exaltation, of ecstasy. He chants an ode to Bacchus, calling for

Wine of wine,  
Blood of the world,  
Form of forms, and mold of statures,  
That I intoxicated  
And by the draught assimilated,  
May float at pleasure through all natures.

Under the heading "Morals" in his discourse on "Poetry and Imagination," he comes to the conclusion, entirely characteristic of him, that "Power, new power, is the good which the soul seeks." On this theme Emerson writes occasionally with a recklessness not often associated with the "Victorian" period in America. For power, he intimates in "Mithridates," a poet may perhaps well pay with his soul:

Too long shut in strait and few,  
Thinly dieted on dew,  
I will use the world, and sift it,  
To a thousand humors shift it,  
As you spin a cherry.  
O doleful ghosts, and goblins merry!  
O all you virtues, methods, mights  
Means, appliances, delights,

Reputed wrongs and braggart rights,  
Smug routine, and things allowed,  
Minorities, things under cloud!  
Hither! take me, use me, fill me,  
Vein and artery, though ye kill me!

As a priest of the "being God, not the God that has been," Emerson finds that even the greatest of the old poets do not wholly content him. As a believer in the doctrine of continuous revelation, he demands a new revelation. "In a cotillon," he declares in "Poetry and Imagination," "some persons dance and others await their turn when the music and the figure come to them. In the dance of God there is not one of the chorus but can and will begin to spin, monumental as he now looks, whenever the music and figure reach his place and duty. O celestial Bacchus! drive them mad, — this multitude of vagabonds, hungry for eloquence, hungry for poetry, starving for symbols, perishing for want of electricity to vitalize this too much pasture, and in the long delay indemnifying themselves with the false wine of alcohol, of politics, or of money."

Emerson knew pretty well what he wanted in the way of a new poet. He was not in the least interested in the production of more "parlor or piano verse." He wanted such utterance as could come only from a great and noble soul immersed in the realities and filled with the spirit of the modern world. His poet must be radical, revolutionary, formative: "Bring us the bards who shall sing all our old ideas out of our heads, and new ones in; men-making poets. . . . poetry which finds its rhymes and cadences in the rhymes and iterations of nature, and is the gift to men of new images and symbols, each the ensign and oracle of an age; that shall assimilate men to it, mould itself into religions and mythologies, and impart its quality to centuries." In his essay on "The Poet" he regrets that "we have yet had no genius in America, with tyrannous eye, which knew the value of our incomparable materials, and saw, in the barbarism and materialism of the times, another carnival of the same gods whose picture it so much admires in Homer; then in the middle age; then in Calvinism. . . . Our log-rolling, our stumps and their politics, our fisheries,

our Negroes, and Indians, our boats, and our repudiations, the wrath of rogues, and the pusillanimity of honest men, the northern trade, the southern planting, the western clearing, Oregon and Texas, are yet unsung. Yet America is a poem in our eyes; its ample geography dazzles the imagination, and it will not wait long for metres." Clearly, Emerson was calling for a singer in many important respects resembling Whitman; and Whitman answered.

It is not yet adequately recognized to what extent Emerson anticipated not only Whitman but also the poets of the present hour. He anticipates their desire to strike up for the new world a new tune. He thinks that we leaned too much in the past upon England. Our literature has become lifelessly traditional through uninspired imitation. We require some sort of break and shock to liberate our own native talents. In an extremely interesting passage of the third volume of the Journals, he records the surmise that salvation may come from that very element which, in politics, he thought of as constituting the party of unkempt pioneers, barbarians, slave-holders, and corruptionists: "I suppose the evil may be cured by this rank rabble party, the Jacksonism of the country, heedless of English and of all literature — a stone cut out of the ground without hands — they may root out the hollow dilettantism of our cultivation in the coarsest way, and the new born may begin again to frame their own world with greater advantage."

As literary critic, Emerson has, with only an occasional trace of reluctance, the courage of his free religion, his philosophy, his politics. His thought in these matters underlies and supports his Poetics and his Rhetoric. Mystic, symbolist, and democrat, he is constrained to declare that there is no vulgar life save that of which the poetry has not yet been written. He urges us bravely to paint the prospect from our doors, wherever they open. He asserts the possibility of all subjects: "A dog drawn by a master, or a litter of pigs, satisfies, and is a reality not less than the frescoes of Angelo." He detests a bookish and fossilized phrase and diction: "He only is a good writer who keeps one eye on his page, and with the other sweeps over things; so that every sentence brings in a new contribution of obser-

vation." He has meditated deeply on image, rhyme, and rhythm; and has discovered the literary value of colloquial cadence, the picturesque language of children, the scoff and violence of the "yeoman," the pungency of natural persons expressing their mother-wit. His essays contain as much great "free verse" as any one has written since. Poems, such as "Hamatreya," "Woodnotes," "Monadnoc," and "Musketaquid" prove his possession of senses tinglingly responsive to the touches of native color, scent, and sound; show a poetical nature that has struck root and has been richly nourished "in haunts which others scorned." As for his general theory of art, in his more sanguine and exalted moments he goes beyond our most radical leaders in his passion for reconciling art with nature and restoring it to "all the people," so that the ultimate phase of artistic development would be an habitual happy improvisation.

That aspiration, as Emerson would have been the first to admit, was ideal, was Utopian. It could be realized only in a profoundly regenerated and enriched society. In this world as it is at present, he recognized that great poetry, for example, must be the result of special culture and austere discipline. It must therefore be submitted for judgment to the cultivated and the disciplined. He has no immediate intention of accepting the standards of the mob. Our radical anti-academic friends would indeed dispose of him as "academic." For he comforts himself, in the absence of a national Academy, with this reflection, in the second volume of the Journals: "Consider the permanence of the best opinion: the certainty with which a good book acquires fame, though a bad book succeeds better at first. Consider the natural academy which the best heads of the time constitute, and which 'tis pleasant to see, act almost as harmoniously and efficiently, as if they were organized and acted by vote."

For a writer who is often classified nowadays as a "mere moralist," Emerson liberated an extraordinary number of ideas about both the major and the minor problems of the literary art. You may say, if you like, that his literary scrupulousness is but an aspect of his moral rectitude; but

any other writer of his exacting artistic conscience would be saluted by all the anti-Puritans as a "lover of beauty," a "martyr of style." In 1831, long before Flaubert or Pater had announced it, he committed to his Journal the doctrine of the "unique word": "No man can write well who thinks there is any choice of words for him. The laws of composition are as strict as those of sculpture and architecture. There is always one line that ought to be drawn, or one proportion that should be kept, and every other line or proportion is wrong, and so far wrong as it deviates from this. So in writing, there is always a right word, and every other than that is wrong. There is no beauty in words except in their collocation. The effect of a fanciful word misplaced, is like that of a horn of exquisite polish growing on a human head."

Economy, Emerson regards as the poet's chastity: "Let the poet, of all men, stop with his inspiration. The inexorable rule in the muses' court, *either inspiration or silence*, compels the bard to report only his supreme moments. It teaches the enormous force of a few words and in proportion to the inspiration checks loquacity." Despite his desire for fresh beginnings in America, he finds it necessary to turn back to the old English writers, "not because they are old, but simply because they wrote well. If we write as well, we may deviate from them and our deviations shall be classical." Every one, it is to be hoped, remembers the little poem called "The Test," in which Emerson challenges his reader to find the "five lines" in his verses which outlasted five hundred. It is a virtue in him, which our present loquacity should some day make esteemed, that he so often anticipates the winnowing of time, as in the firm Landorian carving of the "Concord Hymn" with its cumulative solemnity, reaching its climax in the breathless pause of the flawless final stanza, before the ultimate foot:

Spirit, that made those heroes dare  
To die, and leave their children free,  
Bid Time and Nature gently spare  
The shaft we raise to them and thee.

The popular taste in poetry, as is proved by many of the great reputations, is a little waterish. Emerson served "wine of wine." He has been underrated as a poet because he did not understand, or would not practice, dilution. One suspects that he might be reinstated, if some student of Japanese verse would display in a wide-margined volume some fifty or a hundred of his "images," selected here and there from his basket of cut gems, for example:

I am a willow of the wilderness  
Loving the wind that bent me

Or possibly the reviver of Emerson should remind the Chicago School of these lines:

Bulkeley, Hunt, Willard, Hosmer, Merriam, Flint,  
Possessed the land which rendered to their toil  
Hay, corn, roots, hemp, flax, apples, wool and wood.

Critics have sufficiently harped upon certain defects in the prose style of Emerson: the apparent lack of firm design and evolution in the larger divisions of his discourse, the difficult transitions, the imperfect coherence, within the paragraphs. It is perhaps worth observing that some of these faults are closely connected with his characteristic virtues, and are truly due to the excess of these virtues. Emerson is characteristically rich and economical. He is so rich that he can put into a sentence as much as another would put into a paragraph, and as much into a paragraph as another would put into his entire discourse. He is so economical of space, so bent on filling every inch with solid matter, that he deliberately prunes away what is merely explanatory and transitional. If one compares passages in the Journals with parallel passages in the essays, one remarks at first with surprise that the superiority on the side of fluency and texture is frequently with the Journals. The superiority of the essays is in condensation and intensity.

It should be observed, furthermore, that in the prose which Emerson himself published the degree of fluency and stylistic coherence varies greatly with the subject. The moral essays, such as "Self-Reliance" and "Compensation," are written more or less in the manner of the Book of

Proverbs or the Essays of Bacon. They are built of distinct injunctions, maxims, and fragments of wisdom, twenty or thirty of them to a paragraph. "Solid bags of duckshot," Carlyle called these paragraphs, and urged Emerson to fuse them into a solid luminous bar. They are close packed enough, in all conscience, without fusion. There is stuff enough for a morning's meditation in any half-dozen of the hundreds of maxims which make up the essay on Self-Reliance. But no ordinary mind can read easily page after page of epitomized moral experience: "Be how it will, do right now. Always scorn appearances, and you always may. The force of character is cumulative. All the foregone days of virtue work their health into this." Before such matter can be made to flow, it must be diluted. Read in youth and for the first time, a page of such writing seems pebbly and difficult. But at each re-reading one discovers more pebbles that are interestingly translucent, opalescent, with a fire at the heart of them. Returning later in life, after perhaps the twentieth reading, one may discover that the pattern in the page comes out, that the gaps are bridged by one's own experience, that each sentence is illustrated by one's own verification of it, and that somehow this swift "saltation" from epitome to epitome of moral wisdom makes all other moral writing seem thin and flat.

But Emerson has many other prose manners, to which the stock criticisms and the traditional jests are not at all applicable. Turn, for example, to his "Thoreau," a biographical portrait executed in the firm objective manner of Lucretius yet with the gusto of Plutarch—a superbly vital piece of characterization, unsurpassed if not unequalled by anything of like scope in American literature. Or consider the flow of his reminiscences of Brook Farm and his land comment on Fourierism in "Life and Letters in New England"; it is beautiful writing, urbane, luminous, exquisitely ironical. Or for still another vein, turn the pages of "English Traits" where he describes meeting Thomas Carlyle, with something of the Scotch master's graphic force:

On my return, I came from Glasgow to Dumfries, and being intent on delivering a letter which I had brought from Rome, inquired for Craigenputtock. It was a farm in Nithdale, in the parish of Dumscore, sixteen miles distant. No public coach passed near it, so I took a private carriage from the inn. I found the house amid heathery hills, where the lonely scholar nourished his mighty heart. Carlyle was a man from his youth, an author who did not need to hide from his readers, and as absolute a man of the world, unknown and exiled on that hill-farm as if holding on his own terms what is best in London. He was tall and gaunt, with a cliff-like brow, self-possessed and holding his extraordinary powers of conversation in easy command; clinging to his northern accent with evident relish: full of lively anecdote, and with a streaming humor, which floated everything he looked upon.

If Emerson writes comparatively little in the descriptive and narrative veins, it is neither from impotence nor by chance but on consideration. "Do you see," he asks himself, "what we preserve of history? a few anecdotes of a moral quality of some momentary act or word." The word of Canute on the sea-shore, he observes, is all the world remembers of the Danish conquest. Under the influence of this thought, he seems, for a time, to have meditated composing "a modern Plutarch," British and American,—in which his "Thoreau" would well have taken the place of Cato, and his "Lincoln" a place of its own. His "Representative Men" was a partial fulfilment of the design. But quite early in life Emerson was much occupied by a rival thought, thus recorded in the fourth volume of the Journals: "I said to Bryant and to these young people, that the high poetry of the world from the beginning has been ethical, and it is the tendency of the ripe modern mind to produce it. . . . As I think, no man could be better occupied than in making up his own bible by hearkening to all those sentences which now here, now there, now in nursery rhymes, now in Hebrew, now in English bards, thrill him like the sound of a trumpet." In fulfilment of that design Emerson wrote his great essays.

To many a lonely student, obscure and friendless, meditating in the long cold spring and adolescence of his talent on his untried powers, Emerson has come as with the sound of a magical trumpet, shattering the dungeons of fear, send-

ing the young knight on his quest inwardly fortified and resolute to give soul and body to that undertaking, whatever it be, for which he was sent into the world. Such is the primary function of the religious and democratic ethos with which he sought to impregnate American letters. He, too, had been lonely, obscure, uncertain of his way, feeble, and prone to husband his strength and his gifts. But when he found which way the planets are going and the well where the gods drink, he faltered no longer. "What a discovery I made one day, that the more I spent the more I grew, that it was as easy to occupy a large place and do much work as an obscure place to do little; and that in the winter in which I communicated all my results to classes, I was full of new thoughts." To this, let us add that other thought, so precious to him that it appears repeatedly in various forms in the Journals and in the Essays: "If a man knows the law, he may settle himself in a shanty in a pine forest, and men will and must find their way to him as readily as if he lived in the City Hall." We shall keep near the main stream of the Emersonian virtue, if we close with a variation and enlargement of the same theme: "Penetrate to the bottom of the fact which draws you, although no newspaper, no poet, no man, has ever yet found life and beauty in that region, and presently when men are whispered by the gods to go and hunt in that direction, they shall find that they cannot get to the point which they would reach without passing over that highway which you have built. Your hermit's lodge shall be the Holy City and the Fair of the whole world."

# ESSAYS OF EMERSON

## I

### NATURE

A subtle chain of countless rings  
The next unto the farthest brings;  
The eye reads omens where it goes,  
And speaks all languages the rose;  
And, striving to be man, the worm  
Mounts through all the spires of form.

### INTRODUCTION

OUR age is retrospective. It builds the sepulchres of the fathers. It writes biographies, histories, and criticism. The foregoing generations beheld God and nature face to face; we, through their eyes. Why should not we also enjoy an original relation to the universe? Why should not we have a poetry and philosophy of insight and not of tradition, and a religion by revelation to us, and not the history of theirs? Embosomed for a season in nature, whose floods of life stream around and through us, and invite us by the powers they supply, to action proportioned to nature, why should we grope among the dry bones of the past, or put the living generation into masquerade out of its faded wardrobe? The sun shines to-day also. There is more wool and flax in the fields. There are new lands, new men, new thoughts. Let us demand our own works and laws and worship.

Undoubtedly we have no questions to ask which are unanswerable. We must trust the perfection of the creation so far, as to believe that whatever curiosity the order

of things has awakened in our minds, the order of things can satisfy. Every man's condition is a solution in hieroglyphic to those inquiries he would put. He acts it as life, before he apprehends it as truth. In like manner, nature is already, in its forms and tendencies, describing its own design. Let us interrogate the great apparition that shines so peacefully around us. Let us inquire, to what end is nature?

All science has one aim, namely, to find a theory of nature. We have theories of races and of functions, but scarcely yet a remote approach to an idea of creation. We are now so far from the road to truth that religious teachers dispute and hate each other, and speculative men are esteemed unsound and frivolous. But to a sound judgment, the most abstract truth is the most practical. Whenever a true theory appears, it will be its own evidence. Its test is, that it will explain all phenomena. Now many are thought not only unexplained but inexplicable; as language, sleep, madness, dreams, beasts, sex.

Philosophically considered, the universe is composed of Nature and the Soul. Strictly speaking, therefore, all that is separate from us, all which Philosophy distinguishes as the NOT ME, that is, both nature and art, all other men and my own body, must be ranked under this name, NATURE. In enumerating the values of nature and casting up their sum, I shall use the word in both senses; — in its common and in its philosophical import. In inquiries so general as our present one, the inaccuracy is not material, no confusion of thought will occur. *Nature*, in the common sense, refers to essences unchanged by man; space, the air, the river, the leaf. *Art* is applied to the mixture of his will with the same things, as in a house, a canal, a statue, a picture. But his operations taken together are so insignificant, a little chipping, baking, patching, and washing, that in an impression so grand as that of the world on the human mind, they do not vary the result.

## CHAPTER I

To go into solitude, a man needs to retire as much from his chamber as from society. I am not solitary whilst I read and write, though nobody is with me. But if a man would be alone, let him look at the stars. The rays that come from those heavenly worlds, will separate between him and what he touches. One might think the atmosphere was made transparent with this design, to give man, in the heavenly bodies, the perpetual presence of the sublime. Seen in the streets of cities, how great they are! If the stars should appear one night in a thousand years, how would men believe and adore; and preserve for many generations the remembrance of the city of God which had been shown! But every night come out these envoys of beauty, and light the universe with their admonishing smile.

The stars awaken a certain reverence, because though always present, they are inaccessible; but all natural objects make a kindred impression, when the mind is open to their influence. Nature never wears a mean appearance. Neither does the wisest man extort her secret, and lose his curiosity by finding out all her perfection. Nature never became a toy to a wise spirit. The flowers, the animals, the mountains, reflected the wisdom of his best hour, as much as they had delighted the simplicity of his childhood.

When we speak of nature in this manner, we have a distinct but most poetical sense in the mind. We mean the integrity of impression made by manifold natural objects. It is this which distinguishes the stick of timber of the wood-cutter, from the tree of the poet. The charming landscape which I saw this morning, is indubitably made up of some twenty or thirty farms. Miller owns this field, Locke that, and Manning the woodland beyond. But none of them owns the landscape. There is a property in the horizon which no man has but he whose eye can integrate all the parts, that is, the poet. This is the best part of

these men's farms, yet to this their warranty-deeds give no title.

To speak truly, few adult persons can see nature. Most persons do not see the sun. At least they have a very superficial seeing. The sun illuminates only the eye of the man, but shines into the eye and the heart of the child. The lover of nature is he whose inward and outward senses are still truly adjusted to each other; who has retained the spirit of infancy even into the era of manhood. His intercourse with heaven and earth, becomes part of his daily food. In the presence of nature, a wild delight runs through the man, in spite of real sorrows. Nature says—he is my creature, and maugre all his impertinent griefs, he shall be glad with me. Not the sun or the summer alone, but every hour and season yields its tribute of delight; for every hour and change corresponds to and authorizes a different state of the mind, from breathless noon to grim-mest midnight. Nature is a setting that fits equally well a comic or a mourning piece. In good health, the air is a cordial of incredible virtue. Crossing a bare common, in snow puddles, at twilight, under a clouded sky, without having in my thoughts any occurrence of special good fortune, I have enjoyed a perfect exhilaration. I am glad to the brink of fear. In the woods too, a man casts off his years, as the snake his slough, and at what period soever of life, always is a child. In the woods, is perpetual youth. Within these plantations of God, a decorum and sanctity reign, a perennial festival is dressed, and the guest sees not how he should tire of them in a thousand years. In the woods, we return to reason and faith. There I feel that nothing can befall me in life—no disgrace, no calamity (leaving me my eyes), which nature cannot repair. Standing on the bare ground—my head bathed by the blithe air, and uplifted into infinite space—all mean egotism vanishes. I become a transparent eyeball; I am nothing; I see all; the currents of the Universal Being circulate through me; I am part or particle of God. The name of the nearest friend sounds then foreign and accidental: to be brothers, to be acquaintances—**master or servant, is**

then a trifle and a disturbance. I am the lover of uncontained and immortal beauty. In the wilderness, I find something more dear and connate than in streets or villages. In the tranquil landscape, and especially in the distant line of the horizon, man beholds somewhat as beautiful as his own nature.

The greatest delight which the fields and woods minister, is the suggestion of an occult relation between man and the vegetable. I am not alone and unacknowledged. They nod to me, and I to them. The waving of the boughs in the storm, is new to me and old. It takes me by surprise, and yet is not unknown. Its effect is like that of a higher thought or a better emotion coming over me, when I deemed I was thinking justly or doing right.

Yet it is certain that the power to produce this delight, does not reside in nature, but in man, or in a harmony of both. It is necessary to use these pleasures with great temperance. For, nature is not always tricked in holiday attire, but the same scene which yesterday breathed perfume and glittered as for the frolic of the nymphs, is over-spread with melancholy to-day. Nature always wears the colors of the spirit. To a man laboring under calamity, the heat of his own fire hath sadness in it. Then, there is a kind of contempt of the landscape felt by him who has just lost by death a dear friend. The sky is less grand as it shuts down over less worth in the population.

## CHAPTER II

### COMMODITY

WHOEVER considers the final cause of the world will discern a multitude of uses that enter as parts into that result. They all admit of being thrown into one of the following classes; Commodity; Beauty; Language; and Discipline.

Under the general name of Commodity, I rank all those advantages which our senses owe to nature. This, of

course, is a benefit which is temporary and mediate, not ultimate, like its service to the soul. Yet although low, it is perfect in its kind, and is the only use of nature which all men apprehend. The misery of man appears like childish petulance, when we explore the steady and prodigal provision that has been made for his support and delight on this green ball which floats him through the heavens. What angels invented these splendid ornaments, these rich conveniences, this ocean of air above, this ocean of water beneath, this firmament of earth between, this zodiac of lights, this tent of dropping clouds, this striped coat of climates, this fourfold year? Beasts, fire, water, stones, and corn serve him. The field is at once his floor, his work-yard, his play-ground, his garden, and his bed.

"More servants wait on man  
Than he'll take notice of." —

Nature, in its ministry to man, is not only the material, but is also the process and the result. All the parts incessantly work into each other's hands for the profit of man. The wind sows the seed; the sun evaporates the sea; the wind blows the vapor to the field; the ice, on the other side of the planet, condenses rain on this; the rain feeds the plant; the plant feeds the animal; and thus the endless circulations of the divine charity nourish man.

The useful arts are reproductions or new combinations by the wit of man, of the same natural benefactors. He no longer waits for favoring gales, but by means of steam, he realizes the fable of Æolus's bag, and carries the two and thirty winds in the boiler of his boat. To diminish friction, he paves the road with iron bars, and, mounting a coach with a ship-load of men, animals, and merchandise behind him, he darts through the country, from town to town, like an eagle or a swallow through the air. By the aggregate of these aids, how is the face of the world changed from the era of Noah to that of Napoleon! The private poor man hath cities, ships, canals, bridges, built for him. He goes to the post-office, and the human race run on his errands; to the book-shop, and the human race read and

write of all that happens, for him; to the court-house, and nations repair his wrongs. He sets his house upon the road, and the human race go forth every morning, and shovel out the snow, and cut a path for him.

But there is no need of specifying particulars in this class of uses. The catalogue is endless, and the examples so obvious, that I shall leave them to the reader's reflection, with the general remark, that this mercenary benefit is one which has respect to a farther good. A man is fed, not that he may be fed, but that he may work.

### CHAPTER III

#### BEAUTY

A NOBLER want of man is served by nature, namely, the love of Beauty.

The ancient Greeks called the world *χoσμος*, beauty. Such is the constitution of all things, or such the plastic power of the human eye, that the primary forms, as the sky, the mountain, the tree, the animal, give us a delight *in and for themselves*; a pleasure arising from outline, color, motion, and grouping. This seems partly owing to the eye itself. The eye is the best of artists. By the mutual action of its structure and of the laws of light, perspective is produced, which integrates every mass of objects, of what character soever, into a well colored and shaded globe, so that where the particular objects are mean and unaffecting, the landscape which they compose, is round and symmetrical. And as the eye is the best composer, so light is the first of painters. There is no object so foul that intense light will not make beautiful. And the stimulus it affords to the sense, and a sort of infinitude which it hath, like space and time, make all matter gay. Even the corpse has its own beauty. But beside this general grace diffused over nature, almost all the individual forms are agreeable to the eye, as is proved by our endless imita-

tions of some of them, as the acorn, the grape, the pine-cone, the wheat-ear, the egg, the wings and forms of most birds, the lion's claw, the serpent, the butterfly, sea-shells, flames, clouds, buds, leaves, and the forms of many trees, as the palm.

For better consideration, we may distribute the aspects of Beauty in a threefold manner.

1. First, the simple perception of natural forms is a delight. The influence of the forms and actions in nature, is so needful to man, that, in its lowest functions, it seems to lie on the confines of commodity and beauty. To the body and mind which have been cramped by noxious work or company, nature is medicinal and restores their tone. The tradesman, the attorney comes out of the din and craft of the street, and sees the sky and the woods, and is a man again. In their eternal calm, he finds himself. The health of the eye seems to demand a horizon. We are never tired, so long as we can see far enough.

But in other hours, Nature satisfies by its loveliness, and without any mixture of corporeal benefit. I see the spectacle of morning from the hilltop over against my house, from daybreak to sunrise, with emotions which an angel might share. The long slender bars of cloud float like fishes in the sea of crimson light. From the earth as a shore, I look out into that silent sea. I seem to partake its rapid transformations: the active enchantment reaches my dust, and I dilate and conspire with the morning wind. How does Nature deify us with a few and cheap elements? Give me health and a day, and I will make the pomp of emperors ridiculous. The dawn is my Assyria; the sun-set and moon-rise my Paphos, and unimaginable realms of faerie; broad noon shall be my England of the senses and the understanding; the night shall be my Germany of mystic philosophy and dreams.

Not less excellent, except for our less susceptibility in the afternoon, was the charm, last evening, of a January sunset. The western clouds divided and subdivided themselves into pink flakes modulated with tints of unspeakable softness; and the air had so much life and sweetness, that it was a pain to come within doors. What was it that nature

would say? Was there no meaning in the live repose of the valley behind the mill, and which Homer or Shakespeare could not re-form for me in words? The leafless trees become spires of flame in the sunset, with the blue east for their back-ground, and the stars of the dead calices of flowers, and every withered stem and stubble rimed with frost, contribute something to the mute music.

The inhabitants of cities suppose that the country landscape is pleasant only half the year. I please myself with the graces of the winter scenery, and believe that we are as much touched by it as by the genial influences of summer. To the attentive eye, each moment of the year has its own beauty, and in the same field, it beholds, every hour, a picture which was never seen before, and which shall never be seen again. The heavens change every moment, and reflect their glory or gloom on the plains beneath. The state of the crop in the surrounding farms alters the expression of the earth from week to week. The succession of native plants in the pastures and roadside, which makes the silent clock by which time tells the summer hours, will make even the divisions of the day sensible to a keen observer. The tribes of birds and insects, like the plants punctual to their time, follow each other, and the year has room for all. By water courses, the variety is greater. In July, the blue pontederia or pickerel-weed blooms in large beds in the shallow parts of our pleasant river, and swarms with yellow butterflies in continual motion. Art cannot rival this pomp of purple and gold. Indeed the river is a perpetual gala, and boasts each month a new ornament.

But this beauty of Nature which is seen and felt as beauty, is the least part. The shows of day, the dewy morning, the rainbow, mountains, orchards in blossom, stars, moonlight, shadows in still water, and the like, if too eagerly hunted, become shows merely, and mock us with their unreality. Go out of the house to see the moon, and 't is mere tinsel; it will not please as when its light shines upon your necessary journey. The beauty that shimmers in the yellow afternoons of October. who ever could clutch it?

Go forth to find it, and it is gone: 't is only a mirage as you look from the windows of diligence.

2. The presence of a higher, namely, of the spiritual element is essential to its perfection. The high and divine beauty which can be loved without effeminacy, is that which is found in combination with the human will. Beauty is the mark God sets upon virtue. Every natural action is graceful. Every heroic act is also decent, and causes the place and the bystanders to shine. We are taught by great actions that the universe is the property of every individual in it. Every rational creature has all nature for his dowry and estate. It is his, if he will. He may divest himself of it, he may creep into a corner, and abdicate his kingdom, as most men do, but he is entitled to the world by his constitution. In proportion to the energy of his thought and will, he takes up the world into himself. "All those things for which men plough, build, or sail, obey virtue"; said Sallust. "The winds and waves," said Gibbon, "are always on the side of the ablest navigators." So are the sun and moon and all the stars of heaven. When a noble act is done — perchance in a scene of great natural beauty; when Leonidas and his three hundred martyrs consume one day in dying, and the sun and moon come each and look at them once in the steep defile of Thermopylæ; when Arnold Winkelried, in the high Alps, under the shadow of the avalanche, gathers in his side a sheaf of Austrian spears to break the line for his comrades; are not these heroes entitled to add the beauty of the scene to the beauty of the deed? When the bark of Columbus nears the shore of America; before it, the beach lined with savages, fleeing out of all their huts of cane; the sea behind; and the purple mountains of the Indian Archipelago around, can we separate the man from the living picture? Does not the New World clothe his form with her palm-groves and savannahs as fit drapery? Ever does natural beauty steal in like air, and envelop great actions. When Sir Harry Vane was dragged up the Tower-hill, sitting on a sled, to suffer death, as the champion of the English laws, one of the multitude cried out to him, "You

never sate on so glorious a seat." Charles II., to intimidate the citizens of London, caused the patriot Lord Russel to be drawn in an open coach, through the principal streets of the city, on his way to the scaffold. "But," his biographer says, "the multitude imagined they saw liberty and virtue sitting by his side." In private places, among sordid objects, an act of truth or heroism seems at once to draw to itself the sky as its temple, the sun as its candle. Nature stretcheth out her arms to embrace man, only let his thoughts be of equal greatness. Willingly does she follow his steps with the rose and the violet, and bend her lines of grandeur and grace to the decoration of her darling child. Only let his thoughts be of equal scope, and the frame will suit the picture. A virtuous man is in unison with her works, and makes the central figure of the visible sphere. Homer, Pindar, Socrates, Phocion, associate themselves fitly in our memory with the geography and climate of Greece. The visible heavens and earth sympathize with Jesus. And in common life, whosoever has seen a person of powerful character and happy genius, will have remarked how easily he took all things along with him, — the persons, the opinions, and the day, and nature became ancillary to a man.

3. There is still another aspect under which the beauty of the world may be viewed, namely, as it becomes an object of the intellect. Beside the relation of things to virtue, they have a relation to thought. The intellect searches out the absolute order of things as they stand in the mind of God, and without the colors of affection. The intellectual and the active powers seem to succeed each other, and the exclusive activity of the one, generates the exclusive activity of the other. There is something unfriendly in each to the other, but they are like the alternate periods of feeding and working in animals; each prepares and will be followed by the other. Therefore does beauty, which, in relation to actions, as we have seen, comes unsought, and comes because it is unsought, remain for the apprehension and pursuit of the intellect; and then again, in its turn, of the active power. Nothing divine dies.

All good is eternally reproductive. The beauty of nature re-forms itself in the mind, and not for barren contemplation, but for new creation.

All men are in some degree impressed by the face of the world; some men even to delight. This love of beauty is Taste. Others have the same love in such excess, that, not content with admiring, they seek to embody it in new forms. The creation of beauty is Art.

The production of a work of art throws a light upon the mystery of humanity. A work of art is an abstract or epitome of the world. It is the result or expression of nature, in miniature. For, although the works of nature are innumerable and all different, the result or the expression of them all is similar and single. Nature is a sea of forms radically alike and even unique. A leaf, a sun-beam, a landscape, the ocean, make an analogous impression on the mind. What is common to them all—that perfectness and harmony, is beauty. The standard of beauty is the entire circuit of natural forms—the totality of nature; which the Italians expressed by defining beauty “*il piu nell’ uno*.” Nothing is quite beautiful alone: nothing but is beautiful in the whole. A single object is only so far beautiful as it suggests this universal grace. The poet, the painter, the sculptor, the musician, the architect, seek each to concentrate this radiance of the world on one point, and each in his several work to satisfy the love of beauty which stimulates him to produce. Thus is Art, a nature passed through the alembic of man. Thus in art, does nature work through the will of a man filled with the beauty of her first works.

The world thus exists to the soul to satisfy the desire of beauty. This element I call an ultimate end. No reason can be asked or given why the soul seeks beauty. Beauty, in its largest and profoundest sense, is one expression for the universe. God is the all-fair. Truth, and goodness, and beauty, are but different faces of the same All. But beauty in nature is not ultimate. It is the herald of inward and eternal beauty, and is not alone a solid and satisfactory good. It must stand as a part, and not as yet the last or highest expression of the final cause of Nature.

## CHAPTER IV

## LANGUAGE

LANGUAGE is a third use which Nature subserves to man. Nature is the vehicle of thought, and in a simple, double, and threefold degree.

1. Words are signs of natural facts.

2. Particular natural facts are symbols of particular spiritual facts.

3. Nature is the symbol of spirit.

1. Words are signs of natural facts. The use of natural history is to give us aid in supernatural history: the use of the outer creation, to give us language for the beings and changes of the inward creation. Every word which is used to express a moral or intellectual fact, if traced to its root, is found to be borrowed from some material appearance. *Right* means *straight*; *wrong* means *twisted*. *Spirit* primarily means *wind*; *transgression*, the crossing of a *line*; *supercilious*, the *raising of the eyebrow*. We say the *heart* to express emotion, the *head* to denote thought; and *thought* and *emotion* are words borrowed from sensible things, and now appropriated to spiritual nature. Most of the process by which this transformation is made, is hidden from us in the remote time when language was framed; but the same tendency may be daily observed in children. Children and savages use only nouns or names of things, which they convert into verbs, and apply to analogous mental acts.

2. But this origin of all words that convey a spiritual import — so conspicuous a fact in the history of language — is our least debt to nature. It is not words only that are emblematic; it is things which are emblematic. Every natural fact is a symbol of some spiritual fact. Every appearance in nature corresponds to some state of the mind, and that state of the mind can only be described by presenting that natural appearance as its picture. An enraged man is a lion, a cunning man is a fox, a firm man is

a rock, a learned man is a torch. A lamb is innocence; a snake is subtle spite; flowers express to us the delicate affections. Light and darkness are our familiar expression for knowledge and ignorance; and heat for love. Visible distance behind and before us, is respectively our image of memory and hope.

Who looks upon a river in a meditative hour, and is not reminded of the flux of all things? Throw a stone into the stream, and the circles that propagate themselves are the beautiful type of all influence. Man is conscious of a universal soul within or behind his individual life, wherein, as in a firmament, the natures of Justice, Truth, Love, Freedom, arise and shine. This universal soul, he calls Reason: it is not mine, or thine, or his, but we are its; we are its property and men. And the blue sky in which the private earth is buried, the sky with its eternal calm, and full of everlasting orbs, is the type of Reason. That which, intellectually considered, we call Reason, considered in relation to nature, we call Spirit. Spirit is the Creator. Spirit hath life in itself. And man in all ages and countries, embodies it in his language, as the FATHER.

It is easily seen that there is nothing lucky or capricious in these analogies, but that they are constant, and pervade nature. These are not the dreams of a few poets, here and there, but man is an analogist, and studies relations in all objects. He is placed in the center of beings, and a ray of relations passes from every other being to him. And neither can man be understood without these objects, nor these objects without man. All the facts in natural history taken by themselves, have no value, but are barren, like a single sex. But marry it to human history, and it is full of life. Whole Floras, all Linnæus's and Buffon's volumes, are dry catalogues of facts; but the most trivial of these facts, the habit of a plant, the organs, or work, or noise of an insect, applied to the illustration of a fact in intellectual philosophy, or in any way associated to human nature, affects us in the most lively and agreeable manner. The seed of a plant — to what affecting analogies in the nature of man, is that little fruit made use of, in

all discourse, up to the voice of Paul, who calls the human corpse a seed — "It is sown a natural body; it is raised a spiritual body." The motion of the earth round its axis, and round the sun, makes the day, and the year. These are certain amounts of brute light and heat. But is there no intent of an analogy between man's life and the seasons? And do the seasons gain no grandeur or pathos from that analogy? The instincts of the ant are very unimportant, considered as the ant's: but the moment a ray of relation is seen to extend from it to man, and the little drudge is seen to be a monitor, a little body with a mighty heart, then all its habits, even that said to be recently observed, that it never sleeps, become sublime.

Because of this radical correspondence between visible things and human thoughts, savages, who have only what is necessary, converse in figures. As we go back in history, language becomes more picturesque, until its infancy, when it is all poetry; or all spiritual facts are represented by natural symbols. The same symbols are found to make the original elements of all languages. It has moreover been observed, that the idioms of all languages approach each other in passages of the greatest eloquence and power. And as this is the first language, so is it the last. This immediate dependence of language upon nature, this conversion of an outward phenomenon into a type of somewhat in human life, never loses its power to affect us. It is this which gives that piquancy to the conversation of a strong-natured farmer or back-woodsman, which all men relish.

A man's power to connect his thought with its proper symbol, and so to utter it, depends on the simplicity of his character, that is, upon his love of truth, and his desire to communicate it without loss. The corruption of man is followed by the corruption of language. When simplicity of character and the sovereignty of ideas is broken up by the prevalence of secondary desires, the desire of riches, of pleasure, of power, and of praise — and duplicity and falsehood take place of simplicity and truth, the power over nature as an interpreter of the will, is in a degree lost; new imagery ceases to be created, and old words are

pervverted to stand for things which are not; a paper currency is employed, when there is no bullion in the vaults. In due time, the fraud is manifest, and words lose all power to stimulate the understanding or the affections. Hundreds of writers may be found in every long-civilized nation, who for a short time believe, and make others believe, that they see and utter truths, who do not of themselves clothe one thought in its natural garment, but who feed unconsciously on the language created by the primary writers of the country, those, namely, who hold primarily on nature.

But wise men pierce this rotten diction and fasten words again to visible things; so that picturesque language is at once a commanding certificate that he who employs it, is a man in alliance with truth and God. The moment our discourse rises above the ground line of familiar facts, and is inflamed with passion or exalted by thought, it clothes itself in images. A man conversing in earnest, if he watch his intellectual processes, will find that a material image, more or less luminous, arises in his mind, cotemporaneous with every thought, which furnishes the vestment of the thought. Hence, good writing and brilliant discourse are perpetual allegories. This imagery is spontaneous. It is the blending of experience with the present action of the mind. It is proper creation. It is the working of the Original Cause through the instruments he has already made.

These facts may suggest the advantage which the country-life possesses for a powerful mind, over the artificial and curtailed life of cities. We know more from nature than we can at will communicate. Its light flows into the mind evermore, and we forget its presence. The poet, the orator, bred in the woods, whose senses have been nourished by their fair and appeasing changes, year after year, without design and without heed—shall not lose their lesson altogether, in the roar of cities or the broil of politics. Long hereafter, amidst agitation and terror in natural councils—in the hour of revolution—these solemn images shall reappear in their morning lustre, as fit symbols and words of the thoughts which the passing events shall

awaken. At the call of a noble sentiment, again the woods wave, the pines murmur, the river rolls and shines, and the cattle low upon the mountains, as he saw and heard them in his infancy. And with these forms, the spells of persuasion, the keys of power are put into his hands.

3. We are thus assisted by natural objects in the expression of particular meanings. But how great a language to convey such pepper-corn informations! Did it need such noble races of creatures, this profusion of forms, this host of orbs in heaven, to furnish man with the dictionary and grammar of his municipal speech? Whilst we use this grand cipher to expedite the affairs of our pot and kettle, we feel that we have not yet put it to its use, neither are able. We are like travelers using the cinders of a volcano to roast their eggs. Whilst we see that it always stands ready to clothe what we would say, we cannot avoid the question, whether the characters are not significant of themselves. Have mountains, and waves, and skies, no significance but what we consciously give them, when we employ them as emblems of our thoughts? The world is emblematic. Parts of speech are metaphors, because the whole of nature is a metaphor, of the human mind. The laws of moral nature answer to those of matter as face to face in a glass. "The visible world and the relation of its parts, is the dial plate of the invisible." The axioms of physics translate the laws of ethics. Thus, "the whole is greater than its part"; "reaction is equal to action"; "the smallest weight may be made to lift the greatest, the difference of weight being compensated by time"; and many the like propositions, which have an ethical as well as physical sense. These propositions have a much more extensive and universal sense when applied to human life, than when confined to technical use.

In like manner, the memorable words of history, and the proverbs of nations, consist usually of a natural fact, selected as a picture or parable of a moral truth. Thus; A rolling stone gathers no moss; A bird in the hand is worth two in the bush; A cripple in the right way, will beat a racer in the wrong; Make hay while the sun shines; "T is

hard to carry a full cup even; Vinegar is the son of wine; The last ounce broke the camel's back; Long-lived trees make roots first;—and the like. In their primary sense these are trivial facts, but we repeat them for the value of their analogical import. What is true of proverbs, is true of all fables, parables, and allegories.

This relation between the mind and matter is not fancied by some poet, but stands in the will of God, and so is free to be known by all men. It appears to men, or it does not appear. When in fortunate hours we ponder this miracle, the wise man doubts, if, at all other times, he is not blind and deaf;

— “Can these things be,  
And overcome us like a summer's cloud  
Without our special wonder?”

for the universe becomes transparent, and the light of higher laws than its own, shines through it. It is the standing problem which has exercised the wonder and the study of every fine genius since the world began; from the era of the Egyptians and the Brahmins, to that of Pythagoras, of Plato, of Bacon, of Leibnitz, of Swedenborg. There sits the Sphinx at the roadside, and from age to age, as each prophet comes by, he tries his fortune at reading her riddle. There seems to be a necessity in spirit to manifest itself in material forms; and day and night, river and storm, beast and bird, acid and alkali, pre-exist in necessary Ideas in the mind of God, and are what they are by virtue of preceding affections, in the world of spirit. A Fact is the end or last issue of spirit. The visible creation is the terminus or the circumference of the invisible world. “Material objects,” said a French philosopher, “are necessarily kinds of *scoriæ* of the substantial thoughts of the Creator, which must always preserve an exact relation to their first origin; in other words visible nature must have a spiritual and moral side.”

This doctrine is abstruse, and though the images of garments, “*scoriæ*,” “mirror,” etc., may stimulate the fancy we must summon the aid of subtler and more vital ex-

positors to make it plain. "Every scripture is to be interpreted by the same spirit which gave it forth"—is the fundamental law of criticism. A life in harmony with nature, the love of truth and of virtue, will purge the eyes to understand her text. By degrees we may come to know the primitive sense of the permanent objects of nature, so that the world shall be to us an open book, and every form significant of its hidden life and final cause.

A new interest surprises us, whilst, under the view now suggested, we contemplate the fearful extent and multitude of objects; since "every object rightly seen, unlocks a new faculty of the soul." That which was unconscious truth, becomes, when interpreted and defined in an object, a part of the domain of knowledge—a new weapon in the magazine of power.

## CHAPTER V

### DISCIPLINE

IN view of the significance of nature, we arrive at once at a new fact, that nature is a discipline. This use of the world includes the preceding uses, as parts of itself.

Space, time, society, labor, climate, food, locomotion, the animals, the mechanical forces, give us sincerest lessons, day by day, whose meaning is unlimited. They educate both the Understanding and the Reason. Every property of matter is a school for the understanding—its solidity or resistance, its inertia, its extension, its figure, its divisibility. The understanding adds, divides, combines, measures, and finds nutriment and room for its activity in this worthy scene. Meantime, Reason transfers all these lessons into its own world of thought, by perceiving the analogy that marries Matter and Mind.

1. Nature is a discipline of the understanding in intellectual truths. Our dealing with sensible objects is a constant exercise in the necessary lessons of difference, of likeness, of order, of being and seeming, of progressive arrangement;

of ascent from particular to general; of combination to one end of manifold forces. Proportioned to the importance of the organ to be formed, is the extreme care with which its tuition is provided—a care pretermitted in no single case. What tedious training, day after day, year after year, never ending, to form the common sense; what continual reproduction of annoyances, inconveniences, dilemmas; what rejoicing over us of little men; what disputing of prices, what reckonings of interest—and all to form the Hand of the mind—to instruct us that “good thoughts are no better than good dreams, unless they be executed!”

The same good office is performed by Property and its filial systems of debt and credit. Debt, grinding debt, whose iron face the widow, the orphan, and the sons of genius fear and hate—debt, which consumes so much time, which so cripples and disheartens a great spirit with cares that seems so base, is a preceptor whose lessons cannot be foregone, and is needed most by those who suffer from it most. Moreover, property, which has been well compared to snow—“if it fall level to-day, it will be blown into drifts to-morrow”—is the surface action of internal machinery, like the index on the face of a clock. Whilst now it is the gymnastics of the understanding, it is hiving in the foresight of the spirit, experience in profounder laws.

The whole character and fortune of the individual are affected by the least inequalities in the culture of the understanding; for example, in the perception of differences. Therefore is Space, and therefore Time, that man may know that things are not huddled and lumped, but sundered and individual. A bell and a plough have each their use, and neither can do the office of the other. Water is good to drink, coal to burn, wool to wear; but wool cannot be drunk, nor water spun, nor coal eaten. The wise man shows his wisdom in separation, in gradation, and his scale of creatures and of merits is as wide as nature. The foolish have no range in their scale, but suppose every man is as every other man. What is not good they call the worst, and what is not hateful they call the best.

In like manner, what good heed, nature forms in us! She pardons no mistakes. Her yea is yea, and her nay, nay.

The first steps in Agriculture, Astronomy, Zoölogy (those first steps which the farmer, the hunter, and the sailor take), teach that nature's dice are always loaded; that in her heaps and rubbish are concealed sure and useful results.

How calmly and genially the mind apprehends one after another the laws of physics! What noble emotions dilate the mortal as he enters into the counsels of the creation, and feels by knowledge the privilege to BE! His insight refines him. The beauty of nature shines in his own breast. Man is greater that he can see this, and the universe less, because Time and Space relations vanish as laws are known.

Here again we are impressed and even daunted by the immense Universe to be explored. "What we know, is a point to what we do not know." Open any recent journal of science, and weigh the problems suggested concerning Light, Heat, Electricity, Magnetism, Physiology, Geology, and judge whether the interest of natural science is likely to be soon exhausted.

Passing by many particulars of the discipline of nature, we must not omit to specify two.

The exercise of the Will or the lesson of power is taught in every event. From the child's successive possession of his several senses up to the hour when he saith, "Thy will be done!" he is learning the secret, that he can reduce under his will, not only particular events, but great classes, nay the whole series of events, and so conform all facts to his character. Nature is thoroughly mediate. It is made to serve. It receives the dominion of man as meekly as the ass on which the Saviour rode. It offers all its kingdoms to man as the raw material which he may mould into what is useful. Man is never weary of working it up. He forges the subtile and delicate air into wise and melodious words, and gives them wing as angels of persuasion and command. One after another, his victorious thought comes up with and reduces all things, until the world be-

comes, at last, only a realized will — the double of the man.

2. Sensible objects conform to the premonitions of Reason and reflect the conscience. All things are moral; and in their boundless changes have an unceasing reference to spiritual nature. Therefore is nature glorious with form, color, and motion, that every globe in the remotest heaven; every chemical change from the rudest crystal up to the laws of life; every change of vegetation from the first principle of growth in the eye of a leaf, to the tropical forest and antediluvian coal-mine; every animal function from the sponge up to Hercules, shall hint or thunder to man the laws of right and wrong, and echo the Ten Commandments. Therefore is nature ever the ally of Religion: lends all her pomp and riches to the religious sentiment. Prophet and priest, David, Isaiah, Jesus, have drawn deeply from this source. This ethical character so penetrates the bone and marrow of nature, as to seem the end for which it was made. Whatever private purpose is answered by any member or part, this is its public and universal function, and is never omitted. Nothing in nature is exhausted in its first use. When a thing has served an end to the uttermost, it is wholly new for an ulterior service. In God, every end is converted into a new means. Thus the use of commodity, regarded by itself, is mean and squalid. But it is to the mind an education in the doctrine of Use, namely, that a thing is good only so far as it serves; that a conspiring of parts and efforts to the production of an end, is essential to any being. The first and gross manifestation of this truth, is our inevitable and hated training in values and wants, in corn and meat.

It has already been illustrated, that every natural process is a version of a moral sentence. The moral law lies at the center of nature and radiates to the circumference. It is the pith and marrow of every substance, every relation, and every process. All things with which we deal, preach to us. What is a farm but a mute gospel? The chaff and the wheat, weeds and plants, blight, rain, insects, sun — it is a sacred emblem from the first furrow of spring to the last stack which the snow of winter overtakes in

the fields. But the sailor, the shepherd, the miner, the merchant, in their several resorts, have each an experience precisely parallel, and leading to the same conclusion: because all organizations are radically alike. Nor can it be doubted that this moral sentiment which thus scents the air, grows in the grain, and impregnates the waters of the world, is caught by man and sinks into his soul. The moral influence of nature upon every individual is that amount of truth which it illustrates to him. Who can estimate this? Who can guess how much firmness the sea-beaten rock has taught the fisherman? how much tranquillity has been reflected to man from the azure sky, over whose unspotted deeps the winds forevermore drive flocks of stormy clouds, and leave no wrinkle or stain? how much industry and providence and affection we have caught from the pantomime of brutes? What a searching preacher of self-command is the varying phenomenon of Health!

Herein is especially apprehended the unity of Nature — the unity in variety — which meets us everywhere. All the endless variety of things make an identical impression. Xenophanes complained in his old age, that, look where he would, all thing hastened back to Unity. He was weary of seeing the same entity in the tedious variety of forms. The fable of Proteus has a cordial truth. A leaf, a drop, a crystal, a moment of time is related to the whole, and partakes of the perfection of the whole. Each particle is a microcosm, and faithfully renders the likeness of the world.

Not only resemblances exist in things whose analogy is obvious, as when we detect the type of the human hand in the flipper of the fossil saurus, but also in objects wherein there is great superficial unlikeness. Thus architecture is called "frozen music," by De Stael and Goethe. Vitruvius thought an architect should be a musician. "A Gothic church," said Coleridge, "is a petrified religion." Michael Angelo maintained, that, to an architect, a knowledge of anatomy is essential. In Haydn's oratorios, the notes present to the imagination not only motions, as of the snake, the stag, and the elephant, but colors also; as the green

grass. The law of harmonic sounds reappears in the harmonic colors. The granite is differenced in its laws only by the more or less of heat, from the river that wears it away. The river, as it flows, resembles the air that flows over it; the air resembles the light which traverses it with more subtle currents; the light resembles the heat which rides with it through Space. Each creature is only a modification of the other; the likeness in them is more than the difference, and their radical law is one and the same. A rule of one art, or a law of one organization, holds true throughout nature. So intimate is this Unity, that, it is easily seen, it lies under the undermost garment of nature, and betrays its source in Universal Spirit. For, it pervades Thought also. Every universal truth which we express in words, implies or supposes every other truth. *Omne verum vero consonat*. It is like a great circle on a sphere, comprising all possible circles; which however, may be drawn, and comprise it, in like manner. Every such truth is the absolute Ens seen from one side. But it has innumerable sides.

The central Unity is still more conspicuous in actions. Words are finite organs of the infinite mind. They cannot cover the dimensions of what is in truth. They break, chop, and impoverish it. An action is the perfection and publication of thought. A right action seems to fill the eye, and to be related to all nature. "The wise man, in doing one thing, does all; or, in the one thing he does rightly, he sees the likeness of all which is done rightly."

Words and actions are not the attributes of brute nature. They introduce us to the human form, of which all other organizations appear to be degradations. When this appears among so many that surround it, the spirit prefers it to all others. It says, 'From such as this, have I drawn joy and knowledge; in such as this, have I found and beheld myself; I will speak to it; it can speak again; it can yield me thought already formed and alive.' In fact the eye—the mind—is always accompanied by these forms, male and female; and these are incomparably the richest informations of the power and order that lie at

the heart of things. Unfortunately, every one of them bears the marks as of some injury; is marred and superficially defective. Nevertheless, far different from the deaf and dumb nature around them, these all rest like fountain-pipes on the unfathomed sea of thought and virtue whereto they alone, of all organizations, are the entrances.

It were a pleasant inquiry to follow into detail their ministry to our education, but where would it stop? We are associated in adolescent and adult life with some friends, who, like skies and waters, are coextensive with our idea; who, answering each to a certain affection of the soul, satisfy our desire on that side; whom we lack power to put at such focal distance from us, that we can mend or even analyze them. We cannot choose but love them. When much intercourse with a friend has supplied us with a standard of excellence, and has increased our respect for the resources of God who thus sends a real person to outgo our ideal; when he has, moreover, become an object of thought, and, whilst his character retains all its unconscious effect, is converted in the mind into solid and sweet wisdom—it is a sign to us that his office is closing, and he is commonly withdrawn from our sight in a short time.

## CHAPTER VI

### IDEALISM

THUS is the unspeakable but intelligible and practicable meaning of the world conveyed to man, the immortal pupil, in every object of sense. To this one end of Discipline, all parts of nature conspire.

A noble doubt perpetually suggests itself, whether this end be not the Final Cause of the Universe; and whether nature outwardly exists. It is a sufficient account of that Appearance we call the World, that God will teach a human mind, and so makes it the receiver of a certain number of congruent sensations, which we call sun and moon, man and woman, house and trade. In my utter impotence to

test the authenticity of the report of my senses, to know whether the impressions they make on me correspond with outlying objects, what difference does it make, whether Orion is up there in heaven, or some god paints the image in the firmament of the soul? The relations of parts and the end of the whole remaining the same, what is the difference, whether land and sea interact, and worlds revolve and intermingle without number or end,—deep yawning under deep, and galaxy balancing galaxy, throughout absolute space,—or, whether, without relations of time and space, the same appearances are inscribed in the constant faith of man? Whether nature enjoy a substantial existence without, or is only in the apocalypse of the mind, it is alike useful and alike venerable to me. Be it what it may, it is ideal to me, so long as I cannot try the accuracy of my senses.

The frivolous make themselves merry with the Ideal theory, as if its consequences were burlesque; as if it affected the stability of nature. It surely does not. God never jests with us, and will not compromise the end of nature, by permitting any inconsequence in its procession. Any distrust of the permanence of laws, would paralyze the faculties of man. Their permanence is sacredly respected, and his faith therein is perfect. The wheels and springs of man are all set to the hypothesis of the permanence of nature. We are not built like a ship to be tossed, but like a house to stand. It is a natural consequence of the structure, that, so long as the active powers predominate over the reflective, we resist with indignation any hint that nature is more short-lived or mutable than spirit. The broker, the wheelwright, the carpenter, the tollman, are much displeased at the intimation.

But whilst we acquiesce entirely in the permanence of natural laws, the question of the absolute existence of nature still remains open. It is the uniform effect of culture on the human mind, not to shake our faith in the stability of particular phenomena, as of heat, water, azote; but to lead us to regard nature as a phenomenon, not a substance; to attribute necessary existence to spirit; to

esteem nature as an accident and an effect.

To the senses and the unrenewed understanding, belongs a sort of instinctive belief in the absolute existence of nature. In their view, man and nature are indissolubly joined. Things are ultimates, and they never look beyond their sphere. The presence of Reason mars this faith. The first effort of thought tends to relax this despotism of the senses, which binds us to nature as if we were a part of it, and shows us nature aloof, and, as it were, afloat. Until this higher agency intervened, the animal eye sees, with wonderful accuracy, sharp outlines and colored surfaces. When the eye of Reason opens, to outline and surface are at once added, grace and expression. These proceed from imagination and affection, and abate somewhat of the angular distinctness of objects. If the Reason be stimulated to more earnest vision, outlines and surface become transparent, and are no longer seen; causes and spirits are seen through them. The best moments of life are these delicious awakenings of the higher powers, and the reverential withdrawing of nature before its God.

Let us proceed to indicate the effects of culture. 1. Our first institution in the Ideal philosophy is a hint from nature herself.

Nature is made to conspire with spirit to emancipate us. Certain mechanical changes, a small alteration in our local position apprises us of a dualism. We are strangely affected by seeing the shore from a moving ship, from a balloon, or through the tints of an unusual sky. The least change in our point of view, gives the whole world a pictorial air. A man who seldom rides, needs only to get into a coach and traverse his own town, to turn the street into a puppet show. The men, the women,—talking, running, bartering, fighting,—the earnest mechanic, the loungeur, the beggar, the boys, the dogs, are unrealized at once, or, at least, wholly detached from all relation to the observer, and seen as apparent, not substantial beings. What new thoughts are suggested by seeing a face of country quite familiar, in the rapid movement of the railroad car! Nay, the most wonted objects (make a very slight change in

the point of vision) please us most. In a camera obscura, the butcher's cart, and the figure of one of our own family amuse us. So a portrait of a well-known face gratifies us. Turn the eyes upside down, by looking at the landscape through your legs, and how agreeable is the picture, though you have seen it any time these twenty years!

In these cases, by mechanical means, is suggested the difference between the observer and the spectacle,—between man and nature. Hence arises a pleasure mixed with awe; I may say, a low degree of the sublime is felt from the fact, probably, that man is hereby apprised, that, whilst the world is a spectacle, something in himself is stable.

2. In a higher manner, the poet communicates the same pleasure. By a few strokes, he delineates, as on air, the mountain, the camp, the city, the hero, the maiden, not different from what we know them, but only lifted from the ground and afloat before the eye. He unfixes the land and the sea, makes them revolve around the axis of his primary thought, and disposes them anew. Possessed himself by a heroic passion, he uses matter as symbols of it. The sensual man conforms thoughts to things; the poet conforms things to his thoughts. The one esteems nature as rooted and fast; the other, as fluid, and impresses his being thereon. To him, the refractory world is ductile and flexible, he invests dust and stones with humanity, and makes them the words of the Reason. The Imagination may be defined to be, the use which the Reason makes of the material world. Shakespeare possesses the power of subordinating nature for the purposes of expression, beyond all poets. His imperial muse tosses the creation like a bauble from hand to hand, and uses it to embody any caprice of thought that is uppermost in his mind. The remotest spaces of nature are visited, and the farthest sundered things are brought together, by a subtle spiritual connection. We are made aware that magnitude of material things is relative, and all objects shrink and expand to serve the passion of the poet. Thus, in his sonnets, the lays of birds, the scents and dyes of flowers, he finds to be the *shadow* of his beloved; time, which keeps her from

him, is his *chest*; the suspicion she has awakened, is her *ornament*;

The ornament of beauty is Suspect,  
A crow that flies in heaven's sweetest air.

His passion is not the fruit of chance; it swells, as he speaks, to a city, or a state.

No, it was builded far from accident;  
It suffers not in smiling pomp, nor falls  
Under the brow of thralling discontent;  
It fears not policy, that heretic,  
That works on leases of short numbered hours,  
But all alone stands hugely politic.

In the strength of his constancy, the Pyramids seem to him recent and transitory. The freshness of youth and love dazzles him with its resemblance to morning.

Take those lips away  
Which so sweetly were forsworn;  
And those eyes, — the break of day,  
Lights that do mislead the morn.

The wild beauty of this hyperbole, I may say, in passing, it would not be easy to match in literature.

This transfiguration which all material objects undergo through the passion of the poet, — this power which he exerts to dwarf the great, to magnify the small, — might be illustrated by a thousand examples from his Plays. I have before me the *Tempest*, and will cite only these few lines.

ARIEL. The strong based promontory  
Have I made shake, and by the spurs plucked up  
The pine and cedar.

Prospero calls for music to soothe the frantic Alonzo, and his companions;

A solemn air, and the best comforter  
To an unsettled fancy, cure thy brains  
Now useless, boiled within thy skull.

Again;

The charm dissolves apace,  
And, as the morning steals upon the night,  
Melting the darkness, so their rising senses

Begin to chase the ignorant fumes that mantle  
Their clearer reason.

Their understanding

Begins to swell: and the approaching tide  
Will shortly fill the reasonable shores  
That now lie foul and muddy.

The perception of real affinities between events, (that is to say, of *ideal* affinities, for those only are real,) enables the poet thus to make free with the most imposing forms and phenomena of the world, and to assert the predominance of the soul.

3. Whilst thus the poet animates nature with his own thoughts, he differs from the philosopher only herein, that the one proposes Beauty as his main end; the other, Truth. But the philosopher, not less than the poet, postpones the apparent order and relations of things to the empire of thought. "The problem of philosophy," according to Plato, "is, for all that exists conditionally, to find a ground unconditioned and absolute." It proceeds on the faith that a law determines all phenomena, which being known, the phenomena can be predicted. That law, when in the mind, is an idea. Its beauty is infinite. The true philosopher and the true poet are one, and a beauty, which is truth, and a truth, which is beauty, is the aim of both. Is not the charm of one of Plato's or Aristotle's definitions, strictly like that of the *Antigone* of Sophocles? It is, in both cases, that a spiritual life has been imparted to nature; that the solid seeming block of matter has been pervaded and dissolved by a thought; that this feeble human being has penetrated the vast masses of nature with an informing soul, and recognized itself in their harmony, that is, seized their law. In Physics, when this is attained, the memory disburthens itself of its cumbrous catalogues of particulars and carries centuries of observation in a single formula.

Thus even in physics, the material is degraded before the spiritual. The astronomer, the geometer, rely, on their irrefragable analysis, and disdain the results of observation. The sublime remark of Euler on his law of arches, "This will be found contrary to all experience, yet is true," had

already transferred nature into the mind, and left matter like an outcast corpse.

4. Intellectual science has been observed to beget invariably a doubt of the existence of matter. Turgot said, "He that has never doubted the existence of matter, may be assured he has no aptitude for metaphysical inquiries." It fastens the attention upon immortal necessary uncreated natures, that is, upon Ideas; and in their presence, we feel that the outward circumstance is a dream and a shade. Whilst we wait in this Olympus of gods, we think of nature as an appendix to the soul. We ascend into their region, and know that these are the thoughts of the Supreme Being. "These are they who were set up from everlasting, from the beginning, or ever the earth was. When he prepared the heavens, they were there; when he established the clouds above, when he strengthened the fountains of the deep, then they were by him, as one brought up with him. Of them took he counsel."

Their influence is proportionate. As objects of science, they are accessible to few men. Yet all men are capable of being raised by piety or by passion, into their region. And no man touches these divine natures, without becoming, in some degree, himself divine. Like a new soul, they renew the body. We become physically nimble and light-some; we tread on air; life is no longer irksome, and we think it will never be so. No man fears age or misfortune or death, in their serene company, for he is transported out of the district of change. Whilst we behold unveiled the nature of Justice and Truth, we learn the difference between the absolute and the conditional or relative. We apprehend the absolute. As it were, for the first time, *we exist*. We become immortal, for we learn that time and space are relations of matter; that, with a perception of truth, or a virtuous will, they have no affinity.

5. Finally, religion and ethics, which may be fitly called, — the practice of ideas, or the introduction of ideas into life, — have an analogous effect with all lower culture, in degrading nature and suggesting its dependence on spirit. Ethics and religion differ herein; that the one is the system

of human duties commencing from man; the other, from God. Religion includes the personality of God; Ethics does not. They are one to our present design. They both put nature under foot. The first and last lesson of religion is, "The things that are seen, are temporal; the things that are unseen, are eternal." It puts an affront upon nature. It does that for the unschooled, which philosophy does for Berkeley and Viasa. The uniform language that may be heard in the churches of the most ignorant sects, is,—"Contemn the unsubstantial shows of the world; they are vanities, dreams, shadows, unrealities; seek the realities of religion." The devotee flouts nature. Some theosophists have arrived at a certain hostility and indignation towards matter, as the Manichean and Plotinus. They distrusted in themselves any looking back to these flesh-pots of Egypt. Plotinus was ashamed of his body. In short, they might all say of matter, what Michael Angelo said of external beauty, "it is the frail and weary weed, in which God dresses the soul, which he has called into time."

It appears that motion, poetry, physical and intellectual science, and religion, all tend to affect our convictions of the reality of the external world. But I own there is something ungrateful in expanding too curiously the particulars of the general proposition, that all culture tends to imbue us with idealism. I have no hostility to nature, but a child's love to it. I expand and live in the warm day like corn and melons. Let us speak her fair. I do not wish to fling stones at my beautiful mother, nor soil my gentle nest. I only wish to indicate the true position of nature in regard to man, wherein to establish man, all right education tends; as the ground which to attain is the object of human life, that is, of man's connection with nature. Culture inverts the vulgar views of nature, and brings the mind to call that apparent, which it uses to call real, and that real, which it uses to call visionary. Children, it is true, believe in the external world. The belief that it appears only, is an afterthought, but with culture, this faith will as surely arise on the mind as did the first.

The advantage of the ideal theory over the popular

faith, is this, that it presents the world in precisely that view which is most desirable to the mind. It is, in fact, the view which Reason, both speculative and practical, that is, philosophy and virtue, take. For, seen in the light of thought, the world always is phenomenal; and virtue subordinates it to the mind. Idealism sees the world in God. It beholds the whole circle of persons and things, of actions and events, of country and religion, not as painfully accumulated, atom after atom, act after act, in an aged creeping Past, but as one vast picture, which God paints on the instant eternity, for the contemplation of the soul. Therefore the soul holds itself off from a too trivial and microscopic study of the universal tablet. It respects the end too much, to immerse itself in the means. It sees something more important in Christianity, than the scandals of ecclesiastical history, or the niceties of criticism; and, very incurious concerning persons or miracles, and not at all disturbed by chasms of historical evidence, it accepts from God the phenomenon, as it finds it, as the pure and awful form of religion in the world. It is not hot and passionate at the appearance of what it calls its own good or bad fortune, at the union or opposition of other persons. No man is its enemy. It accepts whatsoever befalls, as part of its lesson. It is a watcher more than a doer, and it is a doer, only that it may the better watch.

## CHAPTER VII

### SPIRIT

It is essential to a true theory of nature and of man, that it should contain somewhat progressive. Uses that are exhausted or that may be, and facts that end in the statement, cannot be all that is true of this brave lodging wherein man is harbored, and wherein all his faculties find appropriate and endless exercise. And all the uses of nature admit of being summed in one, which yields the activity of man an infinite scope. Through all its kingdoms, to the

suburbs and outskirts of things, it is faithful to the cause whence it had its origin. It always speaks of Spirit. It suggests the absolute. It is a perpetual effect. It is a great shadow pointing always to the sun behind us.

The aspect of nature is devout. Like the figure of Jesus, she stands with bended head, and hands folded upon the breast. The happiest man is he who learns from nature the lesson of worship.

Of that ineffable essence which we call Spirit, he that thinks most, will say least. We can foresee God in the coarse, and, as it were, distant phenomena of matter; but when we try to define and describe himself, both language and thought desert us, and we are as helpless as fools and savages. That essence refuses to be recorded in propositions, but when man has worshipped him intellectually, the noblest ministry of nature is to stand as the apparition of God. It is the organ through which the universal spirit speaks to the individual, and strives to lead back the individual to it.

When we consider Spirit, we see that the views already presented do not include the whole circumference of man. We must add some related thoughts.

Three problems are put by nature to the mind; What is matter? Whence is it? and Whereto? The first of these questions only, the ideal theory answers. Idealism saith: matter is a phenomenon, not a substance. Idealism acquaints us with the total disparity between the evidence of our own being, and the evidence of the world's being. The one is perfect; the other, incapable of any assurance; the mind is a part of the nature of things; the world is a divine dream, from which we may presently awake to the glories and certainties of day. Idealism is a hypothesis to account for nature by other principles than those of carpentry and chemistry. Yet, if it only deny the existence of matter, it does not satisfy the demands of the spirit. It leaves God out of me. It leaves me in the splendid labyrinth of my perceptions, to wander without end. Then the heart resists it, because it balks the affections in denying substantive being to men and women. Nature is so pervaded with human life,

that there is something of humanity in all, and in every particular. But this theory makes nature foreign to me, and does not account for that consanguinity which we acknowledge to it.

Let it stand, then, in the present state of our knowledge, merely as a useful introductory hypothesis, serving to apprise us of the eternal distinction between the soul and the world.

But when following the invisible steps of thought, we come to inquire, Whence is matter? and Whereto? many truths arise to us out of the recesses of consciousness. We learn that the highest is present to the soul of man, that the dread universal essence, which is not wisdom, or love, or power, but all in one, and each entirely, is that for which all things exist, and that by which they are; that spirit creates; that behind nature, throughout nature, spirit is present; one and not compound, it does not act upon us from without, that is, in space and time, but spiritually, or through ourselves: therefore, that spirit, that is, the Supreme Being, does not build up nature around us, but puts it forth through us, as the life of the tree puts forth new branches and leaves through the pores of the old. As a plant upon the earth, so a man rests upon the bosom of God; he is nourished by unfailing fountains, and draws, at his need, inexhaustible power. Who can set bounds to the possibilities of man? Once inhale the upper air, being admitted to behold the absolute natures of justice and truth, and we learn that man has access to the entire mind of the Creator, is himself the creator in the finite. This view, which admonishes me where the sources of wisdom and power lie, and points to virtue as to

"The golden key  
Which opes the palace of eternity,"

carries upon its face the highest certificate of truth, because it animates me to create my own world through the purification of my soul.

The world proceeds from the same spirit as the body

of man. It is a remoter and inferior incarnation of God, a projection of God in the unconscious. But it differs from the body in one important respect. It is not, like that, now subjected to the human will. Its serene order is inviolable by us. It is, therefore, to us, the present expositor of the divine mind. It is a fixed point whereby we may measure our departure. As we degenerate, the contrast between us and our house is more evident. We are as much strangers in nature, as we are aliens from God. We do not understand the notes of birds. The fox and the deer run away from us; the bear and tiger rend us. We do not know the uses of more than a few plants, as corn and the apple, the potato and the vine. Is not the landscape, every glimpse of which hath a grandeur, a face of him? Yet this may show us what discord is between man and nature, for you cannot freely admire a noble landscape, if laborers are digging in the field hard by. The poet finds something ridiculous in his delight, until he is out of the sight of men.

## CHAPTER VIII

### PROSPECTS

IN inquiries respecting the laws of the world and the frame of things, the highest reason is always the truest. That which seems faintly possible—it is so refined, is often faint and dim because it is deepest seated in the mind among the eternal verities. Empirical science is apt to cloud the sight, and, by the very knowledge of functions and processes, to bereave the student of the manly contemplation of the whole. The savant becomes unpoetic. But the best read naturalist who lends an entire and devout attention to truth, will see that there remains much to learn of his relation to the world, and that it is not to be learned by any addition or subtraction or other comparison of known quantities, but is arrived at by untaught sallies of the spirit, by a continual self-recovery,

and by entire humility. He will perceive that there are far more excellent qualities in the student than preciseness and infallibility; that a guess is often more fruitful than an indisputable affirmation, and that a dream may let us deeper into the secret of nature than a hundred concerted experiments.

For, the problems to be solved are precisely those which the physiologist and the naturalist omit to state. It is not so pertinent to man to know all the individuals of the animal kingdom, as it is to know whence and whereto is this tyrannizing unity in his constitution, which evermore separates and classifies things, endeavoring to reduce the most diverse to one form. When I behold a rich landscape, it is less to my purpose to recite correctly the order and superposition of the strata, than to know why all thought of multitude is lost in a tranquil sense of unity. I cannot greatly honor minuteness in details, so long as there is no hint to explain the relation between things and thoughts; no ray upon the *metaphysics* of conchology, of botany, of the arts, to show the relation of the forms of flowers, shells, animals, architecture, to the mind, and build science upon ideas. In a cabinet of natural history, we become sensible of a certain occult recognition and sympathy in regard to the most unwieldy and eccentric forms of beast, fish, and insect. The American who has been confined, in his own country, to the sight of buildings designed after foreign models, is surprised on entering York Minster or St. Peter's at Rome, by the feeling that these structures are imitations also, — faint copies of an invisible archetype. Nor has science sufficient humanity, so long as the naturalist overlooks that wonderful congruity which subsists between man and the world; of which he is lord, not because he is the most subtile inhabitant, but because he is its head and heart, and finds something of himself in every great and small thing, in every mountain stratum, in every new law of color, fact of astronomy, or atmospheric influence which observation or analysis lay open. A perception of this mystery inspires the muse of George Herbert, the beautiful psalmist

of the seventeenth century. The following lines are part of his little poem on Man.

"Man is all symmetry,  
Full of proportions, one limb to another,  
And to all the world besides.  
Each part may call the farthest, brother;  
For head with foot hath private amity,  
And both with moons and tides.

"Nothing hath got so far  
But man hath caught and kept it as his prey;  
His eyes dismount the highest star;  
He is in little all the sphere.  
Herbs gladly cure our flesh, because that they  
Find their acquaintance there.

"For us, the winds do blow,  
The earth doth rest, heaven move, and fountains flow;  
Nothing we see, but means our good,  
As our delight, or as our treasure;  
The whole is either our cupboard of food,  
Or cabinet of pleasure.

"The stars have us to bed:  
Night draws the curtain; which the sun withdraws.  
Music and light attend our head.  
All things unto our flesh are kind,  
In their descent and being; to our mind,  
In their ascent and cause.

"More servants wait on man  
Than he'll take notice of. In every path,  
He treads down that which doth befriend him  
When sickness makes him pale and wan.  
Oh mighty love! Man is one world, and hath  
Another to attend him."

The perception of this class of truths makes the attraction which draws men to science, but the end is lost sight of in attention to the means. In view of this half-sight of science, we accept the sentence of Plato, that, "poetry comes nearer to vital truth than history." Every surmise and vaticination of the mind is entitled to a certain respect, and we learn to prefer imperfect theories, and sentences, which contain glimpses of truth, to digested

systems which have no one valuable suggestion. A wise writer will feel that the ends of study and composition are best answered by announcing undiscovered regions of thought, and so communicating, through hope, new activity to the torpid spirit.

I shall therefore conclude this essay with some traditions of man and nature, which a certain poet sang to me; and which, as they have always been in the world, and perhaps reappear to every bard, may be both history and prophecy.

"The foundations of man are not in matter, but in spirit. But the element of spirit is eternity. To it, therefore, the longest series of events, the oldest chronologies are young and recent. In the cycle of the universal man, from whom the known individuals proceed, centuries are points, and all history is but the epoch of one degradation.

"We distrust and deny inwardly our sympathy with nature. We own and disown our relation to it, by turns. We are, like Nebuchadnezzar, dethroned, bereft of reason, and eating grass like an ox. But who can set limits to the remedial force of spirit?

"A man is a god in ruins. When men are innocent, life shall be longer, and shall pass into the immortal, as gently as we awake from dreams. Now, the world would be insane and rabid, if these disorganizations should last for hundreds of years. It is kept in check by death and infancy. Infancy is the perpetual Messiah, which comes into the arms of fallen men, and pleads with them to return to paradise.

"Man is the dwarf of himself. Once he was permeated and dissolved by spirit. He filled nature with his overflowing currents. Out from him sprang the sun and moon; from man, the sun; from woman, the moon. The laws of his mind, the periods of his actions externized themselves into day and night, into the year and the seasons. But, having made for himself this huge shell, his waters retired; he no longer fills the veins and veinlets; he is shrunk to a drop. He sees, that the structure still fits him, but fits him colossally. Say, rather, once it fitted him, now

it corresponds to him from far and on high. He adores timidly his own work. Now is man the follower of the sun, and woman the follower of the moon. Yet sometimes he starts in his slumber, and wonders at himself and his house, and muses strangely at the resemblance betwixt him and it. He perceives that if his law is still paramount, if still he have elemental power, if his word is sterling yet in nature, it is not conscious power, it is not inferior but superior to his will. It is Instinct." Thus my Orphic poet sang.

At present, man applies to nature but half his force. He works on the world with his understanding alone. He lives in it, and masters it by a penny-wisdom; and he that works most in it, is but a half-man, and whilst his arms are strong and his digestion good, his mind is imbruted, and he is a selfish savage. His relation to nature, his power over it, is through the understanding; as by manure; the economic use of fire, wind, water, and the mariner's needle; steam, coal, chemical agriculture; the repairs of the human body by the dentist and the surgeon. This is such a resumption of power, as if a banished king should buy his territories inch by inch, instead of vaulting at once into his throne. Meantime, in the thick darkness, there are not wanting gleams of a better light,—occasional examples of the action of man upon nature with his entire force,—with reason as well as understanding. Such examples are; the traditions of miracles in the earliest antiquity of all nations; the history of Jesus Christ; the achievements of a principle, as in religious and political revolutions, and in the abolition of the Slave-trade; the miracles of enthusiasm, as those reported of Swedenborg, Hohenlohe, and the Shakers; many obscure and yet contested facts, now arranged under the name of Animal Magnetism; prayer; eloquence; self-healing; and the wisdom of children. These are examples of Reason's momentary grasp of the sceptre; the exertions of a power which exists not in time or space, but an instantaneous in-streaming causing power. The difference between the actual and the ideal force of man is

happily figured by the schoolmen, in saying, that the knowledge of man is an evening knowledge, *vespertina cognitio*, but that of God is a morning knowledge, *matutina cognitio*.

The problem of restoring to the world original and eternal beauty, is solved by the redemption of the soul. The ruin or the blank, that we see when we look at nature, is in our own eye. The axis of vision is not coincident with the axis of things, and so they appear not transparent but opaque. The reason why the world lacks unity, and lies broken and in heaps, is, because man is disunited with himself. He cannot be a naturalist, until he satisfies all the demands of the spirit. Love is as much its demand, as perception. Indeed, neither can be perfect without the other. In the uttermost meaning of the words, thought is devout, and devotion is thought. Deep calls unto deep. But in actual life, the marriage is not celebrated. There are innocent men who worship God after the tradition of their fathers, but their sense of duty has not yet extended to the use of all their faculties. And there are patient naturalists, but they freeze their subject under the wintry light of the understanding. Is not prayer also a study of truth, — a sally of the soul into the unfound infinite? No man ever prayed heartily, without learning something. But when a faithful thinker, resolute to detach every object from personal relations, and see it in the light of thought, shall, at the same time, kindle science with the fire of the holiest affections, then will God go forth anew into the creation.

It will not need, when the mind is prepared for study, to search for objects. The invariable mark of wisdom is to see the miraculous in the common. What is a day? What is a year? What is summer? What is woman? What is a child? What is sleep? To our blindness, these things seem unaffected. We make fables to hide the baldness of the fact and conform it, as we say, to the higher law of the mind. But when the fact is seen under the light of an idea, the gaudy fable fades and shrivels. We behold the real higher law. To the wise, therefore, a fact

is true poetry, and the most beautiful of fables. These wonders are brought to our own door. You also are a man. Man and woman, and their social life, poverty, labor, sleep, fear, fortune, are known to you. Learn that none of these things is superficial, but that each phenomenon has its roots in the faculties and affections of the mind. Whilst the abstract question occupies your intellect, nature brings it in the concrete to be solved by your hands. It were a wise inquiry for the closet, to compare, point by point, especially at remarkable crises in life, our daily history, with the rise and progress of ideas in the mind.

So shall we come to look at the world with new eyes. It shall answer the endless inquiry of the intellect,—What is truth? and of the affections,—What is good? by yielding itself passive to the educated Will. Then shall come to pass what my poet said; “Nature is not fixed but fluid. Spirit alters, moulds, makes it. The immobility or bruteness of nature, is the absence of spirit; to pure spirit, it is fluid, it is volatile, it is obedient. Every spirit builds itself a house; and beyond its house a world; and beyond its world a heaven. Know then, that the world exists for you. For you is the phenomenon perfect. What we are, that only can we see. All that Adam had, all that Cæsar could, you have and can do. Adam called his house, heaven and earth; Cæsar called his house, Rome; you perhaps call yours, a cobbler’s trade; a hundred acres of ploughed land; or a scholar’s garret. Yet line for line and point for point, your dominion is as great as theirs, though without fine names. Build, therefore, your own world. As fast as you conform your life to the pure idea in your mind, that will unfold its great proportions. A correspondent revolution in things will attend the influx of the spirit. So fast will disagreeable appearances, swine, spiders, snakes, pets, madhouses, prisons, enemies, vanish; they are temporary and shall be no more seen. The sordor and filths of nature, the sun shall dry up, and the wind exhale. As when the summer comes from the south; the snow-banks melt, and the face of

the earth becomes green before it, so shall the advancing spirit create its ornaments along its path, and carry with it the beauty it visits, and the song which enchants it; it shall draw beautiful faces, warm hearts, wise discourse, and heroic acts, around its way, until evil is no more seen. The kingdom of man over nature, which cometh not with observation, — a dominion such as now is beyond his dream of God, — he shall enter without more wonder than the blind man feels who is gradually restored to perfect sight."

## II

### THE OVER-SOUL

"But souls that of his own good life partake  
He loves as his own self; dear as his eye  
They are to Him: He'll never them forsake:  
When they shall die, then God himself shall die:  
They live, they live in blest eternity." — HENRY MORE.

THERE is a difference between one and another hour of life in their authority and subsequent effect. Our faith comes in moments; our vice is habitual. Yet is there a depth in those brief moments, which constrains us to ascribe more reality to them than to all other experiences. For this reason, the argument, which is always forthcoming to silence those who conceive extraordinary hopes of man, namely, the appeal to experience, is forever invalid and vain. A mightier hope abolishes despair. We give up the past to the objector, and yet we hope. He must explain this hope. We grant that human life is mean; but how did we find out that it was mean? What is the ground of this uneasiness of ours, of this old discontent? What is the universal sense of want and ignorance, but the fine innuendo by which the great soul makes its enormous claim? Why do men feel that the natural history of man has never been written, but always he is leaving behind what you have said of him, and it becomes old, and books of metaphysics worthless? The philosophy of six thousand years has not searched the chambers and magazines of the soul. In its experiments there has always remained in the last analysis a residuum it could not resolve. Man is a stream whose source is hidden. Always our being is descending into us from we know not whence. The most exact calculator has no prescience that somewhat incalculable may not baulk the very next moment. I am constrained every moment to acknowledge a higher

origin for events than the will I call mine.

<sup>2</sup> As with events, so is it with thoughts. When I watch that flowing river, which, out of regions I see not, pours for a season its streams into me,— I see that I am a pensioner,— not a cause, but a surprised spectator of this ethereal water; that I desire and look up, and put myself in the attitude of reception, but from some alien energy the visions come.

<sup>3</sup> The Supreme Critic on all the errors of the past and the present, and the only prophet of that which must be, is that great nature in which we rest, as the earth lies in the soft arms of the atmosphere; that Unity, that Over-Soul, within which every man's particular being is contained and made one with all other; that common heart, of which all sincere conversation is the worship, to which all right action is submission; that overpowering reality which confutes our tricks and talents, and constrains every one to pass for what he is, and to speak from his character and not from his tongue; and which evermore tends and aims to pass into our thought and hand, and become wisdom, and virtue, and power, and beauty. We live in succession, in division, in parts, in particles. Meantime, within man is the soul of the whole; the wise silence; the universal beauty, to which every part and particle is equally related; the eternal ONE. And this deep power in which we exist, and whose beatitude is all accessible to us, is not only self-sufficing and perfect in every hour, but the act of seeing and the thing seen, the seer and the spectacle, the subject and the object, are one. We see the world piece by piece, as the sun, the moon, the animal, the tree; but the whole, of which these are the shining parts, is the soul. It is only by the vision of that Wisdom, that the horoscope of the ages can be read, and it is only by falling back on our better thoughts, by yielding to the spirit of prophecy which is innate in every man, that we can know what it saith. Every man's words, who speaks from that life, must sound vain to those who do not dwell in the same thought on their own part. I dare not speak for it. My words do

not carry its august sense; they fall short and cold. Only itself can inspire whom it will, and, behold, their speech shall be lyrical, and sweet, and universal as the rising of the wind. Yet I desire, even by profane words, if sacred I may not use, to indicate the heaven of this deity, and to report what hints I have collected of the transcendent simplicity and energy of the Highest Law.

\* If we consider what happens in conversation, in reveries, in remorse, in times of passion, in surprises, in the instructions of dreams, wherein often we see ourselves in masquerade,—the droll disguises only magnifying and enhancing a real element, and forcing it on our distinct notice,—we shall catch many hints that will broaden and lighten into knowledge of the secret of nature. All goes to show that the soul in man is not an organ, but animates and exercises all the organs; is not a function, like the power of memory, of calculation, of comparison,—but uses these as hands and feet; is not a faculty, but a light; is not the intellect or the will, but the master of the intellect and the will; is the vast background of our being, in which they lie,—an immensity not possessed and that cannot be possessed. From within or from behind, a light shines through us upon things, and makes us aware that we are nothing, but the light is all. A man is the facade of a temple, wherein all wisdom and all good abide. What we commonly call man,—the eating, drinking, planting, counting man,—does not, as we know him, represent himself, but misrepresents himself. Him we do not respect; but the soul, whose organ he is, would he let it appear through his action, would make our knees bend. When it breathes through his intellect, it is genius; when it breathes through his will, it is virtue; when it flows through his affection, it is love. And the blindness of the intellect begins, when it would be something of itself. The weakness of the will begins, when the individual would be something of himself. All reform aims, in some one particular, to let the great soul have its way through us; in other words, to engage us to obey.

\* Of this pure nature every man is at some time sensible.

Language cannot paint it with his colors. It is too subtle. It is undefinable, unmeasurable; but we know that it pervades and contains us. We know that all spiritual being is in man. A wise old proverb says, "God comes to see us without bell:" that is, there is no screen or ceiling between our heads and the infinite heavens, so is there no bar or wall in the soul where man, the effect, ceases, and God, the cause, begins. The walls are taken away. We lie open on one side to the deeps of spiritual nature, to all the attributes of God. Justice we see and know, Love, Freedom, Power. These natures no man ever got above, but always they tower over us, and most in the moment when our interests tempt us to wound them.

6 The sovereignty of this nature whereof we speak is made known by its independency of those limitations which circumscribe us on every hand. The soul circumscribeth all things. As I have said, it contradicts all experience. In like manner it abolishes time and space. The influence of the senses has, in most men, overpowered the mind to that degree, that the walls of time and space have come to look solid, real, and insurmountable; and to speak with levity of these limits is, in the world, the sign of insanity. Yet time and space are but inverse measures of the force of the soul. A man is capable of abolishing them both. The spirit sports with time —

"Can crowd eternity into an hour,  
Or stretch an hour to eternity."

7 We are often made to feel that there is another youth and age than that which is measured from the year of our natural birth. Some thoughts always find us young, and keep us so. Such a thought is the love of the universal and eternal beauty. Every man parts from that contemplation with the feeling that it rather belongs to ages than to mortal life. The least activity of the intellectual powers redeems us in a degree from the influences of time. In sickness, in languor, give us a strain of poetry or a profound sentence, and we are refreshed; or produce

a volume of Plato or Shakespeare, or remind us of their names, and instantly we come into a feeling of longevity. See how the deep, divine thought demolishes centuries and millenniums, and makes itself present through all ages. Is the teaching of Christ less effective now than it was when first his mouth was opened? The emphasis of facts and persons to my soul has nothing to do with time. And so, always, the soul's scale is one; the scale of the senses and the understanding is another. Before the great revelations of the soul, Time, Space, and Nature shrink away. In common speech, we refer all things to time, as we habitually refer the immensely sundered stars to one concave sphere. And so we say that the Judgment is distant or near; that the Millennium approaches; that a day of certain political, moral, social reforms is at hand; and the like; when we mean, that in the nature of things, one of the facts we contemplate is external and fugitive, and the other is permanent and connate with the soul. The things we now esteem fixed shall, one by one, detach themselves, like ripe fruit, from our experience, and fall. The wind shall blow them none knows whither. The landscape, the figures, Boston, London, are facts as fugitive as any institution past, or any whiff of mist or smoke, and so is society, and so is the world. The soul looketh steadily forwards, creating a world alway before her, and leaving worlds alway behind her. She has no dates, nor rites, nor persons, nor specialties, nor men. The soul knows only the soul. All else is idle weeds for her wearing.

§ After its own law, and not by arithmetic, is the rate of its progress to be computed. The soul's advances are not made by gradation, such as can be represented by motion in a straight line; but rather by ascension of state, such as can be represented by metamorphosis, — from the egg to the worm, from the worm to the fly. The growths of genius are of a certain *total* character, that does not advance the elect individual first over John, then Adam, then Richard, and give to each the pain of discovered inferiority, but by every throe of growth the man expands there where he works, passing, at each

pulsation, classes, populations of men. With each divine impulse the mind rends the thin rinds of the visible and finite; and comes out into eternity, and inspires and expires its air. It converses with truths that have always been spoken in the world, and becomes conscious of a closer sympathy with Zeno and Arrian than with persons in the house.

4 This is the law of moral and of mental gain. The simple rise as by specific levity, not into a particular virtue, but into the region of all the virtues. They are in the spirit which contains them all. The soul is superior to all the particulars of merit. The soul requires purity, but purity is not it; requires justice, but justice is not that; requires beneficence, but is somewhat better; so that there is a kind of descent and accommodation felt when we leave speaking of moral nature, to urge a virtue which it enjoins. For to the soul in her pure action all the virtues are natural, and not painfully acquired. Speak to his heart, and the man becomes suddenly virtuous.

10 Within the same sentiment is the germ of intellectual growth, which obeys the same law. Those who are capable of humility, of justice, of love, of aspiration, are already on a platform that commands the sciences and arts, speech and poetry, action and grace. For whoso dwells in this moral beatitude does already anticipate those special powers which men prize so highly; just as love does justice to all the gifts of the object beloved. The lover has no talent, no skill, which passes for quite nothing with his enamored maiden, however little she may possess of related faculty. And the heart, which abandons itself to the Supreme Mind, finds itself related to all its works, and will travel a royal road to particular knowledges and powers. For in ascending to this primary and aboriginal sentiment, we have come from our remote station on the circumference instantaneously to the center of the world, where, as in the closet of God, we see causes, and anticipate the universe, which is but a slow effect.

One mode of the divine teaching is the incarnation of

the spirit in a form,—in forms like my own. I live in society; with persons who answer to thoughts in my own mind, or outwardly express to me a certain obedience to the great instincts to which I live. I see its presence to them. I am certified of a common nature; and so these other souls, these separated selves, draw me as nothing else can. They stir in me the new emotions we call passion; of love, hatred, fear, admiration, pity; thence comes conversation, competition, persuasion, cities, and war. Persons are supplementary to the primary teaching of the soul. In youth we are mad for persons. Childhood and youth see all the world in them. But the larger experience of man discovers the identical nature appearing through them all. Persons themselves acquaint us with the impersonal. In all conversation between two persons, tacit reference is made as to a third party, to a common nature. That third party or common nature is not social; it is impersonal, is God. And so in groups where debate is earnest, and especially on great questions of thought, the company become aware of their unity; aware that the thought rises to an equal height in all bosoms, that all have a spiritual property in what was said, as well as the sayer. They all wax wiser than they were. It arches over them like a temple, this unity of thought, in which every heart beats with nobler sense of power and duty, and thinks and acts with unusual solemnity. All are conscious of attaining to a higher self-possession. It shines for all. There is a certain wisdom of humanity which is common to the greatest men with the lowest, and which our ordinary education often labors to silence and obstruct. The mind is one; and the best minds, who love truth for its own sake, think much less of property in truth. Thankfully they accept it everywhere, and do not label or stamp it with any man's name, for it is theirs long beforehand. It is theirs from eternity. The learned and the studious of thought have no monopoly of wisdom. Their violence of direction in some degree disqualifies them to think truly. We owe many valuable observations to people who are not very acute or pro-

found, and who say the thing without effort, which we want and have long been hunting in vain. The action of the soul is oftener in that which is felt and left unsaid, than in that which is said in any conversation. It broods over every society, and they unconsciously seek for it in each other. We know better than we do. We do not yet possess ourselves, and we know at the same time that we are much more. I feel the same truth how often in my trivial conversation with my neighbors, that somewhat higher in each of us overlooks this by-play, and Jove nods to Jove from behind each of us.

Men descend to meet. In their habitual and mean service to the world, for which they forsake their native nobleness, they resemble those Arabian Sheikhs, who dwell in mean houses, and affect an eternal poverty, to escape the rapacity of the Pasha, and reserve all their display of wealth for their interior and guarded retirements.

As it is present in all persons, so it is in every period of life. It is adult already in the infant man. In my dealing with my child, my Latin and Greek, my accomplishments and my money, stead me nothing. They are all lost on him: but as much soul as I have avails. If I am merely wilful, he gives me a Rowland for an Oliver, sets his will against mine, one for one, and leaves me, if I please, the degradation of beating him by my superiority of strength. But if I renounce my will, and act for the soul, setting that up as umpire between us two, out of his young eyes looks the same soul; he reveres and loves with me.

The soul is the perceiver and revealer of truth. We know truth when we see it, let sceptic and scoffer say what they choose. Foolish people ask you, when you have spoken what they do not wish to hear, "How do you know it is truth, and not an error of your own?" We know truth when we see it, from opinion, as we know when we are awake that we are awake. It was a grand sentence of Emanuel Swedenborg, which would alone indicate the greatness of that man's perception, — "It is no proof of a man's understanding to be able to affirm

whatever he pleases; but to be able to discern that what is true is true, and that what is false is false, this is the mark and character of intelligence." In the book I read, the good thought returns to me, as every truth will, the image of the whole soul. To the bad thought which I find in it, the same soul becomes a discerning, separating sword, and lops it away. We are wiser than we know. If we will not interfere with our thought, but will act entirely, or see how the thing stands in God, we know the particular thing, and every thing, and every man. For the Maker of all things and all persons stands behind us, and casts his dread omniscience through us over things.

“But beyond this recognition of its own in particular passages of the individual’s experience, it also reveals truth. And here we should seek to reinforce ourselves by its very presence, and to speak with a worthier, loftier strain of that advent. For the soul’s communication of truth is the highest event in nature; for it then does not give somewhat from itself, but it gives itself, or passes into and becomes that man whom it enlightens; or in proportion to that truth he receives, it takes him to itself.

We distinguish the announcements of the soul, its manifestations of its own nature, by the term *Revelation*. These are always attended by the emotion of the sublime.

\* For this communication is an influx of the Divine mind into our mind. It is an ebb of the individual rivulet before the flowing surges of the sea of life. Every distinct apprehension of this central commandment agitates men with awe and delight. A thrill passes through all men at the reception of new truth, or at the performance of a great action, which comes out of the heart of nature. In these communications, the power to see is not separated from the will to do, but the insight proceeds from obedience, and the obedience proceeds from a joyful perception. Every moment when the individual feels himself invaded by it is memorable. Always, I believe, by the necessity of our constitution, a certain enthusiasm attends the individual’s consciousness of that divine presence. The character and duration of this enthusiasm varies with

the state of the individual, from an ecstasy and trance and prophetic inspiration, which is its rarer appearance, to the faintest glow of virtuous emotion, in which form it warms, like our household fires, all the families and associations of men, and makes society possible. A certain tendency to insanity has always attended the opening of the religious sense in men, as if "blasted with excess of light." The trances of Socrates; the "union" of Plotinus; the vision of Porphyry; the conversion of Paul; the aurora of Behmen; the convulsions of George Fox and his Quakers; the illumination of Swedenborg; are of this kind. What was in the case of these remarkable persons a ravishment has in innumerable instances in common life been exhibited in less striking manner. Everywhere the history of religion betrays a tendency to enthusiasm. The rapture of the Moravian and Quietest; the opening of the internal sense of the Word, in the language of the New Jerusalem Church; the revival of the Calvinistic Churches; the experiences of the Methodists,—are varying forms of that shudder of awe and delight with which the individual soul always mingles with the universal soul.

The nature of these revelations is always the same. They are perceptions of the absolute law: they are solutions of the soul's own questions. They do not answer the questions which the understanding asks. The soul answers never by words, but by the thing itself that is inquired after.

Revelation is the disclosure of the soul. The popular notion of a revelation is, that it is a telling of fortunes. In past oracles of the soul, the understanding seeks to find answers to sensual questions, and undertakes to tell from God how long men shall exist, what their hands shall do, and who shall be their company, adding even names, and dates and places. But we must pick no locks. We must check this low curiosity. An answer in words is delusive; it is really no answer to the questions you ask. Do not ask a description of the countries towards which you sail. The description does not describe them to you; and to-morrow you arrive there, and know them by in-

habiting them. Men ask of the immortality of the soul, and the employments of heaven, and the state of the sinner, and so forth. They even dream that Jesus has left replies to precisely these interrogatories. Never a moment did that sublime spirit speak in their *patois*. To truth, justice, love, the attributes of the soul, the idea of immutableness is essentially associated. Jesus, living in these moral sentiments, heedless of sensual fortunes, heeding only the manifestations of these, never made the separation of the idea of duration from the essence of these attributes; never uttered a syllable concerning the duration of the soul. It was left to his disciples to sever duration from the moral elements, and to teach the immortality of the soul as a doctrine, and maintain it by evidences. The moment the doctrine of the immortality is separately taught, man is already fallen. In the flowing of love, in the adoration of humility, there is no question of continuance. No inspired man ever asks this question, or condescends to these evidences. For the soul is true to itself; and the man in whom it is shed abroad cannot wander from the present, which is infinite, to a future, which would be finite.

These questions which we lust to ask about the future are a confession of sin. God has no answer for them. No answer in words can reply to a question of things. It is not in an arbitrary "decree of God," but in the nature of man, that a veil shuts down on the facts of to-morrow: for the soul will not have us read any other cipher but that of cause and effect. By this veil, which curtains events, it instructs the children of men to live in to-day. The only mode of obtaining an answer to these questions of the senses, is to forego all low curiosity, and accepting the tide of being which floats us into the secret of nature, work and live, work and live, and all unawares the advancing soul has built and forged for itself a new condition, and the question and the answer are one.

Thus is the soul the perceiver and revealer of truth. By the same fire, serene, impersonal, perfect, which burns

until it shall dissolve all things into the waves and surges of an ocean of light,—we see and know each other, and what spirit each is of. Who can tell the grounds of his knowledge of the character of the several individuals in his circle of friends? No man. Yet their acts and words do not disappoint him. In that man, though he knew no ill of him, he put no trust. In that other, though they had seldom met, authentic signs had yet passed to signify that he might be trusted as one who had an interest in his own character. We know each other very well,—which of us has been just to himself, and whether that which we teach or behold is only an inspiration, or is our honest effort also.

20 We are all discerners of spirits. That diagnosis lies aloft in our life or unconscious power, not in the understanding. The whole intercourse of society, its trade, its religion, its friendships, its quarrels,—is one wide judicial investigation of character. In full court, or in small committee, or confronted face to face, accuser and accused, men offer themselves to be judged. Against their will they exhibit those decisive trifles by which character is read. But who judges? and what? Not our understanding. We do not read them by learning or craft. No; the wisdom of the wise man consists herein, that he does not judge them; he lets them judge themselves, and merely reads and records their own verdict.

21 By virtue of this inevitable nature, private will is overpowered, and, maugre our efforts or our imperfections, your genius will speak from you, and mine from me. That which we are; we shall teach, not voluntarily, but involuntarily. Thoughts come into our minds by avenues which we never left open, and thoughts go out of our minds through avenues which we never voluntarily opened. Character teaches over our head. The infallible index of true progress is found in the tone the man takes. Neither his age, nor his breeding, nor company, nor books, nor actions, nor talents, nor all together, can hinder him from being deferential to a higher spirit than his own. If he have not found his home in God, his manners, his

forms of speech, the turn of his sentences, the build, shall I say, of all his opinions, will involuntarily confess it, let him brave it out how he will. If he have found his center, the Deity will shine through him, through all the disguises of ignorance, of ungenial temperament, of unfavorable circumstance. The tone of seeking is one, and the tone of having is another.

• The great distinction between teachers sacred or literary, between poets like Herbert, and poets like Pope; between philosophers like Spinoza, Kant, and Coleridge, — and philosophers like Locke, Paley, Mackintosh, and Stewart; between men of the world who are reckoned accomplished talkers, and here and there a fervent mystic, prophesying half-insane under the infinitude of his thought, is, that one class speak *from within*, or from experience, as parties and possessors of the fact; and the other class, *from without*, as spectators merely, or perhaps as acquainted with the fact on the evidence of third persons. It is of no use to preach to me from without. I can do that too easily myself. Jesus speaks always from within, and in a degree that transcends all others. In that is the miracle. That includes the miracle. My soul believes beforehand that it ought so to be. All men stand continually in the expectation of the appearance of such a teacher. But if a man do not speak from within the veil, where the word is one with that it tells of, let him lowly confess it.

• The same Omniscience flows into the intellect, and makes what we call genius. Much of the wisdom of the world is not wisdom, and the most illuminated class of men are no doubt superior to literary fame, and are not writers. Among the multitude of scholars and authors we feel no hallowing presence; we are sensible of a knack and skill rather than of inspiration; they have a light, and know not whence it comes, and call it their own; their talent is some exaggerated faculty, some overgrown member, so that their strength is a disease. In these instances the intellectual gifts do not make the impression of virtue, but almost of vice; and we feel that a man's talents stand in the way of his advancement in truth. But genius is

religious. It is a larger imbibing of the common heart. It is not anomalous, but more like, and not less like, other men. There is in all great poets a wisdom of humanity, which is superior to any talents they exercise. The author, the wit, the partisan, the fine gentleman, does not take place of the man. Humanity shines in Homer, in Chaucer, in Spenser, in Shakespeare, in Milton. They are content with truth. They use the positive degree. They seem frigid and phlegmatic to those who have been spiced with the frantic passion and violent coloring of inferior, but popular writers. For they are poets by the free course which they allow to the informing soul, which through their eyes beholdeth again, and blesseth the things which it hath made. The soul is superior to its knowledge, wiser than any of its works. The great poet makes us feel our own wealth, and then we think less of his compositions. His greatest communication to our mind is, to teach us to despise all he has done. Shakespeare carries us to such a lofty strain of intelligent activity, as to suggest a wealth which beggars his own; and we then feel that the splendid works which he has created, and which in other hours we extol as a sort of self-existent poetry, take no stronger hold of real nature than the shadow of a passing traveler on the rock. The inspiration which uttered itself in Hamlet and Lear could utter things as good from day to day forever. Why then should I make account of Hamlet and Lear, as if we had not the soul from which they fell as syllables from the tongue?

This energy does not descend into individual life on any other condition than entire possession. It comes to the lowly and simple; it comes to whomsoever will put off what is foreign and proud; it comes as insight; it comes as serenity and grandeur. When we see those whom it inhabits, we are apprised of new degrees of greatness. From that inspiration the man comes back with a changed tone. He does not talk with men with an eye to their opinion. He tries them. It requires of us to be plain and true. The vain traveler attempts to embellish his life by quoting my Lord, and the Prince, and the Countess,

who thus said or did to *him*. The ambitious vulgar show you their spoons, and brooches, and rings, and preserve their cards and compliments. The more cultivated, in their account of their own experience, cull out the pleasing poetic circumstance; the visit to Rome; the man of genius they saw; the brilliant friend they know; still further on, perhaps, the gorgeous landscape, the mountain lights, the mountain thoughts, they enjoyed yesterday,—and so seek to throw a romantic color over their life. But the soul that ascendeth to worship the great God is plain and true; has no rose-color; no fine friends; no chivalry; no adventures; does not want admiration; dwells in the hour that now is, in the earnest experience of the common day,—by reason of the present moment and the mere trifle having become porous to thought, and bibulous of the sea of light.

Converse with a mind that is grandly simple, and literature looks like word-catching. The simplest utterances are worthiest to be written, yet are they so cheap, and so things of course, that in the infinite riches of the soul, it is like gathering a few pebbles off the ground, or bottling a little air in a phial, when the whole earth and the whole atmosphere are ours. The mere author, in such society, is like a pickpocket among gentlemen, who has come in to steal a gold button or a pin. Nothing can pass there, or make you one of the circle, but the casting aside your trappings, and dealing man to man in naked truth, plain confession and omniscient affirmation.

Souls such as these treat you as gods would; walk as gods in the earth, accepting without any admiration your wit, your bounty, your virtue even, say rather your act of duty,—for your virtue they own as their proper blood, royal as themselves, and over-royal, and the father of the gods. But what rebuke their plain fraternal bearing casts on the mutual flattery with which authors solace each other, and wound themselves! These flatter not. I do not wonder that these men go to see Cromwell, and Christina, and Charles II., and James I., and the Grand Turk. For they are in their own elevation the fellows of kings, and

must feel the servile tone of conversation in the world. They must always be a godsend to princes, for they confront them, a king to a king, without ducking or concession, and give a high nature the refreshment and satisfaction of resistance, of plain humanity, of even companionship, and of new ideas. They leave them wiser and superior men. Souls like these make us feel that sincerity is more excellent than flattery. Deal so plainly with man and woman, as to constrain the utmost sincerity, and destroy all hope of trifling with you. It is the highest compliment you can pay. Their "highest praising," said Milton, "is not flattery; and their plainest advice is a kind of praising."

¶ Ineffable is the union of man and God in every act of the soul. The simplest person, who in his integrity worships God, becomes God; yet forever and ever the influx of this better and universal self is new and unsearchable; ever it aspires awe and astonishment. How dear, how soothing to man, arises the idea of God peopling the lonely place, effacing the scars of our mistakes and disappointments! When we have broken our god of tradition, and ceased from our god of rhetoric, then may God fire the heart with his presence. It is the doubling of the heart itself, nay, the infinite enlargement of the heart with a power of growth to a new infinity on every side. It inspires in man an infallible trust. He has not the conviction, but the sight that the best is the true, and may in that thought easily dismiss all particular uncertainties and fears, and adjourn to the sure revelation of time the solution of his private riddles. He is sure that his welfare is dear to the heart of being. In the presence of law to his mind, he is overflowed with a reliance so universal, that it sweeps away all cherished hopes and the most stable projects of mortal condition in its flood. He believes that he cannot escape from his good. The things that are really for thee gravitate to thee. You are running to seek your friend. Let your feet run, but your mind need not. If you do not find him, will you not acquiesce that it is best you should not find him? for there is a power, which,

as it is in you, is in him also, and could therefore very well bring you together, if it were for the best. You are preparing with eagerness to go and render a service to which your talent and your taste invite you, the love of men, and the hope of fame. Has it not occurred to you, that you have no right to go, unless you are equally willing to be prevented from going? O believe, as thou livest, that every sound that is spoken over the round world, which thou oughtest to hear, will vibrate on thine ear. Every proverb, every book, every by-word that belongs to thee for aid or comfort, shall surely come home through open or winding passages. Every friend whom not thy fantastic will, but the great and tender heart in thee craveth, shall lock thee in his embrace. And this, because the heart in thee is the heart of all; not a valve, not a wall, not an intersection is there anywhere in nature, but one blood rolls uninterruptedly, an endless circulation, through all men, as the water of the globe is all one sea, and, truly seen, its tide is one.

Let man, then, learn the revelation of all nature, and all thought to his heart; this, namely, that the Highest dwells with him; that the sources of nature are in his own mind, if the sentiment of duty is there. But if he would know what the great God speaketh, he must "go into his closet and shut the door," as Jesus said. God will not make himself manifest to cowards. He must greatly listen to himself, withdrawing himself from all the accents of other men's devotion. Their prayers even are hurtful to him, until he have made his own. The soul makes no appeal from itself. Our religion vulgarly stands on numbers of believers. Whenever the appeal is made,—no matter how indirectly,—to numbers, proclamation is then and there made, that religion is not. He that finds God a sweet, enveloping thought to him, never counts his company. When I sit in that presence, who shall dare to come in? When I rest in perfect humility, when I burn with pure love, what can Calvin or Swedenborg say?

It makes no difference whether the appeal is to numbers

or to one. The faith that stands on authority is not faith. The reliance on authority measures the decline of religion, the withdrawal of the soul. The position men have given to Jesus now for many centuries of history is a position of authority. It characterizes themselves. It cannot alter the eternal facts. Great is the soul, and plain. It is no flatterer, it is no follower; it never appeals from itself. It always believes in itself. Before the immense possibilities of man, all mere experience, all past biography, however spotless and sainted, shrinks away. Before that holy heaven which our presentiments foreshew us, we cannot easily praise any form of life we have seen or read of. We not only affirm that we have few great men, but, absolutely speaking, that we have none; that we have no history, no record of any character or mode of living that entirely contents us. The saints and demigods whom history worships, we are constrained to accept with a grain of allowance. Though in our lonely hours we draw a new strength out of their memory, yet pressed on our attention, as they are by the thoughtless and customary, they fatigue and invade. The soul gives itself alone, original, and pure to the Lonely, Original, and Pure, who, on that condition, gladly inhabits, leads, and speaks through it. Then is it glad, young, and nimble. It is not wise, but it sees through all things. It is not called religious, but it is innocent. It calls the light its own, and feels that the grass grows and the stone falls by a law inferior to and dependent on its nature. Behold, it saith, I am born into the great, the universal mind. I the imperfect adore my own Perfect. I am somehow receptive of the great soul, and thereby I do overlook the sun and the stars, and feel them to be but the fair accidents and effects which change and pass. More and more the surges of everlasting nature enter into me, and I become public and human in my regards and actions. So come I to live in thoughts, and act with energies which are immortal. Thus revering the soul, and learning, as the ancient said, that "its beauty is immense," man will come to see that the world is the perennial miracle

which the soul worketh, and be less astonished at particular wonders; he will learn that there is no profane history; that all history is sacred; that the universe is represented in an atom, in a moment of time. He will weave no longer a spotted life of shreds and patches, but he will live with a divine unity. He will cease from what is base and frivolous in his life, and be content with all places and any service he can render. He will calmly front the morrow in the negligency of that trust which carries God with it, and so hath already the whole future in the bottom of the heart.

### III

## HISTORY

There is no great and no small  
To the Soul that maketh all:  
And where it cometh, all things are;  
And it cometh every where.

I am owner of the sphere,  
Of the seven stars and the solar year,  
Of Cæsar's hand, and Plato's brain,  
Of Lord Christ's heart, and Shakespeare's strain.

<sup>1</sup> THERE is one mind common to all individual men. Every man is an inlet to the same and to all of the same. He that is once admitted to the right of reason is made a freeman of the whole estate. What Plato has thought, he may think; what a saint has felt, he may feel; what at any time has befallen any man, he can understand. Who hath access to this universal mind, is a party to all that is or can be done, for this is the only and sovereign agent.

<sup>2</sup> Of the works of this mind history is the record. Its genius is illustrated by the entire series of days. Man is explicable by nothing less than all his history. Without hurry, without rest, the human spirit goes forth from the beginning to embody every faculty, every thought, every emotion, which belongs to it, in appropriate events. But always the thought is prior to the fact; all the facts of history pre-exist in the mind as laws. Each law in turn is made by circumstances predominant, and the limits of nature give power to but one at a time. A man is the whole encyclopaedia of facts. The creation of a thousand forests is in one acorn; and Egypt, Greece, Rome, Gaul, Britain, America, lie folded already in the first man. Epoch after epoch, camp, kingdom, empire, republic, democracy, are merely the application of his manifold spirit

to the manifold world.

3 This human mind wrote history, and this must read it. The Sphinx must solve her own riddle. If the whole of history is in one man, it is all to be explained from individual experience. There is a relation between the hours of our life and the centuries of time. As the air I breathe is drawn from the great repositories of nature, as the light on my book is yielded by a star a hundred millions of miles distant, as the poise of my body depends on the equilibrium of centrifugal and centripetal forces, so the hours should be instructed by the ages, and the ages explained by the hours. Of the universal mind each individual man is one more incarnation. All its properties consist in him. Every step in his private experience flashes a light on what great bodies of men have done, and the crises of his life refer to national crises. Every revolution was first a thought in one man's mind; and when the same thought occurs to another man, it is the key to that era. Every reform was once a private opinion; and when it shall be a private opinion again, it will solve the problem of the age. The fact narrated must correspond to something in me to be credible or intelligible. We as we read must become Greeks, Romans, Turks, priest and king, martyr and executioner, must fasten these images to some reality in our secret experience, or we shall see nothing, learn nothing, keep nothing. What befel Asdrubal or Cæsar Borgia is as much an illustration of the mind's powers and depravations as what has befallen us. Each new law and political movement has meaning for you. Stand before each of its tablets and say, "Here is one of my coverings. Under this fantastic, or odious, or graceful mask did my Proteus nature hide itself." This remedies the defect of our too great nearness to ourselves. This throws our own actions into perspective: and as crabs, goats, scorpions, the balance and the waterpot, lose all their meanness when hung as signs in the zodiac, so I can see my own vices without heat in the distant persons of Solomon, Alcibiades, and Catiline.

It is this universal nature which gives worth to particular men and things. Human life as containing this is mysterious and inviolable, and we hedge it round with penalties and laws. All laws derive hence their ultimate reason, all express at last reverence for some command of this supreme illimitable essence. Property also holds of the soul, covers great spiritual facts, and instinctively we at first hold to it with swords and laws, and wide and complex combinations. The obscure consciousness of this fact is the light of all our day, the claim of claims; the plea for education, for justice, for charity, the foundation of friendship and love, and of the heroism and grandeur which belongs to acts of self-reliance. It is remarkable that involuntarily we always read as superior beings. Universal history, the poets, the romancers, do not in their stateliest pictures,—in the sacerdotal, the imperial palaces, in the triumphs of will, or of genius, any where lose our ear, any where make us feel that we intrude, that this is for our betters; but rather is it true, that in their grandest strokes, there we feel most at home. All that Shakespeare says of the king, yonder slip of a boy that reads in the corner feels to be true of himself. We sympathize in the great moments of history, in the great discoveries, the great resistances, the great prosperities, of men;—because there law was enacted, the sea was searched, the land was found, or the blow was struck *for us*, as we ourselves in that place would have done or applauded.

So is it in respect to condition and character. We honor the rich, because they have externally the freedom, power, and grace which we feel to be proper to man, proper to us. So all that is said of the wise man by stoic, or oriental or modern essayist, describes to each man his own idea, describes his unattained but attainable self. All literature writes the character of the wise man. All books, monuments, pictures, conversation, are portraits in which the wise man finds the lineaments he is forming. The silent and the loud praise him, and accost him, and he is stimulated wherever he moves as by personal allusions. A wise and good soul, therefore, never needs

look for allusions personal and laudatory in discourse. He hears the commendation, not of himself, but more sweet, of that character he seeks, in every word that is said concerning character, yea, further, in every fact that befalls,—in the running river and the rustling corn. Praise is looked, homage tendered, love flows from mute nature, from the mountains and the lights of the firmament. These hints, dropped as it were from sleep and night, let us use in broad day. The student is to read history actively and not passively; to esteem his own life the text, and books the commentary. Thus compelled, the muse of history will utter oracles, as never to those who do not respect themselves. I have no expectation that any man will read history aright, who thinks that what was done in a remote age, by men whose names have resounded far, has any deeper sense than what he is doing to-day.

The world exists for the education of each man. There is no age or state of society, or mode of action in history, to which there is not somewhat corresponding in his life. Every thing tends in a most wonderful manner to abbreviate itself and yield its own virtue to him. He should see that he can live all history in his own person. He must sit at home with might and main, and not suffer himself to be bullied by kings or empires, but know that he is greater than all the geography and all the government of the world; he must transfer the point of view from which history is commonly read, from Rome and Athens and London to himself, and not deny his conviction that he is the Court, and if England or Egypt have any thing to say to him, he will try the case; if not, let them forever be silent. He must attain and maintain that lofty sight where facts yield their secret sense, and poetry and annals are alike. The instinct of the mind, the purpose of nature betrays itself in the use we make of the signal narrations of history. Time dissipates to shining ether the solid angularity of facts. No anchor, no cable, no fences avail to keep a fact a fact. Babylon and Troy and Tyre, and even early Rome, are passing

already into fiction. The Garden of Eden, the Sun standing still in Gibeon, is poetry thenceforward to all nations. Who cares what the fact was, when we have thus made a constellation of it to hang in heaven an immortal sign? London and Paris and New York must go the same way. "What is history," said Napoleon, "but a fable agreed upon?" This life of ours is stuck round with Egypt, Greece, Gaul, England, War, Colonization, Church, Court, and Commerce, as with so many flowers and wild ornaments grave and gay. I will not make more account of them. I believe in Eternity. I can find Greece, Palestine, Italy, Spain, and the Islands,—the genius and creative principle of each and of all eras in my own mind.

8 We are always coming up with the facts that have moved us in history in our private experience, and verifying them here. All history becomes subjective; in other words, there is properly no History; only Biography. Every soul must know the whole lesson for itself—must go over the whole ground. What it does not see, what it does not live, it will not know. What the former age has epitomized into a formula or rule for manipular convenience, it will lose all the good of verifying for itself, by means of the wall of that rule. Somewhere or other, some time or other, it will demand and find compensation for that loss by doing the work itself. Ferguson discovered many things in astronomy which had long been known. The better for him.

9 History must be this, or it is nothing. Every law which the state enacts indicates a fact in human nature; that is all. We must in our own nature see the necessary reason of every fact,—see how it could and must be. So stand before every public, every private work; before an oration of Burke, before a victory of Napoleon, before a martyrdom of Sir Thomas More, of Sidney, of Marmaduke Robinson, before a French Reign of Terror, and a Salem hanging of witches, before a fanatic Revival, and the Animal Magnetism in Paris, or in Providence. We assume that we under like influence should be alike affected, and should achieve the like; and we aim to master

intellectually the steps, and reach the same height or the same degradation that our fellow, our proxy has done.

70 All inquiry into antiquity, — all curiosity respecting the pyramids, the excavated cities, Stonehenge, the Ohio Circles, Mexico, Memphis, is the desire to do away this wild, savage and preposterous There or Then, and introduce in its place the Here and the Now. It is to banish the *Not me*, and supply the *Me*. It is to abolish difference, and restore unity. Belzoni digs and measures in the mummy-pits and pyramids of Thebes, until he can see the end of the difference between the monstrous work and himself. When he has satisfied himself, in general and in detail, that it was made by such a person as himself, so armed and so motivated, and to ends to which he himself in given circumstances should also have worked, the problem is then solved; his thought lives along the whole line of temples and sphinxes and catacombs, passes through them all like a creative soul, with satisfaction, and they live again to the mind, or are *now*.

71 A Gothic cathedral affirms that it was done by us, and not done by us. Surely it was by man, but we find it not in our man. But we apply ourselves to the history of its production. We put ourselves into the place and historical state of the builder. We remember the forest-dwellers, the first temples, the adherence to the first type, and the decoration of it as the wealth of the nation increased; the value which is given to wood by carving led to the carving over the whole mountain of stone of a cathedral. When we have gone through this process, and added thereto the Catholic Church, its cross, its music, its processions, its Saints' days and image-worship, we have, as it were, been the man that made the minster; we have seen how it could and must be. We have the sufficient reason.

72 The difference between men is in their principle of association. Some men classify objects by color and size and other accidents of appearance; others by intrinsic likeness, or by the relation of cause and effect. The progress of the intellect consists in the clearer vision of

causes, which over-looks surface-differences. To the poet, to the philosopher, to the saint, all things are friendly and sacred, all events profitable, all days holy, all men divine. For the eye is fastened on the life, and slightes the circumstance. Every chemical substance, every plant, every animal in its growth, teaches the unity of cause, the variety of appearance.

Why, being as we are surrounded by this all-creating nature, soft and fluid as a cloud or the air, should we be such hard pedants, and magnify a few forms? Why should we make account of time, or of magnitude, or of form? The soul knows them not, and genius, obeying its law, knows how to play with them as a young child plays with greybeards and in churches. Genius studies the casual thought, and far back in the womb of things sees the rays parting from one orb, that diverge ere they fall by infinite diameters. Genius watches the monad through all his masks as he performs the metempsychosis of nature. Genius detects through the fly, through the caterpillar, through the grub, through the egg, the constant type of the individual; through countless individuals the fixed species; through many species the genus; through all genera the steadfast type; through all the kingdoms of organized life the eternal unity. Nature is a mutable cloud, which is always and never the same. She casts the same thought into troops of forms, as a poet makes twenty fables with one moral. Beautifully shines a spirit through the bruteness and toughness of matter. Alone omnipotent, it converts all things to its own end. The adamant streams into softest but precise form before it, but, whilst I look at it, its outline and texture are changed altogether. Nothing is so fleeting as form. Yet never does it quite deny itself. In man we still trace the rudiments or hints of all that we esteem badges of servitude in the lower races, yet in him they enhance his nobleness and grace; as Io, in Æschylus, transformed to a cow, offends the imagination, but how changed when as Isis in Egypt she meets Jove, a beautiful woman, with nothing of the metamorphosis left but the lunar horns as the

splendid ornament of her brows!

The identity of history is equally intrinsic, the diversity equally obvious. There is at the surface infinite variety of things; at the center there is simplicity and unity of cause. How many are the acts of one man in which we recognize the same character! See the variety of the sources of our information in respect to the Greek genius. Thus at first we have the *civil history* of that people, as Herodotus, Thucydides, Xenophon, Plutarch have given it—a very sufficient account of what manner of persons they were, and what they did. Then we have the same soul expressed for us again in their *literature*; in poems, drama, and philosophy: a very complete form. Then we have it once more in their *architecture*,—the purest sensuous beauty,—the perfect medium never overstepping the limit of charming propriety and grace. Then we have it once more in *sculpture*,—“the tongue on the balance of expression,” those forms in every action, at every age of life, ranging through all the scale of condition, from god to beast, and never transgressing the ideal serenity, but in convulsive exertion the liege of order and of law. Thus, of the genius of one remarkable people, we have a fourfold representation,—the most various expression of one moral thing: and to the senses what more unlike than an ode of Pindar, a marble Centaur, the Peristyle of the Parthenon, and the last actions of Phocion? Yet do these varied external expressions proceed from one national mind.

Every one must have observed faces and forms which, without any resembling feature, make a like impression on the beholder. A particular picture or copy of verses, if it do not awaken the same train of images, will yet superinduce the same sentiment as some wild mountain walk, although the resemblance is nowise obvious to the senses, but is occult and out of the reach of the understanding. Nature is an endless combination and repetition of a very few laws. She hums the old well-known air through innumerable variations.

Nature is full of a sublime family-likeness throughout

her works. She delights in startling us with resemblances in the most unexpected quarters. I have seen the head of an old sachem of the forest, which at once reminded the eye of a bald mountain summit, and the furrows of the brow suggested the strata of the rock. There are men whose manners have the same essential splendor as the simple and awful sculpture on the friezes of the Parthenon, and the remains of the earliest Greek art. And there are compositions of the same strain to be found in the books of all ages. What is Guido's *Rospigliosi Aurora* but a morning thought, as the horses in it are only a morning cloud. If any one will but take pains to observe the variety of actions to which he is equally inclined in certain modes of mind, and those to which he is averse, he will see how deep is the chain of affinity.

17 A painter told me that nobody could draw a tree without in some sort becoming a tree; or draw a child by studying the outlines of its form merely,—but, by watching for a time his motions and plays, the painter enters his nature, and can then draw him at will in every attitude. So Roos “entered into the inmost nature of a sheep.” I knew a draughtsman employed in a public survey, who found that he could not sketch the rocks until their geological structure was first explained to him.

18 What is to be inferred from these facts but this; that in a certain state of thought is the common origin of very diverse works? It is the spirit and not the fact that is identical. By descending far down into the depths of the soul, and not primarily by a painful acquisition of many manual skills, the artist attains the power of awakening other souls to a given activity.

19 It has been said that “common souls pay with what they do; nobler souls with that which they are.” And why? Because a soul, living from a great depth of being, awakens in us by its actions and words, by its very looks and manners, the same power and beauty that a gallery of sculpture, or of pictures, are wont to animate.

20 Civil history, natural history, the history of art, and the history of literature,—all must be explained from

individual history, or must remain words. There is nothing but is related to us, nothing that does not interest us — kingdom, college, tree, horse, or iron shoe, the roots of all things are in man. It is in the soul that architecture exists. Santa Croce and the Dome of St. Peter's are lame copies after a divine model. Strasburg Cathedral is a material counterpart of the soul of Erwin of Steinbach. The true poem is the poet's mind; the true ship is the ship-builder. In the man, could we lay him open, we should see the sufficient reason for the last flourish and tendril of his work, as every spine and tint in the sea-shell pre-exist in the secreting organs of the fish. The whole of heraldry and of chivalry is in courtesy. A man of fine manners shall pronounce your name with all the ornament that titles of nobility could ever add.

The trivial experience of every day is always verifying some old prediction to us, and converting into things for us also the words and signs which we had heard and seen without heed. Let me add a few examples, such as fall within the scope of every man's observation, of trivial facts which go to illustrate great and conspicuous facts.

A lady, with whom I was riding in the forest, said to me, that the woods always seemed to her *to wait*, as if the genii who inhabit them suspended their deeds until the wayfarer has passed onward. This is precisely the thought which poetry has celebrated in the dance of the fairies, which breaks off on the approach of human feet. The man who has seen the rising moon break out of the clouds at midnight, has been present like an archangel at the creation of light and of the world. I remember that being abroad one summer day, my companion pointed out to me a broad cloud, which might extend a quarter of a mile parallel to the horizon, quite accurately in the form of a cherub as painted over churches, — a round block in the centre, which it was easy to animate with eyes and mouth, supported on either side by wide-stretched symmetrical wings. What appears once in the atmosphere may appear often, and it was undoubtedly the archetype of that familiar ornament. I have seen

in the sky a chain of summer lightning which at once revealed to me that the Greeks drew from nature when they painted the thunderbolt in the hand of Jove. I have seen a snow-drift along the sides of the stone wall which obviously gave the idea of the common architectural scroll to abut a tower.

By simply throwing ourselves into new circumstances we do continually invent anew the orders and the ornaments of architecture, as we see how each people merely decorated its primitive abodes. The Doric temple still presents the semblance of the wooden cabin in which the Dorian dwelt. The Chinese pagoda is plainly a Tartar tent. The Indian and Egyptian temples still betray the mounds and subterranean houses of their forefathers. "The custom of making houses and tombs in the living rock," (says Heeren, in his *Researches on the Ethiopians*), "determined very naturally the principal character of the Nubian Egyptian architecture to the colossal form which it assumed. In these caverns already prepared by nature, the eye was accustomed to dwell on huge shapes and masses, so that when art came to the assistance of nature, it could not move on a small scale without degrading itself. What would statues of the usual size, or neat porches and wings have been, associated with those gigantic halls before which only Colossi could sit as watchmen, or lean on the pillars of the interior?"

The Gothic church plainly originated in a rude adaptation of the forest trees with all their boughs to a festal or solemn arcade, as the bands about the cleft pillars still indicate the green withes that tied them. No one can walk in a road cut through pine woods, without being struck with the architectural appearance of the grove, especially in winter, when the bareness of all other trees shows the low arch of the Saxons. In the woods in a winter afternoon one will see as readily the origin of the stained glass window with which the Gothic cathedrals are adorned, in the colors of the western sky seen through the bare and crossing branches of the forest. Nor can any lover of nature enter the old piles of Oxford and the English

cathedrals without feeling that the forest overpowered the mind of the builder, and that his chisel, his saw, and plane still reproduced its ferns, its spikes of flowers, its locust, its pine, its oak, its fir, its spruce.

✓ The Gothic cathedral is a blossoming in stone subdued by the insatiable demand of harmony in man. The mountain of granite blooms into an eternal flower with the lightness and delicate finish as well as the aerial proportions and perspective of vegetable beauty.

✓ In like manner all public facts are to be individualized, all private facts are to be generalized. Then at once History becomes fluid and true, and Biography deep and sublime. As the Persian imitated in the slender shafts and capitals of his architecture the stem and flower of the lotus and palm, so the Persian court in its magnificent era never gave over the Nomadism of its barbarous tribes, but traveled from Ecbatana, where the spring was spent, to Susa in summer, and to Babylon for the winter.

In the early history of Asia and Africa, Nomadism and Agriculture are the two antagonistic facts. The geography of Asia and of Africa necessitated a nomadic life. But the nomads were the terror of all those whom the soil or the advantages of a market had induced to build towns. Agriculture therefore was a religious injunction because of the perils of the state from nomadism. And in these late and civil countries of England and America, the contest of these propensities still fights out the old battle in each individual. We are all rovers and all fixtures by turns, and pretty rapid turns. The nomads of Africa are constrained to wander by the attacks of the gad-fly, which drives the cattle mad, and so compels the tribe to emigrate in the rainy season and drive off the cattle to the higher sandy regions. The nomads of Asia follow the pasturage from month to month. In America and Europe the nomadism is of trade and curiosity. A progress certainly from the gad-fly of Astaboras to the Angelo and Italomania of Boston Bay. The difference between men in this respect is the faculty of rapid domestication, the power to find his chair and bed everywhere, which one man has,

and another has not. Some men have so much of the Indian left, have constitutionally such habits of accommodation, that at sea, or in the forest, or in the snow, they sleep as warm, and dine with as good appetite, and associate as happily, as in their own house. And to push this old fact still one degree nearer, we may find it a representative of a permanent fact in human nature. The intellectual nomadism is the faculty of objectiveness, or of eyes which everywhere feed themselves. Who hath such eyes, everywhere falls into easy relations with his fellow-men. Every man, every thing is a prize, a study, a property to him, and this love smooths his brow, joins him to men, and makes him beautiful and beloved in their sight. His house is a wagon; he roams through all latitudes as easily as a Calmuc.

28 Every thing the individual sees without him, corresponds to his states of mind, and every thing is in turn intelligible to him, as his onward thinking leads him into the truth to which that fact or series belongs.

29 The primeval world, the Fore-World, as the Germans say, — I can dive to it in myself as well as grope for it with researching fingers in catacombs, libraries, and the broken reliefs and torsos of ruined villas.

30 What is the foundation of that interest all men feel in Greek history, letters, art, and poetry, in all its periods, from the heroic or Homeric age, down to the domestic life of the Athenians and Spartans, four or five centuries later? This period draws us because we are Greeks. It is a state through which every man in some sort passes. The Grecian state is the era of the bodily nature, the perfection of the senses, — of the spiritual nature unfolded in strict unity with the body. In it existed those human forms which supplied the sculptor with his models of Hercules, Phœbus, and Jove; not like the forms abounding in the streets of modern cities, wherein the face is a confused blur of features, but composed of incorrupt, sharply defined and symmetrical features, whose eye-sockets are so formed that it would be impossible for such eyes to squint, and take furtive glances on this side

and on that, but they must turn the whole head.

37 The manners of that period are plain and fierce. The reverence exhibited is for personal qualities, courage, address, self-command, justice, strength, swiftness, a loud voice, a broad chest. Luxury is not known, nor elegance. A sparse population and want make every man his own valet, cook, butcher, and soldier; and the habit of supplying his own needs educates the body to wonderful performances. Such are the Agamemnon and Diomed of Homer, and not far different is the picture Xenophon gives of himself and his compatriots in the Retreat of the Ten Thousand. "After the army had crossed the river Teleboas in Armenia, there fell much snow, and the troops lay miserably on the ground, covered with it. But Xenophon arose naked, and taking an axe, began to split wood; whereupon others arose and did the like." Throughout his army seemed to be a boundless liberty of speech. They quarrel for plunder, they wrangle with the generals on each new order, and Xenophon is as sharp-tongued as any, and sharper-tongued than most, and so gives as good as he gets. Who does not see that this is a gang of great boys, with such a code of honor and such lax discipline as great boys have?

The costly charm of the ancient tragedy, and indeed of all the old literature, is, that the persons speak simply—speak as persons who have great good sense without knowing it, before yet the reflective habit has become the predominant habit of the mind. Our admiration of the antique is not admiration of the old, but of the natural. The Greeks are not reflective but perfect in their senses, perfect in their health, with the finest physical organization in the world. Adults acted with the simplicity and grace of boys. They made vases, tragedies, and statues such as healthy senses should—that is, in good taste. Such things have continued to be made in all ages, and are now, wherever a healthy physique exists; but, as a class, from their superior organization, they have surpassed all. They combine the energy of manhood with the engaging unconsciousness of childhood. Our reverence for

them is our reverence for childhood. Nobody can reflect upon an unconscious act with regret or contempt. Bard or hero cannot look down on the word or gesture of a child. It is as great as they. The attraction of these manners is, that they belong to man, and are known to every man in virtue of his being once a child; beside that always there are individuals who retain these characteristics. A person of childlike genius and inborn energy is still a Greek, and revives our love of the muse of Hellas. A great boy, a great girl, with good sense, is a Greek. Beautiful is the love of nature in the Philoctetes. But in reading those fine apostrophes to sleep, to the stars, rocks, mountains, and waves, I feel time passing away as an ebbing sea. I feel the eternity of man, the identity of his thought. The Greek had, it seems, the same fellow beings as I. The sun and moon, water and fire, met his heart precisely as they meet mine. Then the vaunted distinction between Greek and English, between Classic and Romantic schools, seems superficial and pedantic. When a thought of Plato becomes a thought to me,—when a truth that fired the soul of Pindar fires mine, time is no more. When I feel that we two meet in a perception, that our two souls are tinged with the same hue, and do, as it were, run into one, why should I measure degrees of latitude, why should I count Egyptian years?

13 The student interprets the age of chivalry by his own age of chivalry, and the days of maritime adventure and circumnavigation by quite parallel miniature experiences of his own. To the sacred history of the world he has the same key. When the voice of a prophet out of the deeps of antiquity merely echoes to him a sentiment of his own infancy, a prayer of his own youth, he then pierces to the truth through all the confusion of tradition and the caricature of institutions.

14 Rare, extravagant spirits come by us at intervals, who disclose to us new facts in nature. I see that men of God have always, from time to time, walked among men, and made their commission felt in the heart and soul of the commonest hearer. Hence, evidently, the tripod, the

priest, the priestess inspired by the divine afflatus.

Jesus astonishes and overpowers sensual people. They cannot unite him to history, or reconcile him with themselves. As they come to revere their intuitions and aspire to live holily, their own piety explains every fact, every word.

How easily these old worships of Moses, of Zoroaster, of Menu, of Socrates, domesticate themselves in the mind! I cannot find any antiquity in them. They are mine as much as theirs.

Then I have seen the first monks and anchorets without crossing seas or centuries. More than once some individual has appeared to me with such negligence of labor and such commanding contemplation, a haughty beneficiary, begging in the name of God, as made good to the nineteenth century Simeon the Stylite, the Thebais, and the first Capuchins.

The priestcraft of the East and West, of the Magian, Brahmin, Druid and Inca, is expounded in the individual's private life. The cramping influence of a hard formalist on a young child in repressing his spirits and courage, paralyzing the understanding, and that without producing indignation, but only fear and obedience, and even much sympathy with the tyranny,—is a familiar fact explained to the child when he becomes a man, only by seeing that the oppressor of his youth is himself a child tyrannized over by those names and words and forms, of whose influence he was merely the organ to the youth. The fact teaches him how Belus was worshipped, and how the pyramids were built, better than the discovery by Champollion of the names of all the workmen and the cost of every tile. He finds Assyria and the Mounds of Cholula at his door, and himself has laid the courses.

Again, in that protest which each considerate person makes against the superstition of his times, he reacts step for step the part of old reformers, and in the search after truth finds like them new perils to virtue. He learns again what moral vigor is needed to supply the girdle of a superstition. A great licentiousness treads on the

heels of a reformation. How many times in the history of the world has the Luther of the day had to lament the decay of piety in his own household! "Doctor," said his wife to Martin Luther one day, "how is it that whilst subject to papacy we prayed so often and with such fervour, whilst now we pray with the utmost coldness and very seldom?"

The advancing man discovers how deep a property he hath in all literature, — in all fable as well as in all history. He finds that the poet was no odd fellow who described strange and impossible situations, but that universal man wrote by his pen a confession true for one and true for all. His own secret biography he finds in lines wonderfully intelligible to him, yet dotted down before he was born. One after another he comes up in his private adventures with every fable of Æsop, of Homer, of Hafiz, of Ariosto, of Chaucer, of Scott, and verifies them with his own head and hands.

The beautiful fables of the Greeks, being proper creations of the Imagination and not of the Fancy, are universal verities. What a range of meanings and what perpetual pertinence has the story of Prometheus! Beside its primary value as the first chapter of the history of Europe (the mythology thinly veiling authentic facts, the invention of the mechanic arts, and the migration of colonies), it gives the history of religion with some closeness to the faith of later ages. Prometheus is the Jesus of the old mythology. He is the friend of man; stands between the unjust "justice" of the Eternal Father, and the race of mortals; and readily suffers all things on their account. But where it departs from the Calvinistic Christianity, and exhibits him as the defier of Jove, it represents a state of mind which readily appears wherever the doctrine of Theism is taught in a crude, objective form, and which seems the self-defence of man against this untruth, namely, a discontent with the believed fact that a God exists, and a feeling that the obligation of reverence is onerous. It would steal, if it could, the fire of the Creator, and live apart from him, and independent

of him. The Prometheus Vincetus is the romance of scepticism. Not less true to all time are all the details of that stately apologue. Apollo kept the flocks of Admetus, said the poets. Every man is a divinity in disguise, a god playing the fool. It seems as if heaven had sent its insane angels into our world as to an asylum, and here they will break out into their native music and utter at intervals the words they have heard in heaven; then the mad fit returns, and they mope and wallow like dogs. When the gods come among them, they are not known. Jesus was not; Socrates and Shakespeare were not. Antæus was suffocated by the gripe of Hercules, but every time he touched his mother earth, his strength was renewed. Man is the broken giant, and in all his weakness, both his body and his mind are invigorated by habits of conversation with nature. The power of music, the power of poetry to unfix, and, as it were, clap wings to all solid nature, interprets the riddle of Orpheus, which was to his childhood an idle tale. The philosophical perception of identity through endless mutations of form makes him know the Proteus. What else am I who laughed or wept yesterday, who slept last night like a corpse, and this morning stood and ran? And what see I on any side but the transmigrations of Proteus? I can symbolize my thought by using the name of any creature, of any fact, because every creature is man agent or patient. Tantalus is but a name for you and me. Tantalus means the impossibility of drinking the waters of thought which are always gleaming and waving within sight of the soul. The transmigration of souls: that too is no fable. I would it were; but men and women are only half human. Every animal of the barn-yard, the field and the forest, of the earth and of the waters that are under the earth, has contrived to get a footing, and to leave the print of its features and form in some one or other of these upright, heaven-facing speakers. Ah, brother, hold fast to the man and awe the beast; stop the ebb of thy soul—ebbing downward into the forms into whose habits thou hast now for many years slid. As near and proper to us

is also that old fable of the Sphinx, who was said to sit in the roadside and put riddles to every passenger. If the man could not answer, she swallowed him alive. If he could solve the riddle, the Sphinx was slain. What is our life but an endless flight of winged facts or events? In splendid variety these changes come, all putting questions to the human spirit. Those men who cannot answer by a superior wisdom these facts or questions of time, serve them. Facts encumber them, tyrannize over them, and make the men of routine the men of *sense*, in whom a literal obedience to facts has extinguished every spark of that light by which man is truly man. But if the man is true to his better instincts or sentiments, and refuses the dominion of facts, as one that comes of a higher race, remains fast by the soul and sees the principle, then the facts fall aptly and supple into their places; they know their master, and the meanest of them glorifies him.

See in Goethe's *Helena* the same desire that every word should be a thing. These figures, he would say, these Chirons, Griffins, Phorkyas, Helen, and Leda, are somewhat, and do exert a specific influence on the mind. So far then are they eternal entities, as real to-day as in the first Olympiad. Much revolving them, he writes out freely his humor, and gives them body to his own imagination. And although that poem be as vague and fantastic as a dream, yet it is much more attractive than the more regular dramatic pieces of the same author, for the reason that it operates a wonderful relief to the mind from the routine of customary images,—awakens the reader's invention and fancy by the wild freedom of the design, and by the unceasing succession of brisk shocks of surprise.

The universal nature, too strong for the petty nature of the bard, sits on his neck and writes through his hand; so that when he seems to vent a mere caprice and wild romance, the issue is an exact allegory. Hence Plato said that "poets utter great and wise things which they do not themselves understand." All the fictions of the Middle Age explain themselves as a masked or frolic expression of that which, in grave earnest, the mind of that period

toiled to achieve. Magic, and all that is ascribed to it, is manifestly a deep presentiment of the powers of science. The shoes of swiftness, the sword of sharpness, the power of subduing the elements, of using the secret virtues of minerals, of understanding the voices of birds, are the obscure efforts of the mind in a right direction. The preternatural prowess of the hero, the gift of perpetual youth, and the like, are alike the endeavor of the human spirit "to bend the shows of things to the desires of the mind."

In *Perceforest* and *Amadis de Gaul*, a garland and a rose bloom on the head of her who is faithful, and fade on the brow of the inconstant. In the story of the *Boy and the Mantle*, even a mature reader may be surprised with a glow of virtuous pleasure at the triumph of the gentle *Genelas*; and, indeed, all the postulates of elfin annals, that the Fairies do not like to be named; that their gifts are capricious and not to be trusted; that who seeks a treasure must not speak; and the like, I find true in *Concord*, however they might be in *Cornwall* or *Bretagne*.

Is it otherwise in the newest romance? I read the *Bride of Lammermoor*. Sir *William Ashton* is a mask for a vulgar temptation, *Ravenswood Castle*, a fine name for proud poverty, and the foreign mission of state only a *Bunyan* disguise for honest industry. We may all shoot a wild bull that would toss the good and beautiful, by fighting down the unjust and sensual. *Lucy Ashton* is another name for fidelity, which is always beautiful and always liable to calamity in this world.

But along with the civil and metaphysical history of man, another history goes daily forward—that of the external world,—in which he is not less strictly implicated. He is the compend of time: he is also the correlative of nature. The power of man consists in the multitude of his affinities, in the fact that his life is intertwined with the whole chain of organic and inorganic being. In the age of the *Cæsars*, out from the Forum at Rome proceeded the great highways north, south, east, west, to the center of every province of the empire, making each market-town of Persia, Spain, and Britain, pervious to the soldiers of the capital:

so out of the human heart go, as it were, highways to the heart of every object in nature, to reduce it under the dominion of man. A man is a bundle of relations, a knot of roots, whose flower and fruitage is the world. All his faculties refer to natures out of him. All his faculties predict the world he is to inhabit, as the fins of the fish foreshow that water exists, or the wings of an eagle in the egg presuppose a medium like air. Insulate, and you destroy him. He cannot live without a world. Put Napoleon in an island-prison, let his faculties find no men to act on, no Alps to climb, no stake to play for, and he would beat the air and appear stupid. Transport him to large countries, dense population, complex interests, and antagonist power, and you shall see that the man Napoleon, bounded, that is, by such a profile and outline, is not the virtual Napoleon. This is but Talbot's shadow;

"His substance is not here:

For what you see is but the smallest part,

And least proportion of humanity;

But were the whole frame here,

It is of such a spacious, lofty pitch,

Your roof were not sufficient to contain it." — *Henry VI.*

Columbus needs a planet to shape his course upon. Newton and Laplace need myriads of ages and thickstrown celestial areas. One may say a gravitating solar system is already prophesied in the nature of Newton's mind. Not less does the brain of Davy and Gay-Lussac from childhood, exploring always the affinities and repulsions of particles, anticipate the laws of organization. Does not the eye of the human embryo predict the light? the ear of Handel predict the witchcraft of harmonic sound? Do not the constructive fingers of Watt, Fulton, Whittemore, Arkwright predict the fusible, hard, and temperable texture of metals, the properties of stone, water, and wood? the lovely attributes of the maiden child predict the refinements and decorations of civil society? Here also we are reminded of the action of man on man. A mind might ponder its thought for ages, and not gain so much self-knowledge as the passion of love shall teach it in a day. Who knows

himself before he has been thrilled with indignation at an outrage, or has heard an eloquent tongue, or has shared the throb of thousands in a national exultation or alarm? No man can antedate his experience, or guess what faculty or feeling a new object shall unlock, any more than he can draw to-day the face of a person whom he shall see to-morrow for the first time.

I will not now go behind the general statement to explore the reason of this correspondency. Let it suffice that in the light of these two facts, namely, that the mind is One, and that nature is its correlative, history is to be read and written.

Thus in all ways does the soul concentrate and reproduce its treasures for each pupil, for each new-born man. He too shall pass through the whole cycle of experience. He shall collect into a focus the rays of nature. History no longer shall be a dull book. It shall walk incarnate in every just and wise man. You shall not tell me by languages and titles a catalogue of the volumes you have read. You shall make me feel what periods you have lived. A man shall be the Temple of Fame. He shall walk, as the poets have described that goddess, in a robe painted all over with wonderful events and experiences;—his own form and features by their exalted intelligence shall be that variegated vest. I shall find in him the Foreworld; in his childhood the Age of Gold; the Apples of Knowledge; the Argonautic Expedition; the calling of Abraham; the building of the Temple; the Advent of Christ; Dark Ages; the Revival of Letters; the Reformation; the discovery of new lands, the opening of new sciences, and new regions in man. He shall be the priest of Pan, and bring with him into humble cottages the blessing of the morning stars and all the recorded benefits of heaven and earth.

Is there somewhat overweening in this claim? Then I reject all I have written; for what is the use of pretending to know what we know not? But it is the fault of our rhetoric that we cannot strongly state one fact without seeming to belie some other. I hold our actual knowledge very cheap. Hear the rats in the wall, see the lizard on the

fence, the fungus under foot, the lichen on the log. What do I know sympathetically, morally, of either of these worlds of life? As long as the Caucasian man—perhaps longer—these creatures have kept their counsel beside him, and there is no record of any word or sign that has passed from one to the other. Nay, what does history yet record of the metaphysical annals of man? What light does it shed on those mysteries which we hide under the names Death and Immortality? Yet every history should be written in a wisdom which divined the range of our affinities, and looked at facts as symbols. I am ashamed to see what a shallow village-tale our so-called History is. How many times we must say Rome, and Paris, and Constantinople. What does Rome know of rat and lizard? What are Olympiads and Consulates to these neighboring systems of being? Nay, what food or experience or succor have they for the Esquimaux seal-hunter, for the Kanàka in his canoe, for the fisherman, the stevedore, the porter?

5/ Broader and deeper we must write our annals—from an ethical reformation, from an influx of the ever-new, ever-sanative conscience—if we would trulier express our central and wide-related nature, instead of this old chronology of selfishness and pride to which we have too long lent our eyes. Already that day exists for us, shines in on us at unawares; but the path of science and of letters is not the way into nature, but from it rather. The idiot, the Indian, the child, and the unschooled farmer's boy, come much nearer to these,—understand them better than the dissector or the antiquary.

## IV

### EXPERIENCE

The lords of life, the lords of life, —  
I saw them pass  
In their own guise,  
Like and unlike,  
Portly and grim,  
Use and Surprise,  
Surface and Dream,  
Succession swift, and spectral Wrong,  
Temperament without a tongue,  
And the inventor of the game  
Omnipresent without name; —  
Some to see, some to be guessed,  
They marched from east to west:  
Little man, least of all,  
Among the legs of his guardians tall,  
Walked about with puzzled look: —  
Him by the hand dear nature took;  
Dearest nature, strong and kind,  
Whispered, "Darling, never mind!  
To-morrow they will wear another face,  
The founder thou! these are thy race!"

WHERE do we find ourselves? In a series, of which we do not know the extremes, and believe that it has none. We wake, and find ourselves on a stair: there are stairs below us, which we seem to have ascended; there are stairs above us, many a one, which go upward and out of sight. But the Genius which, according to the old belief, stands at the door by which we enter, and gives us the lethe to drink, that we may tell no tales, mixed the cup too strongly, and we cannot shake off the lethargy now at noon-day. Sleep lingers all our lifetime about our eyes, as night hovers all day in the boughs of the fir-tree. All things swim and glimmer. Our life is not so much threatened as our perception. Ghost-like we glide through nature, and should not know

our place again. Did our birth fall in some fit of indigence and frugality in nature, that she was so sparing of her fire and so liberal of her earth, that it appears to us that we lack the affirmative principle, and though we have health and reason, yet we have no superfluity of spirit for new creation? We have enough to live and bring the year about, but not an ounce to impart or to invest. Ah, that our Genius were a little more of a genius! We are like millers on the lower levels of a stream, when the factories above them have exhausted the water. We, too, fancy that the upper people must have raised their dams.

If any of us knew what we were doing, or where we are going, then when we think we best know! We do not know to-day whether we are busy or idle. In times, when we thought ourselves indolent, we have afterwards discovered, that much was accomplished, and much was begun in us. All our days are so unprofitable while they pass, that 'tis wonderful where or when we ever got any thing of this which we call wisdom, poetry, virtue. We never got it on any dated calendar day. Some heavenly days must have been intercalated somewhere, like those that Hermes won with dice of the Moon, that Osiris might be born. It is said, all martyrdoms looked mean when they were suffered. Every ship is a romantic object, except that we sail in. Embark, and the romance quits our vessel, and hangs on every other sail in the horizon. Our life looks trivial, and we shun to record it. Men seem to have learned of the horizon the art of perpetual retreating and reference. "Yonder uplands are rich pasturage, and my neighbor has fertile meadow, but my field," says the querulous farmer, 'only holds the world together.' I quote another man saying; unluckily, that other withdraws himself in the same way, and quotes me. 'Tis a trick of nature thus to degrade to-day; a good deal of buzz, and somewhere a result slipped magically in. Every roof is agreeable to the eye, until it is lifted: then we find tragedy, and moaning women, and hard-eyed husbands, and deluges of lethe, and the men ask, "What's the news?" as if the old were so bad. How many individuals can we count in society?

how many actions? how many opinions? So much of our time is preparation, so much is routine, and so much retrospect, that the pith of each man's genius contracts itself to a very few hours. The history of literature—take the net result of Tiraboschi, Warton, or Schlegel—is a sum of very few ideas, and of very few original tales,—all the rest being variations of these. So in this great society wide lying around us, a critical analysis would find very few spontaneous actions. It is almost all custom and gross sense. There are even few opinions, and these seem organic in the speakers, and do not disturb the universal necessity.

What opium is instilled into all disaster! It shows formidable as we approach it, but there is at last no rough rasping friction, but the most slippery, sliding surfaces. We fall soft on a thought. *Ate Dea* is gentle,

"Over men's heads walking aloft,  
With tender feet treading so soft."

People grieve and bemoan themselves, but it is not half so bad with them as they say. There are moods in which we court suffering, in the hope that here, at least, we shall find reality, sharp peaks and edges of truth. But it turns out to be scene-painting, and counterfeit. The only thing grief has taught me, is to know how shallow it is. That, like all the rest, plays about the surface, and never introduces me into the reality, for contact with which, we would even pay the costly price of sons and lovers. Was it Boscovich who found out that bodies never come in contact? Well, souls never touch their objects. An innavigable sea washes with silent waves between us and the things we aim at and converse with. Grief, too, will make us idealists. In the death of my son, now more than two years ago, I seem to have lost a beautiful estate,—no more. I cannot get it nearer to me. If to-morrow I should be informed of the bankruptcy of my principal debtors, the loss of my property would be a great inconvenience to me, perhaps, for many years; but it would leave me as it found me,—neither better nor worse. So it is with this calamity:

it does not touch me: something which I fancied was a part of me,—which could not be torn away without tearing me, nor enlarged without enriching me, falls off from me, and leaves no scar. It was caducous. I grieve that grief can teach me nothing, nor carry me one step into real nature. The Indian who was laid under a curse, that the wind should not blow on him, nor water flow to him, nor fire burn him, is a type of us all. The dearest events are summer rain, and we the Para coats that shed every drop. Nothing is left us now but death. We look to that with a grim satisfaction, saying, there at least is reality that will not dodge us.

I take this evanescence and lubricity of all objects, which lets them slip through our fingers then when we clutch hardest, to be the most unhandsome part of our condition. Nature does not like to be observed, and likes that we should be her fools and playmates. We may have the sphere for our cricket-ball, but not a berry for our philosophy. Direct strokes she never gave us power to make; all our blows glance, all our hits are accidents. Our relations to each other are oblique and casual.

Dream delivers us to dream, and there is no end to illusion. Life is a train of moods like a string of beads, and, as we pass through them, they prove to be many-colored lenses which paint the world their own hue, and each shows only what lies in its focus. From the mountain you see the mountain. We animate what we can, and we see only what we animate. Nature and books belong to the eyes that see them. It depends on the mood of the man, whether he shall see the sunset or the fine poem. There are always sunsets, and there is always genius; but only a few hours so serene that we can relish nature or criticism. The more or less depends on structure or temperament. Temperament is the iron wire on which the beads are strung. Of what use is fortune or talent to a cold and defective nature? Who cares what sensibility or discrimination a man has at some time shown, if he falls asleep in his chair? or if he laugh and giggle? or if he apologize? or is affected with

egotism? or thinks of his dollar? or cannot go by food? or has gotten a child in his boyhood? Of what use is genius, if the organ is too convex or too concave, and cannot find a focal distance within the actual horizon of human life? Of what use, if the brain is too cold or too hot, and the man does not care enough for results, to stimulate him to experiment, and hold him up in it? or if the web is too finely woven, too irritable by pleasure and pain, so that life stagnates from too much reception, without due outlet? Of what use to make heroic vows of amendment, if the same old law-breaker is to keep them? What cheer can the religious sentiment yield, when that is suspected to be secretly dependent on the seasons of the year, and the state of the blood? I knew a witty physician who found theology in the biliary duct, and used to affirm that if there was disease in the liver, the man became a Calvinist, and if that organ was sound he became a Unitarian. Very mortifying is the reluctant experience that some unfriendly excess or imbecility neutralizes the promise of genius. We see young men who owe us a new world, so readily and lavishly they promise, but they never acquit the debt; they die young and dodge the account: or if they live, they lose themselves in the crowd.

Temperament also enters fully into the system of illusions, and shuts us in a prison of glass which we cannot see. There is an optical illusion about every person we meet. In truth, they are all creatures of given temperament, which will appear in a given character, whose boundaries they will never pass: but we look at them, they seem alive, and we presume there is impulse in them. In the moment, it seems impulse; in the year, in the lifetime, it turns out to be a certain uniform tune which the revolving barrel of the music-box must play. Men resist the conclusion in the morning, but adopt it as the evening wears on, that temperament prevails over every thing of time, place, and condition, and is inconsumable in the flames of religion. Some modifications the moral sentiment avails to impose, but the individual texture holds its dominion, if not to bias the moral judgments, yet to fix the measure of activity and of

enjoyment.

I thus express the law as it is read from the platform of ordinary life, but must not leave it without noticing the capital exception. For temperament is a power which no man willingly hears anyone praise but himself. On the platform of physics, we cannot resist the contracting influences of so-called science. Temperament puts all divinity to rout. I know the mental proclivity of physicians. I hear the chuckle of the phrenologists. Theoretic kidnappers and slave-drivers, they esteem each man the victim of another, who winds him round his finger by knowing the law of his being, and by such cheap sign-boards as the color of his beard, or the slope of his occiput, read the inventory of his fortunes and character. The grossest ignorance does not disgust like this impudent knowingness. The physicians say, they are not materialists; but they are:—Spirit is matter reduced to an extreme thinness: O *so thin!*—But the definition of *spiritual* should be, *that which is its own evidence*. What notions do they attach to love! what to religion! One would not willingly pronounce these words in their hearing, and give them the occasion to profane them. I saw a gracious gentleman who adapts his conversation to the form of the head of the man he talks with! I had fancied that the value of life lay in its inscrutable possibilities; in the fact, that I never know, in addressing myself to a new individual, what may befall me. I carry the keys of my castle in my hand, ready to throw them at the feet of my lord, whenever and in what disguise soever he shall appear. I know he is in the neighborhood, hidden among vagabonds. Shall I preclude my future, by taking a high seat, and kindly adapting my conversation to the shape of heads? When I come to that, the doctors shall buy me for a cent.—“But, sir, medical history; the report to the Institute; the proven facts!”—I distrust the facts and the inferences. Temperament is the veto or limitation-power in the constitution, very justly applied to restrain an opposite excess in the constitution, but absurdly offered as a bar to original equity. When virtue is in presence, all subordinate powers sleep.

On its own level, or in the view of nature, temperament is final. I see not, if one be once caught in this trap of so-called sciences, any escape for the man from the links of the chain of physical necessity. Given such an embryo, such a history must follow. On this platform, one lives in a sty of sensualism, and would soon come to suicide. But it is impossible that the creative power should exclude itself. Into every intelligence there is a door which is never closed, through which the creator passes. The intellect, seeker of absolute truth, or the heart, lover of absolute good, intervenes for our succor, and at one whisper of these high powers, we awake from ineffectual struggles with this nightmare. We hurl it into its own hell, and cannot again contract ourselves to so base a state.

The secret of the illusoriness is in the necessity of a succession of moods or objects. Gladly we would anchor, but the anchorage is quicksand. This onward trick of nature is too strong for us: *Pero si muove*. When, at night, I look at the moon and stars, I seem stationary, and they to hurry. Our love of the real draws us to permanence, but health of body consists in circulation, and sanity of mind in variety or facility of association. We need change of objects. Dedication to one thought is quickly odious. We house with the insane, and must humor them; then conversation dies out. Once I took such delight in Montaigne, that I thought I should not need any other book; before that, in Shakspeare; then in Plutarch; then in Plotinus; at one time in Bacon; afterwards in Goethe; even in Bettine; but now I turn the pages of either of them languidly, whilst I still cherish their genius. So with pictures; each will bear an emphasis of attention once, which it cannot retain, though we fain would continue to be pleased in that manner. How strongly I have felt of pictures, that when you have seen one well, you must take your leave of it; you shall never see it again. I have had good lessons from pictures, which I have since seen without emotion or remark. A deduction must be made from the opinion, which even the wise express of a new book or occurrence. Their opinion gives me tidings of their mood, and some vague guess at

the new fact, but is nowise to be trusted as the lasting relation between that intellect and that thing. The child asks,—“Mama, why don’t I like the story as well as when you told it me yesterday?” Alas! child, it is even so with the oldest cherubim of knowledge. But will it answer thy question to say,—Because thou wert born to a whole, and this story is a particular? The reason of the pain this discovery causes us (and we make it late in respect to works of art and intellect), is the plaint of tragedy which murmurs from it in regard to persons, to friendship and love.

That immobility and absence of elasticity which we find in the arts, we find with more pain in the artist. There is no power of expansion in man. Our friends early appear to us representatives of certain ideas, which they never pass or exceed. They stand on the brink of the ocean of thought and power, but they never take the single step that would bring them there. A man is like a bit of Labrador spar, which has no lustre as you turn it in your hand, until you come to a particular angle; then it shows deep and beautiful colors. There is no adaptation or universal applicability in men, but each has his special talent, and the mastery of successful men consists in adroitly keeping themselves where and when that turn shall be oftenest to be practised. We do what we must, and call it by the best names we can, and would fain have the praise of having intended the result which ensues. I cannot recall any form of man who is not superfluous sometimes. But is not this pitiful? Life is not worth the taking, to do tricks in.

Of course, it needs the whole society, to give the symmetry we seek. The parti-colored wheel must revolve very fast to appear white. Something is learned too by conversing with so much folly and defect. In fine, whoever loses, we are always of the gaining party. Divinity is behind our failures and follies also. The plays of children are nonsense, but very educative nonsense. So is it with the largest and solemnest things, with commerce, government, church, marriage, and so with the history of every man’s bread, and the ways by which he is to come by it. Like

a bird which alights nowhere, but hops perpetually from bough to bough, is the Power which abides in no man and in no woman, but for a moment speaks from this one, and for another moment from that one.

But what help from these fineries or pedantries; What help from thought? Life is not dialectics. We, I think, in these times, have had lessons enough of the futility of criticism. Our young people have thought and written much on labor and reform, and for all that they have written, neither the world nor themselves have got on a step. Intellectual tasting of life will not supersede muscular activity. If a man should consider the nicety of the passage of a piece of bread down his throat, he would starve. At Education-Farm, the noblest theory of life sat on the noblest figures of young men and maidens, quite powerless and melancholy. It would not rake or pitch a ton of hay; it would not rub down a horse; and the men and maidens it left pale and hungry. A political orator wittily compared our party promises to western roads, which opened stately enough, with planted trees on either side, to tempt the traveller, but soon became narrow and narrower, and ended in a squirrel-track, and ran up a tree. So does culture with us; it ends in head-ache. Unspeakably sad and barren does life look to those, who a few months ago were dazzled with the splendor of the promise of the times. "There is now no longer any right course of action, nor any self-devotion left among the Iranis." Objections and criticism we have had our fill of. There are objections to every course of life and action, and the practical wisdom infers an indifference, from the omnipresence of objection. The whole frame of things preaches indifference. Do not craze yourself with thinking, but go about your business anywhere. Life is not intellectual or critical, but sturdy. Its chief good is for well-mixed people who can enjoy what they find without question. Nature hates peeping, and our mothers speak her very sense when they say, "Children eat your victuals, and say no more of it." To fill the hour,—that is happines; to fill the hour, and leave no crevice for a repentance or an approval. We live amid surfaces, and

the true art of life is to skate well on them. Under the oldest, mouldiest conventions, a man of native force prospers just as well as in the newest world, and that by skill of handling and treatment. He can take hold anywhere. Life itself is a mixture of power and form, and will not bear the least excess of either. To finish the moment, to find the journey's end in every step of the road, to live the greatest number of good hours, is wisdom. It is not the part of men, but of fanatics, or of mathematicians, if you will, to say, that, the shortness of life considered, it is not worth caring whether for so short a duration we were sprawling in want, or sitting high. Since our office is with moments, let us husband them. Five minutes of to-day are worth as much to me as five minutes in the next millennium. Let us be poised, and wise, and our own to-day. Let us treat the men and women well: treat them as if they were real: perhaps they are. Men live in their fancy, like drunkards whose hands are too soft and tremulous for successful labor. It is a tempest of fancies, and the only ballast I know, is a respect to the present hour. Without any shadow of doubt, amidst this vertigo of shows and politics, I settle myself ever the firmer in the creed, that we should not postpone and refer and wish, but do broad justice where we are, by whomsoever we deal with, accepting our actual companions and circumstances, however humble or odious, as the mystic officials to whom the universe has delegated its whole pleasure for us. If these are mean and malignant, their contentment, which is the last victory of justice, is a more satisfying echo to the heart, than the voice of poets and the casual sympathy of admirable persons. I think that however a thoughtful man may suffer from the defects and absurdities of his company, he cannot without affectation deny to any set of men and women, a sensibility to extraordinary merit. The coarse and frivolous have an instinct of superiority, if they have not a sympathy and honor it in their blind capricious way with sincere homage.

The fine young people despise life, but in me, and in such as with me are free from dyspepsia, and to whom a day

is a sound and solid good, it is a great excess of politeness to look scornful and to cry for company. I am grown by sympathy a little eager and sentimental, but leave me alone, and I should relish every hour and what it brought me, the pot-luck of the day, as heartily as the oldest gossip in the bar-room. I am thankful for small mercies. I compared notes with one of my friends who expects everything of the universe, and is disappointed when anything is less than the best, and I found that I begin at the other extreme, expecting nothing, and am always full of thanks for moderate goods. I accept the clangor and jangle of contrary tendencies. I find my account in sots and bores also. They give a reality to the circumjacent picture, which such a vanishing meteorous appearance can ill spare. In the morning I awake, and find the old world, wife, babes, and mother, Concord and Boston, the dear old spiritual world, and even the dear old devil not far off. If we will take the good we find, asking no questions, we shall have heaping measures. The great gifts are not got by analysis. Every thing good is on the highway. The middle region of our being is the temperate zone. We may climb into the thin and cold realm of pure geometry and lifeless science, or sink into that of sensation. Between these extremes is the equator of life, of thought, of spirit, of poetry—a narrow belt. Moreover, in popular experience, every thing good is on the highway. A collector peeps into all the picture-shops of Europe, for a landscape of Poussin, a crayon-sketch of Salvator; but the Transfiguration, the Last Judgment, the Communion of St. Jerome, and what are as transcendent as these, are on the walls of the Vatican, the Uffizi, or the Louvre, where every footman may see them; to say nothing of nature's pictures in every street, of sunsets and sunrises every day, and the sculpture of the human body never absent. A collector recently bought at public auction, in London, for one hundred and fifty-seven guineas, an autograph of Shakspeare: but for nothing a school-boy can read Hamlet, and can detect secrets of highest concernment yet unpublished therein. I think I will never read any but the com-

monest books,—the Bible, Homer, Dante, Shakspeare, and Milton. We grow impatient of so public a life and planet, and run hither and thither for nooks and secrets. The imagination delights in the wood-craft of Indians, trappers, and bee-hunters. We fancy that we are strangers, and not so intimately domesticated in the planet as the wild man, and the wild beast and bird. But the exclusion reaches them also: reaches the climbing, flying, gliding, feathered and four-footed man. Fox and woodchuck, hawk and snipe, and bittern, when nearly seen, have no more root in the deep world than man, and are just such superficial tenants of the globe. Then the new molecular philosophy shows astronomical inter-spaces betwixt atom and atom, shows that the world is all outside: it has no inside.

The mid-world is best. Nature, as we know her, is no saint. The lights of the church, the ascetics, Gentoos and Grahamites, she does not distinguish by any favor. She comes eating and drinking and sinning. Her darlings, the great, the strong, the beautiful, are not children of our law, do not come out of the Sunday School, nor weigh their food, nor punctually keep the commandments. If we will be strong with her strength, we must not harbor such disconsolate consciences, borrowed too from the consciences of other nations. We must set up the strong present tense against all the rumors of wrath, past or to come. So many things are unsettled which it is of the first importance to settle—and, pending their settlement, we will do as we do. Whilst the debate goes forward on the equity of commerce, and will not be closed for a century or two, New and Old England may keep shop. Law of copyright and international copyright is to be discussed, and, in the interim, we will sell our books for the most we can. Expediency of literature, reason of literature, lawfulness of writing down a thought, is questioned; much is to say on both sides, and while the fight waxes hot, thou, dearest scholar, stick to thy foolish task, add a line every hour, and between whiles add a line. Right to hold land, right of property, is disputed, and the conventions convene. and before the vote is taken, dig away in your garden,

and spend your earnings as a waif or godsend to all serene and beautiful purposes. Life itself is a bubble and a scepticism, and a sleep within a sleep. Grant it, and as much more as they will,—but thou, God's darling! heed thy private dream: thou wilt not be missed in the scorning and scepticism: there are enough of them: stay there in thy closet, and toil, until the rest are agreed what to do about it. Thy sickness, they say, and thy puny habit, require that thou do this or avoid that, but know that thy life is a flitting state, a tent for a night, and do thou, sick or well, finish that stint. Thou art sick, but shalt not be worse, and the universe, which holds thee dear, shall be the better.

Human life is made up of the two elements, power and form, and the proportion must be invariably kept, if we would have it sweet and sound. Each of these elements in excess makes a mischief as hurtful as its defect. Everything runs to excess: every good quality is noxious, if unmixed, and, to carry the danger to the edge of ruin, nature causes each man's peculiarity to superabound. Here, among the farms, we adduce the scholars as examples of this treachery. They are the victims of expression. You who see the artist, the orator, the poet, too near, and find their life no more excellent than that of mechanics or farmers, and themselves victims of partiality, very hollow and haggard, and pronounce them failures,—not heroes, but quacks—conclude, very reasonably, that these arts are not for man, but are disease. Yet nature will not bear you out. Irresistible nature made them such, and makes legions more of such every day. You love the boy reading in a book, gazing at a drawing, or a cast: yet what are these millions who read and behold, but incipient writers and sculptors? Add a little more of that quality which now reads and sees, and they will seize the pen and chisel. And if one remembers how innocently he began to be an artist, he perceives that nature joined with his enemy. A man is a golden impossibility. The line he must walk is a hair's breadth. The wise through excess of wisdom is made a fool.

How easily, if fate would suffer it, we might keep for ever these beautiful limits. and adjust ourselves, once for all,

to the perfect calculation of the kingdom of known cause and effect. In the street and in the newspapers, life appears so plain a business, that manly resolution and adherence to the multiplication-table through all weathers, will ensure success. But, ah! presently comes a day, or is it only a half-hour, with its angel-whispering,—which discomfits the conclusions of nations and of years! To-morrow, again, every thing looks real and angular, the habitual standards are reinstated, common-sense is as rare as genius,—is the basis of genius, and experience is hands and feet to every enterprise;—and yet, he who should do his business on this understanding, would be quickly bankrupt. Power keeps quite another road than the turnpikes of choice and will, namely the subterranean and invisible tunnels and channels of life. It is ridiculous that we are diplomatists, and doctors, and considerate people: there are no dupes like these. Life is a series of surprises, and would not be worth taking or keeping, if it were not. God delights to isolate us every day, and hide from us the past and the future. We would look about us, but with grand politeness he draws down before us an impenetrable screen of purest sky, and another behind us of purest sky. “You will not remember,” he seems to say, “and you will not expect.” All good conversation, manners, and action, come from a spontaneity which forgets usages, and makes the moment great. Nature hates calculators; her methods are saltatory and impulsive. Man lives by pulses; our organic movements are such; and the chemical and ethereal agents are undulatory and alternate; and the mind goes antagonizing on, and never prospers but by fits. We thrive by casualties. Our chief experiences have been casual. The most attractive class of people are those who are powerful obliquely, and not by the direct stroke: men of genius, but not yet accredited: one gets the cheer of their light without paying too great a tax. Theirs is the beauty of the bird, or the morning light, and not of art. In the thought of genius there is always a surprise; and the moral sentiment is well called “the newness,” for it is never other; as new to the oldest intelligence as to the young child,—“the kingdom

that cometh without observation." In like manner, for practical success, there must not be too much design. A man will not be observed in doing that which he can do best. There is a certain magic about his properest action which stupefies your powers of observation; so that, though it is done before you, you wist not of it. The art of life has a pudency, and will not be exposed. Every man is an impossibility, until he is born; every thing impossible, until we see a success. The ardors of piety agree at last with the coldest scepticism,—that nothing is of us or our works,—that all is of God. Nature will not spare us the smallest leaf of laurel. All writing comes by the grace of God, and all doing and having. I would gladly be moral, and keep due metes and bounds, which I dearly love, and allow the most to the will of man, but I have set my heart on honesty in this chapter, and I can see nothing at last, in success or failure, than more or less of vital force supplied from the Eternal. The results of life are uncalculated and uncalculable. The years teach much which the days never know. The persons who compose our company, converse, and come and go, and design and execute many things, and somewhat comes of it all, but an unlooked-for result. The individual is always mistaken. He designed many things, and drew in other persons as coadjutors, quarrelled with some or all, blundered much, and something is done; all are a little advanced, but the individual is always mistaken. It turns out somewhat new, and very unlike what he promised himself.

The ancients, struck with this irreducibleness of the elements of human life to calculation, exalted Chance into a divinity, but that is to stay too long at the spark,—which glitters truly at one point,—but the universe is warm with the latency of the same fire. The miracle of life which will not be expounded, but will remain a miracle, introduces a new element. In the growth of the embryo, Sir Everard Home, I think, noticed that the evolution was not from one central point, but co-active from three or more points. Life has no memory. That which proceeds

in succession might be remembered, but that which is co-existent, or ejaculated from a deeper cause, as yet far from being conscious, knows not its own tendency. So is it with us, now sceptical, or without unity, because immersed in forms and effects all seeming to be of equal yet hostile value; and now religious, whilst in the reception of spiritual law. Bear with these distractions, with this coetaneous growth of the parts: they will one day be *members*, and obey one will. On that one will, on that secret cause, they nail our attention and hope. Life is hereby melted into an expectation or a religion. Underneath the inharmonious and trivial particulars, is a musical profession, the Ideal journeying always with us,—the heaven without rent or seam. Do but observe the mode of our illumination. When I converse with a profound mind, or if at any time, being alone, I have good thoughts, I do not at once arrive at satisfaction, as when, being thirsty, I drink water, or go to the fire, being cold: no! but I am at first apprised of my vicinity to a new and excellent region of life. By persisting to read or to think, this region gives further sign of itself, as it were in flashes of light, in sudden discoveries of its profound beauty and repose, as if the clouds that covered it parted at intervals, and showed the approaching traveller the inland mountains, with the tranquil, eternal meadows spread at their base, whereon flocks graze, and shepherds pipe and dance. But every insight from this realm of thought is felt as initial, and promises a sequel. I do not make it; I arrive there, and behold what was there already. I make! O no! I clap my hands in infantine joy and amazement, before the first opening to me of this august magnificence, old with the love and homage of innumerable ages, young with the life of life, the sunbright Mecca of the desert. And what a future it opens! I feel a new heart beating with the love of the new beauty. I am ready to die out of nature, and be born again into this new, yet unapproachable America I have found in the West.

Since neither now nor yesterday began  
These thoughts, which have been ever, nor yet can  
A man be found who their first entrance knew.

If I have described life as a flux of moods, I must now add, that there is that in us which changes not, and which ranks all sensations and states of mind. The consciousness in each man is a sliding scale, which identifies him now with the First Cause, and now with the flesh of his body; life above life, in infinite degrees. The sentiment from which it sprung determines the dignity of any deed, and the question ever is, not, what you have done or forborne, but at whose command you have done or forborne it.

Fortune, Minerva, Muse, Holy Ghost,—these are quaint names, too narrow to cover this unbounded substance. The baffled intellect must still kneel before this cause, which refuses to be named,—ineffable cause, which every fine genius has essayed to represent by some emphatic by (Nous) thought, Zoroaster by fire, Jesus and the moderns by love: and the metaphor of each has become a national religion. The Chinese Mencius has not been the least successful in his generalization. "I fully understand language," he said, "and nourish well my vast-flowing vigor."—"I beg to ask, what you call vast-flowing vigor?" said his companion. "The explanation," replied Mencius, "is difficult. This vigor is supremely great, and in the highest degree unbending. Nourish it correctly, and do it no injury, and it will fill the vacancy between heaven and earth. This vigor accords with and assists justice and reason and leaves no hunger." In our more correct writing, we give to this generalization the name of Being, and thereby confess that we have arrived as far as we can go. Suffice it for the joy of the universe, that we have not arrived at a wall, but at interminable oceans. Our life seems not present, so much as prospective; not for the affairs on which it is wasted, but as a hint of this vast-flowing vigor. Most of life seems to be mere advertisement of faculty: information is given us not to sell ourselves cheap; that we are very great. So, in particulars, our greatness is always in a tendency or direction, not in an action. It is for us to believe in the rule, not in the exception. The noble are thus known from the ignoble

So in accepting the leading of the sentiments, it is not what we believe concerning the immortality of the soul, or the like, but *the universal impulse to believe*, that is the material circumstance, and is the principal fact in the history of the globe. Shall we describe this cause as that which works directly? The spirit is not helpless or needful of mediate organs. It has plentiful powers and direct effects. I am explained without explaining, I am felt without acting, and where I am not. Therefore all just persons are satisfied with their own praise. They refuse to explain themselves, and are content that new actions should do them that office. They believe that we communicate without speech, and above speech, and that no right action of ours is quite unaffecting to our friends at whatever distance; for the influence of action is not to be measured by miles. Why should I fret myself, because a circumstance has occurred, which hinders my presence where I was expected? If I am not at the meeting, my presence where I am, should be as useful to the commonwealth of friendship and wisdom, as would be my presence in that place. I exert the same quality of power in all places. Thus journeys the mighty Ideal before us; it never was known to fall into the rear. No man ever came to an experience which was satiating, but his good is tidings of a better. Onward and onward! In liberated moments, we know that a new picture of life and duty is already possible; the elements already exist in many minds around you, of a doctrine of life which shall transcend any written record we have. The new statement will comprise the scepticisms, as well as the faiths of society, and out of unbeliefs a creed shall be formed. For scepticisms are not gratuitous or lawless, but are limitations of the affirmative statement, and the new philosophy must take them in, and make affirmations outside of them, just as much as it must include the oldest beliefs.

It is very unhappy, but too late to be helped, the discovery we have made, that we exist. That discovery is called the Fall of Man. Ever afterwards, we suspect our instruments. We have learned that we do not see directly,

but mediately, and that we have no means of correcting these colored and distorted lenses which we are, or of computing the amount of their errors. Perhaps these subject-lenses have a creative power: perhaps there are no objects. Once we lived in what we saw; now, the rapaciousness of this new power, which threatens to absorb all things, engages us. Nature, art, persons, letters, religions, objects, successively tumble in, and God is but one of its ideas. Nature and literature are subjective phenomena; every evil and every good thing is a shadow which we cast. The street is full of humiliations to the proud. As the fop contrived to dress his bailiffs in his livery, and make them wait on his guests at table, so the chagrins which the bad heart gives off as bubbles, at once take form as ladies and gentlemen in the street, shopmen or bar-keepers in hotels, and threaten or insult whatever is threatenable or insultable in us. 'Tis the same with our idolatries. People forget that it is the eye which makes the horizon, and the rounding mind's eye which makes this or that man a type or representative of humanity with the name of hero or saint. Jesus, the "providential man," is a good man, on whom many people are agreed that these optical laws shall take effect. By love on one part, and by forbearance to press objection on the other part, it is for a time settled, that we will look at him in the center of the horizon, and ascribe to him the properties that will attach to any man so seen. But the longest love or aversion has a speedy term. The great and crescive self, rooted in absolute nature, supplants all relative existence, and ruins the kingdom of mortal friendship and love. Marriage (in what is called the spiritual world) is impossible, because of the inequality between every subject and every object. The subject is the receiver of Godhead, and at every comparison must feel his being enhanced by that cryptic might. Though not in energy, yet by presence, this magazine of substance, cannot be otherwise than felt: nor can any force of intellect attribute to the object the proper deity which sleeps or wakes for ever in every subject. Never can love make consciousness and ascription equal in force. There will

be the same gulf between every me and thee, as between the original and the picture. The universe is the bride of the soul. All private sympathy is partial. Two human beings are like globes, which can touch only in a point, and, whilst they remain in contact, all other points of each of the spheres are inert; their turn must also come, and the longer a particular union lasts, the more energy of appetency the parts not in union acquire.

Life will be imaged, but cannot be divided nor doubled. Any invasion of its unity would be chaos. The soul is not twin-born, but the only begotten, and though revealing itself as child in time, child in appearance, is of a fatal and universal power, admitting no co-life. Every day, every act betrays the ill-concealed deity. We believe in ourselves as we do not believe in others. We permit all things to ourselves, and that which we call sin in others, is experiment for us. It is an instance of our faith in ourselves, that men never speak of crime as lightly as they think: or, every man thinks a latitude safe for himself, which is nowise to be indulged to another. The act looks very differently on the inside, and on the outside; in its quality and in its consequences, murder in the murderer is no such ruinous thought as poets and romancers will have it; it does not unsettle him, or fright him from his ordinary notice of trifles: it is an act quite easy to be contemplated, but in its sequel, it turns out to be a horrible jangle and confounding of all relations. Especially the crimes that spring from love, seem right and fair from the actor's point of view, but, when acted, are found destructive of society. No man at last believes that he can be lost, nor that the crime in him is as black as in the felon; because the intellect qualifies in our own case the moral judgments. For there is no crime to the intellect. That is antinomian or hypernomian, and judges law as well as fact. "It is worse than crime, it is a blunder," said Napoleon, speaking the language of the intellect. To it, the world is a problem in mathematics or the science of quantity, and it leaves out praise and blame, and all weak emotions. All stealing is comparative. If you come to absolutes, pray who does

not steal? Saints are sad, because they behold sin (even when they speculate) from the point of view of the conscience, and not of the intellect; a confusion of thought. Sin seen from the thought, is a diminution or *less*: seen from the conscience or will, it is pravity or *bad*. The intellect names it shade, absence of light, and no essence. The conscience must feel it as essence, essential evil. This it is not: it has an objective existence, but no subjective.

Thus inevitably does the universe wear our color, and every object fall successively into the subject itself. The subject exists, the subject enlarges; all things sooner or later fall into place. As I am, so I see; use what language we will, we can never say anything but what we are; Hermes, Cadmus, Columbus, Newton, Bonaparte, are the mind's ministers. Instead of feeling a poverty when we encounter a great man, let us treat the new comer like a travelling geologist, who passes through our estate, and shows us good slate, or limestone, or anthracite, in our brush pasture. The partial action of each strong mind in one direction, is a telescope for the objects on which it is pointed. But every other part of knowledge is to be pushed to the same extravagance, ere the soul attains her due sphericity. Do you see that kitten chasing so prettily her own tail? If you could look with her eyes, you might see her surrounded with hundreds of figures performing complex dramas, with tragic and comic issues, long conversations, many characters, many ups and downs of fate,—and meantime it is only puss and her tail. How long before our masquerade will end its noise of tambourines laughter, and shouting, and we shall find it was a solitary performance?—A subject and an object, it takes so much to make the galvanic circuit complete, but magnitude adds nothing. What imports it whether it is Kepler and the sphere; Columbus and America; a reader and his book or puss with her tail?

It is true that all the muses, and love, and religion hate these developments, and will find a way to punish the chemist, who publishes in the parlor the secrets of the laboratory. And we cannot say too little of our consti-

tutional necessity of seeing things under private aspects, or saturated with our humors. And yet is the God the native of these bleak rocks. That need makes in morals the capital virtue of self-trust. We must hold hard to this poverty, however scandalous, and by more vigorous self-recoveries, after the sallies of action, possess our axis more firmly. The life of truth is cold, and so far mournful; but it is not the slave of tears, contritions, and perturbations. It does not attempt another's work, nor adopt another's facts. It is a main lesson of wisdom to know your own from another's. I have learned that I cannot dispose of other people's facts; but I possess such a key to my own, as persuades me against all their denials, that they also have a key to theirs. A sympathetic person is placed in the dilemma of a swimmer among drowning men, who all catch at him, and if he gives so much as a leg or a finger, they will drown him. They wish to be saved from the mischief of their vices, but not from their vices. Charity would be wasted on this poor waiting on the symptoms. A wise and hardy physician will say, *Come out of that*, as the first condition of advice.

In this our talking America, we are ruined by our good nature and listening on all sides. This compliance takes away the power of being greatly useful. A man should not be able to look other than directly and forthright. A preoccupied attention is the only answer to the importunate frivolity of other people: an attention, and to an aim which makes their wants frivolous. This is a divine answer, and leaves no appeal, and no hard thoughts. In Flaxman's drawing of the Eumenides of Æschylus, Orestes supplicates Apollo, whilst the Furies sleep on the threshold. The face of the god expresses a shade of regret and compassion, but calm with the conviction of the irreconcilableness of the two spheres. He is born into other politics, into the internal and beautiful. The man at his feet asks for his interests in turmoils of the earth, into which his nature cannot enter. And the Eumenides there lying express pictorially this disparity. The god is surcharged with his divine destiny.

Illusion, Temperament, Succession, Surface, Surprise, Reality, Subjectiveness,—these are threads on the loom of time, these are the lords of life. I dare not assume to give their order, but I name them as I find them in my way. I know better than to claim any completeness for my picture. I am a fragment, and this is a fragment of me. I can very confidently announce one or another law, which throws itself into relief and form, but I am too young yet by some ages to compile a code. I gossip for my hour concerning the eternal politics. I have seen many fair pictures not in vain. A wonderful time I have lived in. I am not the novice I was fourteen, nor yet seven years ago. Let who will ask, where is the fruit? I find a private fruit sufficient. This is a fruit,—that I should not ask for a rash effect from meditations, counsels, and the hiving of truths. I should feel it pitiful to demand a result on this town and county, an overt effect on the instant month and year. The effect is deep and secular as the cause. It works on periods in which mortal lifetime is lost. All I know is reception. I am and I have: but I do not get, and when I have fancied I had gotten anything, I found I did not. I worship with wonder the great Fortune. My reception has been so large, that I am not annoyed by receiving this or that superabundantly. I say to the Genius, if he will pardon the proverb, *In for a mill, in for a million*. When I receive a new gift, I do not macerate my body to make the account square, for, if I should die, I could not make the account square. The benefit overran the merit the first day, and has overran the merit ever since. The merit itself, so called, I reckon part of the receiving.

Also, that hankering after an overt or practical effect seems to me an apostasy. In good earnest, I am willing to spare this most unnecessary deal of doing. Life wears to me a visionary face. Hardest, roughest action is visionary also. It is but a choice between soft and turbulent dreams. People disparage knowing and the intellectual life, and urge doing. I am very content with knowing, if only I could know. That is an august entertainment, and would suffice me a great while. To know a little, would b

worth the expense of this world. I hear always the law of drastia, "that every soul which had acquired any truth, should be safe from harm until another period."

I know that the world I converse with in the city and in the farms, is not the world I *think*. I observe that difference, and shall observe it. One day, I shall know the value and the law of this discrepance. But I have not found that much was gained by manipular attempts to realize the world of thought. Many eager persons successively make an experiment in this way, and make themselves ridiculous. They acquire democratic manners, they foam at the mouth, they hate and deny. Worse, I observe, that, in the history of mankind, there is never a solitary example of success,—taking their own tests of success. I say this polemically, or in reply to the inquiry, why not realize our world? But far be from me the despair which prejudices the law by a paltry empiricism,—since there never was a right endeavor, but it succeeded. Patience and patience, we shall win at the last. We must be very suspicious of the deceptions of the element of time. It takes a good deal of time to eat or to sleep, or to earn a hundred dollars; and a very little time to entertain a hope and an insight which becomes the light of our life. We dress our garden, at our dinners, discuss the household with our wives,—and these things make no impression—are forgotten next week; but in the solitude to which every man is always returning, he has a sanity and revelations, which, in his passage into new worlds, he will carry with him. Never mind the ridicule, never mind the defeat: up again, old heart!—it seems to say,—there is victory yet for all justice; and the true romance which the world exists to realize, will be the transformation of genius into practical power.

## V

### USES OF GREAT MEN

It is natural to believe in great men. If the companions of our childhood should turn out to be heroes, and their condition regal, it would not surprise us. All mythology opens with demigods, and the circumstance is high and poetic; that is, their genius is paramount. In the legends of the Gautama, the first men ate the earth, and found it deliciously sweet.

Nature seems to exist for the excellent. The world is upheld by the veracity of good men: they make the earth wholesome. They who lived with them found life glad and nutritious. Life is sweet and tolerable only in our belief in such society; and actually, or ideally, we manage to live with superiors. We call our children and our land by their names. Their names are wrought into the verbs of language, their works and effigies are in our houses, and every circumstance of the day recalls an anecdote of them.

The search after the great is the dream of youth, and the most serious occupation of manhood. We travel into foreign parts to find his works,—if possible, to get a glimpse of him. But we are put off with fortune instead. You say the English are practical; the Germans are hospitable; in Valencia, the climate is delicious; and in the hills of Sacramento, there is gold for the gathering. Yes, but I do not travel to find comfortable, rich, and hospitable people or clear sky, or ingots that cost too much. But if there were any magnet that would point to the countries and houses where are the persons who are intrinsically rich and powerful, I would sell all, and buy it, and put myself on the road to-day.

The race goes with us on their credit. The knowledge

that in the city is a man who invented the railroad, raises the credit of all the citizens. But enormous populations, if they be beggars, are disgusting, like moving cheese, like hills of ants, or of fleas—the more, the worse.

Our religion is the love and cherishing of these patrons. The gods of fable are the shining moments of great men. We run all our vessels into one mould. Our colossal theologies of Judaism, Christism, Buddhism, Mahometism, are the necessary and structural action of the human mind. The student of history is like a man going into a warehouse to buy cloths or carpets. He fancies he has a new article. If he go to the factory, he shall find that his new stuff still repeats the scrolls and rosettes which are found on the interior walls of the pyramids of Thebes. Our theism is the purification of the human mind. Man can paint, or make, or think nothing but man. He believes that the great material elements had their origin from his thought. And our philosophy finds one essence collected or distributed.

If now we proceed to inquire into the kinds of service we derive from others, let us be warned of the danger of modern studies, and begin low enough. We must not contend against love, or deny the substantial existence of other people. I know not what would happen to us. We have social strengths. Our affection towards others creates a sort of vantage or purchase which nothing will supply. I can do that by another which I cannot do alone. I can say to you what I cannot first say to myself. Other men are senses through which we read our own minds. Each man seeks those of different quality from his own, and such as are good of their kind; that is, he seeks other men, and the *therest*. The stronger the nature, the more it is reactive. Let us have the quality pure. A little genius let us leave alone. A main difference betwixt men is, whether they attend their own affair or not. Man is that noble endogenous plant which grows, like the palm, from within, outward. His own affair, though impossible to others, he can open with celerity and in sport. It is easy to sugar to be sweet, and to nitre to be salt. We take a great deal of pains to waylay and entrap that which of itself will

fall into our hands. I count him a great man who inhabits a higher sphere of thought, into which other men rise with labor and difficulty; he has but to open his eyes to see things in a true light, and in large relations; whilst they must make painful corrections, and keep a vigilant eye on many sources of error. His service to us is of like sort. It costs a beautiful person no exertion to paint her image on our eyes; yet how splendid is that benefit! It costs no more for a wise soul to convey his quality to other men. And every one can do his best thing easiest. "*Peu de moyens, beaucoup d'effét.*" He is great who is what he is from nature and who never reminds us of others.

But he must be related to us, and our life receive from him some promise of explanation. I cannot tell what I would know; but I have observed there are persons, who in their character and actions, answer questions which I have not skill to put. One man answers some questions which none of his contemporaries put, and is isolated. The past and passing religions and philosophies answer some other question. Certain men affect us as rich possibilities but helpless to themselves and to their times,—the sport perhaps, of some instinct that rules in the air;—they do not speak to our want. But the great are near: we know them at sight. They satisfy expectation, and fall into place. What is good is effective, generative; makes for itself room, food, and allies. A sound apple produces seed,—a hybrid does not. Is a man in his place, he is constructive, fertile, magnetic, inundating armies with his purpose which is thus executed. The river makes its own shores, and each legitimate idea makes its own channels and welcome,—harvests for food, institutions for expression, weapons to fight with, and disciples to explain it. The true artist has the planet for his pedestal; the adventurer, after years of strife, has nothing broader than his own shoes.

Our common discourse respects two kinds of use of service from superior men. Direct giving is agreeable to the early belief of men; direct giving of material or metaphysical aid, as of health, eternal youth, fine senses, art of healing, magical power, and prophecy. The boy believe

there is a teacher who can sell him wisdom. Churches believe in imputed merit. But, in strictness, we are not much cognizant of direct serving. Man is endogenous, and education is his unfolding. The aid we have from others is mechanical, compared with the discoveries of nature in us. What is thus learned is delightful in the doing, and the effect remains. Right ethics are central, and go from the soul outward. Gift is contrary to the law of the universe. Serving others is serving us. I must absolve me to myself. "Mind thy affair," says the spirit:—"coxcomb, would you meddle with the skies, or with other people?" Indirect service is left. Men have a pictorial or representative quality, and serve us in the intellect. Behmen and Swedenborg saw that things were representative. Men are also representative; first, of things, and secondly, of ideas.

As plants convert the minerals into food for animals, so each man converts some raw material in nature to human use. The inventors of fire, electricity, magnetism, iron, lead, glass, linen, silk, cotton; the makers of tools; the inventor of decimal notation; the geometer; the engineer; musician,—severally make an easy way for all, through unknown and impossible confusions. Each man is, by secret liking, connected with some district of nature, whose agent and interpreter he is, as Linnæus, of plants; Huber, of bees; Fries, of lichens; Van Mons, of pears; Dalton, of atomic forms; Euclid, of lines; Newton, of fluxions.

A man is a center for nature, running out threads of relation through every thing, fluid and solid, material and elemental. The earth rolls; every clod and stone comes to the meridian: so every organ, function, acid, crystal, grain of dust, has its relation to the brain. It waits long, but its turn comes. Each plant has its parasite, and each created thing its lover and poet. Justice has already been done to steam, to iron, to wood, to coal, to load stone, to iodine, to corn, and cotton; but how few materials are yet used by our arts! The mass of creatures and of qualities are still hid and expectant. It would seem as if each waited, like the enchanted princess in fairy tales, for a destined

human deliverer. Each must be disenchanted, and walk forth to the day in human shape. In the history of discovery, the ripe and latent truth seems to have fashioned a brain for itself. A magnet must be made man, in some Gilbert, or Swedenborg, or Oersted, before the general mind can come to entertain its powers.

If we limit ourselves to the first advantages;—a sober grace adheres to the mineral and botanic kingdoms, which, in the highest moments, comes up as the charm of nature,—the glitter of the spar, the sureness of affinity, the veracity of angles. Light and darkness, heat and cold, hunger and food, sweet and sour, solid, liquid, and gas, circle us round in a wreath of pleasures, and, by their agreeable quarrel, beguile the day of life. The eye repeats every day the finest eulogy on things—"He saw that they were good." We know where to find them; and these performers are relished all the more, after a little experience of the pretending races. We are entitled, also, to higher advantages. Something is wanting to science, until it has been humanized. The table of logarithms is one thing, and its vital play, in botany, music, optics, and architecture, another. There are advancements to numbers, anatomy, architecture, astronomy, little suspected at first, when, by union with intellect and will, they ascend into the life, and reappear in conversation, character, and politics.

But this comes later. We speak now only of our acquaintance with them in their own sphere, and the way in which they seem to fascinate and draw to them some genius who occupies himself with one thing, all his life long. The possibility of interpretation lies in the identity of the observer with the observed. Each material thing has its celestial side; has its translation, through humanity, into the spiritual and necessary sphere, where it plays a part as indestructible as any other. And to these, their ends, all things continually ascend. The gases gather to the solid firmament: the chemic lump arrives at the plant, and grows; arrives at the quadruped, and walks; arrives at the man, and thinks. But also the constituency determines the vote of the representative. He is not only representative,

but participant. Like can only be known by like. The reason why he knows about them is, that he is of them; he has just come out of nature, or from being a part of that thing. Animated chlorine knows of chlorine, and incarnate zinc, of zinc. Their quality makes this career; and he can variously publish their virtues, because they compose him. Man, made of the dust of the world, does not forget his origin; and all that is yet inanimate will one day speak and reason. Unpublished nature will have its whole secret told. Shall we say that quartz mountains will pulverize into innumerable Werners, Von Buchs, and Beaumonts; and the laboratory of the atmosphere holds in solution I know not what Berzeliuses and Davys?

Thus, we sit by the fire, and take hold on the poles of the earth. This *quasi* omnipresence supplies the imbecility of our condition. In one of those celestial days, when heaven and earth meet and adorn each other, it seems a poverty that we can only spend it once: we wish for a thousand heads, a thousand bodies, that we might celebrate its immense beauty in many ways and places. Is this fancy? Well, in good faith, we are multiplied by our proxies. How easily we adopt their labors! Every ship that comes to America got its chart from Columbus. Every novel is debtor to Homer. Every carpenter who shaves with a foreplane borrows the genius of a forgotten inventor. Life is girt all around with a zodiac of sciences, the contributions of men who have perished to add their point of light to our sky. Engineer, broker, jurist, physician, moralist, theologian, and every man, inasmuch as he has any science, is a definer and map-maker of the latitudes and longitudes of our condition. These road-makers on every hand enrich us. We must extend the area of life, and multiply our relations. We are as much gainers by finding a new property in the old earth, as by acquiring a new planet.

We are too passive in the reception of these material or semi-material aids. We must not be sacks and stomachs. To ascend one step,—we are better served through our sympathy. Activity is contagious. Looking where others

look, and conversing with the same things, we catch the charm which lured them. Napoleon said, "you must not fight too often with one enemy, or you will teach him all your art of war." Talk much with any man of vigorous mind, and we acquire very fast the habit of looking at things in the same light, and, on each occurrence, we anticipate his thought.

Men are helpful through the intellect and the affections. Other help, I find a false appearance. If you affect to give me bread and fire, I perceive that I pay for it the full price, and at last it leaves me as it found me, neither better nor worse: but all mental and moral force is a positive good. It goes out from you, whether you will or not, and profits me whom you never thought of. I cannot even hear of personal vigor of any kind, great power of performance, without fresh resolution. We are emulous of all that man can do. Cecil's saying of Sir Walter Raleigh, "I know that he can toil terribly," is an electric touch. So are Clarendon's portraits,—of Hampden; "who was of an industry and vigilance not to be tired out or wearied by the most laborious, and of parts not to be imposed on by the most subtle and sharp, and of a personal courage equal to his best parts"—of Falkland; "who was so severe an adorer of truth, that he could as easily have given himself leave to steal, as to dissemble." We cannot read Plutarch, without a tingling of the blood; and I accept the saying of the Chinese Mencius: "A sage is the instructor of a hundred ages. When the manners of Loo are heard of, the stupid become intelligent, and the wavering, determined."

This is the moral of biography; yet it is hard for departed men to touch the quick like our own companions, whose names may not last as long. What is he whom I never think of? whilst in every solitude are those who succor our genius, and stimulate us in wonderful manners. There is a power in love to divine another's destiny better than that other can, and by heroic encouragements, hold him to his task. What has friendship so signaled as its sublime attraction to whatever virtue is in us? We will never more think cheaply of ourselves, or of life. We are

piqued to some purpose, and the industry of the diggers on the railroad will not again shame us.

Under this head, too, falls that homage, very pure, as I think, which all ranks pay to the hero of the day, from Coriolanus and Gracchus, down to Pitt, Lafayette, Wellington, Webster, Lamartine. Hear the shouts in the street! The people cannot see him enough. They delight in a man. Here is a head and a trunk! What a front! What eyes! Atlantean shoulders, and the whole carriage heroic, with equal inward force to guide the great machine! This pleasure of full expression to that which, in their private experience, is usually cramped and obstructed, runs, also, much higher, and is the secret of the reader's joy in literary genius. Nothing is kept back. There is fire enough to fuse the mountain of ore. Shakspeare's principal merit may be conveyed, in saying that he, of all men, best understands the English language, and can say what he will. Yet these unchoked channels and floodgates of expression are only health or fortunate constitution. Shakspeare's name suggests other and purely intellectual benefits.

Senates and sovereigns have no compliment, with their medals, swords, and armorial coats, like the addressing to a human being thoughts out of a certain height, and presupposing his intelligence. This honor, which is possible in personal intercourse scarcely twice in a lifetime, genius perpetually pays; contented, if now and then, in a century, the proffer is accepted. The indicators of the values of matter are degraded to a sort of cooks and confectioners, on the appearance of the indicators of ideas. Genius is the naturalist or geographer of the supersensible regions, and draws on their map; and, by acquainting us with new fields of activity, cools our affection for the old. These are at once accepted as the reality, of which the world we have conversed with is the show.

We go to the gymnasium and the swimming-school to see the power and beauty of the body; there is the like pleasure, and a higher benefit, from witnessing intellectual feats of all kinds; as, feats of memory, of mathematical combination, great power of abstraction, the transmutings of the imagin-

ation, even versatility, and concentration, as these acts expose the invisible organs and members of the mind, which respond, member for member to the parts of the body. For, we thus enter a new gymnasium, and learn to choose men by their truest marks, taught, with Plato, "to choose those who can, without aid from the eyes, or any other sense, proceed to truth and to being." Foremost among these activities, are the somersaults, spells, and resurrections, wrought by the imagination. When this wakes, a man seems to multiply ten times or a thousand times his force. It opens the delicious sense of intermediate size, and inspires an audacious mental habit. We are as elastic as the gas of gunpowder, and a sentence in a book, or a word dropped in conversation, sets free our fancy, and instantly our heads are bathed with galaxies, and our feet tread the floor of the Pit. And this benefit is real, because we are entitled to these enlargements, and, once having passed the bounds, shall never again be quite the miserable pedants we were.

The high functions of the intellect are so allied, that some imaginative power usually appears in all eminent minds, even in arithmeticians of the first class, but especially in meditative men of an intuitive habit of thought. This class serve us, so that they have the perception of identity and the perception of reaction. The eyes of Plato, Shakespeare, Swedenborg, Goethe, never shut on either of these laws. The perception of these laws is a kind of metre of the mind. Little minds are little, through failure to see them.

Even these feasts have their surfeit. Our delight in reason degenerates into idolatry of the herald. Especially when a mind of powerful method has instructed men, we find the examples of oppression. The dominion of Aristotle, the Ptolemaic astronomy, the credit of Luther, of Bacon, of Locke,—in religion the history of hierarchies, of saints, and the sects which have taken the name of each founder, are in point. Alas! every man is such a victim. The imbecility of men is always inviting the impudence of power. It is the delight of vulgar talent to dazzle and to bind the beholder. But true genius seeks to defend us from itself.

True genius will not impoverish, but will liberate, and add new senses. If a wise man should appear in our village, he would create, in those who conversed with him, a new consciousness of wealth, by opening their eyes to unobserved advantages; he would establish a sense of immovable equality, calm us with assurances that we could not be cheated; as every one would discern the checks and guarantees of condition. The rich would see their mistakes and poverty, the poor their escapes and their resources.

But nature brings all this about in due time. Rotation is her remedy. The soul is impatient of masters, and eager for change. Housekeepers say of a domestic who has been valuable, "She had lived with me long enough." We are tendencies, or rather, symptoms, and none of us complete. We touch and go, and sip the foam of many lives. Rotation is the law of nature. When nature removes a great man, people explore the horizon for a successor; but none comes and none will. His class is extinguished with him. In some other and quite different field, the next man will appear; not Jefferson, not Franklin, but now a great salesman; then a road-contractor; then a student of fishes; then a buffalo-hunting explorer, or semi-savage western general. Thus we make a stand against our rougher masters; but against the best there is a finer remedy. The power which they communicate is not theirs. When we are exalted by ideas, we do not owe this to Plato, but to the idea, to which, also, Plato was debtor.

I must not forget that we have a special debt to a single class. Life is a scale of degrees. Between rank and rank of our great men are wide intervals. Mankind have, in all ages, attached themselves to a few persons, who, either by the quality of that idea they embodied, or by the largeness of their reception, were entitled to the position of leaders and law-givers. These teach us the qualities of primary nature,—admit us to the constitution of things. We swim, day by day, on a river of delusions, and are effectually amused with houses and towns in the air, of which the men about us are dupes. But life is a sincerity. In lucid intervals we say, "Let there be an entrance opened

for me into realities. I have worn the fool's cap too long." We will know the meaning of our economies and politics. Give us the cipher, and, if persons and things are scores of a celestial music, let us read off the strains. We have been cheated of our reason; yet there have been sane men, who enjoyed a rich and related existence. What they know, they know for us. With each new mind, a new secret of nature transpires; nor can the Bible be closed, until the last great man is born. These men collect the delirium of the animal spirits, make us considerate, and engage us to new aims and powers. The veneration of mankind selects these for the highest place. Witness the multitude of statues, pictures, and memorials, which recall their genius in every city, village, house, and ship:—

"Ever their phantoms arise before us,  
Our loftier brothers, but one in blood;  
At bed and table they lord it o'er us,  
With looks of beauty, and words of good."

How to illustrate the distinctive benefit of ideas, the service rendered by those who introduce moral truths into the general mind?—I am plagued, in all my living, with a perpetual tariff of prices. If I work in my garden, and prune an apple-tree, I am well enough entertained, and could continue indefinitely in the like occupation. But it comes to mind that a day is gone, and I have got this precious nothing done. I go to Boston or New York, and run up and down on my affairs; they are sped, but so is the day. I am vexed by the recollection of this price I have paid for a trifling advantage. I remember the *peau d'âne*, on which whoso sat should have his desire, but a piece of the skin was gone for every wish. I go to a convention of philanthropists. Do what I can, I cannot keep my eyes off the clock. But if there should appear in the company some gentle soul who knows little of persons or parties, of Carolina or Cuba, but who announces a law that disposes these particulars, and so certifies me of the equity which checkmates every false player, bankrupts every self-seeker, and apprises me of my independence on any conditions of country, or time or human

body, that man liberates me; I forget the clock. I pass out of the sore relation to persons. I am healed of my hurts. I am made immortal by apprehending my possession of incorruptible goods. Here is great competition of rich and poor. We live in a market, where is only so much wheat, or wool, or land; and if I have so much more, every other must have so much less. I seem to have no good, without breach of good manners. Nobody is glad in the gladness of another, and our system is one of war, of an injurious superiority. Every child of the Saxon race is educated to wish to be first. It is our system; and a man comes to measure his greatness by the regrets, envies, and hatreds of his competitors. But in these new fields there is room: here are no self-esteems, no exclusions.

I admire great men of all classes, those who stand for facts, and for thoughts; I like rough and smooth, "Scourges of God," and "Darlings of the human race." I like the first Cæsar; and Charles V., of Spain; and Charles XII., of Sweden; Richard Plantagenet; and Bonaparte, in France. I applaud a sufficient man, an officer equal to his office; captains, ministers, senators. I like a master standing firm on legs of iron, well-born, rich, handsome, eloquent, loaded with advantages, drawing all men by fascination into tributaries and supporters of his power. Sword and staff, or talents sword-like or staff-like, carry on the work of the world. But I find him greater, when he can abolish himself, and all heroes, by letting in this element of reason, irrespective of persons; this subtilizer, and irresistible upward force, into our thought, destroying individualism; the power so great, that the potentate is nothing. Then he is a monarch, who gives a constitution to his people; a pontiff, who preaches the equality of souls, and releases his servants from their barbarous homages; an emperor, who can spare his empire.

But I intended to specify, with a little minuteness, two or three points of service. Nature never spares the opium of nepenthe; but wherever she mars her creature with some deformity or defect, lays her poppies plentifully on the bruise, and the sufferer goes joyfully through life, ignorant

of the ruin, and incapable of seeing it, though all the world point their finger at it every day. The worthless and offensive members of society, whose existence is a social pest, invariably think themselves the most ill-used people alive, and never get over their astonishment at the ingratitude and selfishness of their contemporaries. Our globe discovers its hidden virtues, not only in heroes and archangels, but in gossips and nurses. Is it not a rare contrivance that lodged the due inertia in every creature, the conserving, resisting energy, the anger at being waked or changed? Altogether independent of the intellectual force in each, is the pride of opinion, the security that we are right. Not the feeblest grandame, not a mowing idiot, but uses what spark of perception and faculty is left, to chuckle and triumph in his or her opinion over the absurdities of all the rest. Difference from me is the measure of absurdity. Not one has a misgiving of being wrong. Was it not a bright thought that made things cohere with this bitumen, fastest of cements? But, in the midst of this chuckle of self-gratulation, some figure goes by, which Thersites too can love and admire. This is he that should marshal us the way we were going. There is no end to his aid. Without Plato, we should almost lose our faith in the possibility of a reasonable book. We seem to want but one, but we want one. We love to associate with heroic persons, since our receptivity is unlimited; and, with the great, our thoughts and manners easily become great. We are all wise in capacity, though so few in energy. There needs but one wise man in a company, and all are wise, so rapid is the contagion.

Great men are thus a collyrium to clear our eyes from egotism, and enable us to see other people and their works. But there are vices and follies incident to whole populations and ages. Men resemble their contemporaries, even more than their progenitors. It is observed in old couples, or in persons who have been housemates for a course of years, that they grow alike; and, if they should live long enough, we should not be able to know them apart. Nature abhors these complaisances, which threaten to melt the world into a lump, and hastens to break up such maudlin agglu-

tinations. The like assimilation goes on between men of one town, of one sect, of one political party; and the ideas of the time are in the air, and infect all who breathe it. Viewed from any high point, this city of New York, yonder city of London, the western civilization, would seem a bundle of insanities. We keep each other in countenance, and exasperate by emulation the frenzy of the time. The shield against the stings of conscience, is the universal practice, or our contemporaries. Again; it is very easy to be as wise and good as your companions. We learn of our contemporaries what they know, without effort, and almost through the pores of the skin. We catch it by sympathy, or, as a wife arrives at the intellectual and moral elevations of her husband. But we stop where they stop. Very hardly can we take another step. The great, or such as hold of nature, and transcend fashions, by their fidelity to universal ideas, are saviors from these federal errors, and defend us from our contemporaries. They are the exceptions which we want, where all grows alike. A foreign greatness is the antidote for cabalism.

Thus we feed on genius, and refresh ourselves from too much conversation with our mates, and exult in the depth of nature in that direction in which he leads us. What indemnification is one great man for populations of pigmies! Every mother wishes one son a genius, though all the rest should be mediocre. But a new danger appears in the excess of influence of the great man. His attractions warp us from our place. We have become underlings and intellectual suicides. Ah! yonder in the horizon is our help:—other great men, new qualities, counterweights and checks on each other. We cloy of the honey of each peculiar greatness. Every hero becomes a bore at last. Perhaps Voltaire was not bad-hearted, yet he said of the good Jesus, even, "I pray you, let me never hear that man's name again." They cry up the virtues of George Washington,—“Damn George Washington!” is the poor Jacobin's whole speech and conutation. But it is human nature's indispensable defence. The centripetence augments the centrifugence. We balance one man with his opposite, and the health of the state de-

pend on the see-saw.

There is, however, a speedy limit to the use of heroes. Every genius is defended from approach by quantities of availableness. They are very attractive, and seem at a distance our own: but we are hindered on all sides from approach. The more we are drawn, the more we are repelled. There is something not solid in the good that is done for us. The best discovery the discoverer makes for himself. It has something unreal for his companion, until he too has substantiated it. It seems as if the Deity dressed each soul which he sends into nature in certain virtues and powers not communicable to other men, and, sending it to perform one more turn through the circle of beings, wrote "*Not transferable,*" and "*Good for this trip only,*" on these garments of the soul. There is somewhat deceptive about the intercourse of minds. The boundaries are invisible, but they are never crossed. There is such good will to impart, and such good will to receive, that each threatens to become the other; but the law of individuality collects its secret strength: you are you, and I am I, and so we remain.

For Nature wishes every thing to remain itself; and whilst every individual strives to grow and exclude, and to exclude and grow, to the extremities of the universe, and to impose the law of its being on every other creature, Nature steadily aims to protect each against every other. Each is self-defended. Nothing is more marked than the power by which individuals are guarded from individuals, in a world where every benefactor becomes so easily a malefactor, only by continuation of his activity into places where it is not due; where children seem so much at the mercy of their foolish parents, and where almost all men are too social and interfering. We rightly speak of the guardian angels of children. How superior in their security from infusions of evil persons, from vulgarity and second thought! They shed their own abundant beauty on the objects they behold. Therefore, they are not at the mercy of such poor educators as we adults. If we huff and chide them, they soon come no to mind it, and get a self-reliance; and if we indulge them too folly, they learn the limitation elsewhere.

We need not fear excessive influence. A more generous trust is permitted. Serve the great. Stick at no humiliation. Grudge no office thou canst render. Be the limb of their body, the breath of their mouth. Compromise thy egotism. Who cares for that, so thou gain aught wider and nobler? Never mind the taunt of Boswellism: the devotion may easily be greater than the wretched pride which is guarding its own skirts. Be another: not thyself, but a Platonist; not a soul, but a Christian; not a naturalist, but a Cartesian; not a poet, but a Shakspearian. In vain, the wheels of tendency will not stop, nor will all the forces of inertia, fear, or of love itself, hold thee there. On, and forever onward! The microscope observes a monad or wheel-insect among the infusories circulating in water. Presently, a dot appears on the animal, which enlarges to a slit, and it becomes two perfect animals. The ever-proceeding detachment appears not less in all thought, and in society. Children think they cannot live without their parents. But, long before they are aware of it, the black dot has appeared, and the detachment taken place. Any accident will now reveal to them their independence.

But *great men*:—the word is injurious. Is there caste? is there fate? What becomes of the promise to virtue? The thoughtful youth laments the superfoetation of nature. "Generous and handsome," he says, "is your hero; but look at yonder poor Paddy, whose country is his wheel-barrow; look at his whole nation of Paddies." Why are the masses, from the dawn of history down, food for knives and powder? The idea dignifies a few leaders, who have sentiment, opinion, love, self-devotion; and they make war and death sacred;—but what for the wretches whom they hire and kill? The cheapness of man is every day's tragedy. It is as real a loss that others should be low, as that we should be low; for we must have society.

Is it a reply to these suggestions, to say, society is a Pestalozzian school: all are teachers and pupils in turn. We are equally served by receiving and by imparting. Men who know the same things, are not long the best company for each other. But bring to each an intelligent person of

another experience, and it is as if you let off water from a lake, by cutting a lower basin. It seems a mechanical advantage, and great benefit it is to each speaker, as he can now paint out his thought to himself. We pass very fast, in our personal moods, from dignity to dependence. And if any appear never to assume the chair, but always to stand and serve, it is because we do not see the company in a sufficiently long period for the whole rotation of parts to come about. As to what we call the masses, and common men;—there are no common men. All men are at last of a size; and true art is only possible, on the conviction that every talent has its apotheosis somewhere. Fair play, and an open field, and freshest laurels to all who have won them! But heaven reserves an equal scope for every creature. Each is uneasy until he has produced his private ray unto the concave sphere, and beheld his talent also in its last nobility and exaltation.

The heroes of the hour are relatively great: of a faster growth; or they are such, in whom, at the moment of success, a quality is ripe which is then in request. Other days will demand other qualities. Some rays escape the common observer, and want a finely adapted eye. Ask the great man if there be none greater. His companions are; and not the less great, but the more, that society cannot see them. Nature never sends a great man into the planet, without confiding the secret to another soul.

One gracious fact emerges from these studies,—that there is true ascension in our love. The reputations of the nineteenth century will one day be quoted to prove its barbarism. The genius of humanity is the real subject whose biography is written in our annals. We must infer much, and supply many chasms in the record. The history of the universe is symptomatic, and life is mnemonical. No man, in all the procession of famous men, is reason or illumination, or that essence we were looking for; but is an exhibition, in some quarter, of new possibilities. Could we one day complete the immense figure which these flagrant points compose! The study of many individuals leads us to an elemental region wherein the individual is lost, or

wherein all touch by their summits. Thought and feeling, that break out there, cannot be impounded by any fence of personality. This is the key to the power of the greatest men,—their spirit diffuses itself. A new quality of mind travels by night and by day, in concentric circles from its origin, and publishes itself by unknown methods: the union of all minds appears intimate: what gets admission to one, cannot be kept out of any other: the smallest acquisition of truth or of energy, in any quarter, is so much good to the commonwealth of souls. If the disparities of talent and position vanish, when the individuals are seen in the duration which is necessary to complete the career of each; even more swiftly the seeming injustice disappears, when we ascend to the central identity of all the individuals, and know that they are made of the same substance which ordaineth and doeth.

The genius of humanity is the right point of view of history. The qualities abide; the men who exhibit them have now more, or less, and pass away; the qualities remain on another brow. No experience is more familiar. Once you saw phoenixes: they are gone; the world is not therefore disenchanted. The vessels on which you read sacred emblems turn out to be common pottery; but the sense of the pictures is sacred, and you may still read them transferred to the walls of the world. For a time, our teachers serve us personally, as metres or milestones of progress. Once they were angels of knowledge, and their figures touched the sky. Then we drew near, saw their means, culture, and limits; and they yielded their place to other geniuses. Happy, if a few names remain so high, that we have not been able to read them nearer, and age and comparison have not robbed them of a ray. But, at last, we shall cease to look in men for completeness, and shall content ourselves with their social and delegated quality. All that respects the individual is temporary and prospective, like the individual himself, who is ascending out of his limits, into a catholic existence. We have never come at the true and best benefit of any genius, so long as we believe him an original force. In the moment when he ceases to help us as a

cause, he begins to help us move as an effect. Then he appears as an exponent of a vaster mind and will. The opaque self becomes transparent with the light of the First Cause.

Yet, within the limits of human education and agency, we may say, great men exist that there may be greater men. The destiny of organized nature is amelioration, and who can tell its limits? It is for man to tame the chaos; on every side, whilst he lives, to scatter the seeds of science and of song, that climate, corn, animals, men, may be milder, and the germs of love and benefit may be multiplied.

## VI

### SPIRITUAL LAWS

WHEN the act of reflection takes place in the mind, when we look at ourselves in the light of thought, we discover that our life is embosomed in beauty. Behind us, as we go, all things assume pleasing forms, as clouds do far off. Not only things familiar and stale, but even the tragic and terrible are comely, as they take their place in the pictures of memory. The river-bank, the weed at the water-side, the old house, the foolish person,—however neglected in the passing,—have a grace in the past. Even the corpse that has lain in the chambers has added a solemn ornament to the house. The soul will not know either deformity or pain. If in the hours of clear reason we should speak the severest truth, we should say, that we had never made a sacrifice. In these hours the mind seems so great, that nothing can be taken from us that seems much. All loss, all pain is particular: the universe remains to the heart unhurt. Distress never, trifles never abate our trust. No man ever stated his griefs as lightly as he might. Allow for exaggeration in the most patient and sorely ridden hack that ever was driven. For it is only the finite that has wrought and suffered; the infinite lies stretched in smiling repose.

The intellectual life may be kept clean and healthful, if man will live the life of nature, and not import into his mind difficulties which are none of his. No man need be perplexed in his speculations. Let him do and say what strictly belongs to him, and, though very ignorant of books, his nature shall not yield him any intellectual obstructions and doubts. Our young people are diseased with the theological problems of original sin, origin of evil, predestination, and the like. These never presented a practical difficulty to any man,—never darkened across any

man's road, who did not go out of his way to seek them. These are the soul's mumps and measles and whooping-coughs; and those who have not caught them cannot describe their health or prescribe the cure. A simple mind will not know these enemies. It is quite another thing that he should be able to give account of his faith, and expound to another theory of his self-union and freedom. This requires rare gifts. Yet without this self-knowledge, there may be a sylvan strength and integrity in that which he is. "A few strong instincts and a few plain rules" suffice us.

My will never gave the images of my mind the rank they now take. The regular course of studies, the years of academical and professional education, have not yielded me better facts than some idle books under the bench at the Latin school. What we do not call education is more precious than that which we call so. We form no guess at the time of receiving a thought, of its comparative value. And education often wastes its effort in attempts to thwart and baulk this natural magnetism, which with sure discrimination selects its own.

In like manner, our moral nature is vitiated by any interference of our will. People represent virtue as a struggle, and take to themselves great airs upon their attainments; and the question is everywhere vexed, when a noble nature is commended, Whether the man is not better who strives with temptation? But there is no merit in the matter. Either God is there, or he is not there. We love characters in proportion as they are impulsive and spontaneous. The less a man thinks or knows about his virtues the better we like him. Timoleon's victories are the best victories; which ran and flowed like Homer's verses, Plutarch said. When we see a soul whose acts are all regal, graceful and pleasant as roses, we must thank God that such things can be and are, and not turn sourly on the angel, and say, "Crump is a better man with his grunting resistance to all his native devils."

Not less conspicuous is the preponderance of nature over will in all practical life. There is less intention in history than we ascribe to it. We impute deep-laid, far

sighted plans to Cæsar and Napoleon; but the best of their power was in nature, not in them. Men of an extraordinary success, in their honest moments have always sung, "Not unto us, not unto us." According to the faith of their times, they have built altars to Fortune or to Destiny, or to St. Julian. Their success lay in their parallelism to the course of thought, which found in them an unobstructed channel; and the wonders of which they were the visible conductors seemed to the eye their deed. Did the wires generate the galvanism? It is even true that there was less in them on which they could reflect than in another; as the virtue of a pipe is to be smooth and hollow. That which externally seemed will and immovableness, was willingness and self-annihilation. Could Shakspeare give a theory of Shakspeare? Could ever a man of prodigious mathematical genius convey to others any insight into his methods? If he could communicate that secret, instantly it would lose all its exaggerated value, blending with the daylight and the vital energy, the power to stand and to go.

The lesson is forcibly taught by the observations, that our life might be much easier and simpler than we make it; that the world might be a happier place than it is; that there is no need of struggles, convulsions, and despairs, of the wringing of the hands and the gnashing of the teeth; that we miscreate our own evils. We interfere with the optimism of nature; for, whenever we get this vantage-ground of the past, or of a wiser mind in the present, we are able to discern that we are begirt with spiritual laws which execute themselves.

The face of external nature teaches the same lesson with calm superiority. Nature will not have us fret and fume. She does not like our benevolence or our learning, much better than she likes our frauds and wars. When we come out of the caucus, or the bank, or the Abolition-convention, or the Temperance-meeting, or the Transcendental club, into the fields and woods, she says to us, "So hot? my little sir."

We are full of mechanical actions. We must needs intermeddle, and have things in our own way, until the sacrifices

and virtues of society are odious. Love should make joy; but our benevolence is unhappy. Our Sunday-schools, and churches, and pauper-societies, are yokes to the neck. We pain ourselves to please nobody. There are natural ways of arriving at the same ends at which these aim, but do not arrive. Why should all virtue work in one and the same way? Why should all give dollars? It is very inconvenient to us country folk, and we do not think any good will come of it. We have not dollars. Merchants have: let them give them. Farmers will give corn. Poets will sing. Women will sew. Laborers will lend a hand. The children will bring flowers. And why drag this dead weight of a Sunday-School over the whole Christendom? It is natural and beautiful that childhood should inquire, and maturity should teach; but it is time enough to answer questions when they are asked. Do not shut up the young people against their will in a pew, and force the children to ask them questions for an hour against their will.

If we look wider, things are all alike; laws, and letters, and creeds, and modes of living, seem a travesty of truth. Our society is encumbered by ponderous machinery, which resembles the endless aqueducts which the Romans built over hill and dale, and which are superseded by the discovery of the law that water rises to the level of its source. It is a Chinese wall, which any nimble Tartar can leap over. It is a standing army, not so good as a peace. It is a graduated, titled, richly appointed Empire, quite superfluous when Town-meetings are found to answer just as well.

Let us draw a lesson from nature, which always works by short ways. When the fruit is ripe, it falls. When the fruit is despatched, the leaf falls. The circuit of the waters is mere falling. The walking of man and all animals is a falling forward. All our manual labor and works of strength, as prying, splitting, digging, rowing, and so forth, are done by dint of continual falling; and the globe, earth, moon, comet, sun, star, fall forever and ever.

The simplicity of the universe is very different from the simplicity of a machine. He who sees moral nature out and out, and thoroughly knows how knowledge is acquired

and character formed, is a pedant. The simplicity of nature is not that which may easily be read, but is inexhaustible. The last analysis can no wise be made. We judge of a man's wisdom by his hope, knowing that the perception of the inexhaustibleness of nature is an immortal youth. The wild fertility of nature is felt in comparing our rigid names and reputations with our fluid consciousness. We pass in the world for sects and schools, for erudition and piety; and we are all the time jejune babes. One sees very well how Pyrrhonism grew up. Every man sees that he is that middle point whereof every thing may be affirmed and denied with equal reason. He is old, he is young, he is very wise, he is altogether ignorant. He hears and feels what you say of the seraphim and of the tin-pedlar. There is no permanent wise man, except in the figment of the stoics. We side with the hero, as we read or paint, against the coward and the robber; but we have been ourselves that coward and robber, and shall be again, not in the low circumstance, but in comparison with the grandeurs possible to the soul.

A little consideration of what takes place around us every day would show us that a higher law than that of our will regulates events; that our painful labors are very unnecessary, and altogether fruitless; that only in our easy, simple, spontaneous action are we strong, and by contenting ourselves with obedience we become divine. Belief and love,—a believing love will relieve us of a vast load of care. O my brothers, God exists. There is a soul at the center of nature, and over the will of every man, so that none of us can wrong the universe. It has so infused its strong enchantment into nature, that we prosper when we accept its advice; and when we struggle to wound its creatures, our hands are glued to our sides, or they beat our own breasts. The whole course of things goes to teach us faith. We need only obey. There is guidance for each of us, and by lowly listening we shall hear the right word. Why need you choose so painfully your place, and occupation, and associates, and modes of action and of entertainment? Certainly there is a possible right for you, that precludes the need of bal-

ance and wilful election. For you there is a reality, a fit place and congenial duties. Place yourself in the middle of the stream of power and wisdom which flows into you as life, place yourself in the full center of that flood, then you are without effort impelled to truth, to right, and a perfect contentment. Then you put all gainsayers in the wrong. Then you are the world, the measure of right, of truth, of beauty. If we will not be marplots with our miserable interferences, the work, the society, letters, arts, science, religion of men, would go on far better than now; and the Heaven predicted from the beginning of the world, and still predicted from the bottom of the heart, would organize itself, as do now the rose and the air and the sun.

I say, *do not choose*; but that is a figure of speech by which I would distinguish what is commonly called *choice* among men, and which is a partial act, the choice of the hands, of the eye, of the appetites, and not a whole act of the man. But that which I call right or goodness, is the choice of my constitution; and that which I call heaven, and inwardly aspire after, is the state or circumstance desirable to my constitution; and the action which I in all my years tend to do, is the work for my faculties. We must hold a man amenable to reason for the choice of his daily craft or profession. It is not an excuse any longer for his deeds that they are the custom of his trade. What business has he with an evil trade? Has he not a *calling* in his character?

Each man has his own vocation. The talent is the call. There is one direction in which all space is open to him. He has faculties silently inviting him thither to endless exertion. He is like a ship in a river; he runs against obstructions on every side but one; on that side, all obstruction is taken away, and he sweeps serenely over God's depths into an infinite sea. This talent and this call depend on his organization, or the mode in which the general soul incarnates itself in him. He inclines to do something which is easy to him, and good when it is done, but which no other man can do. He has no rival. For the more truly he consults his own powers, the more difference will his work ex-

hibit from the work of any other. When he is true and faithful, his ambition is exactly proportioned to his powers. The height of the pinnacle is determined by the breadth of the base. Every man has this call of the power to do somewhat unique, and no man has any other call. The pretence that he has another call, a summons by name and personal election and outward "signs that mark him extraordinary, and not in the roll of common men," is fanaticism, and betrays obtuseness to perceive that there is one mind in all the individuals, and no respect of persons therein.

By doing his work, he makes the need felt which he can supply. He creates the taste by which he is enjoyed. He provokes the wants to which he can minister. By doing his own work, he unfolds himself. It is the vice of our public speaking, that it has not abandonment. Somewhere, not only every orator, but every man, should let out all the length of all the reins; should find or make a frank and hearty expression of what force and meaning is in him. The common experience is, that the man fits himself as well as he can to the customary details of that work or trade he falls into, and tends it as a dog turns a spit. Then is he a part of the machine he moves; the man is lost. Until he can manage to communicate himself to others in his full stature and proportion as a wise and good man, he does not yet find his vocation. He must find in that an outlet for his character, so that he may justify himself to their eyes for doing what he does. If the labor is trivial, let him by his thinking and character make it liberal. Whatever he knows and thinks, whatever in his apprehension is worth doing, that let him communicate, or men will never know and honor him aright. Foolish, whenever you take the meanness and formality of that thing you do, instead of converting it into the obedient spiracle of your character and aims.

We like only such actions as have already long had the praise of men; and do not perceive that any thing man can do may be divinely done. We think greatness entailed or organized in some places or duties, in certain offices or occasions; and do not see that Paganini can extract rap-

ture from a catgut, and Eulenstein from a jews-harp, and a nimble-fingered lad out of shreds of paper with his scissors, and Landseer out of swine, and the hero out of the pitiful habitation and company in which he was hidden. What we call obscure condition or vulgar society, is that condition and society whose poetry is not yet written, but which you shall presently make as enviable and renowned as any. Accept your genius, and say what you think. In our estimates, let us take a lesson from kings. The parts of hospitality, the connexion of families, the impressiveness of death, and a thousand other things, royalty makes its own estimate of, and a royal mind will. To make habitually a new estimate,—that is elevation.

What a man does, that he has. What has he to do with hope or fear? In himself is his might. Let him regard no good as solid but that which is in his nature, and which must grow out of him as long as he exists. The goods of fortune may come and go like summer leaves; let him play with them and scatter them on every wind, as the momentary signs of his infinite productiveness.

He may have his own. A man's genius, the quality that differences him from every other, the susceptibility to one class of influences, the selection of what is fit for him, the rejection of what is unfit, determines for him the character of the universe. As a man thinketh, so is he; and as a man chooseth, so is he and so is nature. A man is a method, a progressive arrangement; a selecting principle, gathering his like to him, wherever he goes. He takes only his own, out of the multiplicity that sweeps and circles round him. He is like one of those booms which are set out from the shore on rivers to catch drift-wood, or like the loadstone amongst splinters of steel.

Those facts, words, persons, which dwell in his memory without his being able to say why, remain, because they have a relation to him not less real for being as yet unapprehended. They are symbols of value to him, as they can interpret parts of his consciousness which he would vainly seek words for in the conventional images of books and other minds. What attracts my attention shall have

it; as I will go to the man who knocks at my door, whilst a thousand persons, as worthy, go by it, to whom I give no regard. It is enough that these particulars speak to me. A few anecdotes, a few traits of character, manners, face, a few incidents, have an emphasis in your memory out of all proportion to their apparent significance, if you measure them by the ordinary standards. They relate to your gift. Let them have their weight, and do not reject them, and cast about for illustration and facts more usual in literature. Respect them, for they have their origin in deepest nature. What your heart thinks great, is great. The soul's emphasis is always right.

Over all things that are agreeable to his nature and genius the man has the highest right. Everywhere he may take what belongs to his spiritual estate, nor can he take anything else, though all doors were open, nor can all the force of men hinder him from taking so much. It is vain to attempt to keep a secret from one who has a right to know it. It will tell itself. That mood into which a friend can bring us is his dominion over us. To the thoughts of that state of mind he has a right. All the secrets of that state of mind he can compel. This is a law which statesmen use in practice. All the terrors of the French Republic, which held Austria in awe, were unable to command her diplomacy. But Napoleon sent to Vienna M. de Narbonne, one of the old noblesse, with the morals, manners, and name of that interest, saying that it was indispensable to send to the old aristocracy of Europe men of the same connexion, which, in fact, constitutes a sort of freemasonry. M. Narbonne in less than a fortnight penetrated all the secrets of the Imperial Cabinet.

A mutual understanding is ever the firmest chain. Nothing seems so easy as to speak and to be understood. Yet a man may come to find *that* the strongest of defences and of ties,—that he has been understood; and he who has received an opinion may come to find it the most inconvenient of bonds.

If a teacher have any opinion which he wishes to conceal, his pupils will become as fully indoctrinated into that as into

any which he publishes. If you pour water into a vessel twisted into coils and angles, it is vain to say, I will pour it only into this or that;—it will find its own level in all. Men feel and act the consequences of your doctrine, without being able to show how they follow. Show us an arc of the curve, and a good mathematician will find out the whole figure. We are always reasoning from the seen to the unseen. Hence the perfect intelligence that subsists between wise men of remote ages. A man cannot bury his meanings so deep in his book, but time and like-minded men will find them. Plato had a secret doctrine, had he? What secret can he conceal from the eyes of Bacon? of Montaigne? Kant? Therefore Aristotle said of his works, “they are published and not published.”

No man can learn what he has not preparation for learning, however near to his eyes is the object. A chemist may tell his most precious secrets to a carpenter, and he shall be never the wiser,—the secrets he would not utter to a chemist for an estate. God screens us evermore from premature ideas. Our eyes are holden that we cannot see things that stare us in the face, until the hour arrives when the mind is ripened,—then we behold them, and the time when we saw them not is like a dream.

Not in nature but in man is all the beauty and worth he sees. The world is very empty, and is indebted to this gilding, exalting soul for all its pride. “Earth fills her lap with splendors” *not her own*. The vale of Tempe, Tivoli, and Rome, are earth and water, rocks and sky. There are as good earth and water in a thousand places, yet how unaffecting!

People are not the better for the sun and moon, the horizon and the trees; as it is not observed that the keepers of Roman galleries, or the valets of painters, have any elevation of thought, or that librarians are wiser men than others. There are graces in the demeanor of a polished and noble person, which are lost upon the eye of a churl. These are like the stars whose light has not yet reached us.

He may see what he maketh. Our dreams are the sequel of our waking knowledge. The visions of the night always

bear some proportion to the visions of the day. Hideous dreams are only exaggerations of the sins of the day. We see our own evil affections embodied in bad physiognomies. On the Alps, the traveller sometimes sees his own shadow magnified to a giant, so that every gesture of his hand is terrific. "My children," said an old man to his boys scared by a figure in the dark entry, "my children, you will never see anything worse than yourselves." As in dreams, so in the scarcely less fluid events of the world, every man sees himself in colossal, without knowing that it is himself that he sees. The good which he sees, compared to the evil which he sees, is as his own good to his own evil. Every quality of his mind is magnified in some one acquaintance, and every emotion of his heart in some one. He is like a quincunx of trees, which counts five, east, west, north, or south; or an initial, medial, and terminal acrostic. And why not? He cleaves to one person, and avoids another, according to their likeness or unlikeness to himself, truly seeking himself in his associates, and moreover in his trade, and habits, and gestures, and meats, and drinks; and comes at last to be faithfully represented by every view you take of his circumstances.

He may read what he writeth. What can we see or acquire, but what we are? You have seen a skilful man reading Virgil. Well, that author is a thousand books to a thousand persons. Take the book into your two hands, and read your eyes out, you will never find what I find. If any ingenious reader would have a monopoly of the wisdom or delight he gets, he is as secure now the book is Englished, as if it were imprisoned in the Pelews tongue. It is with a good book as it is with good company. Introduce a base person among gentlemen: it is all to no purpose: he is not their fellow. Every society protects itself. The company is perfectly safe, and he is not one of them, though his body is in the room.

What avails it to fight with the eternal laws of mind, which adjust the relation of all persons to each other, by the mathematical measure of their havings and beings? Gertrude is enamored of Guy; how high, how aristocratic.

how Roman his mien and manners! to live with him were life indeed: and no purchase is too great; and heaven and earth are moved to that end. Well, Gertrude has Guy: but what now avails how high, how aristocratic, how Roman his mien and manners, if his heart and aims are in the senate, in the theatre, and in the billiard-room, and she has no aims, no conversation that can enchant her graceful lord?

He shall have his own society. We can love nothing but nature. The most wonderful talents, the most meritorious exertions really avail very little with us; but nearness or likeness of nature,—how beautiful is the ease of its victory! Persons approach us famous for their beauty, for their accomplishments, worthy of all wonder for their charms and gifts: they dedicate their whole skill to the hour and the company, with very imperfect result. To be sure, it would be very ungrateful in us not to praise them very loudly. Then, when all is done, a person of related mind, a brother or sister by nature, comes to us so softly and easily, so nearly and intimately, as if it were the blood in our proper veins, that we feel as if some one was gone, instead of another having come: we are utterly relieved and refreshed: it is a sort of joyful solitude. We foolishly think, in our days of sin, that we must court friends by compliance to the customs of society, to its dress, its breeding and its estimates. But later, if we are so happy, we learn that only that soul can be my friend, which I encounter on the line of my own march, that soul to which I do not decline, and which does not decline to me, but, native of the same celestial latitude, repeats in its own all my experience. The scholar and the prophet forget themselves, and ape the customs and costumes of the man of the world, to deserve the smile of beauty. He is a fool, and follows some giddy girl, and not with religious ennobling passion a woman with all that is serene, oracular, and beautiful in her soul. Let him be great, and love shall follow him. Nothing is more deeply punished than the neglect of the affinities by which alone society should be formed, and the insane levity of choosing associates by other's eyes.

He may set his own rate. It is an universal maxim,

worthy of all acceptation, that a man may have that allowance he takes. Take the place and attitude to which you see your unquestionable right, and all men acquiesce. The world must be just. It always leaves every man with profound unconcern to set his own rate. Hero or driveller, it meddles not in the matter. It will certainly accept your own measure of your doing and being, whether you sneak about and deny your own name, or whether you see your work produced to the concave sphere of the heavens, one with the revolution of the stars.

The same reality pervades all teaching. The man may teach by doing, and not otherwise. If he can communicate himself, he can teach, but not by words. He teaches who gives, and he learns who receives. There is no teaching until the pupil is brought into the same state or principle in which you are; a transfusion takes place: he is you, and you are he; then is a teaching, and by no unfriendly chance or bad company can he ever quite lose the benefit. But your propositions run out of one ear as they ran in at the other. We see it advertised that Mr. Grand will deliver an oration on the fourth of July, and Mr. Hand before the Mechanics' Association, and we do not go thither, because we know that these gentlemen will not communicate their own character and being to the audience. If we had reason to expect such a communication, we should go through all inconvenience and opposition. The sick would be carried in litters. But a public oration is an escapade, a non-committal, an apology, a gag, and not a communication, not a speech, not a man.

A like Nemesis presides over all intellectual works. We have yet to learn that the thing uttered in words is not therefore affirmed. It must affirm itself, or no forms of grammar and no plausibility can give it evidence, and no array of arguments. The sentence must also contain its own apology for being spoken.

The effect of any writing on the public mind is mathematically measurable by its depth of thought. How much water does it draw? If it awaken you to think; if it lift you from your feet with the great voice of eloquence; then the effect is to be wide, slow, permanent, over the minds of men; if

the pages instruct you not, they will die like flies in the hour. The way to speak and write what shall not go out of fashion, is to speak and write sincerely. The argument which has not power to reach my own practice, I may well doubt will fail to reach yours. But take Sidney's maxim: "Look in thy heart, and write." He that writes to himself writes to an eternal public. That statement only is fit to be made public which you have come at in attempting to satisfy your own curiosity. The writer who takes his subject from his ear and not from his heart, should know that he has lost as much as he seems to have gained; and when the empty book has gathered all its praise, and half the people say—"What poetry! what genius!" it still needs fuel to make fire. That only profits which is profitable. Life alone can impart life; and though we should burst, we can only be valued as we make ourselves valuable. There is no luck in literary reputation. They who make up the final verdict upon every book, are not the partial and noisy readers of the hour when it appears; but a court as of angels, a public not to be bribed, not to be entreated, and not to be overawed, decides upon every man's title to fame. Only those books come down which deserve to last. All the gilt edges and vellum and morocco, all the presentation-copies to all the libraries, will not preserve a book in circulation beyond its intrinsic date. It must go with all Walpole's Royal and Noble Authors to its fate. Blackmore, Kotzebue, or Pollok, may endure for a night, but Moses and Homer stand forever. There are not in the world at any one time more than a dozen persons who read and understand Plato:—never enough to pay for an edition of his works; yet to every generation these come duly down, for the sake of those few persons, as if God brought them in his hand. "No book," said Bentley, "was ever written down by any but itself." The permanence of all books is fixed by no effort friendly or hostile, but by their own specific gravity, or the intrinsic importance of their contents to the constant mind of man. "Do not trouble yourself too much about the light on your statue," said Michael Angelo to the young sculptor; "the light of the public square will test its value."

In like manner the effect of every action is measured by the depth of the sentiment from which it proceeds. The great man knew not that he was great. It took a century or two for that fact to appear. What he did, he did because he must; he used no election; it was the most natural thing in the world, and grew out of the circumstances of the moment. But now, every thing he did, even to the lifting of his finger, or the eating of bread, looks large, all-related, and is called an institution.

These are the demonstrations, in a few particulars, of the genius of nature: they show the direction of the stream. But the stream is blood; every drop is alive. Truth has not single victories; all things are its organs, not only dust and stones, but errors and lies. The laws of disease, physicians say, are as beautiful as the laws of health. Our philosophy is affirmative, and readily accepts the testimony of negative facts, as every shadow points to the sun. By a divine necessity, every fact in nature is constrained to offer its testimony.

Human character does evermore publish itself. It will not be concealed. It hates darkness,—it rushes into light. The most fugitive deed and word, the mere air of doing a thing, the intimated purpose, expresses character. If you act, you show character; if you sit still, you show it; if you sleep, you show it. You think because you have spoken nothing, when others spoke, and have given no opinion on the times, on the church, on slavery, on college, on parties and persons, that your verdict is still expected with curiosity as a reserved wisdom. Far otherwise; your silence answers very loud. You have no oracle to utter, and your fellow men have learned that you cannot help them; for oracles speak. Doth not wisdom cry, and understanding put forth her voice?

Dreadful limits are set in nature to the powers of dissimulation. Truth tyrannizes over the unwilling members of the body. Faces never lie, it is said. No man need be deceived, who will study the changes of expression. When a man speaks the truth in the spirit of truth, his eye is as clear as the heavens. When he has base ends, and speaks

falsely, the eye is muddy and sometimes asquint.

I have heard an experienced counsellor say, that he feared never the effect upon the jury of a lawyer who does not believe in his heart that his client ought to have a verdict. If he does not believe it, his unbelief will appear to the jury, despite all his protestations, and will become their unbelief. This is that law whereby a work of art, of whatever kind, sets us in the same state of mind wherein the artist was when he made it. That which we do not believe, we cannot adequately say, though we may repeat the words never so often. It was this conviction which Swedenborg expressed, when he described a group of persons in the spiritual world endeavoring in vain to articulate a proposition which they did not believe: but they could not, though they twisted and folded their lips even to indignation.

A man passes for that he is worth. Very idle is all curiosity concerning other people's estimate of us, and idle is all fear of remaining unknown. If a man know that he can do anything,—that he can do it better than any one else,—he has a pledge of the acknowledgment of that fact by all persons. The world is full of judgment-days, and into every assembly that a man enters, in every action he attempts he is gauged and stamped. In every troop of boys that whoop and run in each yard and square, a new-comer is as well and accurately weighed in the balance, in the course of a few days, and stamped with his right number, as if he had undergone a formal trial of his strength, speed, and temper. A stranger comes from a distant school, with better dress, with trinkets in his pockets, with airs, and pretension: an old boy sniffs thereat, and says to himself, "It's of no use: we shall find him out to-morrow." "What hath he done?" is the divine question which searches men, and transpierces every false reputation. A fop may sit in any chair of the world, nor be distinguished for his hour from Homer and Washington; but there can never be any doubt concerning the respective ability of human beings, when we seek the truth. Pretension may sit still, but cannot act. Pretension never feigned an act of real greatness. Pretension never wrote an Iliad, nor drove back Xerxes, nor

christianized the world, nor abolished slavery.

Always as much virtue as there is, so much appears; as much goodness as there is, so much reverence it commands. All the devils respect virtue. The high, the generous, the self-devoted sect will always instruct and command mankind. Never a sincere word was utterly lost. Never a magnanimity fell to the ground. Always the heart of man greets and accepts it unexpectedly. A man passes for that he is worth. What he is, engraves itself on his face, on his form, on his fortunes, in letters of light, which all men may read but himself. Concealment avails him nothing; boasting, nothing. There is confession in the glances of our eyes, in our smiles, in salutations, and the grasp of hands. His sin bedaubs him, mars all his good impression. Men know not why they do not trust him; but they do not trust him. His vice glasses his eye, demeans his cheek, pinches the nose, sets the mark of the beast on the back of the head, and writes, O fool! fool! on the forehead of a king.

If you would not be known to do anything, never do it. A man may play the fool in the drifts of a desert, but every grain of sand shall seem to see. He may be a solitary eater, but he cannot keep his foolish counsel. A broken complexion, a swinish look, ungenerous acts, and the want of due knowledge,—all blab. Can a cook, a Chiffinch, an Iachimo, be mistaken for Zeno or Paul? Confucius exclaimed, "How can a man be concealed! How can a man be concealed!"

On the other hand, the hero fears not, that if he withhold the avowal of a just and brave act, it will go unwitnessed and unloved. One knows it,—himself,—and is pledged by it to sweetness of peace, and to nobleness of aim, which will prove in the end a better proclamation of it than the relating of the incident. Virtue is the adherence in action to the nature of things, and the nature of things makes it prevalent. It consists in a perpetual substitution of being for seeming, and with sublime propriety God is described as saying, I AM.

The lesson which all these observations convey, is, Be, and not seem. Let us acquiesce. Let us take our bloated

nothingness out of the path of the divine circuits. Let us unlearn our wisdom of the world. Let us lie low in the Lord's power, and learn that truth alone makes rich and great.

If you visit your friend, why need you apologise for not having visited him, and waste his time and deface your own act? Visit him now. Let him feel that the highest love has come to see him, in thee its lowest organ. Or why need you torment yourself and friend by secret self-reproaches that you have not assisted him or complimented him with gifts and salutations heretofore? Be a gift and a benediction. Shine with real light, and not with the borrowed reflections of gifts. Common men are apologies for men; they bow the head, they excuse themselves with prolix reasons, they accumulate appearances, because the substance is not.

We are full of these superstitions of sense, the worship of magnitude. God loveth not size: whale and minnow are of like dimension. But we call the poet inactive, because he is not a president, a merchant, or a porter. We adore an institution, and do not see that it is founded on a thought which we have. But real action is in silent moments. The epochs of our life are not in the visible facts of our choice of a calling, our marriage, our acquisition of an office, and the like; but in a silent thought by the way-side as we walk: in a thought which revises our entire manner of life, and says, "Thus hast thou done, but it were better thus." And all our after years, like menials, do serve and wait on this, and according to their ability do execute its will. This revisal or correction is a constant force, which, as a tendency, reaches through our lifetime. The object of the man, the aim of these moments, is to make daylight shine through him, to suffer the law to traverse his whole being without obstruction, so that, on what point soever of his doing your eye falls, it shall report truly of his character, whether it be his diet, his house, his religious forms, his society, his mirth, his vote, his opposition. Now he is not homogeneous, but heterogeneous, and the ray does not traverse; there are no thorough lights; but the eye of the beholder is

puzzled, detecting many unlike tendencies, and a life not yet at one.

Why should we make it a point with our false modesty to disparage that man we are, and that form of being assigned to us? A good man is contented. I love and honor Epaminondas, but I do not wish to be Epaminondas. I hold it more just to love the world of this hour than the world of his hour. Nor can you, if I am true, excite me to the least uneasiness by saying, "he acted, and thou sittest still." I see action to be good, when the need is, and sitting still to be also good. Epaminondas, if he was the man I take him for, would have sat still with joy and peace, if his lot had been mine. Heaven is large, and affords space for all modes of love and fortitude. Why should we be busybodies and superserviceable? Action and inaction are alike to the true. One piece of the tree is cut for a weathercock, and one for the sleeper of a bridge; the virtue of the wood is apparent in both.

I desire not to disgrace the soul. The fact that I am here, certainly shows me that the soul had need of an organ here. Shall I not assume the post? Shall I skulk and dodge and duck with my unseasonable apologies and vain modesty, and imagine my being here impertinent? less pertinent than Epaminondas or Homer being there? and that the soul did not know its own needs? Besides, without any reasoning on the matter, I have no discontent. The good soul nourishes me alway, unlocks new magazines of power and enjoyment to me every day. I will not meanly decline the immensity of good, because I have heard that it has come to others in another shape.

Besides, why should we be cowed by the name of Action? 'Tis a trick of the senses,—no more. We know that the ancestor of every action is a thought. The poor mind does not seem to itself to be any thing, unless it have an outside badge,—some Gentoo diet, or Quaker coat, or Calvinistic prayer-meeting, or philanthropic society, or a great donation, or a high office, or, any how, some wild contrasting action to testify that it is somewhat. The rich mind lies in the sun and sleeps, and is Nature. To think is to act.

Let us, if we must have great actions, make our own so. All action is of an indefinite elasticity, and the least admits of being inflated with the celestial air until it eclipses the sun and moon. Let us seek *one* peace by fidelity. Let me do my duties. Why need I go gadding into the scenes and philosophy of Greek and Italian history, before I have washed my own face, or justified myself to my own benefactors? How dare I read Washington's campaigns, when I have not answered the letters of my own correspondents? Is not that a just objection to much of our reading? It is a pusillanimous desertion of our work to gaze after our neighbors. It is peeping. Byron says of Jack Bunting,

"He knew not what to say, and so he swore."

I may say it of our preposterous use of books: "He knew not what to do, and so *he read*." I can think of nothing to fill my time with, and so, without any constraint, I find the life of Brant. It is a very extravagant compliment to pay to Brant, or to General Schuyler, or to General Washington. My time should be as good as their time: my world, my facts, all my net of relations as good as theirs or either of theirs. Rather let me do my work so well that other idlers, if they choose, may compare my texture with the texture of these, and find it identical with the best.

This over-estimate of the possibilities of Paul and Pericles, this under-estimate of our own, comes from a neglect of the fact of an identical nature. Bonaparte knew but one Merit, and rewarded in one and the same way the good soldier, the good astronomer, the good poet, the good player. Thus he signified his sense of a great fact. The poet uses the names of Cæsar, of Tamerlane, of Bonduca, of Belisarius; the painter uses the conventional story of the Virgin Mary, of Paul, of Peter. He does not, therefore, defer to the nature of these accidental men, of these stock heroes. If the poet writes a true drama, then he is Cæsar, and not the player of Cæsar; then the self-same strain of thought, emotion as pure, wit as subtle, motions as swift, mounting, extravagant, and a heart as great, self-sufficing, dauntless, which on the waves of its love and hope can up-

lift all that is reckoned solid and precious in the world, palaces, gardens, money, navies, kingdoms,—marking its own incomparable worth by the slight it casts on these gauds of men,—these all are his, and by the power of these he rouses the nations. But the great names cannot stead him, if he have not life himself. Let a man believe in God, and not in names and places and persons. Let the great soul incarnated in some woman's form, poor and sad and single, in some Dolly or Joan, go out to service, and sweep chambers and scour floors, and its effulgent day-beams cannot be muffled or hid, but to sweep and scour will instantly appear supreme and beautiful actions, the top and radiance of human life, and all people will get mops and brooms; until, lo, suddenly the great soul has enshrined itself in some other form, and done some other deed, and that is now the flower and head of all living nature.

We are the photometers, we the irritable goldleaf and tinfoil that measure the accumulations of the subtle element. We know the authentic effects of the true fire through every one of its million disguises.

## VII

### SELF-RELIANCE

Ne te quæsiveris extra.

“Man is his own star; and the soul that can  
Render an honest and a perfect man,  
Commands all light, all influence, all fate,  
Nothing to him falls early or too late.  
Our acts our angels are, or good or ill,  
Our fatal shadows that walk by us still.”

*Epilogue to Beaumont and Fletcher's Honest Man's Fortune.*

Cast the bantling on the rocks,  
Suckle him with the she-wolf's teat:  
Wintered with the hawk and fox,  
Power and speed be hands and feet.

I READ the other day some verses written by an eminent painter which were original and not conventional. Always the soul hears an admonition in such lines, let the subject be what it may. The sentiment they instil is of more value than any thought they may contain. To believe your own thought, to believe that what is true for you in your private heart, is true for all men,—that is genius. Speak your latent conviction, and it shall be the universal sense; for always the inmost becomes the outmost,—and our first thought is rendered back to us by the trumpets of the Last Judgment. Familiar as the voice of the mind is to each, the highest merit we ascribe to Moses, Plato, and Milton, is that they set at naught books and traditions, and spoke not what men but what they thought. A man should learn to detect and watch that gleam of light which flashes across his mind from within, more than the lustre of the firmament of bards and sages. Yet he dismisses without notice his thought, because it is his. In every work of genius we recognize our own rejected thoughts: they come back to us with a certain alien-

ated majesty. Great works of art have no more affecting lesson for us than this. They teach us to abide by our spontaneous impression with good-humored inflexibility then most when the whole cry of voices is on the other side. Else, to-morrow a stranger will say with masterly good sense precisely what we have thought and felt all the time, and we shall be forced to take with shame our own opinion from another.

There is a time in every man's education when he arrives at the conviction that envy is ignorance; that imitation is suicide; that he must take himself for better, for worse, as his portion; that though the wide universe is full of good, no kernel of nourishing corn can come to him but through his toil bestowed on that plot of ground which is given to him to till. The power which resides in him is new in nature, and none but he knows what that is which he can do, nor does he know until he has tried. Not for nothing one face, one character, one fact makes much impression on him, and another none. It is not without pre-established harmony, this sculpture in the memory. The eye was placed where one ray should fall, that it might testify of that particular ray. Bravely let him speak the utmost syllable of his confession. We but half express ourselves, and are ashamed of that divine idea which each of us represents. It may be safely trusted as proportionate and of good issues, so it be faithfully imparted, but God will not have his work made manifest by cowards. It needs a divine man to exhibit anything divine. A man is relieved and gay when he has put his heart into his work and done his best; but what he has said or done otherwise, shall give him no peace. It is a deliverance which does not deliver. In the attempt his genius deserts him; no muse befriends; no invention, no hope.

Trust thyself: every heart vibrates to that iron string. Accept the place the divine Providence has found for you; the society of your contemporaries, the connection of events. Great men have always done so, and confided themselves childlike to the genius of their age, betraying their perception that the Eternal was stirring at their heart, working

through their hands, predominating in all their being. And we are now men, and must accept in the highest mind the same transcendent destiny; and not pinched in a corner, not cowards fleeing before a revolution, but redeemers and benefactors, pious aspirants to be noble clay plastic under the Almighty effort, let us advance and advance on Chaos and the Dark.

What pretty oracles nature yields us on this text in the face and behavior of children, babes and even brutes! That divided and rebel mind, that distrust of a sentiment because our arithmetic has computed the strength and means opposed to our purpose, these have not. Their mind being whole, their eye is yet unconquered; and when we look in their faces, we are disconcerted. Infancy conforms to nobody: all conform to it, so that one babe commonly makes four or five out of the adults who prattle and play to it. So God has armed youth and puberty and manhood no less with its own piquancy and charm, and made it enviable and gracious, and its claims not to be put by, if it will stand by itself. Do not think the youth has no force because he cannot speak to you and me. Hark! in the next room, who spoke so clear and emphatic? Good Heaven! it is he! it is that very lump of bashfulness and phlegm which for weeks has done nothing but eat when you were by, that now rolls out these words like bell-strokes. It seems he knows how to speak to his contemporaries. Bashful or bold, then, he will know how to make us seniors very unnecessary.

The nonchalance of boys who are sure of a dinner, and would disdain as much as a lord to do or say aught to conciliate one, is the healthy attitude of human nature. How is a boy the master of society! Independent, irresponsible, looking out from his corner on such people and facts as pass by, he tries and sentences them on their merits, in the swift summary way of boys, as good, bad, interesting, silly, eloquent, troublesome. He cumbers himself never about consequences, about interests: he gives an independent, genuine verdict. You must court him; he does not court you. But the man is, as it were, clapped into jail by his consciousness. As soon as he has once acted or spoken with *éclat*, he is a

committed person, watched by the sympathy or the hatred of hundreds, whose affections must now enter into his account. There is no Lethe for this. Ah, that he could pass again into his neutral, godlike independence! Who can thus lose all pledge, and having observed, observe again from the same unaffected, unbiased, unbribeable, unaffrighted innocence, must always be formidable, must always engage the poet's and the man's regards. Of such an immortal youth the force would be felt. He would utter opinions on all passing affairs, which being seen to be not private, but necessary, would sink like darts into the ear of men, and put them in fear.

These are the voices which we hear in solitude, but they grow faint and inaudible as we enter into the world. Society everywhere is in conspiracy against the manhood of every one of its members. Society is a joint-stock company, in which the members agree, for the better securing of his bread to each shareholder, to surrender the liberty and culture of the eater. The virtue in most request is conformity. Self-reliance is its aversion. It loves not realities and creators, but names and customs.

Whoso would be a man must be a nonconformist. He who would gather immortal palms must not be hindered by the name of goodness, but must explore if it be goodness. Nothing is at last sacred but the integrity of our own mind. Absolve you to yourself, and you shall have the suffrage of the world. I remember an answer which, when quite young, I was prompted to make to a valued adviser who was wont to importune me with the dear old doctrines of the church. On my saying, What have I to do with the sacredness of traditions, if I live wholly from within? my friend suggested,—“But these impulses may be from below, not from above.” I replied, “They do not seem to me to be such; but if I am the devil's child, I will live then from the devil.” No law can be sacred to me but that of my nature. Good and bad are but names, very readily transferable to that or this; the only right is what is after my constitution, the only wrong is what is against it. A man is to carry himself in the presence of all opposition as if every thing

were titular and ephemeral but he. I am ashamed to think how easily we capitulate to badges and names, to large societies and dead institutions. Every decent and well-spoken individual affects and sways me more than is right. I ought to go upright and vital, and speak the rude truth in all ways. If malice and vanity wear the coat of philanthropy, shall that pass? If an angry bigot assumes this bountiful cause of Abolition, and comes to me with his last news of Barbadoes, why should I not say to him, "Go, love thy infant; love thy wood-chopper: be good-natured and modest; have that grace; and never varnish your hard, uncharitable ambition with this incredible tenderness for black folk a thousand miles off. Thy love afar is spite at home." Rough and graceless would be such greeting, but truth is handsomer than the affectation of love. Your goodness must have some edge to it—else it is none. The doctrine of hatred must be preached, as the counteraction of the doctrine of love when that pules and whines. I shun father and mother and wife and brother, when my genius calls me. I would write on the lintels of the door-post, *Whim*. I hope it is somewhat better than whim at last, but we cannot spend the day in explanation. Expect me not to show cause why I seek or why I exclude company. Then, again, do not tell me, as a good man did to-day, of my obligation to put all poor men in good situations. Are they *my* poor? I tell thee, thou foolish philanthropist, that I grudge the dollar, the dime, the cent I give to such men as do not belong to me, and to whom I do not belong. There is a class of persons to whom by all spiritual affinity I am bought and sold; for them I will go to prison, if need be; but your miscellaneous popular charities; the education at college of fools; the building of meeting-houses to the vain end to which many now stand; alms to sots; and the thousandfold Relief Societies;—though I confess with shame I sometimes succumb and give the dollar, it is a wicked dollar which by and by I shall have the manhood to withhold.

Virtues are, in the popular estimate, rather the exception than the rule. There is the man *and* his virtues. Men do what is called a good action, as some piece of courage or

charity, much as they would pay a fine in expiation of daily non-appearance on parade. Their works are done as an apology or extenuation of their living in the world,—as invalids and the insane pay a high board. Their virtues are penances. I do not wish to expiate, but to live. My life is not an apology, but a life. It is for itself, and not for a spectacle. I much prefer that it should be of a lower strain, so it be genuine and equal, than that it should be glittering and unsteady. I wish it to be sound and sweet, and not to need diet and bleeding. My life should be unique; it should be an alms, a battle, a conquest, a medicine. I ask primary evidence that you are a man, and refuse this appeal from the man to his actions. I know that for myself it makes no difference whether I do or forbear those actions which are reckoned excellent. I cannot consent to pay for a privilege where I have intrinsic right. Few and mean as my gifts may be, I actually am, and do not need for my own assurance or the assurance of my fellows any secondary testimony.

What I must do, is all that concerns me; not what the people think. This rule, equally arduous in actual and in intellectual life, may serve for the whole distinction between greatness and meanness. It is the harder, because you will always find those who think they know what is your duty better than you know it. It is easy in the world to live after the world's opinion; it is easy in solitude to live after our own; but the great man is he who in the midst of the crowd keeps with perfect sweetness the independence of solitude.

The objection to conforming to usages that have become dead to you, is, that it scatters your force. It loses your time, and blurs the impression of your character. If you maintain a dead church, contribute to a dead Bible-Society, or vote with a great party either for the Government or against it, spread your table like base house-keepers,—under all these screens, I have difficulty to detect the precise man you are. And, of course, so much force is withdrawn from your proper life. But do your thing, and I shall know you. Do your work, and you shall rein-

force yourself. A man must consider what a blind-man's buff is this game of conformity. If I know your sect, I anticipate your argument. I hear a preacher announce for his text and topic the expediency of one of the institutions of his church. Do I not know beforehand that not possibly can he say a new and spontaneous word? Do I not know that with all this ostentation of examining the grounds of the institution, he will do no such thing? Do I not know that he is pledged to himself not to look but at one side; the permitted side, not as a man, but as a parish minister? He is a retained attorney, and these airs of the bench are the emptiest affectation. Well, most men have bound their eyes with one or another handkerchief, and attached themselves to some one of these communities of opinion. This conformity makes them not false in a few particulars, authors of a few lies, but false in all particulars. Their every truth is not quite true. Their two is not the real two, their four not the real four: so that every word they say chagrins us, and we know not where to begin to set them right. Meantime nature is not slow to equip us in the prison-uniform of the party to which we adhere. We come to wear one cut of face and figure, and acquire by degrees the gentlest asinine expression. There is a mortifying experience in particular which does not fail to wreak itself also in the general history; I mean, "the foolish face of praise," the forced smile which we put on in company where we do not feel at ease in answer to conversation which does not interest us. The muscles, not spontaneously moved, but moved by a low usurping willfulness, grow tight about the outline of the face, and make the most disagreeable sensation,—a sensation of rebuke and warning which no brave young man will suffer twice.

For nonconformity the world whips you with its displeasure. And therefore a man must know how to estimate a sour face. The bystanders look askance on him in the public street or in the friend's parlor. If this aversation had its origin in contempt and resistance like his own, he might well go home with a sad countenance; but the sour faces of the multitude, like their sweet faces, have no deep

cause,—disguise no god, but are put on and off as the wind blows and a newspaper directs. Yet is the discontent of the multitude more formidable than that of the senate and the college. It is easy enough for a firm man who knows the world to brook the rage of the cultivated classes. Their rage is decorous and prudent; for they are timid, as being very vulnerable themselves. But when to their feminine rage the indignation of the people is added, when the ignorant and the poor are aroused, when the unintelligent brute force that lies at the bottom of society is made to growl and mow, it needs the habit of magnanimity and religion to treat it godlike as a trifle of no concernment.

The other terror that scares us from self-trust is our consistency; a reverence for our past act or word, because the eyes of others have no other data for computing our orbit than our past acts, and we are loath to disappoint them.

But why should you keep your head over your shoulder? Why drag about this monstrous corpse of your memory, lest you contradict somewhat you have stated in this or that public place? Suppose you should contradict yourself; what then? It seems to be a rule of wisdom never to rely on your memory alone, scarcely even in acts of pure memory, but bring the past for judgment into the thousand-eyed present, and live ever in a new day. Trust your emotion. In your metaphysics you have denied personality to the Deity: yet when the devout motions of the soul come, yield to them heart and life, though they should clothe God with shape and color. Leave your theory, as Joseph his coat in the hand of the harlot, and flee.

A foolish consistency is the hobgoblin of little minds, adored by little statesmen and philosophers and divines. With consistency a great soul has simply nothing to do. He may as well concern himself with his shadow on the wall. Out upon your guarded lips! Sew them up with backthread, do. Else, if you would be a man, speak what you think to-day in words as hard as cannon-balls, and to-morrow speak what to-morrow thinks in hard words again, though it contradict every thing you said to-day. Ah, then, exclaim the aged ladies, you shall be sure to be misunder-

stood. Misunderstood! It is a right fool's word. Is it so bad then to be misunderstood? Pythagoras was misunderstood, and Socrates, and Jesus, and Luther, and Copernicus, and Galileo, and Newton, and every pure and wise spirit that ever took flesh. To be great is to be misunderstood.

I suppose no man can violate his nature. All the sallies of his will are rounded in by the law of his being, as the inequalities of Andes and Himmaleh are insignificant in the curve of the sphere. Nor does it matter how you gauge and try him. A character is like an acrostic or Alexandrian stanza;—read it forward, backward, or across, it still spells the same thing. In this pleasing contrite wood-life which God allows me, let me record day by day my honest thought, without prospect or retrospect, and I cannot doubt it will be found symmetrical, though I mean it not, and see it not. My book should smell of pines and resound with the hum of insects. The swallow over my window should inter-weave that thread or straw he carries in his bill into my web also. We pass for what we are. Character teaches above our wills. Men imagine that they communicate their virtue or vice only by overt actions, and do not see that virtue or vice emit a breath every moment.

Fear never but you shall be consistent in whatever variety of actions, so they be each honest and natural in their hour. For of one will the actions will be harmonious, however unlike they seem. These varieties are lost sight of when seen at a little distance, at a little height of thought. One tendency unites them all. The voyage of the best ship is a zigzag line of a hundred tacks. This is only microscopic criticism. See the line from a sufficient distance, and it straightens itself to the average tendency. Your genuine action will explain itself, and will explain your other genuine actions. Your conformity explains nothing. Act singly, and what you have already done singly will justify you now. Greatness always appeals to the future. If I can be great enough now to do right and scorn eyes, I must have done so much right before as to defend me now. Be

it how it will, do right now. Always scorn appearances, and you always may. The force of character is cumulative. All the foregone days of virtue work their health into this. What makes the majesty of the heroes of the senate and the field, which so fills the imagination? The consciousness of a train of great days and victories behind. There they all stand, and shed a united light on the advancing actor. He is attended as by a visible escort of angels to every man's eye. That is it which throws thunder into Chatham's voice, and dignity into Washington's port, and America into Adam's eye. Honor is venerable to us, because it is no ephemeris. It is always ancient virtue. We worship it to-day, because it is not of to-day. We love it and pay it homage, because it is not a trap for our love and homage, but is self-dependent, self-derived, and therefore of an old immaculate pedigree, even if shown in a young person.

I hope in these days we have heard the last of conformity and consistency. Let the words be gazetted and ridiculous henceforward. Instead of the gong for dinner, let us hear a whistle from the Spartan fife. Let us bow and apologize never more. A great man is coming to eat at my house. I do not wish to please him; I wish that he should wish to please me. I will stand here for humanity; and though I would make it kind, I would make it true. Let us affront and reprimand the smooth mediocrity and squalid contentment of the times, and hurl in the face of custom, and trade, and office, the fact which is the upshot of all history, that there is a great responsible Thinker and Actor moving wherever moves a man; that a true man belongs to no other time or place, but is the center of things. Where he is, there is nature. He measures you, and all men, and all events. You are constrained to accept his standard. Ordinarily everybody in society reminds us of somewhat else or of some other person. Character, reality, reminds you of nothing else. It takes place of the whole creation. The man must be so much that he must make all circumstances indifferent,—put all means into the shade. This all great men are and do. Every true man is a cause, a country, and an age; requires infinite spaces and numbers and time fully

to accomplish his thought;—and posterity seem to follow his steps as a procession. A man Cæsar is born, and for ages after we have a Roman Empire. Christ is born, and millions of minds so grow and cleave to his genius, that he is confounded with virtue and the possible of man. An institution is the lengthened shadow of one man; as, the Reformation, of Luther; Quakerism, of Fox; Methodism, of Wesley; Abolition, of Clarkson. Scipio, Milton called “the height of Rome”; and all history resolves itself very easily into the biography of a few stout and earnest persons.

Let a man, then, know his worth, and keep things under his feet. Let him not peep or steal, or skulk up and down with the air of a charity-boy, a bastard, or an interloper, in the world which exists for him. But the man in the street, finding no worth in himself which corresponds to the force which built a tower or sculptured a marble god, feels poor when he looks on these. To him a palace, a statue, or a costly book have an alien and forbidding air, much like a gay equipage, and seem to say like that, “Who are you, sir?” Yet they are all his, suitors for his notice, petitioners to his faculties that they will come out and take possession. The picture waits for my verdict: it is not to command me, but I am to settle its claims to praise. That popular fable of the sot who was picked up dead drunk in the street, carried to the duke’s house, washed and dressed and laid in the duke’s bed, and, on his waking, treated with all obsequious ceremony like the duke, and assured that he had been insane,—owes its popularity to the fact, that it symbolizes so well the state of man, who is in the world a sort of sot, but now and then wakes up, exercises his reason, and finds himself a true prince.

Our reading is mendicant and sycophantic. In history, our imagination makes fools of us, plays us false. Kingdom and lordship, power and estate, are a gaudier vocabulary than private John and Edward in a small house and common day’s work: but the things of life are the same to both; the sum-total of both is the same. Why all this deference to Alfred, and Scanderbeg, and Gustavus? Suppose they were virtuous: did they wear out virtue?

As great a stake depends on your private act to-day, as followed their public and renowned steps. When private men shall act with vast views, the lustre will be transferred from the actions of kings to those of gentlemen.

The world has indeed been instructed by its kings, who have so magnetised the eyes of nations. It has been taught by this colossal symbol the mutual reverence that is due from man to man. The joyful loyalty with which men have everywhere suffered the king, the noble, or the great proprietor to walk among them by a law of his own; make his own scale of men and things, and reverse theirs; pay for benefits not with money but with honor, and represent the Law in his person,—was the hieroglyphic by which they obscurely signified their consciousness of their own right and comeliness, the right of every man.

The magnetism which all original action exerts is explained when we inquire the reason of self-trust. Who is the Trustee? What is the aboriginal Self on which a universal reliance may be grounded? What is the nature and power of that science-baffling star, without parallax, without calculable elements, which shoots a ray of beauty even into trivial and impure actions, if the least mark of independence appear? The inquiry leads us to that source, at once the essence of genius, the essence of virtue, and the essence of life, which we call Spontaneity or Instinct. We denote this primary wisdom as Intuition, whilst all later teachings are tuitions. In that deep force, the last fact, behind which analysis cannot go, all things find their common origin. For the sense of being, which in calm hours rises, we know not how, in the soul, is not diverse from things, from space, from light, from time, from man, but one with them, and proceedeth obviously from the same source whence their life and being also proceedeth. We first share the life by which things exist, and afterwards see them as appearances in nature, and forget that we have shared their cause. Here is the fountain of action and the fountain of thought. Here are the lungs of that inspiration which giveth man wisdom, of that inspiration of man which cannot be denied without impiety and atheism. We lie in the lap of im-

mense intelligence, which makes us organs of its activity and receivers of its truth. When we discern justice, when we discern truth, we do nothing of ourselves but allow a passage to its beams. If we ask whence this comes, if we seek to pry into the soul that causes, all metaphysics, all philosophy is at fault. Its presence or its absence is all we can affirm. Every man discerns between the voluntary acts of his mind, and his involuntary perceptions. And to his involuntary perceptions he knows a perfect respect is due. He may err in the expression of them, but he knows that these things are so, like day and night, not to be disputed. All my willful actions and acquisitions are but roving;—the most trivial reverie, the faintest emotion are domestic and divine. Thoughtless people contradict as readily the statement of perceptions as of opinions, or rather much more readily; for they do not distinguish between perception and notion. They fancy that I choose to see this or that thing. But perception is not whimsical, but fatal. If I see a trait, my children will see it after me, and in course of time all mankind,—although it may chance that no one has seen it before me. For my perception of it is as much a fact as the sun.

The relations of the soul to the divine spirit are so pure that it is profane to seek to interpose help. It must be that when God speaketh, he should communicate not one thing, but all things; should fill the world with his voice; should scatter forth light, nature, time, souls, from the center of the present thought; and new date and new create the whole. Whenever a mind is simple, and receives a divine wisdom, then old things pass away,—means, teachers, texts, temples fall; it lives now, and absorbs past and future into the present hour. All things are made sacred by relation to it,—one thing as much as another. All things are dissolved to their center by their cause, and in the universal miracle petty and particular miracles disappear. This is and must be. If, therefore, a man claims to know and speak of God, and carries you backward to the phraseology of some old mouldered nation in another country, in another world, believe him not. Is the acorn better than the oak which is

its fullness and completion? Is the parent better than the child into whom he has cast his ripened being? Whence then this worship of the past? The centuries are conspirators against the sanity and majesty of the soul. Time and space are but physiological colors which the eye maketh, but the soul is light; where it is, is day; where it was, is night; and history is an impertinence and an injury, if it be anything more than a cheerful apologue or parable of my being and becoming.

Man is timid and apologetic. He is no longer upright. He dares not say "I think," "I am," but quotes some saint or sage. He is ashamed before the blade of grass or the blowing rose. These roses under my window make no reference to former roses or to better ones; they are for what they are; they exist with God to-day. There is no time to them. There is simply the rose; it is perfect in every moment of its existence. Before a leaf-bud has burst, its whole life acts; in the full-blown flower there is no more; in the leafless root there is no less. Its nature is satisfied, and it satisfies nature, in all moments alike. There is no time to it. But man postpones or remembers; he does not live in the present, but with reverted eye laments the past, or, heedless of the riches that surround him, stands on tip-toe to foresee the future. He cannot be happy and strong until he too lives with nature in the present, above time.

This should be plain enough. Yet see what strong intellects dare not yet hear God himself, unless he speak the phraseology of I know not what David, or Jeremiah, or Paul. We shall not always set so great a price on a few texts, on a few lives. We are like children who repeat by rote the sentences of grandames and tutors, and, as they grow older, of the men of talents and character they chance to see,—painfully recollecting the exact words they spoke; afterwards, when they come into the point of view which those had who uttered these sayings, they understand them, and are willing to let the words go; for, at any time, they can use words as good, when occasion comes. So was it with us; so will it be, if we proceed. If we live truly, we shall see truly. It is as easy for the strong man to be strong,

as it is for the weak to be weak. When we have new perception, we shall gladly disburden the memory of its hoarded treasures as old rubbish. When a man lives with God, his voice shall be as sweet as the murmur of the brook and the rustle of the corn.

And now at last the highest truth on this subject remains unsaid, probably cannot be said; for all that we say is the far-off remembering of the intuition. That thought, by what I can now nearest approach to say it, is this. When good is near you, when you have life in yourself,—it is not by any known or appointed way; you shall not discern the footprints of any other; you shall not see the face of man; you shall not hear any name;—the way, the thought, the good shall be wholly strange and new. It shall exclude all other being. You take the way from man, not to man. All persons that ever existed are its fugitive ministers. There shall be no fear in it. Fear and hope are alike beneath it. It asks nothing. There is somewhat low even in hope. We are then in vision. There is nothing that can be called gratitude nor properly joy. The soul is raised over passion. It seeth identity and eternal causation. It is a perceiving that Truth and Right are. Hence it becomes a Tranquillity out of the knowing that all things go well. Vast spaces of nature, the Atlantic Ocean, the South Sea; vast intervals of time, years, centuries, are of no account. This which I think and feel, underlay that former state of life and circumstances, as it does underlie my present, and will always all circumstance, and what is called life, and what is called death.

Life only avails, not the having lived. Power ceases in the instant of repose; it resides in the moment of transition from a past to a new state; in the shooting of the gulf; in the darting to an aim. This one fact the world hates, that the soul *becomes*; for that forever degrades the past; turns all riches to poverty, all reputation to a shame; confounds the saint with the rogue; shoves Jesus and Judas equally aside. Why then do we prate of self-reliance? Inasmuch as the soul is present, there will be power not confident but agent. To talk of reliance, is a poor external

way of speaking. Speak rather of that which relies, because it works and is. Who has more soul than I masters me, though he should not raise his finger. Round him I must revolve by the gravitation of spirits; who has less, I rule with like facility. We fancy it rhetoric when we speak of eminent virtue. We do not yet see that virtue is Height, and that a man or a company of men plastic and permeable to principles, by the law of nature must overpower and ride all cities, nations, kings, rich men, poets, who are not.

This is the ultimate fact which we so quickly reach on this as on every topic, the resolution of all into the ever-blessed ONE. Virtue is the governor, the creator, the reality. All things real are so by so much of virtue as they contain. Hardship, husbandry, hunting, whaling, war, eloquence, personal weight, are somewhat, and engage my respect as examples of the soul's presence and impure action. I see the same law working in nature for conservation and growth. The poise of a planet, the bended tree recovering itself from the strong wind, the vital resources of every vegetable and animal, are also demonstrations of the self-sufficing, and therefore self-relying soul. All history from its highest to its trivial passages, is the various record of this power.

Thus all concentrates: let us not rove; let us sit at home with the cause. Let us stun and astonish the intruding rabble of men and books and institutions by a simple declaration of the divine fact. Bid them take their shoes from off their feet, for God is here within. Let our simplicity judge them, and our docility to our own law demonstrate the poverty of nature and fortune beside our native riches.

But now we are a mob. Man does not stand in awe of man, nor is the soul admonished to stay at home, to put itself in communication with the internal ocean, but it goes abroad to beg a cup of water of the urns of men. We must go alone. Isolation must precede true society. I like the silent church before the service begins, better than any preaching. How far off, how cool, how chaste the persons look, begirt each one with a precinct or sanctuary! So let us always sit. Why should we assume the faults of our

friend, or wife, or father, or child, because they sit around our hearth, or are said to have the same blood? All men have my blood, and I have all men's. Not for that will I adopt their petulance or folly, even to the extent of being ashamed of it. But your isolation must not be mechanical, but spiritual, that is, must be elevation. At times the whole world seems to be in conspiracy to importune you with emphatic trifles. Friend, client, child, sickness, fear, want, charity, all knock at once at thy closet-door and say, "Come out unto us."—Do not spill thy soul; do not all descend; keep thy state; stay at home in thine own heaven; come not for a moment into their facts, into their hubbub of conflicting appearances, but let in the light of thy law on their confusion. The power men possess to annoy me, I give them by a weak curiosity. No man can come near me but through my act. "What we love, that we have; but by desire we bereave ourselves of the love."

If we cannot at once rise to the sanctities of obedience and faith, let us at least resist our temptations, let us enter into the state of war, and wake Thor and Woden, courage and constancy, in our Saxon breasts. This is to be done in our smooth times by speaking the truth. Check this lying hospitality and lying affection. Live no longer to the expectation of these deceived and deceiving people with whom we converse. Say to them, O father, O mother, O wife, O brother, O friend, I have lived with you after appearances hitherto. Henceforward I am the truth's. Be it known unto you that henceforward I obey no law less than the eternal law. I will have no covenants but proximities. I shall endeavor to nourish my parents, to support my family, to be the chaste husband of one wife,—but these relations I must fill after a new and unprecedented way. I appeal from your customs. I must be myself. I cannot break myself any longer from you, or you. If you can love me for what I am, we shall be the happier. If you cannot, I will still seek to deserve that you should. I must be myself. I will not hide my tastes or aversions. I will so trust that what is deep is holy, that I will do strongly before the sun and moon whatever inly rejoices me, and

the heart appoints. If you are noble, I will love you; if you are not, I will not hurt you and myself by hypocritical attentions. If you are true, but not in the same truth with me, cleave to your companions; I will seek my own. I do this not selfishly, but humbly and truly. It is alike your interest and mine and all men's, however long we have dwelt in lies, to live in truth. Does this sound harsh to-day? You will soon love what is dictated by your nature as well as mine; and if we follow the truth, it will bring us out safe at last.—But so you may give these friends pain. Yes, but I cannot sell my liberty and my power, to save their sensibility. Besides, all persons have their moments of reason, when they look out into the region of absolute truth; then will they justify me and do the same thing.

The populace think that your rejection of popular standards is a rejection of all standard, and mere antinomianism; and the bold sensualist will use the name of philosophy to gild his crimes. But the law of consciousness abides. There are two confessionals, in one or the other of which we must be shriven. You may fulfil your round of duties by clearing yourself in the *direct*, or in the *reflex* way. Consider whether you have satisfied your relations to father, mother, cousin, neighbor, town, cat, and dog; whether any of these can upbraid you. But I may also neglect this reflex standard, and absolve me to myself. I have my own stern claims and perfect circle. It denies the name of duty to many offices that are called duties. But if I can discharge its debts, it enables me to dispense with the popular code. If any one imagines that this law is lax, let him keep its commandment one day.

And truly it demands something godlike in him who has cast off the common motives of humanity, and has ventured to trust himself for a task-master. High be his heart, faithful his will, clear his sight, that he may in good earnest be doctrine, society, law to himself, that a simple purpose may be to him as strong as iron necessity is to others.

If any man consider the present aspects of what is called by distinction *society*, he will see the need of these ethics. The sinew and heart of man seem to be drawn out, and we

are become timorous desponding whimperers. We are afraid of truth, afraid of fortune, afraid of death, and afraid of each other. Our age yields no great and perfect persons. We want men and women who shall renovate life and our social state, but we see that most natures are insolvent; cannot satisfy their own wants, have an ambition out of all proportion to their practical force, and so do lean and beg day and night continually. Our housekeeping is mendicant; our arts, our occupations, our marriages, our religion we have not chosen, but society has chosen for us. We are parlor soldiers. The rugged battle of fate, where strength is born, we shun.

If our young men miscarry in their first enterprises, they lose all heart. If the young merchant fails, men say he is *ruined*. If the finest genius studies at one of our colleges, and is not installed in an office within one year afterwards in the cities or suburbs of Boston or New York, it seems to his friends and to himself that he is right in being disheartened and in complaining the rest of his life. A sturdy lad from New Hampshire or Vermont, who in turn tries all the professions, who *teams it, farms it, peddles*, keeps a school, preaches, edits a newspaper, goes to Congress, buys a township, and so forth, in successive years, and always, like a cat, falls on his feet, is worth a hundred of these city dolls. He walks abreast with his days, and feels no shame in not "studying a profession," for he does not postpone his life, but lives already. He has not one chance, but a hundred chances. Let a stoic arise who shall reveal the resources of man, and tell men they are not leaning willows, but can and must detach themselves; that with the exercise of self-trust, new powers shall appear; that a man is the word made flesh, born to shed healing to the nations; that he should be ashamed of our compassion; and that the moment he acts from himself, tossing the laws, the books, idolatries, and customs out of the window, we pity him no more, but thank and revere him;—and that teacher shall restore the life of man to splendor, and make his name dear to all History.

It is easy to see that a greater self-reliance,—a new re-

spect for the divinity in man,—must work a revolution in all the offices and relations of men; in their religion; in their education; in their pursuits; their modes of living; their association; in their property; in their speculative views.

1. In what prayers do men allow themselves! That which they call a holy office, is not so much as brave and manly. Prayer looks abroad, and asks for some foreign addition to come through some foreign virtue, and loses itself in endless mazes of natural and supernatural, and mediatorial and miraculous. Prayer that craves a particular commodity—any thing less than all good, is vicious. Prayer is the contemplation of the facts of life from the highest point of view. It is the soliloquy of a beholding and jubilant soul. It is the spirit of God pronouncing his works good. But prayer as a means to effect a private end, is theft and meanness. It supposes dualism and not unity in nature and consciousness. As soon as the man is at one with God, he will not beg. He will then see prayer in all action. The prayer of the farmer kneeling in his field to weed it, the prayer of the rower kneeling with the stroke of his oar, are true prayers heard throughout nature, though for cheap ends. Caratach, in Fletcher's *Bonduca*, when admonished to inquire the mind of the god Andate, replies,

“His hidden meaning lies in our endeavours,  
Our valours are our best gods.”

Another sort of false prayers are our regrets. Discontent is the want of self-reliance: it is infirmity of will. Regret calamities, if you can thereby help the sufferer; if not, attend your own work, and already the evil begins to be repaired. Our sympathy is just as base. We come to them who weep foolishly, and sit down and cry for company, instead of imparting to them truth and health in rough electric shocks, putting them once more in communication with the soul. The secret of fortune is joy in our hands. Welcome evermore to gods and men is the self-helping man. For him all doors are flung wide. Him all tongues greet, all honors crown, all eyes follow with desire. Our love goes out to him and embraces him, because

he did not need it. We solicitously and apologetically caress and celebrate him, because he held on his way and scorned our disapprobation. The gods love him, because men hated him. "To the persevering mortal," said Zoroaster, "the blessed Immortals are swift."

As men's prayers are a disease of the will, so are their creeds a disease of the intellect. They say with those foolish Israelites, "Let not God speak to us, lest we die. Speak thou, speak any man with us, and we will obey." Everywhere I am bereaved of meeting God in my brother, because he has shut his own temple-doors, and recites fables merely of his brother's, or his brother's brother's God. Every new mind is a new classification. If it prove a mind of uncommon activity and power, a Locke, a Lavoisier, a Hutton, a Bentham, a Spurzheim, it imposes its classification on other men, and lo! a new system. In proportion always to the depth of the thought, and so to the number of the objects it touches and brings within the reach of the pupil, is his complacency. But chiefly is this apparent in creeds and churches, which are also classifications of some powerful mind acting on the great elemental thought of Duty, and man's relation to the Highest. Such is Calvinism, Quakerism, Swedenborgianism. The pupil takes the same delight in subordinating every thing to the new terminology, that a girl does who has just learned botany, in seeing a new earth and new seasons thereby. It will happen for a time, that the pupil will feel a real debt to the teacher,—will find his intellectual power has grown by the study of his writings. This will continue until he has exhausted his master's mind. But in all unbalanced minds the classification is idolized, passes for the end, and not for a speedily exhaustible means, so that the walls of the system blend to their eye in the remote horizon with the walls of the universe; the luminaries of heaven seem to them hung on the arch their master built. They cannot imagine how you aliens have any right to see,—how can you see; "It must be somehow that you stole the light from us." They do not yet perceive, that light unsystematic, indomitable, will break into any cabin, even into theirs. Let them chirp awhile and call it their

own. If they are honest and do well, presently their neat new pinfold will be too strait and low, will crack, will lean, will rot and vanish, and the immortal light, all young and joyful, million-orbed, million-colored, will beam over the universe as on the first morning.

2. It is for want of self-culture that the idol of Traveling, the idol of Italy, of England, of Egypt, remains for all educated Americans. They who made England, Italy, or Greece venerable in the imagination, did so not by rambling round creation as a moth round a lamp, but by sticking fast where they were, like an axis of the earth. In manly hours we feel that duty is our place, and that the merry-men of circumstance should follow as they may. The soul is no traveler: the wise man stays at home with the soul; and when his necessities, his duties, on any occasion call him from his house, or into foreign lands, he is at home still, and is not gadding abroad from himself, and shall make men sensible by the expression of his countenance, that he goes the missionary of wisdom and virtue, and visits cities and men like a sovereign, and not like an interloper or a valet.

I have no churlish objection to the circumnavigation of the globe for the purposes of art, of study, and of benevolence, so that the man is first domesticated, or does not go abroad with the hope of finding somewhat greater than he knows. He who travels to be amused, or to get somewhat which he does not carry, travels away from himself, and grows old even in youth among old things. In Thebes, in Palmyra, his will and mind have become old and dilapidated as they. He carries ruins to ruins.

Travelling is a fool's paradise. We owe to our first journeys the discovery that place is nothing. At home I dream that at Naples, at Rome, I can be intoxicated with beauty, and lose my sadness. I pack my trunk, embrace my friends, embark on the sea and at last wake up in Naples, and there beside me is the stern Fact, the sad Self, unrelenting, identical, that I fled from. I seek the Vatican, and the palaces affect to be intoxicated with sights and suggestions, but I am not intoxicated. My giant goes with me wherever I go.

3. But the rage of travelling is itself only a symptom of a deeper unsoundness, affecting the whole intellectual action. The intellect is vagabond, and the universal system of education fosters restlessness. Our minds travel when our bodies are forced to stay at home. We imitate; and what is imitation but the traveling of the mind? Our houses are built with foreign taste; our shelves are garnished with foreign ornaments; our opinions, our tastes, our whole minds lean, and follow the Past and the Distant, as the eyes of a maid follow her mistress. The soul created the arts wherever they have flourished. It was in his own mind that the artist sought his model. It was an application of his own thought to the thing to be done and the conditions to be observed. And why need we copy the Doric or the Gothic model? Beauty, convenience, grandeur of thought, and quaint expression, are as near to us as to any; and if the American artist will study with hope and love the precise thing to be done by him, considering the climate, the soil, the length of the day, the wants of the people, the habit and form of the government, he will create a house in which all these will find themselves fitted, and taste and sentiment will be satisfied also.

Insist on yourself; never imitate. Your own gift you can present every moment with the cumulative force of a whole life's cultivation; but of the adopted talent of another you have only an extemporaneous, half possession. That which each can do best, none but his Maker can teach him. No man yet knows what it is, nor can, till that person has exhibited it. Where is the master who could have taught Shakspeare? Where is the master who could have instructed Franklin, or Washington, or Bacon, or Newton? Every great man is an unique. The Scipionism of Scipio is precisely that part he could not borrow. If anybody will tell me whom the great man imitates in the original crisis when he performs a great act, I will tell him who else than himself can teach him. Shakspeare will never be made by the study of Shakspeare. Do that which is assigned thee, and thou canst not hope too much or dare too much. There is at this moment, there is for me an utterance bare and grand as that

of the colossal chisel of Phidias, or trowel of the Egyptians, or the pen of Moses, or Dante, but different from all these. Not possibly will the soul all rich, all eloquent, with thousand-cloven tongue, deign to repeat itself; but if I can hear what these patriarchs say, surely I can reply to them in the same pitch of voice: for the ear and the tongue are two organs of one nature. Dwell up there in the simple and noble regions of thy life, obey thy heart, and thou shalt reproduce the Foreworld again.

4. As our Religion, our Education, our Art look abroad, so does our spirit of society. All men plume themselves on the improvement of society, and no man improves.

Society never advances. It recedes as fast on one side as it gains on the other. Its progress is only apparent, like the workers of a treadmill. It undergoes continual changes: it is barbarous, it is civilized, it is christianized, it is rich, it is scientific; but this change is not amelioration. For every thing that is given something is taken. Society acquires new arts, and loses old instincts. What a contrast between the well-clad, reading, writing, thinking American, with a watch, a pencil, and a bill of exchange in his pocket, and the naked New Zealander, whose poverty is a club, a spear, a mat, and an undivided twentieth of a shed to sleep under! But compare the health of the two men, and you shall see that his aboriginal strength the white man has lost. If the traveller tell us truly, strike the savage with a broad axe, and in a day or two the flesh shall unite and heal as if you struck the blow into soft pitch, and the same blow shall send the white to his grave.

The civilized man has built a coach, but has lost the use of his feet. He is supported on crutches, but loses so much support of muscle. He has got a fine Geneva watch, but he has lost the skill to tell the hour by the sun. A Greenwich nautical almanac he has, and so being sure of the information when he wants it, the man in the street does not know a star in the sky. The solstice he does not observe; the equinox he knows as little; and the whole bright calendar of the year is without a dial in his mind. His note books impair his memory; his libraries overload his wit; the insurance-office

increases the number of accidents; and it may be a question whether machinery does not encumber; whether we have not lost by refinement some energy, by a christianity entrenched in establishments and forms some vigor of wild virtue. For every stoic was a stoic; but in Christendom where is the Christian?

There is no more deviation in the moral standard than in the standard of height or bulk. No greater men are now than ever were. A singular equality may be observed between the great men of the first and of the last ages; nor can all the science, art, religion, and philosophy of the nineteenth century avail to educate greater men than Plutarch's heroes, three or four and twenty centuries ago. Not in time is the race progressive. Phocion, Socrates, Anaxagoras, Diogenes, are great men, but they leave no class. He who is really of their class will not be called by their name, but be wholly his own man, and in his turn the founder of a sect. The arts and inventions of each period are only its costume, and do not invigorate men. The harm of the improved machinery may compensate its good. Hudson and Behring accomplished so much in their fishing-boats, as to astonish Parry and Franklin, whose equipment exhausted the resources of science and art. Galileo, with an opera-glass, discovered a more splendid series of facts than any one since. Columbus found the New World in an undecked boat. It is curious to see the periodical disuse and perishing of means and machinery which were introduced with loud laudation a few years or centuries before. The great genius returns to essential man. We reckoned the improvements of war among the triumphs of science, and yet Napoleon conquered Europe by the Bivouac, which consisted of falling back on naked valor, and disencumbering it of all aids. The Emperor held it impossible to make a perfect army, says Las Casas, "without abolishing our arms, magazines, commissaries, and carriages; until, in imitation of the Roman custom, the soldier should receive his supply of corn, grind it in his hand-mill, and bake his bread himself."

Society is a wave. The wave moves onward, but the water of which it is composed does not. The same particle

does not rise from the valley to the ridge. Its unity is only phenomenal. The persons who make up a nation to-day, next year die, and their experience with them.

And so the reliance on Property, including the reliance on governments which protect it, is the want of self-reliance. Men have looked away from themselves and at things so long, that they have come to esteem what they call the soul's progress, namely, the religious, learned, and civil institutions, as guards of property, and they deprecate assaults on these, because they feel them to be assaults on property. They measure their esteem of each other by what each has, and not by what each is. But a cultivated man becomes ashamed of his property, ashamed of what he has, out of new respect for his being. Especially he hates what he has, if he sees that it is accidental,—came to him by inheritance, or gift, or crime; then he feels that it is not having; it does not belong to him, has no root in him, and merely lies there, because no revolution or no robber takes it away. But that which a man is, does always by necessity acquire, and what the man acquires is permanent and living property, which does not wait the beck of rulers, or mobs, or revolutions, or fire, or storm, or bankruptcies, but perpetually renews itself wherever the man is put. "Thy lot or portion of life," said the Caliph Ali, "is seeking after thee; therefore be at rest from seeking after it." Our dependence on these foreign goods leads us to our slavish respect for numbers. The political parties meet in numerous conventions; the greater the concourse, and with each new uproar of announcement, The delegation from Essex! The Democrats from New Hampshire! The Whigs of Maine! the young patriot feels himself stronger than before by a new thousand of eyes and arms. In like manner the reformers summon conventions, and vote and resolve in multitude. But not so, O friends! will the God deign to enter and inhabit you; but by a method precisely the reverse. It is only as a man puts off from himself all external support, and stands alone, that I see him to be strong and to prevail. He is weaker by every recruit to his banner. Is not a man better than a town? Ask nothing of men, and in the end-

less mutation, thou only firm column must appear the upholder of all that surrounds thee. He who knows that power is in the soul, that he is weak only because he has looked for good out of him and elsewhere, and so perceiving, throws himself unhesitatingly on his thought, instantly rights himself, stands in the erect position, commands his limbs, works miracles; just as a man who stands on his feet is stronger than a man who stands on his head.

So use all that is called Fortune. Most men gamble with her, and gain all, and lose all, as her wheel rolls. But do thou leave as unlawful these winnings, and deal with Cause and Effect, the chancellors of God. In the Will work and acquire, and thou hast chained the wheel of Chance, and shall always drag her after thee. A political victory, a rise of rents, the recovery of your sick, or the return of your absent friend, or some other quite external event, raises your spirits, and you think good days are preparing for you. Do not believe it. It can never be so. Nothing can bring you peace but yourself. Nothing can bring you peace but the triumph of principles.

## VIII

### COMPENSATION

EVER since I was a boy, I have wished to write a discourse on Compensation: for it seemed to me when very young, that, on this subject, Life was ahead of theology, and the people knew more than the preachers taught. The documents, too, from which the doctrine is to be drawn, charmed my fancy by their endless variety, and lay always before me, even in sleep; for they are the tools in our hands, the bread in our basket, the transactions of the street, the farm, and the dwelling-house, the greetings, the relations, the debts and credits, the influence of character, the nature and endowment of all men. It seemed to me also that in it might be shown men a ray of divinity, the present action of the Soul of this world, clean from all vestige of tradition, and so the heart of man might be bathed by an inundation of eternal love, conversing with that which he knows was always and always must be, because it really is now. It appeared, moreover, that if this doctrine could be stated in terms with any resemblance to those bright intuitions in which this truth is sometimes revealed to us, it would be a star in many dark hours and crooked passages in our journey, that would not suffer us to lose our way.

I was lately confirmed in these desires by hearing a sermon at church. The preacher, a man esteemed for his orthodoxy, unfolded in the ordinary manner the doctrine of the Last Judgment. He assumed that judgment is not executed in this world; that the wicked are successful; that the good are miserable; and then urged from reason and from Scripture a compensation to be made to both parties in the next life. No offence appeared to be taken by the congregation at this doctrine. As far as I could observe, when

the meeting broke up, they separated without remark on the sermon.

Yet what was the import of this teaching? What did the preacher mean by saying that the good are miserable in the present life? Was it that houses and lands, offices, wine, horses, dress, luxury, are had by unprincipled men, whilst the saints are poor and despised; and that a compensation is to be made to these last hereafter, by giving them the like gratifications another day,—bankstock and doubloons, venison and champagne? This must be the compensation intended; for what else? Is it that they are to have leave to pray and praise? to love and serve men? Why, that they can do now. The legitimate inference the disciple would draw, was: “We are to have *such* a good time as the sinners have now”;—or, to push it to its extreme import: “You sin now; we shall sin by and by: we would sin now, if we could; not being successful, we expect our revenge to-morrow.”

The fallacy lay in the immense concession that the bad are successful; that justice is not done now. The blindness of the preacher consisted in deferring to the base estimate of the market of what constitutes a manly success, instead of confronting and convicting the world from the truth; announcing the Presence of the Soul, the omnipotence of the Will; and so establishing the standard of good and ill, of success and falsehood, and summoning the dead to its present tribunal.

I find a similar base tone in the popular religious works of the day, and the same doctrines assumed by the literary men when occasionally they treat the related topics. I think that our popular theology has gained in decorum, and not in principle, over the superstitions it has displaced. But men are better than this theology. Their daily life gives it the lie. Every ingenious and aspiring soul leaves the doctrine behind him in his own experience; and all men feel sometimes the falsehood which they cannot demonstrate. For men are wiser than they know. That which they hear in schools and pulpits without afterthought, if said in conversation would probably be questioned in silence. If a

man dogmatize in a mixed company on Providence and the divine laws, he is answered by a silence which conveys well enough to an observer the dissatisfaction of the hearer, but his incapacity to make his own statement.

I shall attempt in this and the following chapter to record some facts that indicate the path of the law of Compensation; happy beyond my expectation, if I shall truly draw the smallest arc of this circle.

Polarity, or action and reaction, we meet in every part of nature; in darkness and light; in heat and cold; in the ebb and flow of waters; in male and female; in the inspiration and expiration of plants and animals; in the systole and diastole of the heart; in the undulations of fluid and of sound; in the centrifugal and centripetal gravity; in electricity, galvanism, and chemical affinity. Superinduce magnetism at one end of a needle, the opposite magnetism takes place at the other end. If the south attracts, the north repels. To empty here, you must condense there. An inevitable dualism bisects nature, so that each thing is a half, and suggests another thing to make it whole; as spirit, matter; man, woman; subjective, objective; in, out; upper, under; motion, rest; yea, nay.

Whilst the world is thus dual, so is every one of its parts. The entire system of things gets represented in every particle. There is somewhat that resembles the ebb and flow of the sea, day and night, man and woman, in a single needle of the pine, in a kernel of corn, in each individual of every animal tribe. The reaction so grand in the elements is repeated within these small boundaries. For example, in the animal kingdom, the physiologist has observed that no creatures are favorites, but a certain compensation balances every gift and every defect. A surplusage given to one part is paid out of a reduction from another part of the same creature. If the head and neck are enlarged, the trunk and extremities are cut short.

The theory of the mechanic forces is another example. What we gain in power is lost in time; and the converse. The periodic or compensating errors of the planets is another instance. The influences of climate and soil in poli-

tical history are another. The cold climate invigorates; the barren soil does not breed fevers, crocodiles, tigers, or scorpions.

The same dualism underlies the nature and condition of man. Every excess causes a defect; every defect an excess. Every sweet hath its sour; every evil its good. Every faculty which is a receiver of pleasure, has an equal penalty put on its abuse. It is to answer for its moderation with its life. For every grain of wit there is a grain of folly. For every thing you have missed, you have gained something else; and for every thing you gain, you lose something. If riches increase, they are increased that use them. If the gatherer gathers too much, nature takes out of the man what she puts into his chest; swells the estate, but kills the owner. Nature hates monopolies and exceptions. The waves of the sea do not more speedily seek a level from their loftiest tossing, than the varieties of condition tend to equalize themselves. There is always some levelling circumstance, that puts down the overbearing, the strong, the rich, the fortunate, substantially on the same ground with all others. Is a man too strong and fierce for society, and by temper and position a bad citizen,—a morose ruffian with a dash of the pirate in him;—nature sends him a troop of pretty sons and daughters, who are getting along in the dame's classes at the village-school, and love and fear for them smooths his grim scowl to courtesy. Thus she contrives to intenerate the granite and feldspar, takes the boar out and puts the lamb in, and keeps her balance true.

The farmer imagines power and place are fine things. But the President has paid dear for his White House. It has commonly cost him all his peace and the best of his manly attributes. To preserve for a short time so conspicuous an appearance before the world, he is content to eat dust before the real masters, who stand erect behind the throne. Or, do men desire the more substantial and permanent grandeur of genius? Neither has this an immunity. He who by force of will or of thought is great, and overlooks thousands, has the responsibility of overlooking. With every influx of light comes new danger. Has he light? he must bear wit-

ness to the light, and always outrun that sympathy which gives him such keen satisfaction, by his fidelity to new revelations of the incessant soul. He must hate father and mother, wife and child. Has he all that the world loves and admires and covets? he must cast behind him their admiration, and afflict them by faithfulness to his truth, and become a by-word and a hissing.

This Law writes the laws of cities and nations. It will not be baulked of its end in the smallest iota. It is in vain to build or plot or combine against it. Things refuse to be mismanaged long. *Res nolunt diu male administrari.* Though no checks to a new evil appear, the checks exist, and will appear. If the government is cruel, the governor's life is not safe. If you tax too high, the revenue will yield nothing. If you make the criminal code sanguinary, juries will not convict. Nothing arbitrary, nothing artificial can endure. The true life and satisfactions of man seem to elude the utmost rigors or felicities of condition, and to establish themselves with great indifference under all varieties of circumstance. Under all governments the influence of character remains the same,—in Turkey and in New England about alike. Under the primeval despots of Egypt, history honestly confesses that man must have been as free as culture could make him.

These appearances indicate the fact that the universe is represented in every one of its particles. Every thing in nature contains all the powers of nature. Every thing is made of one hidden stuff; as the naturalist sees one type under every metamorphosis, and regards a horse as a running man, a fish as a swimming man, a bird as a flying man, a tree as a rooted man. Each new form repeats not only the main character of the type, but part for part all the details, all the aims, furtherances, hinderances, energies, and whole system of every other. Every occupation, trade, art, transaction, is a compend of the world, and a correlative of every other. Each one is an entire emblem of human life; of its good and ill, its trials, its enemies, its course, and its end. And each one must somehow accommodate the whole man, and recite all his destiny.

The world globes itself in a drop of dew. The microscope cannot find the animalcule which is less perfect for being little. Eyes, ears, taste, smell, motion, resistance, appetite, and organs of reproduction that take hold on eternity,—all find room to consist in the small creature. So do we put our life into every act. The true doctrine of omnipresence is, that God reappears with all his parts in every moss and cobweb. The value of the universe contrives to throw itself into every point. If the good is there, so is the evil; if the affinity, so the repulsion; if the force, so the limitation.

Thus is the universe alive. All things are moral. That soul which within us is a sentiment, outside of us is a law. We feel its inspirations; out there in history we can see its fatal strength. It is almighty. All nature feels its grasp. "It is in the world, and the world was made by it." It is eternal, but it enacts itself in time and space. Justice is not postponed. A perfect equity adjusts its balance in all parts of life. *Οἱ κύβοι Διὸς ἀεὶ εὐπίπτουσι.* The dice of God are always loaded. The world looks like a multiplication-table or a mathematical equation, which, turn it how you will, balances itself. Take what figure you will, its exact value, nor more nor less, still returns to you. Every secret is told, every crime is punished, every virtue rewarded, every wrong redressed, in silence and certainty. What we call retribution, is the universal necessity by which the whole appears wherever a part appears. If you see smoke, there must be a fire. If you see a hand or a limb, you know that the trunk to which it belongs is there behind.

Every act rewards itself, or, in other words, integrates itself, in a twofold manner; first, in the thing, or in real nature; and secondly, in the circumstance, or in apparent nature. Men call the circumstance the retribution. The causal retribution is in the thing, and is seen by the soul. The retribution in the circumstance is seen by the understanding; it is inseparable from the thing, but is often spread over a long time, and so does not become distinct until after many years. The specific stripes may follow late after the offence, but they follow because they accom-

pany it. Crime and punishment grow out of one stem. Punishment is a fruit that unsuspected ripens within the flower of the pleasure which concealed it. Cause and effect, means and ends, seed and fruit, cannot be severed; for the effect already blooms in the cause, the end pre-exists in the means, the fruit in the seed.

Whilst thus the world will be whole, and refuses to be disparted, we seek to act partially, to sunder, to appropriate; for example,—to gratify the senses, we sever the pleasure of the senses from the needs of the character. The ingenuity of man has been dedicated always to the solution of one problem,—how to detach the sensual sweet, the sensual strong, the sensual bright, &c., from the moral sweet, the moral deep, the moral fair; that is, again, to contrive to cut clean off this upper surface so thin as to leave it bottomless; to get a *one end*, without an *other end*. The soul says, Eat; the body would feast. The soul says, The man and woman shall be one flesh and one soul; the body would join the flesh only. The soul says, Have dominion over all things to the ends of virtue; the body would have the power over things to its own ends.

The soul strives amain to live and work through all things. It would be the only fact. All things shall be added unto it,—power, pleasure, knowledge, beauty. The particular man aims to be somebody; to set up for himself; to truck and higgler for a private good; and, in particulars, to ride, that he may ride; to dress, that he may be dressed; to eat, that he may eat; and to govern, that he may be seen. Men seek to be great; they would have offices, wealth, power, and fame. They think that to be great is to get only one side of nature—the sweet, without the other side—the bitter.

Steadily is this dividing and detaching counteracted. Up to this day, it must be owned, no projector has had the smallest success. The parted water reunites behind our hand. Pleasure is taken out of pleasant things, profit out of profitable things, power out of strong things, the moment we seek to separate them from the whole. We can no more *have things*, and get the sensual good by itself, than we can

get an inside that shall have no outside, or a light without a shadow. "Drive out nature with a fork, she comes running back."

Life invests itself with inevitable conditions, which the unwise seek to dodge, which one and another brags that he does not know; brags that they do not touch him;—but the brag is on his lips, the conditions are in his soul. If he escapes them in one part, they attack him in another more vital part. If he has escaped them in form and in the appearance, it is that he has resisted his life and fled from himself; and the retribution is so much death. So signal is the failure of all attempts to make this separation of the good from the tax, that the experiment would not be tried,—since to try it is to be mad,—but for the circumstance, that when the disease begins in the will, of rebellion and separation, the intellect is at once infected, so that the man ceases to see God whole in each object, but is able to see the sensual allurement of an object, and not see the sensual hurt; he sees the mermaid's head, but not the dragon's tail; and thinks he can cut off that which he would have, from that which he would not have. "How secret art thou who dwellest in the highest heavens in silence, O thou only great God, sprinkling with an unwearied Providence certain penal blindnesses upon such as have unbridled desires!"<sup>1</sup>

The human soul is true to these facts in the painting of fable, of history, of law, of proverbs, of conversation. It finds a tongue in literature unawares. Thus the Greeks called Jupiter, Supreme Mind; but having traditionally ascribed to him many base actions, they involuntarily made amends to Reason, by tying up the hands of so bad a god. He is made as helpless as a king of England. Prometheus knows one secret, which Jove must bargain for; Minerva, another. He cannot get his own thunders; Minerva keeps the key of them.

"Of all the gods I only know the keys  
That ope the solid doors within whose vaults  
His thunders sleep."

A plain confession of the in-working of the All, and of its

<sup>1</sup> St. Augustine: Confessions, book i.

moral aim. The Indian mythology ends in the same ethics; and indeed it would seem impossible for any fable to be invented and get any currency which was not moral. Aurora forgot to ask youth for her lover, and so though Tithonus immortal, he is old. Achilles is not quite invulnerable; for Thetis held him by the heel when she dipped him in the Styx, and the sacred waters did not wash that part. Siegfried, in the Niebelungen, is not quite immortal, for a leaf fell on his back whilst he was bathing in the Dragon's blood, and that spot which it covered is mortal. And so it always is. There is a crack in every thing God has made. Always, it would seem, there is this vindictive circumstance stealing in at unawares, even into the wild poesy in which the human fancy attempted to make bold holyday, and to shake itself free of the old laws,—this backstroke, this kick of the sun, certifying that the law is fatal; that in Nature nothing can be given, all things are sold.

This is the ancient doctrine of Nemesis, who keeps watch over the Universe, and lets no offence go unchastised. The Furies, they said, are attendants on Justice, and if the sun or heaven should transgress his path, they would punish him. The poets related that stone walls, and iron swords, and leather thongs, had an occult sympathy with the wrongs of their owners; that the belt which Ajax gave Hector dragged the Trojan hero over the field at the wheels of the car of Achilles; and the sword which Hector gave Ajax was that on whose point Ajax fell. They recorded, that when the Persians erected a statue to Theogenes, a victor in the games, one of his rivals went to it by night, and endeavored to throw it down by repeated blows, until at last he moved it from its pedestal, and was crushed to death beneath its fall.

This voice of fable has in it somewhat divine. It came from the thought above the will of the writer. That is the best part of each writer which has nothing private in it. That is the best part of each which he does not know, that which flowed out of his constitution, and not from his too active invention; that which in the study of a single artist you might not easily find, but in the study of many you

would abstract as the spirit of them all. Phidias it is not, but the work of man in that early Hellenic world, that I would know. The name and circumstances of Phidias, however convenient for history, embarrasses when we come to the highest criticism. We are to see that which man was tending to do in a given period, and was hindered, or, if you will, modified in doing, by the interfering volitions of Phidias, of Dante, of Shakspeare, the organ whereby man at the moment wrought.

Still more striking is the expression of this fact in the proverbs of all nations, which are always the literature of Reason, or the statements of an absolute truth without qualification. Proverbs, like the sacred books of each nation, are the sanctuary of the Intuitions. That which the droning world, chained to appearances, will not allow the realist to say in his own words, it will suffer him to say in proverbs without contradiction. And this law of laws, which the pulpit, the senate, and the college deny, is hourly preached in all markets and all languages by flights of proverbs, whose teaching is as true and as omnipresent as that of birds and flies.

All things are double, one against another.—Tit for tat; an eye for an eye; a tooth for a tooth; blood for blood; measure for measure; love for love.—Give, and it shall be given you.—He that watereth shall be watered himself.—What will you have? quoth God; pay for it, and take it.—Nothing venture, nothing have.—Thou shalt be paid exactly for what thou hast done, no more, no less.—Who doth not work shall not eat.—Harm watch, harm catch.—Curses always recoil on the head of him who imprecates them.—If you put a chain around the neck of a slave, the other end fastens itself around your own.—Bad counsel confounds the adviser.—The devil is an ass.

It is thus written because it is thus in life. Our action is overmastered and characterized above our will by the law of nature. We aim at a petty end, quite aside from the public good, but our act arranges itself by irresistible magnetism in a line with the poles of the world.

A man cannot speak but he judges himself. With his

all, or against his will, he draws his portrait to the eye of his companions by every word. Every opinion reacts on him who utters it. It is a threadball thrown at a mark, but the other end remains in the thrower's bag. Or rather, it is a harpoon thrown at the whale, unwinding, as it flies, a coil of cord in the boat; and if the harpoon is not good, or it will go nigh to cut the steersman in twain, to sink the boat.

You cannot do wrong without suffering wrong. "No man had ever a point of pride that was not injurious to him," said Burke. The exclusive in fashionable life does not see that he excludes himself from enjoyment, in the attempt to appropriate it. The exclusionist in religion does not see that he shuts the door of heaven on himself, in striving to shut out others. Treat men as pawns and ninepins, and you shall suffer as well as they. If you leave out their heart, you shall lose your own. The senses would make things of persons; of women, of children, of the poor. The vulgar proverb, "I will get it from his purse or get it from his skin," is sound philosophy.

All infractions of love and equity in our social relations are speedily punished. They are punished by Fear. Whilst I stand in simple relations to my fellow man, I have no displeasure in meeting him. We meet as water meets water, as a current of air meets another, with perfect diffusion and interpenetration of nature. But as soon as there is any departure from simplicity and attempt at halfness, or good for me that is not good for him, my neighbor feels the wrong; he shrinks from me as far as I have shrunk from him; his eyes no longer seek mine; there is war between us; there is hate in him, and fear in me.

All the old abuses in society, the great and universal, and the petty and particular, all unjust accumulations of property and power, are avenged in the same manner. Fear is an instructor of great sagacity, and the herald of all revolutions. One thing he always teaches, that there is no safety where he appears. He is a carrion crow; and though you see not well what he hovers for, there is death everywhere. Our property is timid, our laws are timid,

our cultivated classes are timid. Fear for ages has boded and mowed and gibbered over government and property. That obscene bird is not there for nothing. He indicates great wrongs, which must be revised.

Of the like nature is that expectation of change which instantly follows the suspension of our voluntary activity. The terror of cloudless moon, the emerald of Polycrates, the awe of prosperity, the instinct which leads every generous soul to impose on itself tasks of a noble asceticism, and vicarious virtue, are the tremblings of the balance of justice through the heart and mind of man.

Experienced men of the world know very well that it is always best to pay scot and lot as they go along, and that a man often pays dear for a small frugality. The borrower runs in his own debt. Has a man gained any thing who has received a hundred favors and rendered none? Has he gained by borrowing, through indolence or cunning, his neighbor's wares, or horses, or money? There arises on the deed the instant acknowledgment of benefit on the one part, and of debt on the other; that is, of superiority and inferiority. The transaction remains in the memory of himself and his neighbor; and every new transaction alters, according to its nature, their relation to each other. He may soon come to see that he had better have broken his own bones than to have ridden in his neighbor's coach, and that "the highest price he can pay for a thing is to ask for it."

A wise man will extend this lesson to all parts of life, and know that it is always the part of prudence to face every claimant, and pay every just demand on your time, your talents, or your heart. Always pay; for, first or last, you must pay your entire debt. Persons and events may stand for a time between you and justice, but it is only a postponement. You must pay at last your own debt. If you are wise, you will dread a prosperity which only loads you with more. Benefit is the end of nature. But for every benefit which you receive, a tax is levied. He is great who confers the most benefits. He is base,—and that is the only base thing in the universe,—to receive favors, and render none. In the order of nature we cannot render benefits

ose from whom we receive them, or only seldom. But the benefit we receive must be rendered again, line for line, ed for deed, cent for cent, to somebody. Beware of too uch good staying in your hand. It will fast corrupt and orm worms. Pay it away quickly in some sort.

Labor is watched over by the same pitiless laws. Cheap- t, say the prudent, is the dearest labor. What we buy in oroom, a mat, a wagon, a knife, is some application of good nse to a common want. It is best to pay in your land skilful gardener, or to buy good sense applied to garden- g; in your sailor, good sense applied to navigation; in the use, good sense applied to cooking, sewing, serving; in ur agent, good sense applied to accounts and affairs. So you multiply your presence, or spread yourself through- t your estate. But because of the dual constitution of things, in labor as in life there can be no cheating. The ef steals from himself. The swindler swindles himself. r the real price of labor is knowledge and virtue, whereof alth and credit are signs. These signs, like paper-money, ay be counterfeited or stolen, but that which they rep- sent, namely, knowledge and virtue, cannot be counter- ted or stolen. These ends of labor cannot be answered t by real exertions of the mind, and in obedience to pure tives. The cheat, the defaulter, the gambler, cannot ex- t the benefit, cannot extort the knowledge of material and oral nature, which his honest care and pains yield to the erative. The law of nature is, Do the thing, and you shall ve the power: but they who do not the thing have not the wer.

Human labor, through all its forms, from the sharpening a stake to the construction of a city or an epic, is one im- nse illustration of the perfect compensation of the uni-erse. Every where and always this law is sublime. The solute balance of Give and Take, the doctrine that every ng has its price; and if that price is not paid, not that ng, but something else, is obtained, and that it is im- ssible to get any thing without its price,—this doctrine is t less sublime in the columns of a ledger than in the bud- s of states, in the laws of light and darkness, in all the

action and reaction of nature. I cannot doubt that the high laws which each man sees ever implicated in those processes with which he is conversant, the stern ethics which sparkle on his chisel-edge, which are measured out by his plumb and foot-rule, which stand as manifest in the footing of the shop-bill as in the history of a state,—do recommend to him his trade, and, though seldom named, exalt his business to his imagination.

The league between virtue and nature engages all things to assume a hostile front to vice. The beautiful laws and substances of the world persecute and whip the traitor. He finds that things are arranged for truth and benefit, but there is no den in the wide world to hide a rogue. There is no such thing as concealment. Commit a crime, and the earth is made of glass. Commit a crime, and it seems as if a coat of snow fell on the ground, such as reveals in the woods the track of every partridge and fox and squirrel and mole. You cannot recall the spoken word, you cannot wipe out the foot-track, you cannot draw up the ladder, so as to leave no inlet or clew. Always some damning circumstance transpires. The laws and substances of nature, water, snow, wind, gravitation, become penalties to the thief.

On the other hand, the law holds with equal sureness for all right action. Love, and you shall be loved. All love is mathematically just, as much as the two sides of an algebraic equation. The good man has absolute good, which like fire turns every thing to its own nature, so that you cannot do him any harm; but as the royal armies sent against Napoleon, when he approached, cast down their colors, and from enemies became friends, so do disasters of all kinds, as sickness, offence, poverty, prove benefactors.

“Winds blow and waters roll  
Strength to the brave, and power and deity,  
Yet in themselves are nothing.”

The good are befriended even by weakness and defect. As no man had ever a point of pride that was not injurious to him, so no man had ever a defect that was not somewhere made useful to him. The stag in the fable admired his

runs and blamed his feet; but when the hunter came, his  
t saved him, and afterwards, caught in the thicket, his  
runs destroyed him. Every man in his lifetime needs to  
unk his faults. As no man thoroughly understands a  
th until first he has contended against it, so no man has a  
rough acquaintance with the hinderances or talents of  
n, until he has suffered from the one, and seen the triumph  
the other over his own want of the same. Has he a de-  
t of temper that unfits him to live in society? Thereby  
is driven to entertain himself alone, and acquire habits  
self-help; and thus, like the wounded oyster, he mends  
shell with pearl.

Our strength grows out of our weakness. Not until we are  
cked and stung and sorely shot at, awakens the indignation  
ich arms itself with secret forces. A great man is always  
ling to be little. Whilst he sits on the cushion of advan-  
es, he goes to sleep. When he is pushed, tormented, de-  
ted, he has a chance to learn something; he has been put  
his wits, on his manhood; he has gained facts; learns his  
orance; is cured of the insanity of conceit; has got moder-  
n and real skill. The wise man always throws himself  
the side of his assailants. It is more his interest than  
is theirs to find his weak point. The wound cicatrizes  
d falls off from him, like a dead skin; and when they  
uld triumph, lo! he has passed on invulnerable. Blame  
safer than praise. I hate to be defended in a newspaper.  
long as all that is said, is said against me, I feel a certain  
urance of success. But as soon as honied words of praise  
e spoken for me, I feel as one that lies unprotected before  
enemies. In general, every evil to which we do not suc-  
mb is a benefactor. As the Sandwich Islander believes  
t the strength and valor of the enemy he kills passes into  
self, so we gain the strength of the temptation we resist.  
The same guards which protect us from disaster, defect,  
d enmity, defend us, if we will, from selfishness and fraud.  
Its and bars are not the best of our institutions, nor is  
ewdness in trade a mark of wisdom. Men suffer all  
eir life long under the foolish superstition that they can be  
eated. But it is as impossible for a man to be cheated by

anyone but himself, as for a thing to be and not to be at the same time. There is a third silent party to all our bargains. The nature and soul of things takes on itself the guaranty of the fulfilment of every contract, so that honest service can never come to a loss. If you serve an ungrateful master, serve him the more. Put God in your debt. Every stroke shall be repaid. The longer the payment is withheld, the better for you; for compound interest on compound interest is the rate and usage of this exchequer.

The history of persecution is a history of endeavors of a cheat nature, to make water run up hill, to twist a rope of sand. It makes no difference whether the actors be many or one, a tyrant or a mob. A mob is a society of bodies voluntarily bereaving themselves of reason and traversing its work. The mob is man voluntarily descending to the nature of the beast. Its fit hour of activity is night. Its actions are insane, like its whole constitution. It persecutes a principle; it would whip a right; it would tar and feather justice, by inflicting fire and outrage upon houses and persons who have these. It resembles the prank of boys who run with fire-engines to put out the ruddy aurora streaming to the stars. The inviolate spirit turns their spite against the wrong-doers. The martyr cannot be dishonored. Every lash inflicted is a tongue of fame; every prison a more illustrious abode; every burned book or house enlightens the world; every suppressed or expunged word reverberates through the earth from side to side. The minds of men are at last aroused; reason looks out and justifies her own, and malice finds all her work vain. It is the whipper who is whipped, and the tyrant who is undone.

Thus do all things preach the indifference of circumstance. The man is all. Every thing has two sides, a good and an evil. Every advantage has its tax. I learn to be content. But the doctrine of compensation is not the doctrine of indifference. The thoughtless say, on hearing these representations: What boots it to do well? there is one event, good and evil: if I gain any good, I must pay for it; if I lose any good, I gain some other; all actions are indiffer-

There is a deeper fact in the soul than compensation; wit, its own nature. The soul is not a compensation, but life. The soul *is*. Under all this running sea of circumstance, whose waters ebb and flow with perfect balance, lies the aboriginal abyss of real Being. Existence, or God, is not relation, or a part, but the whole. Being is the vast affirmative, excluding negation, self-balanced, and swallowing up relations, parts, and times, within itself. Nature, truth, virtue, are the influx from thence. Vice is the absence or departure of the same. Nothing, Falsehood, may indeed stand as the great Night or shade, on which, as a background, the living universe paints itself forth; but no fact is begotten by it; it cannot work; for it is not. It cannot work any good; it cannot work any harm. It is harm, inasmuch as it is worse not to be than to be.

We feel defrauded of the retribution due to evil acts, because the criminal adheres to his vice and contumacy, and does not come to a crisis or judgment anywhere in visible nature. There is no stunning confutation of his nonsense before men and angels. Has he therefore outwitted the law? Inasmuch as he carries the malignity and the lie with him, he so far deceases from nature. In some manner there will be a demonstration of the wrong to the understanding also; but should we not see it, this deadly deduction makes square the eternal account.

Neither can it be said, on the other hand, that the gain of rectitude must be bought by any loss. There is no penalty to virtue; no penalty to wisdom; they are proper additions of being. In a virtuous action, I properly *am*; in a virtuous act, I add to the world; I plant into deserts conquered from Chaos and Nothing, and see the darkness receding on the limits of the horizon. There can be no excess to love, none to knowledge, none to beauty, when these tributes are considered in the purest sense. The soul releases all limits. It affirms in man always an Optimism, never a Pessimism.

His life is a progress, and not a station. His instinct is just. Our instinct uses "more" and "less" in application to man, always of the *presence of the soul*, and not of its ab-

sence: the brave man is greater than the coward; the true, the benevolent, the wise, is more a man, and not less, than the fool and knave. There is, therefore, no tax on the good of virtue; for that is the incoming of God himself, or absolute existence, without any comparative. All external good has its tax; and if it came without desert or sweat, has no root in me, and the next wind will blow it away. But all the good of nature is the soul's, and may be had, if paid for in nature's lawful coin, that is, by labor, which the heart and the head allow. I no longer wish to meet a good I do not earn—for example, to find a pot of buried gold—knowing that it brings with it new responsibility. I do not wish more external goods,—neither possessions, nor honors, nor powers, nor persons. The gain is apparent, the tax is certain. But there is no tax on the knowledge that the compensation exists, and that it is not desirable to dig up treasure. Herein I rejoice with a serene eternal peace. I contract the boundaries of possible mischief. I learn the wisdom of St. Bernard: "Nothing can work me damage except myself; the harm that I sustain, I carry about with me, and never am a real sufferer but by my own fault."

In the nature of the soul is the compensation for the inequalities of condition. The radical tragedy of nature seems to be the distinction of More and Less. How can Less not feel the pain; how not feel indignation or malevolence towards More? Look at those who have less faculty, and one feels sad, and knows not well what to make of it. Almost he shuns their eye; almost he fears they will upbraid God. What should they do? It seems a great injustice. But face the facts, and see them nearly, and the mountainous inequalities vanish. Love reduces them all, as the sun melts the iceberg in the sea. The heart and soul of all men being one, this bitterness of *His* and *Mine* ceases. *His* is mine. I am my brother, and my brother is me. If I feel overshadowed and outdone by great neighbors, I can yet love; I can still receive; and he that loveth maketh his own the grandeur he loves. Thereby I make the discovery that my brother is my guardian, acting for me with the friendliest designs, and the estate I so admired and envied is my own. It is the

eternal nature of the soul to appropriate and make all things its own. Jesus and Shakspeare are fragments of the soul, and by love I conquer and incorporate them in my own conscious domain. His virtue,—is not that mine? His wit,—if it cannot be made mine, it is not wit.

Such, also, is the natural history of calamity. The changes which break up at short intervals the prosperity of men are advertisements of a nature whose law is growth. Evermore it is the order of nature to grow, and every soul is by this intrinsic necessity quitting its whole system of things, its friends, and home, and laws, and faith, as the shell-fish crawls out of its beautiful but stony case, because it no longer admits of its growth, and slowly forms a new house. In proportion to the vigor of the individual, these revolutions are frequent, until in some happier mind they are inessential, and all worldly relations hang very loosely about him, becoming, as it were, a transparent fluid membrane through which the form is always seen, and not, as in most men, an indurated heterogenous fabric of many dates, and of no settled character, in which the man is imprisoned. Then there can be enlargement, and the man of to-day scarcely recognizes the man of yesterday. And such should be the outward biography of man in time,—a putting off of lead circumstances day by day, as he renews his raiment day by day. But to us, in our lapsed estate, resting not advancing, resisting not co-operating with the divine expansion, this growth comes by shocks.

We cannot part with our friends. We cannot let our angels go. We do not see that they only go out that arch-angels may come in. We are idolaters of the Old. We do not believe in the riches of the soul, in its proper eternity and omnipresence. We do not believe there is any force in to-day to rival or re-create that beautiful yesterday. We linger in the ruins of the old tent, where once we had bread and shelter and organs, nor believe that the spirit can feed, revive, and nerve us again. But we sit and weep in vain. The voice of the Almighty saith, "Up and onward for evermore!" We cannot stay amid the ruins. Neither will we

rely on the New: and so we walk ever with reverted eyes, like those monsters who look backwards,

And yet the compensations of calamity are made apparent to the understanding also, after long intervals of time. A fever, a mutilation, a cruel disappointment, a loss of wealth, a loss of friends, seems at the moment unpaid loss, and unpayable. But the sure years reveal the deep remedial force that underlies all facts. The death of a dear friend, wife, brother, lover, which seemed nothing but privation, somewhat later assumes the aspect of a guide or genius; for it commonly operates revolutions in our way of life, terminates an epoch of infancy or of youth which was waiting to be closed, breaks up a wonted occupation, or a household, or style of living, and allows the formation of new ones more friendly to the growth of character. It permits or constrains the formation of new acquaintances, and the reception of new influences, that prove of the first importance to the next years; and the man or woman who would have remained a sunny garden-flower, with no room for its roots, and too much sunshine for its head, by the falling of the walls and the neglect of the gardener, is made the banian of the forest, yielding shade and fruit to wide neighborhoods of men

## IX

### HEROISM

“Paradise is under the shadow of swords.”

*Mahomet.*

IN the elder English dramatists, and mainly in the plays of Beaumont and Fletcher, there is a constant recognition of gentility, as if a noble behavior were as easily marked in the society of their age, as color is in our American population. When any Rodrigo, Pedro, or Valerio enters, though he be a stranger, the duke or governor exclaims, This is a gentleman,—and proffers civilities without end; but all the rest are slag and refuse. In harmony with this delight in personal advantages, there is in their plays a certain heroic cast of character and dialogue,—as in *Bonduca*, *Sophocles*, the *Mad Lover*, the *Double Marriage*,—wherein the speaker is so earnest and cordial, and on such deep grounds of character, that the dialogue, on the slightest additional incident in the plot, rises naturally into poetry. Among many texts, take the following. The Roman *Martius* has conquered Athens,—all but the invincible spirits of *Sophocles* the duke of Athens, and *Dorigen* his wife. The beauty of the latter flames *Martius*, and he seeks to save her husband; but *Sophocles* will not ask his life, although assured that a word will save him, and the execution of both proceeds.

“*Valerius*. Bid thy wife farewell.

*Soph.* No, I will take no leave. My *Dorigen*,  
Yonder above, 'bout *Ariadne's* crown,  
My spirit shall hover for thee. Prithee, haste.

*Dor.* Stay, *Sophocles*, — with this tie up my sight;  
Let not soft nature so transformed be,  
And lose her gentler-sexed humanity,  
To make me see my lord bleed. So, 'tis well;  
Never one object underneath the sun

Will I behold before my Sophocles.

Farewell: now teach the Romans how to die.

*Mar.* Dost know what 'tis to die?

*Soph.* Thou dost not, Martius,  
And therefore not what 'tis to live. To die  
Is to begin to live; it is to end

An old, stale, weary work, and to commence  
A newer and a better; 'tis to leave  
Deceitful knaves for the society

Of gods and goodness. Thou thyself must part  
At last from all thy garlands, pleasures, triumphs,  
And prove thy fortitude what then 'twill do.

*Val.* But art not grieved nor vexed to leave thy life thus?

*Soph.* Why should I grieve or vex for being sent  
To them I ever loved best? Now, I'll kneel,  
But with my back toward thee; 'tis the last duty  
This trunk can do the gods.

*Mar.* Strike, strike, Valerius,  
Or Martius' heart will leap out at his mouth:  
This is a man, a woman! Kiss thy lord,  
And live with all the freedom you were wont.  
O love! thou doubly hast afflicted me  
With virtue and with beauty. Treacherous heart,  
My hand shall cast thee quick into my urn,  
Ere thou transgress this knot of piety.

*Val.* What ails my brother?

*Soph.* Martius, O Martius,  
Thou now hast found a way to conquer me.

*Dor.* O star of Rome! what gratitude can speak  
Fit words to follow such a deed as this?

*Mar.* This admirable duke, Valerius,  
With his disdain of fortune and of death,  
Captived himself, has captivated me,  
And though my arm hath ta'en his body here,  
His soul hath subjugated Martius' soul.  
By Romulus, he is all soul, I think;  
He hath no flesh, and spirit cannot be gyved.  
Then we have vanquished nothing; he is free,  
And Martius walks now in captivity."

I do not readily remember any poem, play, sermon, novel, or oration, that our press vents in the last few years, which goes to the same tune. We have a great many flutes and flageolets, but not often the sound of any fife. Yet Wordsworth's *Laodamia*, and the ode of "Dion," and some sonnets, have a certain noble music; and Scott will sometimes draw a stroke like the portrait of Lord Evandale, given by Balfour

of Burley. Thomas Carlyle, with his natural taste for what is manly and daring in character, has suffered no heroic trait in his favorites to drop from his biographical and historical pictures. Earlier, Robert Burns has given us a song or two. In the Harleian Miscellanies there is an account of the battle of Lutzen, which deserves to be read. And Simon Ockley's History of the Saracens recounts the prodigies of individual valor with admiration, all the more evident on the part of the narrator, that he seems to think that his place in Christian Oxford requires of him some proper protestations of abhorrence. But if we explore the literature of Heroism, we shall quickly come to Plutarch, who is its doctor and historian. To him we owe the Brasidas, the Dion, the Epaminondas, the Scipio of old; and I must think we are more deeply indebted to him than to all the ancient writers. Each of his "Lives" is a refutation to the despondency and cowardice of our religious and political theorists. A wild courage, a stoicism not of the schools, but of the blood, shines in every anecdote, and has given that book its immense fame.

We need books of this tart cathartic virtue, more than books of political science or of private economy. Life is a festival only to the wise. Seen from the nook and chimney-side of prudence, it wears a ragged and dangerous front. The violations of the laws of nature by our predecessors and our contemporaries are punished in us also. The disease and deformity around us certify the infraction of natural, intellectual, and moral laws, and often violation on violation to breed such compound misery. A lock-jaw, that bends a man's head back to his heels; hydrophobia, that makes him bark at his wife and babes; insanity, that makes him eat grass; war, plague, cholera, famine,—indicate a certain ferocity in nature, which, as it had its inlet by human crime, must have its outlet by human suffering. Unhappily, almost no man exists who has not in his own person become, to some amount, a stockholder in the sin, and so made himself liable to a share in the expiation.

Our culture, therefore, must not omit the arming of our man. Let him hear in season, that he is born into the state

of war, and that the commonwealth and his own well-being require that he should not go dancing in the weeds of peace; but warned, self-collected, and neither defying nor dreading the thunder, let him take both reputation and life in his hand, and with perfect urbanity dare the gibbet and the mob by the absolute truth of his speech and the rectitude of his behavior.

Towards all this external evil the man within the breast assumes a warlike attitude, and affirms his ability to cope single-handed with the infinite army of enemies. To this military attitude of the soul we give the name of Heroism. Its rudest form is the contempt for safety and ease, which makes the attractiveness of war. It is a self-trust which slights the restraints of prudence, in the plenitude of its energy and power to repair the harms it may suffer. The hero is a mind of such balance that no disturbances can shake his will; but pleasantly, and as it were merrily, he advances to his own music, alike in frightful alarms and in the tipsy mirth of universal dissoluteness. There is somewhat not philosophical in heroism; there is somewhat not holy in it; it seems not to know that other souls are of one texture with it; it hath pride; it is the extreme of individual nature. Nevertheless we must profoundly revere it. There is somewhat in great actions, which does not allow us to go behind them. Heroism feels and never reasons, and therefore is always right; and although a different breeding, different religion, and greater intellectual activity, would have modified or even reversed the particular action, yet for the hero, that thing he does is the highest deed, and is not open to the censure of philosophers or divines. It is the avowal of the unschooled man, that he finds a quality in him that is negligent of expense, of health, of life, of danger, of hatred, of reproach, and that he knows that his will is higher and more excellent than all actual and all possible antagonists.

Heroism works in contradiction to the voice of mankind, and in contradiction, for a time, to the voice of the great and good. Heroism is an obedience to a secret impulse of an individual's character. Now to no other man can its wisdom appear as it does to him, for every man must be supposed

to see a little farther on his own proper path than any one else. Therefore, just and wise men take umbrage at his act, until after some little time be past; then they see it to be in unison with their acts. All prudent men see that the action is clean contrary to a sensual prosperity; for every heroic act measures itself by its contempt of some external good. But it finds its own success at last, and then the prudent also extol.

Self-trust is the essence of Heroism. It is the state of the soul at war; and its ultimate objects are the last defiance of falsehood and wrong, and the power to bear all that can be inflicted by evil agents. It speaks the truth, and it is just. It is generous, hospitable, temperate, scornful of petty calculations, and scornful of being scorned. It persists; it is of an undaunted boldness, and of a fortitude not to be wearied out. Its jest is the littleness of common life. That false prudence which dotes on health and wealth is the foil, the butt and merriment of heroism. Heroism, like Plotinus, is almost ashamed of its body. What shall it say, then, to the sugar-plums and cat's-cradles, to the toilet, compliments, quarrels, cards, and custard, which rack the wit of all human society? What joys has kind nature provided for us dear creatures! There seems to be no interval between greatness and meanness. When the spirit is not master of the world, then it is its dupe. Yet the little man takes the great hoax so innocently, works in it so headlong and believing, is born red, and dies gray, arranging his toilet, attending on his own health, laying traps for sweet food and strong wine, setting his heart on a horse or a rifle, made happy with a little gossip or a little praise, that the great soul cannot choose but laugh at such earnest nonsense. "Indeed, these humble considerations make me out of love with greatness. What a disgrace is it to me to take note how many pairs of silk stockings thou hast, namely, these and those that were the peach-colored ones; or to bear the inventory of thy shirts, as one for superfluity, and one other for use!"

Citizens, thinking after the laws of arithmetic, consider the inconvenience of receiving strangers at their fireside, reckon narrowly the loss of time and the unusual display:

the soul of a better quality thrusts back the unseasonable economy into the vaults of life, and says, I will obey the God, and the sacrifice and the fire he will provide. Ibn Haukal, the Arabian geographer, describes a heroic extreme in the hospitality of Sogd, in Bukharia. "When I was in Sogd, I saw a great building, like a palace, the gates of which were open and fixed back to the wall with large nails. I asked the reason, and was told that the house had not been shut night or day, for a hundred years. Strangers may present themselves at any hour, and in whatever number; the master has amply provided for the reception of the men and their animals, and is never happier than when they tarry for some time. Nothing of the kind have I seen in any other country." The magnanimous know very well, that they who give time, or money, or shelter to the stranger—so it be done for love, and not for ostentation—do as it were put God under obligation to them, so perfect are the compensations of the universe. In some way, the time they seem to lose is redeemed, and the pains they seem to take remunerate themselves. These men fan the flame of human love, and raise the standard of civil virtue among mankind. But hospitality must be for service, and not for show, or it pulls down the host. The brave soul rates itself too high to value itself by the splendor of its table and draperies. It gives what it hath, and all it hath; but its own majesty can lend a better grace to bannocks and fair water than belong to city feasts.

The temperance of the hero proceeds from the same wish to do no dishonor to the worthiness he has. But he loves it for its elegance, not for its austerity. It seems not worth his while to be solemn, and denounce with bitterness flesh-eating or wine-drinking, the use of tobacco, or opium, or tea, or silk, or gold. A great man scarcely knows how he dines, how he dresses; but, without railing or precision, his living is natural and poetic. John Eliot, the Indian Apostle, drank water, and said of wine, "It is a noble, generous liquor, and we should be humbly thankful for it; but, as I remember, water was made before it." Better still is the temperance of king David, who poured out on the ground unto the

Lord the water which three of his warriors had brought him to drink at the peril of their lives.

It is told of Brutus, that when he fell on his sword, after the battle of Philippi, he quoted a line of Euripides, "O virtue, I have followed thee through life, and I find thee at last but a shade." I doubt not the hero is slandered by this report. The heroic soul does not sell its justice and its nobleness. It does not ask to dine nicely and to sleep warm. The essence of greatness is the perception that virtue is enough. Poverty is its ornament. Plenty it does not need, and can very well abide its loss.

But that which takes my fancy most, in the heroic class, is the good humor and hilarity they exhibit. It is a height to which common duty can very well attain, to suffer and to dare with solemnity. But these rare souls set opinion, success, and life, at so cheap a rate, that they will not soothe their enemies by petitions, or the show of sorrow, but wear their own habitual greatness. Scipio, charged with peculation, refuses to do himself so great a disgrace as to wait for justification, though he had the scroll of his accounts in his hands, but tears it to pieces before the tribunes. Socrates' condemnation of himself to be maintained in all honor in the Prytaneum during his life, and Sir Thomas More's playfulness at the scaffold, are of the same strain. In Beaumont and Fletcher's "Sea Voyage," Julietta tells the stout captain and his company,

*Jul.* Why, slaves, 'tis in our power to hang ye.

*Master.*

Very likely;

"Tis in our powers, then, to be hanged, and scorn ye."

These replies are sound and whole. Sport is the bloom and glow of a perfect health. The great will not condescend to take anything seriously; all must be as gay as the song of a canary, though it were the building of cities, or the eradication of old and foolish churches and nations, which have cumbered the earth long thousands of years. Simple hearts put all the history and customs of this world behind them, and play their own play in innocent defiance of the Blue-Laws of the world; and such would appear, could we see the

human race assembled in vision, like little children frolicking together; though, to the eyes of mankind at large, they wear a stately and solemn garb of works and influences.

The interest these fine stories have for us, the power of a romance over the boy who grasps the forbidden book under his bench at school, our delight in the hero, is the main fact to our purpose. All these great and transcendent properties are ours. If we dilate in beholding the Greek energy, the Roman pride, it is that we are already domesticating the same sentiment. Let us find room for this great guest in our small houses. The first step of worthiness will be to disabuse us of our superstitious associations with places and times, with number and size. Why should these words, Athenian, Roman, Asia, and England, so tingle in the ear? Let us feel that where the heart is, there the muses, there the gods sojourn, and not in any geography of fame. Massachusetts, Connecticut River, and Boston Bay, you think paltry places, and the ear loves names of foreign and classic topography. But here we are;—that is a great fact, and, if we will tarry a little, we may come to learn that here is best. See to it, only that thyself is here;—and art and nature, hope and dread, friends, angels, and the Supreme Being, shall not be absent from the chamber where thou sittest. Epaminondas, brave and affectionate, does not seem to us to need Olympus to die upon, nor the Syrian sunshine. He lies very well where he is. The Jerseys were handsome ground enough for Washington to tread, and London streets for the feet of Milton. A great man illustrates his place, makes his climate genial in the imagination of men, and its air the beloved element of all delicate spirits. That country is the fairest which is inhabited by the noblest minds. The pictures which fill the imagination in reading the actions of Pericles, Xenophon, Columbus, Bayard, Sidney, Hampden, teach us how needlessly mean our life is; that we, by the depth of our living, should deck it with more than regal or national splendor, and act on principles that should interest man and nature in the length of our days.

We have seen or heard of many extraordinary young men who never ripened, or whose performance in actual life was

not extraordinary. When we see their air and mien, when we hear them speak of society, of books, of religion, we admire their superiority, they seem to throw contempt on the whole state of the world; theirs is the tone of a youthful giant, who is sent to work revolutions. But they enter an active profession, and the forming Colossus shrinks to the common size of man. The magic they used was the ideal tendencies, which always make the Actual ridiculous; but the tough world had its revenge the moment they put their horses of the sun to plough in its furrow. They found no example and no companion, and their heart fainted. What then? The lesson they gave in their first aspirations is yet true; and a better valor and a purer truth shall one day execute their will, and put the world to shame. Or why should a woman liken herself to any historical woman, and think, because Sappho, or Sévigné, or De Staël, or the cloistered souls who have had genius and cultivation, do not satisfy the imagination and the serene Themis, none can,—certainly not she? Why not? She has a new and unattempted problem to solve, perchance that of the happiest nature that ever bloomed. Let the maiden with erect soul walk serenely on her way, accept the hint of each new experience, try, in turn, all the gifts God offers her, that she may learn the power and the charm that, like a new dawn radiating out of the deep of space, her new-born being is. The fair girl, who repels interference by a decided and proud choice of influences, so careless of pleasing, so wilful and lofty, inspires every beholder with somewhat of her own nobleness. The silent heart encourages her; O friend, never strike sail to a fear. Come into port greatly, or sail with God the seas. Not in vain you live, for every passing eye is cheered and refined by the vision.

The characteristic of a genuine heroism is its persistency. All men have wandering impulses, fits and starts of generosity. But when you have resolved to be great, abide by yourself, and do not weakly try to reconcile yourself with the world. The heroic cannot be the common, nor the common the heroic. Yet we have the weakness to expect the sympathy of people in those actions whose excellence is, that they out-

run sympathy, and appeal to a tardy justice. If you would serve your brother, because it is fit for you to serve him, do not take back your words when you find that prudent people do not commend you. Be true to your own act, and congratulate yourself if you have done something strange and extravagant, and broken the monotony of a decorous age. It was a high counsel that I once heard given to a young person, "Always do what you are afraid to do." A simple manly character need never make an apology, but should regard its past action with the calmness of Phocion, when he admitted that the event of the battle was happy, yet did not regret his dissuasion from the battle.

There is no weakness or exposure for which we cannot find consolation in the thought,—this is a part of my constitution, part of my relation and office to my fellow-creature. Has nature covenanted with me that I should never appear to disadvantage, never make a ridiculous figure? Let us be generous of our dignity, as well as of our money. Greatness once and forever has done with opinion. We tell our charities, not because we wish to be praised for them, not because we think they have great merit, but for our justification. It is a capital blunder; as you discover, when another man recites his charities.

To speak the truth even with some austerity, to live with some rigor of temperance or some extremes of generosity, seems to be an asceticism which common good nature would appoint to those who are at ease and in plenty, in sign that they feel a brotherhood with the great multitude of suffering men. And not only need we breathe and exercise the soul by assuming the penalties of abstinence, of debt, of solitude, of unpopularity, but it behoves the wise man to look with a bold eye into those rarer dangers which sometimes invade men, and to familiarize himself with disgusting forms of disease, with sounds of execration, and the vision of violent death.

Times of heroism are generally times of terror; but the day never shines in which this element may not work. The circumstances of man, we say, are historically somewhat better in this country, and at this hour, than perhaps ever

before. More freedom exists for culture. It will not now run against an axe at the first step out of the beaten track of opinion. But whoso is heroic will always find crises to try his edge. Human virtue demands her champions and martyrs, and the trial of persecution always proceeds. It is but the other day that the brave Lovejoy gave his breast to the bullets of a mob for the rights of free speech and opinion, and died when it was better not to live.

I see not any road of perfect peace which a man can walk, but to take counsel of his own bosom. Let him quit too much association; let him go home much, and stablish himself in those courses he approves. The unremitting retention of simple and high sentiments in obscure duties is hardening the character to that temper which will work with honor, if need be, in the tumult or on the scaffold. Whatever outrages have happened to men may befall a man again; and very easily in a republic, if there appear any signs of a decay of religion. Coarse slander, fire, tar and feathers, and the gibbet, the youth may freely bring home to his mind, and with what sweetness of temper he can, and inquire how fast he can fix his sense of duty, braving such penalties, whenever it may please the next newspaper, and a sufficient number of his neighbors, to pronounce his opinions incendiary.

It may calm the apprehension of calamity in the most susceptible heart, to see how quick a bound nature has set to the utmost infliction of malice. We rapidly approach a brink over which no enemy can follow us.

"Let them rave:  
Thou art quiet in thy grave."

In the gloom of our ignorance of what shall be in the hour when we are deaf to the higher voices, who does not envy them who have seen safely to an end their manful endeavor? Who that sees the meanness of our politics, but inly congratulates Washington that he is long already wrapped in his shroud, and forever safe; that he was laid sweet in his grave, the hope of humanity not yet subjugated in him? Who does not sometimes envy the good and brave, who are no

more to suffer from the tumults of the natural world, and await with curious complacency the speedy term of his own conversation with finite nature? And yet the love that will be annihilated sooner than treacherous, has already made death impossible, and affirms itself no mortal, but a native of the deeps of absolute and inextinguishable being.

## X

### FRIENDSHIP

WE have a great deal more kindness than is ever spoken. Maugre all the selfishness that chills like east winds the world, the whole human family is bathed with an element of love like a fine ether. How many persons we meet in houses, whom we scarcely speak to, whom yet we honor, and who honor us! How many we see in the street, or sit with in church, whom, though silently, we warmly rejoice to be with! Read the language of these wandering eye-beams. The heart knoweth.

The effect of the indulgence of this human affection is a certain cordial exhilaration. In poetry and in common speech, the emotions of benevolence and complacency which are felt towards others are likened to the material effects of fire; so swift, or much more swift, more active, more cheering, are these fine inward irradiations. From the highest degree of passionate love, to the lowest degree of good will, they make the sweetness of life.

Our intellectual and active powers increase with our affection. The scholar sits down to write, and all his years of meditation do not furnish him with one good thought or happy expression; but it is necessary to write a letter to a friend,—and forthwith troops of gentle thoughts invest themselves, on every hand, with chosen words. See, in any house where virtue and self-respect abide, the palpitation which the approach of a stranger causes. A commended stranger is expected and announced, and an uneasiness betwixt pleasure and pain invades all the hearts of a household. His arrival almost brings fear to the good hearts that would welcome him. The house is dusted, all things fly into their places, the old coat is exchanged for the new, and they

must get up a dinner if they can. Of a commended stranger, only the good report is told by others, only the good and new is heard by us. He stands to us for humanity. He is what we wish. Having imagined and invested him, we ask how we should stand related in conversation and action with such a man, and are uneasy with fear. The same idea exalts conversation with him. We talk better than we are wont. We have the nimblest fancy, a richer memory, and our dumb devil has taken leave for the time. For long hours we can continue a series of sincere, graceful, rich communications, drawn from the oldest, secretest experience so that they who sit by, of our own kinsfolk and acquaintance, shall feel a lively surprise at our unusual powers. But as soon as the stranger begins to intrude his partialities, his definitions, his defects, into the conversation, it is all over. He has heard the first, the last and best, he will ever hear from us. He is no stranger now. Vulgarity, ignorance, misapprehension, are old acquaintances. Now, when he comes, he may get the order, the dress, and the dinner,—but the throbbing of the heart, and the communications of the soul, no more.

Pleasant are these jets of affection, which relume a young world for me again. Delicious is a just and firm encounter of two in a thought, in a feeling. How beautiful, on their approach to this beating heart, the steps and forms of the gifted and the true! The moment we indulge our affections, the earth is metamorphosed: there is no winter, and no night: all tragedies, all ennuis vanish; all duties even; nothing fills the proceeding eternity but the forms all radiant of beloved persons. Let the soul be assured that somewhere in the universe it should rejoin its friend, and it would be content and cheerful alone for a thousand years.

I awoke this morning with devout thanksgiving for my friends, the old and the new. Shall I not call God, the Beautiful, who daily showeth himself so to me in his gifts? I chide society, I embrace solitude, and yet I am not so ungrateful as not to see the wise, the lovely, and the noble-minded, as from time to time they pass my gate. Who hears me, who understands me, becomes mine,—a possession for all time. Nor is nature so poor, but she gives me this

joy several times, and thus we weave social threads of our own, a new web of relations; and, as many thoughts in succession substantiate themselves, we shall by and by stand in a new world of our own creation, and no longer strangers and pilgrims in a traditionary globe. My friends have come to me unsought. The great God gave them to me. By oldest right, by the divine affinity of virtue with itself, I find them, or rather, not I, but the Deity in me and in them, both deride and cancel the thick walls of individual character, relation, age, sex, and circumstance, at which he usually connives, and now makes many one. High thanks I owe you, excellent lovers, who carry out the world for me to new and noble depths, and enlarge the meaning of all my thoughts. These are not stark and stiffened persons, but the new-born poetry of God,—poetry without stop,—hymn, ode, and epic, poetry still flowing, and not yet caked in dead books with annotations and grammar, but Apollo and the Muses chanting still. Will these two separate themselves from me again, or some of them? I know not, but I fear it not; for my relation to them is so pure, that we hold by simple affinity, and the Genius of my life being thus social, the same affinity will exert its energy on whomsoever is as noble as these men and women, wherever I may be.

I confess to an extreme tenderness of nature on this point. It is almost dangerous to me to “crush the sweet poison of misused wine” of the affections. A new person is to me always a great event, and hinders me from sleep. I have had such fine fancies lately about two or three persons, as have given me delicious hours; but the joy ends in the day: it yields no fruit. Thought is not born of it; my action is very little modified. I must feel pride in my friend’s accomplishments, as if they were mine,—wild, delicate, throbbing property in his virtues. I feel as warmly when he is praised, as the lover when he hears applause of his engaged maiden. We over-estimate the conscience of our friend. His goodness seems better than our goodness, his nature finer, his temptations less. Every thing that is his, his name, his form, his dress, books, and instruments fancy enhances. Our own thought sounds new and larger from his mouth.

Yet the systole and diastole of the heart are not without their analogy in the ebb and flow of love. Friendship, like the immortality of the soul, is too good to be believed. The lover, beholding his maiden, half knows that she is not verily that which he worships; and in the golden hour of friendship, we are surprised with shades of suspicion and unbelief. We doubt that we bestow on our hero the virtues in which he shines, and afterwards worship the form to which we have ascribed this divine inhabitation. In strictness, the soul does not respect men as it respects itself. In strict science, all persons underlie the same condition of an infinite remoteness. Shall we fear to cool our love by facing the fact, by mining for the metaphysical foundation of this Elysian temple? Shall I not be as real as the things I see? If I am, I shall not fear to know them for what they are. Their essence is not less beautiful than their appearance, though it needs finer organs for its apprehension. The root of the plant is not unsightly to science, though for chaplets and festoons we cut the stem short. And I must hazard the production of the bald fact amidst these pleasing reveries, though it should prove an Egyptian skull at our banquet. A man who stands united with his thought conceives magnificently of himself. He is conscious of a universal success, even though bought by uniform particular failures. No advantages, no powers, no gold or force can be any match for him. I cannot choose but rely on my own poverty more than on your wealth. I cannot make your consciousness tantamount to mine. Only the star dazzles; the planet has a faint, moon-like ray. I hear what you say of the admirable parts and tried temper of the party you praise, but I see well that for all his purple cloaks I shall not like him, unless he is at last a poor Greek like me. I cannot deny it, O friend, that the vast shadow of the Phenomenal includes thee also in its pied and painted immensity,—thee also, compared with whom all else is shadow. Thou art not Being, as Truth is, as Justice is,—thou art not my soul, but a picture and effigy of that. Thou hast come to me lately, and already thou art seizing thy hat and cloak. Is it not that the soul puts forth friends, as the tree

puts forth leaves, and presently, by the germination of new buds, extrudes the old leaf? The law of nature is alternation forevermore. Each electrical state superinduces the opposite. The soul environs itself with friends, that it may enter into a grander self-acquaintance or solitude; and it goes alone for a season, that it may exalt its conversation or society. This method betrays itself along the whole history of our personal relations. Ever the instinct of affection revives the hope of union with our mates, and ever the returning sense of insulation recalls us from the chase. Thus every man passes his life in the search after friendship; and if he should record his true sentiment, he might write a letter like this to each new candidate for his love.

DEAR FRIEND,

If I was sure of thee, sure of thy capacity, sure to match my mood with thine, I should never think again of trifles, in relation to thy comings and goings. I am not very wise; my moods are quite attainable: and I respect thy genius: it is to me as yet unfathomed; yet dare I not presume in thee a perfect intelligence of me, and so thou art to me a delicious torment. Thine ever, or never.

Yet these uneasy pleasures and fine pains are for curiosity, and not for life. They are not to be indulged. This is to weave cobweb, and not cloth. Our friendships hurry to short and poor conclusions, because we have made them a texture of wine and dreams, instead of the tough fibre of the human heart. The laws of friendship are great, austere, and eternal, of one web with the laws of nature and of morals. But we have aimed at a swift and petty benefit, to suck a sudden sweetness. We snatch at the slowest fruit in the whole garden of God, which many summers and many winters must ripen. We seek our friend not sacredly, but with an adulterate passion, which would appropriate him to ourselves. In vain. We are armed all over with subtle antagonisms, which, as soon as we meet, begin to play, and translate all poetry into stale prose. Almost all people descend to meet. All association must be a compromise, and, what is worst, the very flower and aroma of the flower of each of the beautiful natures disappears as they approach

each other. What a perpetual disappointment is actual society, even of the virtuous and gifted! After interviews have been compassed with long foresight, we must be tormented presently by baffled blows, by sudden unseasonable apathies, by epilepsies of wit and of animal spirits, in the hey-day of friendship and thought. Our faculties do not play us true, and both parties are relieved by solitude.

I ought to be equal to every relation. It makes no difference how many friends I have, and what content I can find in conversing with each, if there be one to whom I am not equal. If I have shrunk unequal from one contest, instantly the joy I find in all the rest becomes mean and cowardly. I should hate myself, if then I made my other friends my asylum.

"The valiant warrior famed for fight,  
After a hundred victories, once foiled,  
Is from the book of honour razed quite,  
And all the rest forgot for which he toiled."

Our impatience is thus sharply rebuked. Bashfulness and apathy are a tough husk, in which a delicate organization is protected from premature ripening. It would be lost, if it knew itself before any of the best souls were yet ripe enough to know and own it. Respect the *Naturlangsamkeit* which hardens the ruby in a million years, and works in duration, in which Alps and Andes come and go as rainbows. The good spirit of our life has no heaven which is the price of rashness. Love, which is the essence of God, is not for levity, but for the total worth of man. Let us not have this childish luxury in our regards, but the austere worth; let us approach our friend with an audacious trust in the truth of his heart, in the breadth, impossible to be overturned, of his foundations.

The attractions of this subject are not to be resisted; and I leave, for the time, all account of subordinate social benefit, to speak of that select and sacred relation which is a kind of absolute, and which even leaves the language of love suspicious and common, so much is this purer, and nothing is so much divine.

I do not wish to treat friendships daintily, but with roughest courage. When they are real, they are not glass threads or frost-work, but the solidest thing we know. For now, after so many ages of experience, what do we know of nature, or of ourselves? Not one step has man taken toward the solution of the problem of his destiny. In one condemnation of folly stand the whole universe of men. But the sweet sincerity of joy and peace, which I draw from this alliance with my brother's soul, is the nut itself whereof all nature and all thought is but the husk and shell. Happy is the house that shelters a friend! It might well be built, like a festal bower or arch, to entertain him a single day. Happier, if he knows the solemnity of that relation, and honor its laws! It is no idle band, no holyday engagement. He who offers himself a candidate for that covenant comes up, like an Olympian, to the great games, where the first-born of the world are the competitors. He proposes himself for contests where Time, Want, Danger, are in the lists, and he alone is victor who has truth enough in his constitution to preserve the delicacy of his beauty from the wear and tear of all these. The gifts of fortune may be present or absent, but all the hap in that contest depends on intrinsic nobleness, and the contempt of trifles. There are two elements that go to the composition of friendship, each so sovereign, that I can detect no superiority in either, no reason why either should be first named. One is Truth. A friend is a person with whom I may be sincere. Before him I may think aloud. I am arrived at last in the presence of a man so real and equal, that I may drop even those undermost garments of dissimulation, courtesy, and second thought, which men never put off, and may deal with him with the simplicity and wholeness with which one chemical atom meets another. Sincerity is the luxury allowed, like diadems and authority, only to the highest rank, *that* being permitted to speak truth, as having none above it to court or conform unto. Every man alone is sincere. At the entrance of a second person, hypocrisy begins. We parry and fend the approach of our fellow man by compliments, by gossip, by amusements, by affairs. We cover up our

thought from him under a hundred folds. I knew a man who, under a certain religious frenzy, cast off this drapery, and, omitting all compliment and commonplace, spoke to the conscience of every person he encountered, and that with great insight and beauty. At first he was resisted, and all men agreed he was mad. But persisting, as indeed he could not help doing, for some time in this course, he attained to the advantage of bringing every man of his acquaintance into true relations with him. No man would think of speaking falsely with him, or of putting him off with any chat of markets or reading-rooms. But every man was constrained by so much sincerity to face him, and what love of nature, what poetry, what symbol of truth he had, he did certainly show him. But to most of us society shows not its face and eye, but its side and its back. To stand in true relations with men in a false age is worth a fit of insanity, is it not? We can seldom go erect. Almost every man we meet requires some civility, requires to be humored;—he has some fame, some talent, some whim of religion or philanthropy in his head that is not to be questioned, and so spoils all conversation with him. But a friend is a sane man who exercises not my ingenuity, but me. My friend gives me entertainment without requiring me to stoop, or to lisp, or to mask myself. A friend, therefore, is a sort of paradox in nature. I who alone am, I who see nothing in nature whose existence I can affirm with equal evidence to my own, behold now the semblance of my being in all its height, variety, and curiosity, reiterated in a foreign form; so that a friend may well be reckoned the masterpiece of nature.

The other element of friendship is Tenderness. We are holden to men by every sort of tie, by blood, by pride, by fear, by hope, by lucre, by lust, by hate, by admiration, by every circumstance and badge and trifle, but we can scarce believe that so much character can subsist in another as to draw us by love. Can another be so blessed, and we so pure, that we can offer him tenderness? When a man becomes dear to me, I have touched the goal of fortune. I find very little written directly to the heart of this matter in books.

And yet I have one text which I cannot choose but remember. My author says, "I offer myself faintly and bluntly to those whose I effectually am, and tender myself least to him to whom I am the most devoted." I wish that friendship should have feet, as well as eyes and eloquence. It must plant itself on the ground, before it walks over the moon. I wish it to be a little of a citizen, before it is quite a cherub. We chide the citizen because he makes love a commodity. It is an exchange of gifts, of useful loans; it is good neighborhood; it watches with the sick; it holds the pall at the funeral; and quite loses sight of the delicacies and nobility of the relation. But though we cannot find the god under this disguise of a sutler, yet, on the other hand, we cannot forgive the poet, if he spins his thread too fine, and does not substantiate his romance by the municipal virtues of justice, punctuality, fidelity, and pity. I hate the prostitution of the name of friendship to signify modish and worldly alliances. I much prefer the company of plough-boys and tin-pedlars to the silken and perfumed amity which only celebrates its days of encounter by a frivolous display, by rides in a curricie, and dinners at the best taverns. The end of friendship is a commerce the most strict and homely that can be joined; more strict than any of which we have experience. It is for aid and comfort through all the relations and passages of life and death. It is fit for serene days, and graceful gifts, and country rambles, but also for rough roads and hard fare, shipwreck, poverty, and persecution. It keeps company with the sallies of their wit and the trances of religion. We are to dignify to each other the daily needs and offices of man's life, and embellish it by courage, wisdom, and unity. It should never fall into something usual and settled, but should be alert and inventive, and add rhyme and reason to what was drudgery.

For perfect friendship it may be said to require natures so rare and costly, so well tempered each, and so happily adapted, and withal so circumstanced, (for even in that particular, a poet says, love demands that the parties be altogether paired,) that very seldom can its satisfaction be real-

ized. It cannot subsist in its perfection, say some of those who are learned in this warm lore of the heart, betwixt more than two. I am not quite so strict in my terms, perhaps because I have never known so high a fellowship as others. I please my imagination more with a circle of god-like men and women variously related to each other, and between whom subsists a lofty intelligence. But I find this law of *one to one* peremptory for conversation, which is the practice and consummation of friendship. Do not mix waters too much. The best mix as ill as good and bad. You shall have very useful and cheering discourse at several times with two several men; but let all three of you come together, and you shall not have one new and hearty word. Two may talk and one may hear, but three cannot take part in a conversation of the most sincere and searching sort. In good company there is never such discourse between two, across the table, as takes place when you leave them alone. In good company the individuals at once merge their egotism into a social soul exactly coextensive with the several consciousnesses there present. No partialities of friend to friend, no fondnesses of brother to sister, of wife to husband, are there pertinent, but quite otherwise. Only he may then speak who can sail on the common thought of the party, and not poorly limited to his own. Now this convention, which good sense demands, destroys the high freedom of great conversation, which requires an absolute running of two souls into one.

No two men but being left alone with each other enter into simpler relations. Yet it is affinity that determines *which* two shall converse. Unrelated men give little joy to each other; will never suspect the latent powers of each. We talk sometimes of a great talent for conversation, as if it were a permanent property in some individuals. Conversation is an evanescent relation,—no more. A man is reputed to have thought and eloquence; he cannot, for all that, say a word to his cousin or his uncle. They accuse his silence with as much reason as they would blame the insignificance of a dial in the shade. In the sun it will mark

the hour. Among those who enjoy his thought, he will regain his tongue.

Friendship requires that rare mean betwixt likeness and unlikeness, that piques each with the presence of power and of consent in the other party. Let me be alone to the end of the world, rather than that my friend should overstep by a word or a look in his real sympathy. I am equally baulked by antagonism and by compliance. Let him not cease an instant to be himself. The only joy I have in his being mine, is that the *not mine* is *mine*. It turns the stomach, it blots the daylight, where I looked for a manly furtherance, or at least a manly resistance, to find a mush of concession. Better be a nettle in the side of your friend than his echo. The condition which high friendship demands is, ability to do without it. To be capable of that high office requires great and sublime parts. There must be very two, before there can be very one. Let it be an alliance of two large formidable natures, mutually beheld, mutually feared, before yet they recognize the deep identity which beneath these disparities unites them.

He only is fit for this society who is magnanimous. He must be so, to know its law. He must be one who is sure that greatness and goodness are always economy. He must be one who is not swift to intermeddle with his fortunes. Let him not dare to intermeddle with this. Leave to the diamond its ages to grow, nor expect to accelerate the births of the eternal. Friendship demands a religious treatment. We must not be wilful, we must not provide. We talk of choosing our friends, but friends are self-elected. Reverence is a great part of it. Treat your friend as a spectacle. Of course, if he be a man, he has merits that are not yours, and that you cannot honor, if you must needs hold him close to your person. Stand aside. Give those merits room. Let them mount and expand. Be not so much his friend that you can never know his peculiar energies; like fond mamas who shut up their boy in the house until he is almost grown a girl. Are you the friend of your friend's buttons, or of his thought? To a great heart he will still be a stranger in a thousand particulars, that he may come near on the holiest ground. Leave it to girls and boys to regard

a friend as property, and to suck a short and all-confounding pleasure instead of the pure nectar of God.

Let us buy our entrance to this guild by a long probation. Why should we desecrate noble and beautiful souls by intruding on them? Why insist on rash personal relations with your friend? Why go to his house, or know his mother and brother and sisters? Why be visited by him at your own? Are these things material to our covenant? Leave this touching and clawing. Let him be to me a spirit. A message, a thought, a sincerity, a glance from him, I want, but not news, nor pottage. I can get politics, and chat, and neighborly conveniences, from cheaper companions. Should not the society of my friend be to me poetic, pure, universal, and great as nature itself? Ought I to feel that our tie is profane in comparison with yonder bar of cloud that sleeps on the horizon, or that clump of waving grass that divides the brook? Let us not vilify, but raise it to that standard. That great defying eye, that scornful beauty of his mien and action, do not pique yourself on reducing, but rather fortify and enhance. Worship his superiorities. Wish him not less by a thought, but hoard and tell them all. Guard him as thy great counterpart; have a principedom to thy friend. Let him be to thee forever a sort of beautiful enemy, untamable, devoutly revered; and not a trivial conveniency, to be soon outgrown and cast aside. The hues of the opal, the light of the diamond, are not to be seen, if the eye is too near. To my friend I write a letter, and from him I receive a letter. That seems to you a little. Me it suffices. It is a spiritual gift worthy of him to give and of me to receive. It profanes nobody. In these warm lines the heart will trust itself, as it will not to the tongue, and pour out the prophecy of a godlier existence than all the annals of heroism have yet made good.

Respect so far the holy laws of this fellowship as not to prejudice its perfect flower by your impatience for its opening. We must be our own, before we can be another's. There is at least this satisfaction in crime, according to the Latin proverb, you can speak to your accomplice on even terms. *Crimen, quos inquinat, æquat.* To those whom we

admire and love, at first we cannot. Yet the least defect of self-possession vitiates, in my judgment, the entire relation. There can never be deep peace between two spirits, never mutual respect, until, in their dialogue, each stands for the whole world.

What is so great as friendship, let us carry with what grandeur of spirit we can. Let us be silent,—so we may hear the whisper of the gods. Let us not interfere. Who set you to cast about what you should say to the select souls, or to say any thing to such? No matter how ingenious, no matter how graceful and bland. There are innumerable degrees of folly and wisdom; and for you to say ought is to be frivolous. Wait, and thy soul shall speak. Wait until the necessary and everlasting overpowers you, until day and night avail themselves of your lips. The only money of God is God. He pays never with any thing less or any thing else. The only reward of virtue is virtue: the only way to have a friend is to be one. Vain to hope to come nearer a man by getting into his house. If unlike, his soul only flees the faster from you, and you shall catch never a true glance of his eye. We see the noble afar off, and they repel us; why should we intrude? Late—very late—we perceive that no arrangements, no introductions, no consuetudes, or habits of society, would be of any avail to establish us in such relations with them as we desire,—but solely the uprise of nature in us to the same degree it is in them: then shall we meet as water with water: and if we should not meet them then, we shall not want them, for we are already they. In the last analysis, love is only the reflection of a man's own worthiness from other men. Men have sometimes exchanged names with their friends, as if they would signify that in their friend each loved his own soul.

The higher the style we demand of friendship, of course the less easy to establish it with flesh and blood. We walk alone in the world. Friends such as we desire are dreams and fables. But a sublime hope cheers ever the faithful heart, that elsewhere, in other regions of the universal power, souls are now acting, enduring, and daring, which can love us, and which we can love. We may congratulate our-

selves that the period of nonage, of follies, of blunders, and of shame, is passed in solitude, and when we are finished men, we shall grasp heroic hands in heroic hands. Only be admonished by what you already see, not to strike leagues of friendship with cheap persons, where no friendship can be. Our impatience betrays us into rash and foolish alliances, which no God attends. By persisting in your patience, though you forfeit the little, you gain the great. You become pronounced. You demonstrate yourself, so as to put yourself out of the reach of false relations, and you draw to you the first-born of the world,—those rare pilgrims whereof only one or two wander in nature at once, and before whom the vulgar great show as spectres and shadows merely.

It is foolish to be afraid of making our ties too spiritual, as if so we could lose any genuine love. Whatever correction to our popular views we make from insight, nature will be sure to bear us out in, and though it seems to rob us of some joy, it will repay us with a greater. Let us feel, if we will, the absolute insulation of man. We are sure that we have all in us. We go to Europe, or we pursue persons, or we read books in the instinctive faith that these will call it out and reveal us to ourselves. Beggars all. The persons are such as we; the Europe, an old faded garment of dead persons; the books, their ghosts. Let us drop this idolatry. Let us give over this mendicancy. Let us even bid our dearest friends farewell, and defy them, saying, "Who are you? Unharm me: I will be dependent no more." Ah! seest thou not, brother, that thus we part only to meet again on a higher platform, and only be more each other's, because we are more our own? A friend is Janus-faced: he looks to the past and the future. He is the child of all my foregoing hours, the prophet of those to come. He is the harbinger of a greater friend. It is the property of the divine to be reproductively

I do, then, with my friends as I do with my books. I would have them where I can find them, but I seldom use them. We must have society on our own terms, and admit or exclude it on the slightest cause. I cannot afford to spend much with my friend. If he is great, he makes me so great that I cannot descend to converse. In the great days, pr

sentiments hover before me, far before me in the firmament. I ought then to dedicate myself to them. I go in that I may seize them, I go out that I may seize them. I fear only that I may lose them receding into the sky in which now they are only a patch of brighter light. Then, though I prize my friends, I cannot afford to talk with them and study their visions, lest I lose my own. It would indeed give me a certain household joy to quit this lofty seeking, this spiritual astronomy, or search of stars, and come down to warm sympathies with you; but then I know well I shall mourn always the vanishing of my mighty gods. It is true, next week I shall have languid times, when I can well afford to occupy myself with foreign objects; then I shall regret the lost literature of your mind, and wish you were by my side again. But if you come, perhaps you will fill my mind only with new visions, not with yourself, but with your lustres, and I shall not be able any more than now to converse with you. So I will owe to my friends this evanescent intercourse. I will receive from them not what they have, but what they are. They shall give me that which properly they cannot give me, but which radiates from them. But they shall not hold me by any relations less subtle and pure. We will meet as though we met not, and part as though we parted not.

It has seemed to me lately more possible than I knew, to carry a friendship greatly, on one side, without due correspondence on the other. Why should I cumber myself with the poor fact that the receiver is not capacious? It never troubles the sun that some of his rays fall wide and vain into ungrateful space, and only a small part on the reflecting planet. Let your greatness educate the crude and cold companion. If he is unequal, he will presently pass away; but thou art enlarged by thy own shining, and, no longer a mate for frogs and worms, dost soar and burn with the gods of the empyrean. It is thought a disgrace to love unrequited. But the great will see that true love cannot be unrequited. True love transcends instantly the unworthy object, and dwells and broods on the eternal; and when the poor, interposed mask crumbles, it is not sad, but feels rid of

so much earth, and feels its independency the surer. Yet these things may hardly be said without a sort of treachery to the relation. The essence of friendship is entireness, a total magnanimity and trust. It must not surmise or provide for infirmity. It treats its object as a god, that it may deify both.

## XI

### MANNERS

"How near to good is what is fair!  
Which we no sooner see,  
But with the lines and outward air  
Our senses taken be.

Again yourselves compose,  
And now put all the aptness on  
Of Figure, that Proportion  
Or Colour can disclose;  
That if those silent arts were lost,  
Design and Picture, they might boast  
From you a newer ground,  
Instructed by the heightening sense  
Of dignity and reverence  
In their true motions found."

BEN JONSON.

HALF the world, it is said, knows not how the other half lives. Our Exploring Expedition saw the Feejee islanders getting their dinner off human bones; and they are said to eat their own wives and children. The husbandry of the modern inhabitants of Gournou (west of old Thebes) is philosophical to a fault. To set up their housekeeping, nothing is requisite but two or three earthen pots, a stone to grind meal, and a mat which is the bed. The house, namely, a tomb, is ready without rent or taxes. No rain can pass through the roof, and there is no door, for there is no want of one, as there is nothing to lose. If the house do not please them, they walk out and enter another, as there are several hundreds at their command. "It is somewhat singular," adds Belzoni, to whom we owe this account, "to talk of happiness among people who live in sepulchres, among the corpses and rags of an ancient nation which they

know nothing of." In the deserts of Borgoo, the rock-Tibboos still dwell in caves, like cliff swallows, and the language of these negroes is compared by their neighbors to the shrieking of bats, and to the whistling of birds. Again, the Bornoos have no proper names; individuals are called after their height, thickness, or other accidental quality, and have nicknames merely. But the salt, the dates, the ivory, and the gold, for which these horrible regions are visited, find their way into countries, where the purchaser and consumer can hardly be ranked in one race with these cannibals and man-stealers: countries where man serves himself with metals, wood, stone, glass, gum, cotton, silk, and wool; honors himself with architecture; writes laws, and contrives to execute his will through the hands of many nations; and especially establishes a select society, running through all the countries of intelligent men, a self-constituted aristocracy, or fraternity of the best, which, without written law, or exact usage of any kind, perpetuates itself, colonizes every new-planted island, and adopts and makes its own, whatever personal beauty or extraordinary native endowment anywhere appears.

What fact more conspicuous in modern history than the creation of the gentleman? Chivalry is that, and loyalty is that, and, in English literature, half the drama, and all the novels, from Sir Philip Sidney to Sir Walter Scott, paint this figure. The word *gentleman*, which, like the word Christian, must hereafter characterize the present and the few preceeding centuries, by the importance attached to it, is a homage to personal and incommunicable properties. Frivolous and fantastic additions have got associated with the name, but the steady interest of mankind in it must be attributed to the valuable properties which it designated. An element which unites all the most forcible persons of every country; makes them intelligible and agreeable to each other, and is somewhat so precise, that it is at once felt if an individual lack the masonic sign, cannot be any casual product, but must be an average result of the character and faculties universally found in men. It seems a certain permanent average; as the atmosphere is a permanent compo-

sition, whilst so many gases are combined only to be decomposed. *Comme il faut*, is the Frenchman's description of good society, *as we must be*. It is a spontaneous fruit of talents and feelings of precisely that class who have most vigor, who take the lead in the world of this hour, and, though far from pure, far from constituting the gladdest and highest tone of human feeling, is as good as the whole society permits it to be. It is made of the spirit, more than of the talent of men, and is a compound result, into which every great force enters as an ingredient, namely, virtue, wit, beauty, wealth, and power.

There is something equivocal in all the words in use to express the excellence of manners and social cultivation, because the quantities are fluxional, and the last effect is assumed by the senses as the cause. The word *gentleman* has not any correlative abstract to express the quality. *Gentility* is mean, and *gentillesse* is obsolete. But we must keep alive in the vernacular the distinction between *fashion*, a word of narrow and often sinister meaning, and the heroic character which the gentleman imports. The usual words, however, must be respected: they will be found to contain the root of the matter. The point of distinction in all this class of names, as courtesy, chivalry, fashion, and the like, is, that the flower and the fruit, not the grain of the tree, are contemplated. It is beauty which is the aim this time, and not worth. The result is now in question, although our words intimate well enough the popular feeling, that the appearance supposes a substance. The gentleman is a man of truth, lord of his own actions, and expressing that lordship in his behavior, not in any manner dependent and servile, either on persons, or opinions, or possessions. Beyond this fact of truth and real force, the word denotes good-nature or benevolence: manhood first, and then gentleness. The popular notion certainly adds a condition of ease and fortune. But that is a natural result of personal force and love, that they should possess and dispense the goods of the world. In times of violence, every eminent person must fall in with many opportunities to approve his stoutness and worth; therefore, every man's name that emerged at all

from the mass in the feudal ages, rattles in our ear like a flourish of trumpets. But personal force never goes out of fashion. That is still paramount to-day, and, in the moving crowd of good society, the men of valor and reality are known, and rise to their natural place. The competition is transferred from war to politics and trade, but the personal force appears readily enough in these new arenas.

Power first, or no leading class. In politics and in trade, bruisers and pirates are of better promise than talkers and clerks. God knows that all sorts of gentlemen knock at the door; but whenever used in strictness, and with any emphasis, the name will be found to point at original energy. It describes a man standing in his own right, and working after untaught methods. In a good lord, there must first be a good animal, at least to the extent of yielding the incomparable advantage of animal spirits. The ruling class must have more, but they must have these, giving in every company the sense of power, which makes things easy to be done which daunt the wise. The society of the energetic class, in their friendly and festive meetings, is full of courage, and of attempts, which intimidate the pale scholar. The courage which girls exhibit is like the battle of Lundy's Lane, or a sea-fight. The intellect relies on memory to make some supplies to face these extemporaneous squadrons. But memory is a base mendicant with basket and badge, in the presence of these sudden masters. The rulers of society must be up to the work of the world, and equal to their versatile office: men of the right Cæsarian pattern, who have great range of affinity. I am far from believing the timid maxim of Lord Falkland, ("that for ceremony there must go two to it; since a bold fellow will go through the cunningest forms,") and am of opinion that the gentleman is the bold fellow whose forms are not to be broken through; and only that plenteous nature is rightful master, which is the complement of whatever person it converses with. My gentleman gives the law where he is; he will out-pray saints, in chapel, out-general veterans in the field, and outshine all courtesy in the hall. He is good company for pirates, and good with academicians; so that it is useless to fortify your-

self against him; he has the private entrance to all minds, and I could as easily exclude myself as him. The famous gentlemen of Asia and Europe have been of this strong type: Saladin, Sapor, the Cid, Julius Cæsar, Scipio, Alexander, Pericles, and the lordliest personages. They sat very carelessly in their chairs, and were too excellent themselves, to value any condition at a high rate.

A plentiful fortune is reckoned necessary, in the popular judgment, to the completion of this man of the world: and it is a material deputy which walks through the dance which the first has led. Money is not essential, but this wide affinity is, which transcends the habits of clique and caste, and makes itself felt by men of all classes. If the aristocrat is only valid in fashionable circles, and not with truckmen, he will never be a leader in fashion; and if the man of the people cannot speak on equal terms with the gentleman, so that the gentleman shall perceive that he is already really of his own order, he is not to be feared. Diogenes, Socrates, and Epaminondas, are gentlemen of the best blood, who have chosen the condition of poverty, when that of wealth was equally open to them. I use these old names, but the men I speak of are my contemporaries. Fortune will not supply to every generation one of these well-appointed knights, but every collection of men furnishes some example of the class: and the politics of this country, and the trade of every town, are controlled by these hardy and irresponsible doers, who have invention to take the lead, and a broad sympathy which puts them in fellowship with crowds, and makes their action popular.

The manners of this class are observed and caught with devotion by men of taste. The association of these masters with each other, and with men intelligent of their merits, is mutually agreeable and stimulating. The good forms, the happiest expressions of each, are repeated and adopted. By swift consent, every thing superfluous is dropped, every thing graceful is renewed. Fine manners show themselves formidable to the uncultivated man. They are a subtler science of defence to parry and intimidate; but once matched by the skill of the other party, they drop the point of the

sword,—points and fences disappear, and the youth finds himself in a more transparent atmosphere, wherein life is a less troublesome game, and not a misunderstanding arises between the players. Manners aim to facilitate life, to get rid of impediments, and to bring the man pure to energize. They aid our dealings and conversation, as a railway aids travelling, by getting rid of all avoidable obstructions of the road, and leaving nothing to be conquered but pure space. These forms very soon become fixed, and a fine sense of propriety is cultivated with the more heed, that it becomes a badge of social and civil distinctions. Thus grows up Fashion, an equivocal semblance, the most puissant, the most fantastic and frivolous, the most feared and followed, and which morals and violence assault in vain.

There exists a strict relation between the class of power, and the exclusive and polished circles. The last are always filled or filling from the first. The strong men usually give some allowance even to the petulances of fashion, for that affinity they find in it. Napoleon, child of the revolution, destroyer of the old noblesse, never ceased to court the Faubourg St. Germain: doubtless with the feeling, that fashion is a homage to men of his stamp. Fashion, though in a strange way, represents all manly virtue. It is virtue gone to seed: it is a kind of posthumous honor. It does not often caress the great, but the children of the great: it is a hall of the Past. It usually sets its face against the great of this hour. Great men are not commonly in its halls: they are absent in the field: they are working, not triumphing. Fashion is made up of their children; of those, who through the value and virtue of somebody, have acquired lustre to their name, marks of distinction, means of cultivation and generosity, and, in their physical organization, a certain health and excellence which secures to them, if not the highest power to work, yet high power to enjoy. The class of power, the working heroes, the Cortez, the Nelson, the Napoleon, see that this is the festivity and permanent celebration of such as they; that fashion is funded talent; is Mexico, Marengo, and Trafalgar, beaten out thin; that the brilliant names of fashion run back to just such busy

names as their own, fifty or sixty years ago. They are the sowers, their sons shall be the reapers, and *their* sons, in the ordinary course of things, must yield the possession of the harvest to new competitors with keener eyes and stronger frames. The city is recruited from the country. In the year 1805, it is said, every legitimate monarch in Europe was imbecile. The city would have died out, rotted, and exploded long ago, but that it was reinforced from the fields. It is only country which came to town day before yesterday, that is city and court to-day.

Aristocracy and fashion are certain inevitable results. These mutual selections are indestructible. If they provoke anger in the least favored class, and the excluded majority revenge themselves on the excluding minority, by the strong hand, and kill them, at once a new class finds itself at the top, as certainly as cream rises in a bowl of milk: and if the people should destroy class after class, until two men only were left, one of these would be the leader, and would be involuntarily served and copied by the other. You may keep this minority out of sight and out of mind, but it is tenacious of life, and is one of the estates of the realm. I am the more struck with this tenacity, when I seek its work. It respects the administration of such unimportant matters, that we should not look for any durability in its rule. We sometimes meet men under some strong moral influence, as, a patriotic, a literary, a religious movement, and feel that the moral sentiment rules man and nature. We think all other distinctions and ties will be slight and fugitive, this of caste or fashion, for example; yet come from year to year, and see how permanent that is, in this Boston or New York life of man, where, too, it has not the least countenance from the law of the land. Not in Egypt or in India, a firmer or more impassable line. Here are associations whose ties go over, and under, and through it, a meeting of merchants, a military corps, a college-class, a fire-club, a professional association, a political, a religious convention;—the persons seem to draw inseparably near; yet, that assembly once dispersed, its members will not in the year meet again. Each returns to

his degree in the scale of good society, porcelain remains porcelain, and earthen earthen. The objects of fashion may be frivolous, or fashion may be objectless, but the nature of this union and selection can be neither frivolous nor accidental. Each man's rank in that perfect graduation depends on some symmetry in his structure, or some agreement in his structure to the symmetry of society. Its doors unbar instantaneously to a natural claim of their own kind. A natural gentleman finds his way in, and will keep the oldest patrician out, who has lost his intrinsic rank. Fashion understands itself; good breeding of every country and personal superiority readily fraternize with that of every other. The chiefs of savage tribes have distinguished themselves in London and Paris, by the purity of their tournure.

To say what good of fashion we can,—it rests on reality, and hates nothing so much as pretenders;—to exclude and mystify pretenders, and send them into everlasting "Covenentry," is its delight. We condemn, in turn, every other gift of men of the world; but the habit even in little and the least matters, of not appealing to any but our own sense of propriety, constitutes the foundation of all chivalry. There is almost no kind of self-reliance, so it be sane and proportioned, which fashion does not occasionally adopt, and give it the freedom of its saloons. A sainted soul is always elegant, and, if it will, passes unchallenged into the most guarded ring. But so will Jock the teamster pass, in some crisis that brings him thither, and find favor, as long as his head is not giddy with the new circumstance, and the iron shoes do not wish to dance in waltzes and cotillons. For there is nothing settled in manners, but the laws of behavior yield to the energy of the individual. The maiden at her first ball, the countryman at a city dinner, believes that there is a ritual according to which every act and compliment must be performed, or the failing party must be cast out of this presence. Later they learn that good sense and character make their own forms every moment, and speak or abstain, take wine or refuse it, stay or go, sit in a chair or sprawl with children on the floor, or stand on their head, or what else soever, in a new and aboriginal way: and that strong will is

always in fashion, let who will be unfashionable. All that fashion demands is composure, and self-content. A circle of men perfectly well-bred, would be a company of sensible persons, in which every man's native manners and character appeared. If the fashionist have not this quality, he is nothing. We are such lovers of self-reliance, that we excuse in a man many sins, if he will show us a complete satisfaction in his position, which asks no leave to be, of mine, or any man's good opinion. But any deference to some eminent man or woman of the world, forfeits all privilege of nobility. He is an underling: I have nothing to do with him; I will speak with his master. A man should not go where he cannot carry his whole sphere or society with him,—not bodily, the whole circle of his friends, but atmospherically. He should preserve in a new company the same attitude of mind and reality of relation, which his daily associates draw him to, else he is shorn of his best beams, and will be an orphan in the merriest club. "If you could see Vich Ian Vohr with his tail on!"— But Vich Ian Vohr must always carry his belongings in some fashion, if not added as honor, then severed as disgrace.

There will always be in society certain persons who are Mercuries of its approbation, and whose glance will at any time determine for the curious their standing in the world. These are the chamberlains of the lesser gods. Accept their coldness as an omen of grace with the loftier deities, and allow them all their privilege. They are clear in their office, nor could they be thus formidable, without their own merits. But do not measure the importance of this class by their pretension, or imagine that a fop can be the dispenser of honor and shame. They pass also at their just rate; for how can they otherwise, in circles which exist as a sort of herald's office for the sifting of character?

As the first thing man requires of man, is reality, so, that appears in all the forms of society. We pointedly, and by name introduce the parties to each other. Know you before all heaven and earth, that this is Andrew, and this is Gregory;—they look each other in the eye; they grasp each other's hand, to identify and signalize each other. It is a great satis-

faction. A gentleman never dodges: his eyes look straight forward, and he assures the other party, first of all, that he has been met. For what is it that we seek, in so many visits and hospitalities? Is it your draperies, pictures, and decorations? Or do we not insatiably ask, Was a man in the house? I may easily go into a great household where there is much substance, excellent provision for comfort, luxury, and taste, and yet not encounter there any *Amphitryon*, who shall subordinate these appendages. I may go into a cottage, and find a farmer who feels that he is the man I have come to see, and fronts me accordingly. It was therefore a very natural point of feudal etiquette, that a gentleman who received a visit, though it were of his sovereign, should not leave his roof, but should wait his arrival at the door of his house. No house, though it were the *Tuileries*, or the *Escorial*, is good for anything without a master. And yet we are not often gratified by this hospitality. Every body we know surrounds himself with a fine house, fine books, conservatory, gardens, equipage, and all manner of toys, as screens to interpose between himself and his guest. Does it not seem as if man was of a very sly, elusive nature, and dreaded nothing so much as a full *rencontre* front to front with his fellow? It were unmerciful, I know, quite to abolish the use of these screens, which are of eminent convenience, whether the guest is too great, or too little. We call together many friends who keep each other in play, or, by luxuries and ornaments we amuse the young people, and guard our retirement. Or if, perchance, a searching realist comes to our gate, before whose eye we have no care to stand, then again we run to our curtain, and hide as Adam at the voice of the Lord God in the garden. Cardinal Caprara, the Pope's legate at Paris, defended himself from the glances of Napoleon, by an immense pair of green spectacles. Napoleon remarked them, and speedily managed to rally them off; and yet Napoleon, in his turn, was not great enough with eight hundred thousand troops at his back, to face a pair of freeborn eyes, but fenced himself with etiquette, and within triple barriers of reserve; and, as all the world knows from *Madame de Staël*, was

wont, when he found himself observed, to discharge his face of all expression. But emperors and rich men are by no means the most skilful masters of good manners. No rent-roll nor army-list can dignify skulking and dissimulation: and the first point of courtesy must always be truth, as really all the forms of good-breeding point that way.

I have just been reading, in Mr. Hazlitt's translation, Montaigne's account of his journey into Italy, and am struck with nothing more agreeably than the self-respecting fashions of the time. His arrival in each place, the arrival of a gentleman of France, is an event of some consequence. Wherever he goes, he pays a visit to whatever prince or gentleman of note resides upon his road, as a duty to himself and to civilization. When he leaves any house in which he has lodged for a few weeks, he causes his arms to be painted and hung up as a perpetual sign to the house, as was the custom of gentlemen.

The complement of this graceful self-respect, and that of all the points of good breeding I most require and insist upon, is deference. I like that every chair should be a throne, and hold a king. I prefer a tendency to stateliness, to an excess of fellowship. Let the incommunicable objects of nature and the metaphysical isolation of man teach us independence. Let us not be too much acquainted. I would have a man enter his house through a hall filled with heroic and sacred sculptures, that he might not want the hint of tranquillity and self-poise. We should meet each morning, as from foreign countries, and spending the day together, should depart at night, as into foreign countries. In all things I would have the island of a man inviolate. Let us sit apart as the gods, talking from peak to peak all round Olympus. No degree of affection need invade this religion. This is myrrh and rosemary to keep the other sweet. Lovers should guard their strangeness. If they forgive too much, all slides into confusion and meanness. It is easy to push this deference to a Chinese etiquette; but coolness and absence of heat and haste indicate fine qualities. A gentleman makes no noise: a lady is serene. Proportionate is our disgust at those invaders who fill a studious house with

blast or running, to secure some paltry convenience. Not less I dislike a low sympathy of each with his neighbor's needs. Must we have a good understanding with one another's palates? as foolish people who have lived long together, know when each wants salt or sugar. I pray my companion, if he wishes for bread, to ask me for bread, and if he wishes for sassafras or arsenic, to ask me for them, and not to hold out his plate, as if I knew already. Every natural function can be dignified by deliberation and privacy. Let us leave hurry to slaves. The compliments and ceremonies of our breeding should signify, however remotely, the recollection of the grandeur of our destiny.

The flower of courtesy does not very well bide handling, but if we dare to open another leaf, and explore what parts go to its conformation, we shall find also an intellectual quality. To the leaders of men, the brain as well as the flesh and the heart must furnish a proportion. Defect in manners is usually the defect of fine perceptions. Men are too coarsely made for the delicacy of beautiful carriage and customs. It is not quite sufficient to good breeding, a union of kindness and independence. We imperatively require a perception of, and a homage to beauty in our companions. Other virtues are in request in the field and workyard, but a certain degree of taste is not to be spared in those we sit with. I could better eat with one who did not respect the truth or the laws, than with a sloven and unrepresentable person. Moral qualities rule the world, but at short distances, the senses are despotic. The same discrimination of fit and fair runs out, if with less rigor, into all parts of life. The average spirit of the energetic class is good sense, acting under certain limitations and to certain ends. It entertains every natural gift. Social in its nature, it respects every thing which tends to unite men. It delights in measure. The love of beauty is mainly the love of measure or proportion. The person who screams, or uses the superlative degree, or converses with heat, puts whole drawing-rooms to flight. If you wish to be loved, love measure. You must have genius, or a prodigious usefulness, if you will hide the want of measure. This perception comes in to

polish and perfect the parts of the social instrument. Society will pardon much to genius and special gifts, but, being in its nature a convention, it loves what is conventional, or what belongs to coming together. That makes the good and bad of manners, namely, what helps or hinders fellowship. For fashion is not good sense absolute, but relative; not good sense private, but good sense entertaining company. It hates corners and sharp points of character, hates quarrelsome, egotistical, solitary, and gloomy people; hates whatever can interfere with total blending of parties; whilst it values all peculiarities as in the highest degree refreshing, which can consist with good fellowship. And besides the general infusion of wit to heighten civility, the direct splendor of intellectual power is ever welcome in fine society as the costliest addition to its rule and its credit.

The dry light must shine in to adorn our festival, but it must be tempered and shaded, or that will also offend. Accuracy is essential to beauty, and quick perceptions to politeness, but not too quick perceptions. One may be too punctual and too precise. He must leave the omniscience of business at the door, when he comes into the palace of beauty. Society loves creole natures, and sleepy, languishing manners, so that they cover sense, grace, and good-will; the air of drowsy strength, which disarms criticism; perhaps, because such a person seems to reserve himself for the best of the game, and not spend himself on surfaces; an ignoring eye, which does not see the annoyances, shifts, and inconveniences that cloud the brow and smother the voice of the sensitive.

Therefore, besides personal force and so much perception as constitutes unerring taste, society demands, in its patrician class, another element already intimated, which it significantly terms good-nature, expressing all degrees of generosity from the lowest willingness and faculty to oblige, up to the heights of magnanimity and love. Insight we must have, or we shall run against one another, and miss the way to our food; but intellect is selfish and barren. The secret of success in society, is a certain heartiness and sympathy. A man who is not happy in the company, cannot find any

word in his memory that will fit the occasion. All his information is a little impertinent. A man who is happy there, finds in every turn of the conversation equally lucky occasions for the introduction of that which he has to say. The favorites of society, and what it calls *whole souls*, are able men, and of more spirit than wit, who have no uncomfortable egotism, but who exactly fill the hour and the company, contented and contenting, at a marriage or a funeral, a ball or a jury, a water-party or a shooting-match. England, which is rich in gentlemen, furnished, in the beginning of the present century, a good model of that genius which the world loves, in Mr. Fox, who added to his great abilities the most social disposition, and real love of men. Parliamentary history has few better passages than the debate, in which Burke and Fox separated in the House of Commons; when Fox urged on his old friend the claims of old friendship with such tenderness that the house was moved to tears. Another anecdote is so close to my matter, that I must hazard the story. A tradesman who had long dunned him for a note of three hundred guineas, found him one day counting gold and demanded payment: "No," said Fox, "I owe this money to Sheridan; it is a debt of honor: if an accident should happen to me, he has nothing to show." "Then," said the creditor, "I change my debt into a debt of honor," and tore the note in pieces. Fox thanked the man for his confidence and paid him, saying, "his debt was of older standing, and Sheridan must wait." Lover of liberty, friend of the Hindoo, friend of the African slave, he possessed a great personal popularity; and Napoleon said of him on the occasion of his visit to Paris, in 1805, "Mr Fox will always hold the first place in an assembly of the Tuileries."

We may easily seem ridiculous in our eulogy of courtesy whenever we insist on benevolence as its foundation. The painted phantasm Fashion rises to cast a species of derision on what we say. But I will neither be driven from some allowance to Fashion, as a symbolic institution, nor from the belief that love is the basis of courtesy. We must obtain *that*, if we can; but by all means we must affirm *this*. Life owes much of its spirit to these sharp contrasts

Fashion which affects to be honor, is often, in all men's experience, only a ball-room code. Yet, so long as it is the highest circle in the imagination of the best heads on the planet, there is something necessary and excellent in it; or it is not to be supposed that men have agreed to be the dupes of any thing preposterous; and the respect which these mysteries inspire in the most rude and sylvan characters, and the curiosity with which details of high life are read, betray the universality of the love of cultivated manners. I know that a comic disparity would be felt, if we should enter the acknowledged "first circles," and apply these terrific standards of justice, beauty, and benefit, to the individuals actually found there. Monarchs and heroes, sages and lovers, these gallants are not. Fashion has many classes and many rules of probation and admission; and not the best alone. There is not only the right of conquest, which genius pretends,—the individual demonstrating his natural aristocracy best of the best;—but less claims will pass for the time; for Fashion loves lions, and points, like Circe, to her horned company. This gentleman is this afternoon arrived from Denmark; and that is my Lord Ride, who came yesterday from Bagdat; here is Captain Friese, from Cape Turnagain; and Captain Symmes, from the interior of the earth; and Monsieur Jovaire, who came down this morning in a balloon; Mr. Hobnail, the reformer; and Reverend Jul Bat, who has converted the whole torrid zone in his Sunday-school; and Signor Torre del Greco, who extinguished Vesuvius, by pouring into it the Bay of Naples; Spahi, the Persian ambassador; and Tul Wil Shan, the exiled Nabob of Nepaul, whose saddle is the new moon. —But these are monsters of one day, and to-morrow will be dismissed to their holes and dens; for, in these rooms, every chair is waited for. The artist, the scholar, and, in general, the clerisy, wins its way up into these places, and gets represented here, somewhat on this footing of conquest. Another mode is to pass through all the degrees, spending year and a day in St. Michael's Square, being steeped in Cologne water, and perfumed, and dined, and introduced, and properly grounded in all the biography, and politics, and

anecdotes of the boudoirs.

Yet these fineries may have grace and wit. Let there be grotesque sculpture about the gates and offices of temples. Let the creed and commandments even have the saucy homage of parody. The forms of politeness universally express benevolence in superlative degrees. What if they are in the mouths of selfish men, and used as means of selfishness? What if the false gentleman almost bows the true out of the world? What if the false gentleman contrives so to address his companion, as civilly to exclude all others from his discourse, and also to make them feel excluded? Real service will not lose its nobleness. All generosity is not merely French and sentimental; nor is it to be concealed, that living blood and a passion of kindness does at last distinguish God's gentleman from Fashion's. The epitaph of Sir Jenkin Grout is not wholly unintelligible to the present age: "Here lies Sir Jenkin Grout, who loved his friend, and persuaded his enemy: what his mouth ate, his hand paid for; what his servants robbed, he restored: if a woman gave him pleasure, he supported her in pain: he never forgot his children: and whoso touched his finger, drew after it his whole body." Even the line of heroes is not utterly extinct. There is still ever some admirable person in plain clothes standing on the wharf, who jumps in to rescue a drowning man; there is still some absurd inventor of charities; some guide and comforter of run-away slaves; some friend of Poland; some Philhellene; some fanatic who plants shade trees for the second and third generation, and orchards when he is grown old; some well-concealed piety; some just man happy in an ill-fame; some youth ashamed of the favors of fortune, and impatiently casting them on other shoulders. And these are the centers of society, on which it returns for fresh impulses. These are the creators of Fashion, which is an attempt to organize beauty of behavior. The beautiful and the generous are, in the theory, the doctors and apostles of this church: Scipio, and the Cid, and Sir Phillip Sidney, and Washington, and every pure and valiant heart, who worshipped Beauty by word and by deed. The persons who constitute the natural aristocracy

are not found in the actual aristocracy, or, only on its edge; as the chemical energy of the spectrum is found to be greatest, just outside of the spectrum. Yet that is the infirmity of the seneschals, who do not know their sovereign when he appears. The theory of society supposes the existence and sovereignty of these. It divines afar off their coming. It says with the elder gods,—

“As Heaven and Earth are fairer far  
 Than Chaos and blank Darkness, though once chiefs;  
 And as we show beyond that Heaven and Earth,  
 In form and shape compact and beautiful;  
 So, on our heels a fresh perfection treads;  
 A power, more strong in beauty, born of us,  
 And fated to excel us, as we pass  
 In glory that old Darkness:  
 —for, 'tis the eternal law,  
 That first in beauty shall be first in might.”

Therefore, within the ethnical circle of good society, there is a narrower and higher circle, concentration of its light, and flower of courtesy, to which there is always a tacit appeal of pride and reference, as to its inner and imperial court, the parliament of love and chivalry. And this is constituted of those persons in whom heroic dispositions are native, with the love of beauty, the delight in society, and the power to embellish the passing day. If the individuals who compose the purest circles of aristocracy in Europe, the guarded blood of centuries, should pass in review, in such a manner as that we could, at leisure, and critically, inspect their behavior, we might find no gentleman, and no lady; for, although excellent specimens of courtesy and high-breeding would gratify us in the assemblage, in the particulars we should detect offense; because elegance comes of no breeding, but of birth. There must be romance of character, or the most fastidious exclusion of impertinencies will not avail. It must be genius which takes that direction: it must be not courteous, but courtesy. High behavior is as rare in fiction, as it is in fact. Scott is praised for the fidelity with which he painted the demeanor and conversation of the superior classes. Certainly, kings and queens,

nobles and great ladies, had some right to complain of the absurdity that had been put in their mouths, before the days of *Waverley*: but neither does Scott's dialogue bear criticism. His lords brave each other in smart epigrammatic speeches, but the dialogue is in costume, and does not please on the second reading: it is not warm with life. In Shakspeare alone, the speakers do not strut and bridle, the dialogue is easily great, and he is the best-bred man in all England, in all Christendom. Once or twice, in real life, we are permitted to enjoy the charm of noble manners, in the presence of a man or woman who have no bar in their nature, but whose character emanates freely in their word and gesture. A beautiful form is better than a beautiful face; a beautiful behavior is better than a beautiful form: it gives a higher pleasure than statues or pictures; it is the finest of the fine arts. A man is but a little thing in the midst of the objects of nature, yet, by the moral quality radiating from his countenance, he may abolish all considerations of magnitude, and in his manners equal the majesty of the world. I have seen an individual, whose manners, though wholly within the conventions of elegant society, were never learned there, but were original and commanding, and held out protection and prosperity; one who did not need the aid of a court-suit, but carried the holiday in his eye; who exhilarated the fancy by flinging wide the doors of new modes of existence; who shook off the captivity of etiquette, with happy, spirited bearing, good-natured and free as Robin Hood; yet with the port of an emperor,—if need be, calm, serious, and fit to stand the gaze of millions.

The open air and the fields, the streets and public chambers, are the places where man executes his will; let him yield or divide the sceptre at the door of the house. Woman, with her instinct of behavior, instantly detects in man a love of trifles, any coldness or imbecility, or, in short, any want of that large, flowing, and a magnanimous deportment, which is indispensable as an exterior in the hall. Our American institutions have been friendly to her, and, at this moment, I esteem it a chief felicity of this country, that it

excels in women. A certain awkward consciousness of inferiority in the men, may give rise to the new chivalry in behalf of Women's Rights. Certainly, let her be as much better placed in the laws and in social forms, as the most zealous reformer can ask, but I confide so entirely in her inspiring and musical nature, that I believe only herself can show us how she shall be served. The wonderful generosity of her sentiments raises her at times into heroical and godlike regions, and verifies the pictures of Minerva, Juno, or Polymnia; and, by the firmness with which she treads her upward path, she convinces the coarsest calculators that another road exists, than that which their feet know. But besides those who make good in our imagination the place of muses and of Delphic Sybils, are there not women who fill our vase with wine and roses to the brim, so that the wine runs over and fills the house with perfume; who inspire us with courtesy; who unloose our tongues, and we speak; who annoint our eyes, and we see? We say things we never thought to have said; for once, our walls of habitual reserve vanished, and left us at large; we were children playing with children in a wide field of flowers. Steep us, we cried, in these influences for days, for weeks, and we shall be sunny poets, and will write out in many-colored words the romance that you are. Was it Hafiz or Firdousi that said of his Persian, Lilla, she was an elemental force, and astonished me by her amount of life, when I saw her day after day radiating, every instant, redundant joy and grace on all around her? She was a solvent powerful to reconcile all heterogeneous persons into one society. Like air or water, an element of such a great range of affinities, that it combines readily with a thousand substances. Where she is present, all others will be more than they are wont. She was a unit and whole, so that whatsoever she did, became her. She had too much sympathy and desire to please, than that you could say, her manners were marked with dignity, yet no princess could surpass her clear and direct demeanor on each occasion. She did not study the Persian grammar, nor the books of the seven poets, but all the poems of the seven seemed to be written upon her. For, though

the bias of her nature was not to thought, but to sympathy, yet was she so perfect in her own nature, as to meet intellectual persons by the fullness of her heart, warming them by her sentiments; believing, as she did, that by dealing nobly with all, all would show themselves noble.

I know that this Byzantine pile of Chivalry or Fashion, which seems so fair and picturesque to those who look at the contemporary facts for science or for entertainment, is not equally pleasant to all spectators. The constitution of our society makes it a giant's castle to the ambitious youth who have not found their names enrolled in its Golden Book, and whom it has excluded from its coveted honors and privileges. They have yet to learn that its seeming grandeur is shadowy and relative: it is great by their allowance: its proudest gates will fly open at the approach of their courage and virtue. For the present distress, however, of those who are predisposed to suffer from the tyrannies of this caprice, there are easy remedies. To remove your resistance a couple of miles, or at most four, will commonly relieve the most extreme susceptibility. For, the advantages which fashion values, are plants, which thrive in very confined localities, in a few streets, namely. Out of this precinct, they go for nothing; are of no use in the farm, in the forest, in the market, in war, in the nuptial society, in the literary or scientific circle, at sea, in friendship, in the heaven of thought or virtue.

But we have lingered long enough in these painted courts. The worth of the thing signified must vindicate our taste for the emblem. Every thing that is called fashion and courtesy humbles itself before the cause and fountain of honor, creator of titles and dignities, namely, the great heart of love. This is the royal blood, this the fire, which, in all countries and contingencies, will work after its kind, and conquer and expand all that approaches it. This gives new meanings to every fact. This impoverishes the rich, suffering no grandeur but its own. What is rich? Are you rich enough to help anybody? to succor the unfashionable

and the eccentric? rich enough to make the Canadian in his wagon, the itinerant with his consul's paper which commends him "to the charitable," the swarthy Italian with his few broken words of English, the lame pauper hunted by overseers from town to town, even the poor insane besotted wreck of man or woman, feel the noble exception of your presence and your house, from the general bleakness and stoniness; to make such feel that they were greeted with a voice which made them both remember and hope? What is vulgar, but to refuse the claim on acute and conclusive reasons? What is gentle, but to allow it, and give their heart and yours one holiday from the national caution? Without the rich heart, wealth is an ugly beggar. The king of Schiraz could not afford to be so bountiful as the poor Osman who dwelt at his gate. Osman had a humanity so broad and deep, that although his speech was so bold and free with the Koran, as to disgust all the dervishes, yet was there never a poor outcast, eccentric, or insane man, some fool who had cut off his beard, or who had been mutilated under a vow, or had a pet madness in his brain, but fled at once to him,—that great heart lay there so sunny and hospitable in the center of the country,—that it seemed as if the instinct of all sufferers drew them to his side. And the madness which he harbored, he did not share. Is not this to be rich? this only to be rightly rich?

But I shall hear without pain, that I play the courtier very ill, and talk of that which I do not well understand. It is easy to see, that what is called by distinction society and fashion, has good laws as well as bad, has much that is necessary, and much that is absurd. Too good for banning, and too bad for blessing, it reminds us of a tradition of the pagan mythology, in any attempt to settle its character. "I overheard Jove, one day," said Silenus, "talking of destroying the earth; he said, it had failed; they were all rogues and vixens, who went from bad to worse, as fast as the days succeeded each other. Minerva said, she hoped not; they were only ridiculous little creatures, with this odd circumstance, that they had a blur, or indeterminate aspect,

seen far or seen near: if you called them bad, they would appear so; if you called them good, they would appear so; and there was no one person or action among them which would not puzzle her owl, much more all Olympus, to know whether it was fundamentally bad or good."

### POLITICS

Gold and iron are good  
To buy iron and gold;  
All earth's fleece and food  
For their like are sold.  
Boded Merlin wise,  
Proved Napoleon great, —  
Nor kind nor coinage buys  
Aught above its rate.  
Fear, Craft, and Avarice  
Cannot rear a State.  
Out of dust to build  
What is more than dust, —  
Walls Amphion piled  
Phœbus stablish must.  
When the Muses nine  
With the Virtues meet,  
Find to their design  
An Atlantic seat,  
By green orchard boughs  
Fended from the heat,  
Where the statesman ploughs  
Furrow for the wheat;  
When the Church is social worth,  
When the state-house is the hearth  
Then the perfect State is come,  
The republican at home.

IN dealing with the State, we ought to remember that its institutions are not aboriginal; though they existed before we were born: that they are not superior to the citizen: that every one of them was once the act of a single man: every law and usage was a man's expedient to meet a particular case: that they all are imitable, all alterable; we may make as good: we may make better. Society is an illusion to the young citizen. It lies before him in rigid repose, with cer-

tain names, men, and institutions, rooted like oak-trees to the center, round which all arrange themselves the best they can. But the old statesman knows that society is fluid; there are no such roots and centers; but any particle may suddenly become the center of the movement, and compel the system to gyrate round it, as every man of strong will, like Pisistratus, or Cromwell, does for a time, and every man of truth, like Plato, or Paul, does for ever. But politics rest on necessary foundations, and cannot be treated with levity. Republics abound in young civilians, who believe that the laws make the city; that grave modifications of the policy and modes of living, and employments of the population; that commerce, education, and religion, may be voted in or out; and that any measure, though it were absurd, may be imposed on a people, if only you can get sufficient voices to make it a law. But the wise know that foolish legislation is a rope of sand, which perishes in the twisting; that the State must follow, and not lead the character and progress of the citizen; the strongest usurper is quickly got rid of; and they only who build on Ideas, build for eternity: and that the form of government which prevails, is the expression of what cultivation exists in the population which permits it. The law is only a memorandum. We are superstitious, and esteem the statute somewhat: so much life as it has in the character of living men, is its force. The statute stands there to say, yesterday we agreed so and so, but how feel ye this article to-day? Our statute is a currency, which we stamp with our own portrait: it soon becomes unrecognizable, and in process of time will return to the mint. Nature is not democratic, nor limited-monarchical, but despotic, and will not be fooled or abated of any jot of her authority, by the pertest of her sons: and as fast as the public mind is open to more intelligence, the code is seen to be brute and stammering. It speaks not articulately, and must be made to. Meantime the education of the general mind never stops. The reveries of the true and simple are prophetic. What the tender poetic youth dreams, and prays, and paints to-day, but shuns the ridicule of saying aloud, shall presently be the

solutions of public bodies, then shall be carried as grievance and bill of rights through conflict and war, and then shall be triumphant law and establishment for a hundred years, until it gives place, in turn, to new prayers and pictures. The history of the State sketches in coarse outline the progress of thought, and follows at a distance the delicacy of culture and of aspiration.

The theory of politics, which has possessed the mind of men, and which they have expressed the best they could in their laws and in their revolutions, considers persons and property as the two objects for whose protection government exists. Of persons, all have equal rights, in virtue of being identical in nature. This interest, of course, with its whole power demands a democracy. Whilst the rights of all as persons are equal, in virtue of their access to reason, their rights in property are very unequal. One man owns his clothes, and another owns a county. This accident, depending, primarily, on the skill and virtue of the parties, of which there is every degree, and, secondarily, on patrimony, falls unequally, and its rights, of course, are unequal. Personal rights, universally the same, demand a government framed on the ratio of the census: property demands a government framed on the ratio of owners and of owning. Laban, who has flocks and herds, wishes them looked after by an officer on the frontiers, lest the Midianites shall drive them off, and pays a tax to that end. Jacob has no flocks or herds, and no fear of the Midianites, and pays no tax to the officer. It seemed fit that Laban and Jacob should have equal rights to elect the officer, who is to defend their persons, but that Laban, and not Jacob, should elect the officer who is to guard the sheep and cattle. And, if the question arise whether additional officers or watch-towers should be provided, must not Laban and Isaac, and those who must sell part of their herds to buy protection for the rest, judge better of this, and with more right, than Jacob, who, because he is a youth and a traveller, eats their bread and not his own.

In the earliest society the proprietors made their own wealth, and so long as it comes to the owners in the direct

way, no other opinion would arise in any equitable community, than that property should make the law for property, and persons the law for persons.

But property passes through donation or inheritance to those who do not create it. Gift, in one case, makes it as really the new owner's, as labor made it the first owner's; in the other case, of patrimony, the law makes an ownership, which will be valid in each man's view according to the estimate which he sets on the public tranquillity.

It was not, however, found easy to embody the readily admitted principle, that property should make law for property, and persons for persons: since persons and property mixed themselves in every transaction. At last it seemed settled, that the rightful distinction was, that the proprietors should have more elective franchise than non-proprietors, on the Spartan principle of "calling that which is just, equal; not that which is equal, just."

That principle no longer looks so self-evident as it appeared in former times, partly, because doubts have arisen whether too much weight had not been allowed in the law to property, and such a structure given to our usages, as allowed the rich to encroach on the poor, and to keep them poor; but mainly, because there is an instinctive sense, however obscure and yet inarticulate, that the whole constitution of property, on its present tenures, is injurious, and its influence on persons deteriorating and degrading; that truly the only interest for the consideration of the State, is persons: that property will always follow persons; that the highest end of government is the culture of men: and if men can be educated, the institutions will share their improvement, and the moral sentiment will write the law of the land.

If it be not easy to settle the equity of this question, the peril is less when we take note of our natural defences. We are kept by better guards than the vigilance of such magistrates as we commonly elect. Society always consists, in its greatest part, of young and foolish persons. The old, who have seen through the hypocrisy of courts and statesmen, die, and leave no wisdom to their sons. They believe their own newspapers, as their fathers did at their age. With

h an ignorant and deceivable majority, States would soon n to ruin, but that there are limitations, beyond which e folly and ambition of governors cannot go. Things have ir laws, as well as men; and things refuse to be trifled h. Property will be protected. Corn will not grow, less it is planted and manured; but the farmer will not nt or hoe it unless the chances are a hundred to one, that will cut and harvest it. Under any forms, persons and roperty must and will have their just sway. They exert ir power, as steadily as matter its attraction. Cover a pound of earth never so cunningly, divide and sub- ide it; melt it to liquid, convert it to gas; it will always gh a pound: it will always attract and resist other tter, by the full virtue of one pound weight;— and the tributes of a person, his wit and his moral energy, will rcise, under any law or extinguishing tyranny, their prop- force,—if not overtly, then covertly; if not for the law, n against it; with right, or by might.

The boundaries of personal influence it is impossible to fix, persons are organs of moral or supernatural force. Under e dominion of an idea, which possesses the minds of multi- les, as civil freedom, or the religious sentiment, the powers persons are no longer subjects of calculation. A nation men unanimously bent on freedom, or conquest, can ily confound the arithmetic of statist, and achieve ex- vagant actions, out of all proportion to their means; as e Greeks, the Saracens, the Swiss, the Americans, and the ench have done.

In like manner, to every particle of property belongs its n attraction. A cent is the representative of a certain antity of corn or other commodity. Its value is in the ecessities of the animal man. It is so much warmth, so uch bread, so much water, so much land. The law may do at it will with the owner of property, its just power will l attach to the cent. The law may in a mad freak say, t'all shall have power except the owners of property; they ll have no vote. Nevertheless, by a higher law, the roperty will, year after year, write every statute that re- cts property. The non-proprietor will be the scribe of

the proprietor. What the owners wish to do, the whole power of property will do, either through the law, or else in defiance of it. Of course, I speak of all the property, not merely of the great estates. When the rich are out-voted as frequently happens, it is the joint treasury of the poor which exceeds their accumulations. Every man owns something, if it is only a cow or a wheelbarrow, or his arms, and so has that property to dispose of.

The same necessity which secures the rights of person and property against the malignity or folly of the magistracy determines the form and methods of governing, which are proper to each nation, and to its habit of thought, and now is transferable to other states of society. In this country, we are very vain of our political institutions, which are singular in this, that they sprung, within the memory of living men, from the character and condition of the people, which they still express with sufficient fidelity,—and we ostentatiously prefer them to any other in history. They are not better, but only fitter for us. We may be wise in asserting the advantage in modern times of the democratic form, but to other states of society, in which religion consecrated the monarchical, that, and not this, was expedient. Democracy is better for us, because the religious sentiment of the present time accords better with it. Born democrats, we are now qualified to judge of monarchy, which, to our fathers living in the monarchical idea, was also relatively right. But our institutions, though in coincidence with the spirit of the age, have not any exemption from the practical defects which have discredited other forms. Every actual State is corrupt. Good men must not obey the laws too well. What satire on government can equal the severity of censure conveyed by the word *politic*, which now for ages has signified *cunning* and intimating that the State is a trick?

The same benign necessity and the same practical abuses appear in the parties into which each State divides itself, opponents and defenders of the administration of the government. Parties are also founded on instincts, and have better guides to their own humble aims than the sagacity of their leaders. They have nothing perverse in their origin, but

deliberately mark some real and lasting relation. We might as easily reprove the east wind, or the frost, as a political party, whose members, for the most part, could give no account of their position, but stand for the defence of those interests in which they find themselves. Our quarrel with them begins when they quit this deep natural ground at the bidding of some leader, and, obeying personal considerations throw themselves into the maintenance and defence of points not belonging to their system. A party is perpetually corrupted by personality. Whilst we absolve the association from dishonesty, we cannot extend the same charity to their leaders. They reap the rewards of the docility and zeal of the masses, which they direct. Ordinarily, our parties are parties of circumstance, and not of principle; as, the party of the landed interest in conflict with the commercial; the party of the capitalists, and that of the operatives; parties which are identical in their moral character, and which can easily change ground with each other, in support of many of their measures. Parties of principle, as, religious sects, or the party of free-trade, of universal suffrage, of abolition of slavery, of abolition of capital punishment, degenerate into personalities which would inspire enthusiasm. The vice of our leading parties in this country (which may be cited as a fair specimen of these societies of opinion) is, that they do not plant themselves on the deep and necessary grounds to which they are respectively entitled, but lash themselves to fury in the carrying of some local and momentary measure, nowise useful to the Commonwealth. Of the two great parties, which, at this hour, almost share the nation between them, I should say, that one has the best cause, and the other contains the best men. The philosopher, the poet, or the religious man, will, of course, wish to cast his vote with the democrat, for free-trade, for wide suffrage, for the abolition of legal cruelties in the penal code, and for facilitating in every manner the access of the young and the poor to the sources of wealth and power. But he can rarely accept the persons whom the so-called popular party propose to him as representatives of these liberalities. They have not at heart the ends which we give to the name of democracy what hope and virtue are in

it. The spirit of our American radicalism is destructive and aimless; it is not loving; it has no ulterior and divine ends but is destructive only out of hatred and selfishness. On the other side, the conservative party, composed of the most moderate, able, and cultivated part of the population, timid, and merely defensive of property. It vindicates right, it aspires to no real good, it brands no crime, it proposes no generous policy, it does not build, nor write, nor cherish the arts, nor foster religion, nor establish schools, nor encourage science, nor emancipate the slave, nor befriended the poor, or the Indian, or the immigrant. From neither party, when in power, has the world any benefit to expect in science, art, or humanity, at all commensurate with the resources of the nation.

I do not for these defects despair of our republic. We are not at the mercy of any waves of chance. In the strife of ferocious parties, human nature always finds itself cherished, as the children of the convicts at Botany Bay are found to have as healthy a moral sentiment as other children. Citizens of feudal states are alarmed at our democratic institutions lapsing into anarchy; and the older and more cautious among ourselves are learning from Europeans to look with some terror at our turbulent freedom. It is said that in our license of construing the Constitution, and in the despotism of public opinion, we have no anchor; and our foreign observer thinks he has found the safeguard in the sanctity of Marriage among us; and another thinks he has found it in our Calvinism. Fisher Ames expressed the popular security more wisely, when he compared a monarchy and a republic, saying, "that a monarchy is a merchantman which sails well, but will sometimes strike on a rock, and go to the bottom; whilst a republic is a raft, which would never sink, but then your feet are always in water." No form can have any dangerous importance, whilst we are befriended by the laws of things. It makes no difference how many tons weight of atmosphere presses on our heads, so long as the same pressure resists it within the lungs. Against the mass a thousandfold, it cannot begin to crush us, as long as reaction is equal to action. The fact of two

les, of two forces, centripetal and centrifugal, is universal, and each force, by its own activity, develops the other. Wild liberty develops iron conscience. Want of liberty, by lengthening law and decorum, stupefies conscience. "Lynch-law" prevails only where there is greater hardihood and self-subsistency in the leaders. A mob cannot be a permanency: everybody's interest requires that it should not exist, and only justice satisfies all.

We must trust infinitely to the beneficent necessity which runs through all laws. Human nature expresses itself in them as characteristically as in statues, or songs, or railroads, and an abstract of the codes of nations would be a transcript of the common conscience. Governments have their origin in the moral identity of men. Reason for one is reason to be reason for another, and for every other. There is no middle measure which satisfies all parties, be they never so many, or so resolute for their own. Every man finds a sanction for his simplest claims and deeds in decisions of his own mind, which he calls truth and holiness. In these decisions all the citizens find a perfect agreement, and only differ in these; not in what is good to eat, good to wear, good use of time, or what amount of land, or of public aid, each is entitled to claim. This truth and justice men presently endeavor to make application of, to the measuring of land, the apportionment of service, the protection of life and property. Their first endeavors, no doubt, are very awkward. The absolute right is the first governor; or, every government is an impure theocracy. The idea, after which each community is aiming to make and mend its law, is the will of the wise man. The wise man, it cannot find in nature, and therefore makes awkward but earnest efforts to secure his government by contrivance; as, by causing the entire people to give their voices on every measure; or, by a double choice to get the representation of the whole; or, by a selection of the best citizens; or, to secure the advantages of efficiency and internal peace, by confiding the government to one, who may himself select his agents. All forms of government abolish an immortal government, common to all dynasties and independent of numbers, perfect where two men exist,

perfect where there is only one man.

Every man's nature is a sufficient advertisement to him of the character of his fellows. My right and my wrong, their right and their wrong. Whilst I do what is fit for me, and abstain from what is unfit, my neighbor and I shall often agree in our means, and work together for a time to one end. But whenever I find my dominion over myself not sufficient for me, and undertake the direction of him also, I overstep the truth, and come into false relations to him. I may have so much more skill or strength than he, that he cannot express adequately his sense of wrong, but it is a lie, and hurtful like a lie both him and me. Love and nature cannot maintain the assumption: it must be executed by a practical lie, namely, by force. This undertaking for another, is the blunder which stands in colossal ugliness in the governments of the world. It is the same thing in numbers, and in a pair, only not quite so intelligible. I can see well enough a great difference between my setting myself down to a self-control, and my going to make somebody else act after my views; but when a quarter of the human race assume to tell me what I must do, I may be too much disturbed by the circumstances to see so clearly the absurdity of their command. Therefore, all public ends look vague and quixotic beside private ones. For, any laws but those which men make for themselves, are laughable. If I put myself in place of my child, and we stand in one thought, and see what things are thus or thus, that perception is law for him and me. We are both there, both act. But I, without carrying him into the thought, I look over into his plot, and, guessing how it is with him, ordain this or that he will never obey me. This is the history of government—one man does something which is to bind another. A man who cannot be acquainted with me, taxes me; looking from afar at me, ordains that a part of my labor shall go to this or that whimsical end, not as I, but as he happens to fancy. Behold the consequence. Of all debts, men are at least willing to pay the taxes. What a satire is this on government! Everywhere they think they get their money worth, except for these.

Hence, the less government we have, the better,—the fewer laws, and the less confided power. The antidote to this abuse of formal government, is, the influence of private character, the growth of the individual; the appearance of the principal to supersede the proxy; the appearance of the wise man, of whom the existing government, is, it must be owned, but a shabby imitation. That which all things tend to educe, which freedom, cultivation, intercourse, revolutions, go to form and deliver, is character: that is the end of nature, to reach unto this coronation of her king. To educate the wise man, the State exists; and with the appearance of the wise man, the State expires. The appearance of character makes the State unnecessary. The wise man is the State. He needs no army, fort, or navy,—he loves men too well; no bribe, or feast, or palace, to draw friends to him: no vantage ground, no favorable circumstance. He needs no library, for he has not done thinking; no church, for he is a prophet; no statute book, for he is the lawgiver; no money, for he is value; no road, for he is at home where he is; no experience, for the life of the creator shoots through him, and looks from his eyes. He has no personal friends, for he who has the spell to draw the prayer and piety of all men unto him, needs not husband and educate a few, to share with him a select and poetic life. His relation to men is angelic; his memory is myrrh to them; his presence, frankincense and flowers.

We think our civilization near its meridian, but we are yet only at the cock-crowing and the morning star. In our barbarous society the influence of character is in its infancy. As a political power, as the rightful lord who is to tumble all rulers from their chairs, its presence is hardly yet suspected. Malthus and Ricardo quite omit it; the Annual Register is silent; in the Conversations' Lexicon, it is not set down; the President's Message, the Queen's Speech, have not mentioned it; and yet it is never nothing. Every thought which genius and piety throw into the world, alters the world. The gladiators in the lists of power feel, through all their frocks of force and simulation, the presence of worth. I think the very strife of trade and ambition are confession

of this divinity; and successes in those fields are the poor amends, the fig-leaf with which the shamed soul attempts to hide its nakedness. I find the like unwilling homage in all quarters. It is because we know how much is due from us, that we are impatient to show some petty talent as a substitute for worth. We are haunted by a conscience of this right to grandeur of character, and are false to it. But each of us has some talent, can do somewhat useful, or graceful, or formidable, or amusing, or lucrative. That we do, as an apology to others and to ourselves, for not reaching the mark of a good and equal life. But it does not satisfy us, whilst we thrust it on the notice of our companions. It may throw dust in their eyes, but does not smooth our own brow, or give us the tranquillity of the strong when we walk abroad. We do penance as we go. Our talent is a sort of expiation, and we are constrained to reflect on our splendid moment, with a certain humiliation, as somewhat too fine, and not as one act of many acts, a fair expression of our permanent energy. Most persons of ability meet in society with a kind of tacit appeal. Each seems to say, "I am not all here." Senators and presidents have climbed so high with pain enough, not because they think the place specially agreeable, but as an apology for real worth, and to vindicate their manhood in our eyes. This conspicuous chair is their compensation to themselves for being of a poor, cold, hard nature. They must do what they can. Like one class of forest animals, they have nothing but a prehensile tail: climb they must, or crawl. If a man found himself so rich-natured that he could enter into strict relations with the best persons, and make life serene around him by the dignity and sweetness of his behavior, could he afford to circumvent the favor of the caucus and the press, and covert relations so hollow and pompous, as those of a politician? Surely nobody would be a charlatan, who could afford to be sincere.

The tendencies of the times favor the idea of self-government, and leave the individual, for all code, to the rewards and penalties of his own constitution, which work with more energy than we believe, whilst we depend on artificial re-

straints. The movement in this direction has been very marked in modern history. Much has been blind and dis-creditable, but the nature of the revolution is not affected by the vices of the revolvers; for this is a purely moral force. It was never adopted by any party in history, neither can it be. It separates the individual from all party, and unites him, at the same time, to the race. It promises a recognition of higher rights than those of personal freedom, or the security of property. A man has a right to be employed, to be trusted, to be loved, to be revered. The power of love, as the basis of a state, has never been tried. We must not imagine that all things are lapsing into confusion, if every tender protestant be not compelled to bear his part in certain social conventions: nor doubt that roads can be built, letters carried, and the fruit of labor secured, when the government of force is at an end. Are our methods now so excellent that all competition is hopeless? Could not a nation of friends even devise better ways? On the other hand, let not the most conservative and timid fear anything from a premature surrender of the bayonet, and the system of force. For, according to the order of nature, which is quite superior to our will, it stands thus: there will always be a government of force, where men are selfish; and when they are pure enough to abjure the code of force, they will be wise enough to see how these public ends of the post-office, of the highway, of commerce, and the exchange of property, of museums and libraries, of institutions of art and science, can be answered.

We live in a very low state of the world, and pay unwilling tribute to governments founded on force. There is not, among the most religious and instructed men of the most religious and civil nations, a reliance on the moral sentiment, and a sufficient belief in the unity of things to persuade them that society can be maintained without artificial restraints, as well as the solar system; or that the private citizen might be reasonable, and a good neighbor, without the hint of a jail or a confiscation. What is strange too, there never was in any man sufficient faith in the power of rectitude, to inspire him with the broad design of renovating the State on the

principle of right and love. All those who have pretended this design, have been partial reformers, and have admitted in some manner the supremacy of the bad State. I do not call to mind a single human being who has steadily denied the authority of the laws, on the simple ground of his own moral nature. Such designs, full of genius and full of fate as they are, are not entertained except avowedly as air-pictures. If the individual who exhibits them, dare to think them practicable, he disgusts scholars and churchmen; and men of talent, and women of superior sentiments, cannot hide their contempt. Not the less does nature continue to fill the heart of youth with suggestions of this enthusiasm, and there are now men,—if indeed I can speak in the plural unnumber,—more exactly, I will say, I have just been conversing with one man, to whom no weight of adverse experience will make it for a moment appear impossible, that thousands of human beings might exercise towards each other the grandest and simplest sentiments, as well as a knot of friends, or a pair of lovers.

## XIII

### ART

BECAUSE the soul is progressive, it never quite repeats itself, but in every act attempts the production of a new and fairer whole. This appears in works both of the useful and the fine arts, if we employ the popular distinction of works according to their aim, either at use or beauty. Thus in our fine arts, not imitation, but creation is the aim. In landscapes, the painter should give the suggestion of a fairer creation than we know. The details, the prose of nature, he should omit, and give us only the spirit and splendor. He should know that the landscape has beauty for his eye, because it expresses a thought which is to him good: and this, because the same power which sees through his eyes is seen in that spectacle; and he will come to value the expression of nature, and not nature itself, and so exalt in his copy the features that please him. He will give the gloom of gloom, and the sunshine of sunshine. In a portrait he must inscribe the character, and not the features, and must esteem the man who sits to him as himself only an imperfect picture or likeness of the aspiring original within.

What is that abridgment and selection we observe in all spiritual activity, but itself the creative impulse? for it is the inlet of that higher illumination which teaches to convey a larger sense by simpler symbols. What is a man but nature's finer success in self-explication? What is a man but a finer and compacter landscape than the horizon figures,—nature's eclecticism? and what is his speech, his love of painting, love of nature, but a still finer success,—all the weary miles and tons of space and bulk left out, and the spirit or moral of it contracted into a musical word, or the most cunning stroke of the pencil?

But the artist must employ the symbols in use in his day and nation to convey his enlarged sense to his fellow-men. Thus the new in art is always formed out of the old. The Genius of the Hour always sets his ineffaceable seal on the work, and gives it an inexpressible charm for the imagination. As far as the spiritual character of the period overpowers the artist and finds expression in his work, so far it will always retain a certain grandeur, and will represent to future beholders the Unknown, the Inevitable, the Divine. No man can quite exclude this element of Necessity from his labor. No man can quite emancipate himself from his age and country, or produce a model in which the education, the religion, the politics, usages, and arts of his times shall have no share. Though he were never so original, never so wilful and fantastic, he cannot wipe out of his work every trace of the thoughts amidst which it grew. The very avoidance betrays the usage he avoids. Above his will, and out of his sight, he is necessitated, by the air he breathes, and the idea on which he and his contemporaries live and toil, to share the manner of his times, without knowing what that manner is. Now that which is inevitable in the work has a higher charm than individual talent can ever give, inasmuch as the artist's pen or chisel seems to have been held and guided by a gigantic hand to inscribe a line in the history of the human race. This circumstance gives a value to the Egyptian hieroglyphics, to the Indian, Chinese, and Mexican idols, however gross and shapeless. They denote the height of the human soul in that hour, and were not fantastic, but sprung from a necessity as deep as the world. Shall I now add, that the whole extant product of the plastic arts has herein its highest value *as history*; as a stroke drawn in the portrait of that fate, perfect and beautiful, according to whose ordinations all beings advance to their beatitude?

Thus, historically viewed, it has been the office of art to educate the perception of beauty. We are immersed in beauty, but our eyes have no clear vision. It needs, by the exhibition of single traits, to assist and lead the dormant taste. We carve and paint, or we behold what is carved

and painted, as students of the mystery of Form. The virtue of art lies in detachment, in sequestering one object from the embarrassing variety. Until one thing comes out from the connection of things, there can be enjoyment, contemplation, but no thought. Our happiness and unhappiness are unproductive. The infant lies in a pleasing trance; but his individual character and his practical power depend on his daily progress in the separation of things, and dealing with one at a time. Love and all the passions concentrate all existence around a single form. It is the habit of certain minds to give an all-excluding fulness to the object, the thought, the word, they alight upon, and to make that for the time the deputy of the world. These are the artists, the orators, the leaders of society. The power to detach, and to magnify by detaching, is the essence of rhetoric in the hands of the orator and the poet. This rhetoric, or power to fix the momentary eminency of an object,—so remarkable in Burke, in Byron, in Carlyle,—the painter and sculptor exhibit in color and in stone. The power depends on the depth of the artist's insight of that object he contemplates. For every object has its roots in central nature, and may of course be so exhibited to us as to represent the world. Therefore each work of genius is the tyrant of the hour, and concentrates attention on itself. For the time, it is the only thing worth naming, to do that,—be it a sonnet, an opera, a landscape, a statue, an oration, the plan of a temple, of a campaign, or of a voyage of discovery. Presently we pass to some other object, which rounds itself into a whole, as did the first; for example, a well-laid garden,—and nothing seems worth doing but the laying out of gardens. I should think fire the best thing in the world, if I were not acquainted with air, and water, and earth. For it is the right and property of all natural objects, of all genuine talents, of all native properties whatsoever, to be for their moment the top of the world. A squirrel leaping from bough to bough, and making the wood but one wide tree for his pleasure, fills the eye not less than a lion, is beautiful, self-sufficing, and stands then and there for nature. A good ballad draws my ear and heart whilst I listen, as much

as an epic has done before. A dog drawn by a master, or a litter of pigs, satisfies, and is a reality not less than the frescoes of Angelo. From this succession of excellent objects learn we at last the immensity of the world, the opulence of human nature, which can run out to infinitude in any direction. But I also learn that what astonished and fascinated me in the first work astonished me in the second work also,—that excellence of all things is one.

The office of painting and sculpture seems to be merely initial. The best pictures can easily tell us their last secret. The best pictures are rude draughts of a few of the miraculous dots and lines and dyes which make up the ever-changing "landscape with figures" amidst which we dwell. Painting seems to be to the eye what dancing is to the limbs. When that has educated the frame to self-possession, to nimbleness, to grace, the steps of the dancing-master are better forgotten: so painting teaches me the splendor of color and the expression of form, and as I see many pictures and higher genius in the art, I see the boundless opulence of the pencil, the indifference in which the artist stands free to choose out of the possible forms. If he can draw every thing, why draw anything? and then is my eye opened to the eternal picture which nature paints in the street, with moving men and children, beggars and fine ladies, draped in red, and green, and blue, and grey; long-haired, grizzled, white-faced, black-faced, wrinkled, giant, dwarf, expanded, elfish,—capped and based by heaven, earth, and sea.

A gallery of sculpture teaches more austere the same lesson. As picture teaches the coloring, so sculpture the anatomy of form. When I have seen fine statues, and afterwards enter a public assembly, I understand well what he meant who said, "When I have been reading Homer, all men look like giants." I too see that painting and sculpture are gymnastics of the eye, its training to the niceties and curiosities of its function. There is no statue like this living man, with his infinite advantage over all ideal sculpture, of perpetual variety. What a gallery of art have I here! No mannerist made these varied groups and diverse original single figures. Here is the artist himself improvising,

and glad, at his block. Now one thought strikes him, and another; and with each moment he alters the whole attitude, and expression of his clay. Away with your sense of oil and easels, of marble and chisels: except to turn your eyes to the witchcraft of eternal art, they are doctrinal rubbish.

The reference of all production at last to an Aboriginal never explains the traits common to all works of the highest—that they are universally intelligible, that they restore us the simplest states of mind, and are religious. Since that skill is therein shown is the reappearance of the original soul, a jet of pure light, it should produce a similar impression to that made by natural objects. In happy nature appears to us one with art; art perfected,—a work of genius. And the individual in whom simple ideas, and susceptibility to all the great human influences, overpower the accidents of a local and special culture, is the best critic of art. Though we travel the world over to find the beautiful, we must carry it with us, or we find it not. The best of beauty is a finer charm than skill in surfaces, in lines, or rules of art can ever teach, namely, a radiation, in the work of art, of human character,—a wonderful impression, through stone or canvas or musical sound, of the deepest and simplest attributes of our nature, and therefore not intelligible at last to those souls which have these attributes. In the sculptures of the Greeks, in the masonry of the Romans, and in the pictures of the Tuscan and Venetian masters, the highest charm is the universal language they speak. A confession of moral nature, of purity, love, and life, breathes from them all. That which we carry to them, the same we bring back more fairly illustrated in the memory.

The traveller who visits the Vatican, and passes from chamber to chamber through galleries of statues, vases, sarcophagi, and candelabra, through all forms of beauty, cut from the richest materials, is in danger of forgetting the simplicity of the principles out of which they all sprung, and that they had their origin from thoughts and laws in his own breast. He studies the technical rules on these wonderful remains, but forgets that these works were not always so constellated; that they are the contributions of many

ages and many countries; that each came out of the solitary workshop of one artist, who toiled perhaps in ignorance of the existence of other sculpture, created his work without other model save life, household life, and the sweet and smart of personal relations, of beating hearts, and meeting eyes, of poverty, and necessity, and hope, and fear. These were his inspirations, and these are the effects he carries home to your heart and mind. In proportion to his force, the artist will find in his work an outlet for his proper character. He must not be in any manner pinched or hindered by his material, but through his necessity of imparting himself, the adamant will be wax in his hands, and will allow an adequate communication of himself in his full stature and proportion. Not a conventional nature and culture need he cumber himself with, nor ask what is the mode in Rome or in Paris; but that house, and weather, and manner of living, which poverty and the fate of birth have made at once so odious and so dear, in the gray unpainted wood cabin on the corner of a New Hampshire farm, or in the log-hut of the back woods, or in the narrow lodging where he has endured the constraints and seeming of a city poverty,—will serve as well as any other condition as the symbol of a thought which pours itself indifferently through all.

I remember, when in my younger days I had heard of the wonders of Italian painting, I fancied the great pictures would be great strangers; some surprising combination of color and form; a foreign wonder, barbaric pearl and gold like the spontoons and standards of the militia, which played such pranks in the eyes and imaginations of school-boys. It was to see and acquire I knew not what. When I came at last to Rome, and saw with eyes the pictures, I found that the genius left to novices the gay and fantastic and ostentatious, and itself pierced directly to the simple and true; that it was familiar and sincere; that it was the old, eternal fact I had met already in so many forms; unto which I lived; that it was the plain *you and me* I knew so well,—had left at home in so many conversations. I had had the same experience already in a church at Naples. There I saw that nothing was changed with me but the place, and said to

yourself,—“Thou foolish child, hast thou come out hither, over our thousand miles of salt water, to find that which was perfect to thee there at home?” That fact I saw again in the Accademia at Naples, in the chambers of sculpture; and again when I came to Rome, and to the paintings of Raphael, Angelo, Sacchi, Titian, and Leonardo da Vinci. What, old mole! workest thou in the earth so fast?” It had travelled by my side: that which I fancied I had left in Boston was here in the Vatican, and again at Milan, and at Paris, and made all travelling ridiculous as a treadmill. I now require this of all pictures, that they domesticate me, not that they dazzle me. Pictures must not be too picturesque. Nothing astonishes men so much as common sense and plain dealing. All great actions have been simple, and all great pictures are.

The Transfiguration, by Raphael, is an eminent example of this peculiar merit. A calm, benignant beauty shines over this picture, and goes directly to the heart. It seems almost to call you by name. The sweet and sublime face of Jesus is beyond praise, yet how it disappoints all florid expectations! This familiar, simple, home-speaking countenance is as if one should meet a friend. The knowledge of picture-dealers has its value; but listen not to their criticism when your heart is touched by genius. It was not painted for them,—it was painted for you; for such as had eyes capable of being touched by simplicity and lofty emotions.

Yet when we have said all our fine things about the arts, we must end with a frank confession, that the arts, as we know them, are but initial. Our best praise is given to what they aimed and promised, not to the actual result. He has conceived meanly of the resources of man who believes that the best age of production is past. The real value of the Parthenon or the Transfiguration is as signs of power; billows or apples they are of the great stream of tendency; tokens of the everlasting effort to produce, which even in its worst state the soul betrays. Art has not yet come to its maturity, if it do not put itself abreast with the most potent influences of the world, if it is not practical and moral, if it does not stand in connection with the conscience, if it do not

make the poor and uncultivated feel that it addresses them with a voice of lofty cheer. There is higher work for Art than the arts. They are abortive births of an imperfect or vitiated instinct. Art is the need to create; but in its essence, immense and universal, it is impatient of working with lame or tied hands, and of making cripples and monsters such as all pictures and statues are. Nothing less than the creation of man and nature is its end. A man should find in it an outlet for his whole energy. He may paint and carve only as long as he can do that. Art should exhilarate and throw down the walls of circumstance on every side, awakening in the beholder the same sense of universal relation and power which the work evinced in the artist, and its highest effect is to make new artists.

Already History is old enough to witness the old age and disappearance of particular arts. The art of sculpture is long ago perished to any real effect. It was originally a useful art, a mode of writing, a savage's record of gratitude or devotion; and among a people possessed of a wonderful perception or form, this childish carving was refined to the utmost splendor of effect. But it is the game of a rude and youthful people, and not the manly labor of a wise and spiritual nation. Under an oak-tree loaded with leaves and nuts, under a sky full of eternal eyes, I stand in a thoroughfare; but in the works of our plastic arts, and especially of sculpture, creation is driven into a corner. I cannot hide from myself that there is a certain appearance of paltriness as of toys, and the trumpery of a theatre, in sculpture. Nature transcends all our moods of thought, and its secrets we do not yet find. But the gallery stands at the mercy of our moods, and there is a moment when it becomes frivolous. I do not wonder that Newton, with an attention habitually engaged on the earth of planets and suns, should have wondered what the Earl of Pembroke found to admire in "stone dolls." Sculpture may serve to teach the pupil how deep the secret of form, how purely the spirit can translate its meanings into that eloquent dialect. But the statue will look cold and false before that new activity, which needs to roll through all things, and is impatient of counterfeits and

things not alive. Picture and sculpture are the celebrations and festivities of form. But true art is never fixed, but always flowing. The sweetest music is not in the oratorio, but in the human voice when it speaks from its instant life tones of tenderness, truth, or courage. The oratorio has already lost its relation to the morning, to the sun and the earth, but that persuading voice is in tune with these. All works of art should not be detached, but extempore performances. A great man is a new statue in every attitude and action. A beautiful woman is a picture which drives all beholders nobly mad. Life may be lyric or epic, as well as a poem or a romance.

A true announcement of the law of creation, if a man were found worthy to declare it, would carry art up into the kingdom of nature, and destroy its separate and contrasted existence. The fountains of invention and beauty in modern society are all but dried up. A popular novel, a theatre, or a ball-room, makes us feel that we are all paupers in the almshouse of this world, without dignity, without skill or industry. Art is as poor and low. The old tragic Necessity, which lowers on the brows even of the Venuses and the Cupids of the antique, and furnishes the sole apology for the intrusion of such anomalous figures into nature,—namely, that they were inevitable, that the artist was drunk with a passion for form, which he could not resist, and which vented itself in these fine extravagances,—no longer dignifies the chisel or the pencil. But the artist and the connoisseur now seek in art the exhibition of their talent, or an asylum from the evils of life. Men are not well pleased with the figure they make in their own imagination, and they flee to art, and convey their better sense in an oratorio, a statue, or a picture. Art makes the same effort which a sensual prosperity makes, namely, to detach the beautiful from the useful, to do up the work as unavoidable, and hating it, pass on to enjoyment. These solaces and compensations, this division of beauty from use, the laws of nature do not permit. As soon as beauty is sought not from religion and love, but for pleasure, it degrades the seeker. High beauty is no longer attainable

by him in canvas or in stone, in sound or in lyrical construction; an effeminate, prudent, sickly beauty, which is not beauty, is all that can be formed; for the hand can never execute any thing higher than the character can inspire.

The art that thus separates is itself first separated. Art must not be a superficial talent, but must begin farther back in man. Now men do not see nature to be beautiful, and they go to make a statue which shall be. They abhor man as tasteless, dull, and inconvertible, and console themselves with color-bags and blocks of marble. They reject life as prosaic, and create a death which they call poetic. They despatch the day's weary chores, and fly to voluptuous recreations. They eat and drink, that they may afterwards execute the ideal. Thus is art vilified; the name conveys to the mind its secondary and bad senses; it stands in the imagination as somewhat contrary to nature, and struck with death from the first. Would it not be better to begin high up,—to serve the ideal before they eat and drink; to serve the ideal in eating and drinking, in drawing the breath, and in the functions of life? Beauty must come back to the useful arts, and the distinction between the fine and the useful arts be forgotten. If history were truly told, if life were nobly spent, it would be no longer easy or possible to distinguish the one from the other. In nature all is useful, all is beautiful. It is therefore beautiful because it is alive, moving, reproductive; it is therefore useful because it is symmetrical and fair. Beauty will not come at the call of a legislature, nor will it repeat in England or America the history in Greece. It will come, as always, unannounced and spring up between the feet of brave and earnest men. It is in vain that we look for genius to reiterate its miracles in the old arts; it is its instinct to find beauty and holiness in new and necessary facts, in the field and roadside, in the shop and mill. Proceeding from a religious heart, it will raise to a divine use the railroad, the insurance-office, the joint-stock company, our law, our primary assemblies, our commerce, the galvanic battery, the electric jar, the prism, and the chemist's retort, in which we seek now only an economical use. Is not the selfish and even cruel aspect which

belongs to our great mechanical works, to mills, railways, and machinery, the effect of the mercenary impulses which these works obey? When its errands are noble and adequate, a steam-boat bridging the Atlantic between Old and New England, and arriving at its ports with the punctuality of a planet,—is a step of man into harmony with nature. The boat at St. Petersburg, which plies along the Lena by magnetism, needs little to make it sublime. When science is learned in love, and its powers are wielded by love, they will appear the supplements and continuations of the material creation.

## XIV

### BEAUTY

THE spiral tendency of vegetation infects education also. Our books approach very slowly the things we most wish to know. What a parade we make of our science, and how far off, and at arm's length, it is from its objects! Our botany is all names, not powers: poets and romancers talk of herbs of grace and healing; but what does the botanist know of the virtues of his weeds? The geologist lays bare the strata, and can tell them all on his fingers: but does he know what effect passes into the man who builds his house in them? what effect on the race that inhabits a granite shelf? what on the inhabitants of marl and of alluvium?

We should go to the ornithologist with a new feeling, if he could teach us what the social birds say, when they sit in the autumn council, talking together in the trees. The want of sympathy makes his record a dull dictionary. His result is a dead bird. The bird is not in its ounces and inches, but in its relations to Nature; and the skin or skeleton you show me is no more a heron, than a heap of ashes or a bottle of gases into which his body has been reduced is Dante or Washington. The naturalist is led *from* the road by the whole distance of his fancied advance. The boy had juster views when he gazed at the shells on the beach, or the flowers in the meadow, unable to call them by their names, than the man in the pride of his nomenclature. Astrology interested us, for it tied man to the system. Instead of an isolated beggar, the farthest star felt him, and he felt the star. However rash and however falsified by pretenders and traders in it, the hint was true and divine, the soul's avowal of its large relations, and that climate, century, remote natures, as well as near, are part of its biography.

Chemistry takes to pieces, but it does not construct. Alchemy which sought to transmute one element into another, to prolong life, to arm with power,—that was in the right direction. All our science lacks a human side. The tenant is more than the house. Bugs and stamens and spores, on which we lavish so many years, are not finalities, and man, when his powers unfold in order, will take Nature along with him, and enit light into all her recesses. The human heart concerns us more than the poring into microscopes, and is larger than can be measured by the pompous figures of the astronomer.

We are just so frivolous and sceptical. Men hold themselves cheap and vile: and yet a man is a fagot of thunderbolts. All the elements pour through his system: he is the flood of the flood, and fire of the fire; he feels the antipodes and the pole, as drops of his blood: they are the extension of his personality. His duties are measured by that instrument he is; and a right and perfect man would be felt to the center of the Copernican system. 'T is curious that we only believe as deep as we live. We do not think heroes can exert any more awful power than that surface-play which amuses us. A deep man believes in miracles, waits for them, believes in magic, believes that the orator will decompose his adversary; believes that the evil eye can wither, that the heart's blessing can heal; that love can exalt talent; can overcome all odds. From a great heart secret magnetisms flow incessantly to draw great events. But we prize very humble utilities, a prudent husband, a good son, a voter, a citizen, and deprecate any romance of character; and perhaps reckon only his money value,—his intellect, his affection, as a sort of bill of exchange, easily convertible into fine chambers, pictures, music, and wine.

The motive of science was the extension of man, on all sides, into Nature, till his hands should touch the stars, his eyes see through the earth; his ears understand the language of beast and bird, and the sense of the wind; and, through his sympathy, heaven and earth should talk with him. But that is not our science. These geologies, chemistries, astronomies, seem to make wise, but they leave us where they found us. The invention is of use to the inven-

tor, of questionable help to any other. The formulas of science are like the papers in your pocket-book, of no value to any but the owner. Science in England, in America, is jealous of theory, hate the name of love and moral purpose. There's a revenge for this inhumanity. What manner of man does science make? The boy is not attracted. He says, I do not wish to be such a kind of man as my professor is. The collector has dried all the plants in his herbal, but he has lost weight and humor. He has got all snakes and lizards in his phials, but science has done for him also, and has put the man into a bottle. Our reliance on the physician is a kind of despair of ourselves. The clergy have bronchitis, which does not seem a certificate of spiritual health. Macready thought it came of the *false* *setto* of their voicing. An Indian prince, Tisso, one day riding in the forest, saw a herd of elk sporting. "See how happy," he said, "these browsing elks are! Why should not priests, lodged and fed comfortably in the temples, also amuse themselves?" Returning home, he imparted this reflection to the king. The king, on the next day, conferred the sovereignty on him, saying, "Prince, administer this empire for seven days: at the termination of that period, I shall put thee to death." At the end of the seventh day, the king inquired, "From what cause hast thou become so emaciated?" He answered, "From the horror of death." The monarch rejoined: "Live, my child, and be wise. Thou hast ceased to take recreation, saying to thyself, In seven days I shall be put to death. These priests in the temple incessantly meditate on death; how can they enter into healthful diversions?" But the men of science or the doctors or the clergy are not victims of their pursuits, more than others. The miller, the lawyer, and the merchant dedicate themselves to their own details, and do not come out men of more force. Have they divination, grand aims, hospitality of soul, and the equality to any event, which we demand in man, or only the reactions of the mill, of the wares, of the chicane?

No object really interests us but man, and in man only his superiorities; and though we are aware of a perfect law in Nature, it has fascination for us only through its relation

to him, or, as it is rooted in the mind. At the birth of Winckelmann, more than a hundred years ago, side by side with this arid, departmental, *post-mortem* science, rose an enthusiasm in the study of Beauty; and perhaps some sparks from it may yet light a conflagration in the other. Knowledge of men, knowledge of manners, the power of form, and our sensibility to personal influence, never go out of fashion. These are facts of a science which we study without book, whose teachers and subjects are always near us.

So inveterate is our habit of criticism, that much of our knowledge in this direction belongs to the chapter of pathology. The crowd in the street oftener furnishes degradations than angels or redeemers; but they all prove the transparency. Every spirit makes its house; and we can give a shrewd guess from the house to the inhabitant. But not less does Nature furnish us with every sign of grace and goodness. The delicious faces of children, the beauty of school-girls, "the sweet seriousness of sixteen," the lofty air of well-born, well-bred boys, the passionate histories in the looks and manners of youth and early manhood, and the varied power in all that well-known company that escort us through life,—we know how these forms thrill, paralyze, provoke, inspire, and enlarge us.

Beauty is the form under which the intellect prefers to study the world. All privilege is that of beauty; for there are many beauties; as, of general nature, of the human face and form, of manners, of brain, or method, moral beauty, or beauty of the soul.

The ancients believed that a genius or demon took possession at birth of each mortal, to guide him; that these genii were sometimes seen as a flame of fire partly immersed in the bodies which they governed;—on an evil man, resting on his head; in a good man, mixed with his substance. They thought the same genius, at the death of its ward, entered a new-born child, and they pretended to guess the pilot, by the sailing of the ship. We recognize obscurely the same fact, though we give it our own names. We say, that every man is entitled to be valued by his best moment. We measure our friends so. We know, they have intervals of folly,

whereof we take no heed, but wait the reappearings of the genius, which are sure and beautiful. On the other side, everybody knows people who appear bedridden, and who, with all degrees of ability, never impress us with the air of free agency. They know it too, and peep with their eyes to see if you detect their sad plight. We fancy, could we pronounce the solving word, and disenchant them, the cloud would roll up, the little rider would be discovered and unseated, and they would regain their freedom. The remedy seems to be never far off, since the first step into thought lifts this mountain of necessity. Thought is the pent air-ball which can rive the planet, and the beauty which certain objects have for him is the friendly fire which expands the thought, and acquaints the prisoner that liberty and power await him.

The question of Beauty takes us out of surfaces, to thinking of the foundations of things. Goethe said: "The beautiful is a manifestation of secret laws of Nature, which, but for this appearance, had been forever concealed from us." And the working of this deep instinct makes all the excitement—much of it superficial and absurd enough—about works of art, which leads armies of vain travellers every year to Italy, Greece, and Egypt. Every man values every acquisition he makes in the science of beauty, above his possessions. The most useful man in the most useful world, so long as only commodity was served, would remain unsatisfied. But, as fast as he sees beauty, life acquires a very high value.

I am warned by the ill fate of many philosophers not to attempt a definition of Beauty. I will rather enumerate a few of its qualities. We ascribe beauty to that which is simple; which has no superfluous parts; which exactly answers its end; which stands related to all things; which is the mean of many extremes. It is the most enduring quality, and the most ascending quality. We say love is blind, and the figure of Cupid is drawn with a bandage round his eyes. Blind:—yes, because he does not see what he does not like; but the sharpest-sighted hunter in the universe is Love, for finding what he seeks, and only that; and the

mythologists tell us, that Vulcan was painted lame, and Cupid blind, to call attention to the fact, that one was all limbs, and the other, all eyes. In the true mythology, Love is an immortal child, and Beauty leads him as a guide: nor can we express a deeper sense than when we say, Beauty is the pilot of the young soul.

Beyond their sensuous delight, the forms and colors of Nature have a new charm for us in our perception, that not one ornament was added for ornament, but each is a sign of some better health, or more excellent action. Elegance of form in bird or beast, or in the human figure, marks some excellence of structure: or beauty is only an invitation from what belongs to us. 'T is a law of botany, that in plants, the same virtues follow the same forms. It is a rule of largest application, true in a plant, true in a loaf of bread, that in the construction of any fabric or organism, any real increase of fitness to its end, is an increase of beauty.

The lesson taught by the study of Greek and of Gothic art, of antique and of Pre-Raphaelite painting, was worth all the research,—namely, that all beauty must be organic; that outside embellishment is deformity. It is the soundness of the bones that ultimates itself in a peach-bloom complexion: health of constitution that makes the sparkle and the power of the eye. 'T is the adjustment of the size and of the joining of the sockets of the skeleton, that gives grace of outline and the finer grace of movement. The cat and the deer cannot move or sit inelegantly. The dancing-master can never teach a badly built man to walk well. The tint of the flower proceeds from its root, and the lustres of the sea-shell begin with its existence. Hence our taste in building rejects paint, and all shifts, and shows the original grain of the wood: refuses pilasters and columns that support nothing, and allows the real supporters of the house honestly to show themselves. Every necessary or organic action pleases the beholder. A man leading a horse to water, a farmer sowing seed, the labors of haymakers in the field, the carpenter building a ship, the smith at his forge, or, whatever useful labor, is becoming to the wise eye. But if it is done to be seen, it is mean. How beautiful are ships

on the sea! but ships in the theatre,—or ships kept for picturesque effect on Virginia Water, by George IV., and men hired to stand in fitting costumes at a penny an hour! —What a difference in effect between a battalion of troops marching to action, and one of our independent companies on a holiday! In the midst of a military show, and a festal procession gay with banners, I saw a boy seize an old tin pan that lay resting under a wall, and poising it on the top of a stick, he set it turning, and made it describe the most elegant imaginable curves, and drew away attention from the decorated procession by this startling beauty.

Another text from the mythologists. The Greeks fabled that Venus was born of the foam of the sea. Nothing interests us which is stark or bounded, but only what streams with life, what is in act or endeavor to reach somewhat beyond. The pleasure a palace or a temple gives the eye, is, that an order and method has been communicated to stones, so that they speak and geometrize, become tender or sublime with expression. Beauty is the moment of transition, as if the form were just ready to flow into other forms. Any fixedness, heaping, or concentration on one feature,—a long nose, a sharp chin, a hump-back,—is the reverse of the flowing, and therefore deformed. Beautiful as is the symmetry of any form, if the form can move, we seek a more excellent symmetry. The interruption of equilibrium stimulates the eye to desire the restoration of symmetry, and to watch the steps through which it is attained. This is the charm of running water, sea-waves, the flight of birds, and the locomotion of animals. This is the theory of dancing, to recover continually in changes the lost equilibrium, not by abrupt and angular, but by gradual and curving movements. I have been told by persons of experience in matters of taste, that the fashions follow a law of gradation, and are never arbitrary. The new mode is always only a step onward in the same direction as the last mode; and a cultivated eye is prepared for and predicts the new fashion. This fact suggests the reason of all mistakes and offence in our own modes. It is necessary in music, when you strike a discord, to let down the ear by an intermediate

note or two to the accord again: and many a good experiment, born of good sense, and destined to succeed, fails, only because it is offensively sudden. I suppose, the Parisian milliner who dresses the world from her imperious boudoir, will know how to reconcile the Bloomer costume to the eye of mankind, and make it triumphant over Punch himself, by interposing the just gradations. I need not say how wide the same law ranges; and how much it can be hoped to effect. All that is a little harshly claimed by progressive parties may easily come to be conceded without question, if this rule be observed. Thus the circumstances may be easily imagined, in which woman may speak, vote, argue causes, legislate, and drive a coach, and all the most naturally in the world, if only it come by degrees. To this streaming or flowing belongs the beauty that all circular movement has; as, the circulation of waters, the circulation of the blood, the periodical motion of planets, the annual wave of vegetation, the action and reaction of Nature; and, if we follow it out, this demand in our thought for an ever-onward action is the argument for the immortality.

One more text from the mythologists is to the same purpose,—*Beauty rides on a lion*. Beauty rests on necessities. The line of beauty is the result of perfect economy. The cell of the bee is built at that angle which gives the most strength with the least wax; the bone or the quill of the bird gives the most alar strength with the least weight. "It is the purgation of superfluities," said Michel Angelo. There is not a particle to spare in natural structures. There is a compelling reason in the uses of the plant, for every novelty of color or form: and our art saves material, by more skilful arrangement, and reaches beauty by taking every superfluous ounce that can be spared from a wall, and keeping all its strength in the poetry of columns. In rhetoric, this art of omission is a chief secret of power, and, in general, it is proof of high culture, to say the greatest matters in the simplest way.

Veracity first of all, and forever. *Rien de beau que le vrai*. In all design, art lies in making your object prominent, but there is a prior part in choosing objects that are prom-

inent. The fine arts have nothing casual, but spring from the instincts of the nations that created them.

Beauty is the quality which makes to endure. In a house that I know, I have noticed a block of spermaceti lying about closets and mantel-pieces, for twenty years together, simply because the tallow-man gave it the form of a rabbit; and, I suppose, it may continue to be lugged about unchanged for a century. Let an artist scrawl a few lines or figures on the back of a letter, and that scrap of paper is rescued from danger, is put in portfolio, is framed and glazed, and, in proportion to the beauty of the lines drawn, will be kept for centuries. Burns writes a copy of verses, and sends them to a newspaper, and the human race take charge of them that they shall not perish.

As the flute is heard farther than the cart, see how surely a beautiful form strikes the fancy of men, and is copied and reproduced without end. How many copies are there of the Belvedere Apollo, the Venus, the Psyche, the Warwick Vase, the Parthenon, and the Temple of Vesta? These are objects of tenderness to all. In our cities, an ugly building is soon removed, and is never repeated, but any beautiful building is copied and improved upon, so that all masons and carpenters work to repeat and preserve the agreeable forms, whilst the ugly ones die out.

The felicities of design in art, or in works of Nature, are shadows or forerunners of that beauty which reaches its perfection in the human form. All men are its lovers. Wherever it goes, it creates joy and hilarity, and everything is permitted to it. It reaches its height in woman. "To Eve," say the Mahometans, "God gave two thirds of all beauty." A beautiful woman is a practical poet, taming her savage mate, planting tenderness, hope, and eloquence in all whom she approaches. Some favors of condition must go with it, since a certain serenity is essential, but we love its reproofs and superiorities. Nature wishes that woman should attract man, yet she often cunningly moulds into her face a little sarcasm, which seems to say, "Yes, I am willing to attract, but to attract a little better kind of man than any I yet behold." French *mémoires* of the fifteenth

century celebrate the name of Pauline de Viguere, a virtuous and accomplished maiden, who so fired the enthusiasm of her contemporaries, by her enchanting form, that the citizens of her native city of Toulouse obtained the aid of the civil authorities to compel her to appear publicly on the balcony at least twice a week, and, as often as she showed herself, the crowd was dangerous to life. Not less, in England, in the last century, was the fame of the Gunnings, of whom Elizabeth married the Duke of Hamilton; and Maria, the Earl of Coventry. Walpole says: "The concourse was so great, when the Duchess of Hamilton was presented at court, on Friday, that even the noble crowd in the drawing-room clambered on chairs and tables to look at her. There are mobs at their doors to see them get into their chairs, and people go early to get places at the theatres, when it is known they will be there." "Such crowds," he adds, elsewhere, "flock to see the Duchess of Hamilton, that seven hundred people sat up all night, in and about an inn, in Yorkshire, to see her get into her post-chaise next morning."

But why need we console ourselves with the fames of Helen of Argos, or Corinna, or Pauline of Toulouse, or the Duchess of Hamilton? We all know this magic very well, or can divine it. It does not hurt weak eyes to look into beautiful eyes never so long. Women stand related to beautiful Nature around us, and the enamored youth mixes their form with moon and stars, with woods and waters, and the pomp of summer. They heal us of awkwardness by their words and looks. We observe their intellectual influence on the most serious student. They refine and clear his mind; teach him to put a pleasing method into what is dry and difficult. We talk to them and wish to be listened to; we fear to fatigue them, and acquire a facility of expression which passes from conversation into habit of style.

That Beauty is the normal state, is shown by the perpetual effort of Nature to attain it. Mirabeau had an ugly face on a handsome ground; and we see faces every day which have a good type, but have been marred in the casting: a proof that we are all entitled to beauty, should have been beautiful, if our ancestors had kept the laws,—as every lily

and every rose is well. But our bodies do not fit us, but caricature and satirize us. Thus, short legs, which constrain to short, mincing steps, are a kind of personal insult and contumely to the owner; and long stilts, again, put him at perpetual disadvantage, and force him to stoop to the general level of mankind. Martial ridicules a gentleman of his day whose countenance resembled the face of a swimmer seen under water. Saadi describes a schoolmaster "so ugly and crabbed, that a sight of him would derange the ecstasies of the orthodox." Faces are rarely true to any ideal type, but are a record in sculpture of a thousand anecdotes of whim and folly. Portrait painters say that most faces and forms are irregular and unsymmetrical; have one eye blue, and one gray; the nose not straight; and one shoulder higher than another; the hair unequally distributed, etc. The man is physically as well as metaphysically a thing of shreds and patches, borrowed unequally from good and bad ancestors, and a misfit from the start.

A beautiful person, among the Greeks, was thought to betray by this sign some secret favor of the immortal gods; and we can pardon pride, when a woman possesses such a figure, that wherever she stands, or moves, or throws a shadow on the wall, or sits for a portrait to the artist, she confers a favor on the world. And yet—it is not beauty that inspires the deepest passion. Beauty without grace is the hook without the bait. Beauty, without expression, tires. Abbé Ménage said of the President Le Bailleul, "that he was fit for nothing but to sit for his portrait." A Greek epigram intimates that the force of love is not shown by the courting of beauty, but when the like desire is inflamed for one who is ill-favored. And petulant old gentlemen, who have chanced to suffer some intolerable weariness from pretty people, or who have seen cut flowers to some profusion, or who see, after a world of pains have been successfully taken for the costume, how the least mistake in sentiment takes all the beauty out of your clothes,—affirm, that the secret of ugliness consists not in irregularity, but in being uninteresting.

We love any forms, however ugly, from which great qual-

ities shine. If command, eloquence, art, or invention exist in the most deformed person, all the accidents that usually displease, please, and raise esteem and wonder higher. The great orator was an emaciated, insignificant person, but he was all brain. Cardinal De Retz says of De Bouillon, "With the physiognomy of an ox, he had the perspicacity of an eagle." It was said of Hooke, the friend of Newton, "He is the most, and promises the least, of any man in England." "Since I am so ugly," said Du Guesclin, "it behooves that I be bold." Sir Philip Sidney, the darling of mankind, Ben Jonson tells us, "was no pleasant man in countenance, his face being spoiled with pimples, and of high blood, and long." Those who have ruled human destinies, like planets, for thousands of years, were not handsome men. If a man can raise a small city to be a great kingdom, can make bread cheap, can irrigate deserts, can join oceans by canals, can subdue steam, can organize victory, can lead the opinions of mankind, can enlarge knowledge, 't is no matter whether his nose is parallel to his spine, as it ought to be, or whether he has a nose at all; whether his legs are straight, or whether his legs are amputated; his deformities will come to be reckoned ornamental and advantageous on the whole. This is the triumph of expression. degrading beauty, charming us with a power so fine and friendly and intoxicating, that it makes admired persons insipid, and the thought of passing our lives with them insupportable. There are faces so fluid with expression, so flushed and rippled by the play of thought, that we can hardly find what the mere features really are. When the delicious beauty of lineaments loses its power, it is because a more delicious beauty has appeared; that an interior and durable form has been disclosed. Still, Beauty rides on her lion, as before. Still, "it was for beauty that the world was made." The lives of the Italian artists, who established a despotism of genius amidst the dukes and kings and mobs of their stormy epoch, prove how loyal men in all times are to a finer brain, a finer method, than their own. If a man can cut such a head on his stone gate-post as shall draw and keep a crowd about it all day, by its grace, good-nature, and inscrutable meaning;—if a man can

build a plain cottage with such symmetry, as to make all the fine palaces look cheap and vulgar; can take such advantage of Nature that all her powers serve him; making use of geometry, instead of expense; tapping a mountain for his water-jet; causing the sun and moon to seem only the decorations of his estate; this is still the legitimate dominion of beauty.

The radiance of the human form, though sometimes astonishing, is only a burst of beauty for a few years or a few months, at the perfection of youth, and in most, rapidly declines. But we remain lovers of it, only transferring our interest to interior excellence. And it is not only admirable in singular and salient talents, but also in the world of manners.

But the sovereign attribute remains to be noted. Things are pretty, graceful, rich, elegant, handsome, but, until they speak to the imagination, not yet beautiful. This is the reason why beauty is still escaping out of all analysis. It is not yet possessed, it cannot be handled. Proclus says, "It swims on the light of forms." It is properly not in the form, but in the mind. It instantly deserts possession, and flies to an object in the horizon. If I could put my hand on the north star, would it be as beautiful? The sea is lovely, but when we bathe in it, the beauty forsakes all the near water. For the imagination and senses cannot be gratified at the same time. Wordsworth rightly speaks of "a light that never was on sea or land," meaning, that it was supplied by the observer, and the Welsh bard warns his countrywomen, that

"Half of their charms with Cadwallon shall die."

The new virtue which constitutes a thing beautiful is a certain cosmical quality, or, a power to suggest relation to the whole world, and so lift the object out of a pitiful individuality. Every natural feature—sea, sky, rainbow, flowers, musical tone—has in it somewhat which is not private, but universal, speaks of that central benefit which is the soul of Nature, and thereby is beautiful. And, in chosen men and women, I find somewhat in form, speech, and

manners, which is not of their person and family, but of a humane, catholic, and spiritual character, and we love them as the sky. They have a largeness of suggestion, and their face and manners carry a certain grandeur, like time and justice.

The feat of the imagination is in showing the convertibility of everything into every other thing. Facts which had never before left their stark common sense suddenly figure as Eleusinian mysteries. My boots and chair and candlestick are fairies in disguise, meteors and constellations. All the facts in Nature are nouns of the intellect, and make the grammar of the eternal language. Every word has a double, treble, or centuple use and meaning. What! has my stove and pepper-pot a false bottom! I cry you mercy, good shoe-box! I did not know you were a jewel-case. Chaff and dust begin to sparkle, and are clothed about with immortality. And there is a joy in perceiving the representative or symbolic character of a fact, which no bare fact or event can ever give. There are no days in life so memorable as those which vibrated to some stroke of the imagination.

The poets are quite right in decking their mistresses with the spoils of the landscape, flower-gardens, gems, rainbows, flushes of morning, and stars of night, since all beauty points at identity, and whatsoever thing does not express to me the sea and sky, day and night, is somewhat forbidden and wrong. Into every beautiful object there enters somewhat immeasurable and divine, and just as much into form bounded by outlines, like mountains on the horizon, as into tones of music, or depths of space. Polarized light showed the secret architecture of bodies; and when the *second-sight* of the mind is opened, now one color or form or gesture, and now another, has a pungency, as if a more interior ray had been emitted, disclosing its deep holdings in the frame of things.

The laws of this translation we do not know, or why one feature or gesture enchants, why one word or syllable intoxicates, but the fact is familiar that the fine touch of the eye, or a grace of manners, or a phrase of poetry, plants wings at our shoulders; as if the Divinity, in his approaches,

lifts away mountains of obstruction, and deigns to draw a truer line which the mind knows and owns. This is that haughty force of beauty, "*vis superba formæ*," which the poets praise,—under calm and precise outline, the immeasurable and divine Beauty hiding all wisdom and power in its calm sky.

All high beauty has a moral element in it, and I find the antique sculpture as ethical as Marcus Antoninus: and the beauty ever in proportion to the depth of thought. Gross and obscure natures, however decorated, seem impure shambles; but character gives splendor to youth, and awe to wrinkled skin and gray hairs. An adorer of truth we can not choose but obey, and the woman who has shared with us the moral sentiment,—her locks must appear to us sublime. Thus there is a climbing scale of culture, from the first agreeable sensation which a sparkling gem or a scarlet stain affords the eye, up through fair outlines and details of the landscape, features of the human face and form, signs and tokens of thought and character in manners, up to the ineffable mysteries of the intellect. Wherever we begin, thither our steps tend: an ascent from the joy of a horse in his trappings, up to the perception of Newton, that the globe on which we ride is only a larger apple falling from a larger tree; up to the perception of Plato, that globe and universe are rude and early expressions of an all-dissolving Unity,—the first stair on the scale to the temple of the Mind.

## XV

### THE AMERICAN SCHOLAR

*An Oration delivered before the Phi Beta Kappa Society,  
at Cambridge, August 31, 1837*

MR. PRESIDENT AND GENTLEMEN,

I GREET you on the re-commencement of our literary year. Our anniversary is one of hope, and, perhaps, not enough of labor. We do not meet for games of strength or skill, for the recitation of histories, tragedies, and odes, like the ancient Greeks; for parliaments of love and poesy, like the Troubadours; nor for the advancement of science, like our contemporaries in the British and European capitals. Thus far, our holiday has been simply a friendly sign of the survival of the love of letters amongst a people too busy to give to letters any more. As such, it is precious as the sign of an indestructible instinct. Perhaps the time is already come, when it ought to be, and will be something else; when the sluggard intellect of this continent will look from under its iron lids, and fill the postponed expectation of the world with something better than the exertions of mechanical skill. Our day of dependence, our long apprenticeship to the learning of other lands, draws to a close. The millions, that around us are rushing into life, cannot always be fed on the sere remains of foreign harvests. Events, actions arise, that must be sung, that will sing themselves. Who can doubt, that poetry will revive and lead in a new age, as the star in the constellation Harp, which now flames in our zenith, astronomers announce, shall one day be the pole-star for a thousand years?

In this hope, I accept the topic which not only usage, but the nature of our association, seem to prescribe to this day

—the American Scholar. Year by year, we come up hither to read one more chapter of his biography. Let us inquire what light new days and events have thrown on his character, and his hopes.

It is one of those fables, which, out of an unknown antiquity, convey an unlooked-for wisdom, that the gods, in the beginning, divided Man into men, that he might be more helpful to himself; just as the hand was divided into fingers, the better to answer its end.

The old fable covers a doctrine ever new and sublime; that there is One Man,—present to all particular men only partially, or through one faculty; and that you must take the whole society to find the whole man. Man is not a farmer, or professor, or an engineer, but he is all. Man is priest, and scholar, and statesman, and producer, and soldier. In the *divided* or social state, these functions are parcelled out to individuals, each of whom aims to do his stint of the joint work, whilst each other performs his. The fable implies, that the individual, to possess himself, must sometimes return from his own labor to embrace all the other laborers. But unfortunately, this original unit, this fountain of power, has been so distributed to multitudes, has been so minutely subdivided and peddled out, that it is spilled into drops, and cannot be gathered. The state of society is one in which the members have suffered amputation from the trunk, and strut about so many walking monsters,—a good finger, a neck, a stomach, an elbow, but never a man.

Man is thus metamorphosed into a thing, into many things. The planter, who is Man sent out into the field to gather food, is seldom cheered by any idea of the true dignity of his ministry. He sees his bushel and his cart, and nothing beyond, and sinks into the farmer, instead of Man on the farm. The tradesman scarcely ever gives an ideal worth to his work, but is ridden by the routine of his craft, and the soul is subject to dollars. The priest becomes a form; the attorney, a statute-book; the mechanic, a machine; the sailor, a rope of a ship.

In this distribution of functions, the scholar is the dele-

gated intellect. In the right state, he is *Man Thinking*. In the degenerate state, when the victim of society, he tends to become a mere thinker, or, still worse, the parrot of other men's thinking.

In this view of him, as *Man Thinking*, the theory of his office is contained. His nature solicits with all her placid, all her monitory pictures; him the past instructs; him the future invites. Is not, indeed, every man a student, and do not all things exist for the student's behoof? And, finally, is not the true scholar the only true master? But the old oracle said, "All things have two handles: beware of the wrong one." In life, too often, the scholar errs with mankind and forfeits his privilege. Let us see him in his school, and consider him in reference to the main influences he receives.

I. The first in time and first in importance of the influences upon the mind is of that nature. Every day, the sun; and, after sunset, night and her stars. Ever the winds blow; ever the grass grows. Every day, men and women, conversing, beholding and beholden. The scholar is he of all men whom this spectacle most engages. He must settle its value in his mind. What is nature to him? There is never a beginning, there is never an end, to the inexplicable continuity of this web of God, but always circular power returning into itself. Therein it resembles his own spirit, whose beginning, whose ending, he never can find,—so entire, so boundless. Far, too, as her splendors shine, system on system shooting like rays, upward, downward, without center, without circumference,—in the mass and in the particle, nature hastens to render account of herself to the mind. Classification begins. To the young mind, every thing in individuals, stands by itself. By and by, it finds how to join two things, and see in them one nature; then three, then three thousand; and so, tyrannized over by its own unifying instinct, it goes on tying things together, diminishing anomalies, discovering roots running under ground, whereby contrary and remote things cohere, and flower out from one stem. It presently learns, that, since the dawn of history, there has been a constant accumulation and clas-

sifying of facts. But what is classification but the perceiving that these objects are not chaotic, and are not foreign, but have a law which is also a law of the human mind? The astronomer discovers that geometry, a pure abstraction of the human mind, is the measure of planetary motion. The chemist finds proportions and intelligible method throughout matter; and science is nothing but the finding of analogy, identity, in the most remote parts. The ambitious soul sits down before each refractory fact; one after another, reduces all strange constitutions, all new powers, to their class and their law, and goes on for ever to animate the last fibre of organization, the outskirts of nature, by insight.

Thus to him, to this school-boy under the bending dome of day, is suggested, that he and it proceed from one root; one is leaf and one is flower; relation, sympathy, stirring in every vein. And what is that Root? Is not that the soul of his soul?—A thought too bold,—a dream too wild. Yet when this spiritual light shall have revealed the law of more earthly natures,—when he has learned to worship the soul, and to see that the natural philosophy that now is, is only the first gropings of its gigantic hand, he shall look forward to an ever expanding knowledge as to a becoming creator. He shall see, that nature is the opposite of the soul, answering to it part for part. One is seal, and one is print. Its beauty is the beauty of his own mind. Its laws are the laws of his own mind. Nature then becomes to him the measure of his attainments. So much of nature as he is ignorant of, so much of his own mind does he not yet possess. And, in fine, the ancient precept, “Know thyself,” and the modern precept, “Study nature,” become at last the one maxim.

II. The next great influence into the spirit of the scholar, is, the mind of the Past,—in whatever form, whether of literature, of art, of institutions, that mind is inscribed. Books are the best type of the influence of the past, and perhaps we shall get at the truth,—learn the amount of this influence more conveniently,—by considering their value alone.

The theory of books is noble. The scholar of the first age received into him the world around; brooded thereon; gave it the new arrangement of his own mind, and uttered it again. It came into him, life; it went out from him, truth. It came to him, short-lived actions; it went out from him, immortal thoughts. It came to him, business; it went from him poetry. It was dead fact; now, it is quick thought. It can stand, and it can go. It now endures, it now flies, it now inspires. Precisely in proportion to the depth of mind from which it issued, so high does it soar, so long does it sing.

Or, I might say, it depends on how far the process had gone, of transmuting life into truth. In proportion to the completeness of the distillation, so will the purity and imperishableness of the product be. But none is quite perfect. As no air-pump can by any means make a perfect vacuum, so neither can any artist entirely exclude the conventional, the local, the perishable, from his book, or write a book of pure thought, that shall be as efficient, in all respects, to a remote posterity, as to contemporaries, or rather to the second age. Each age, it is found, must write its own books; or rather, each generation for the next succeeding. The books of an older period will not fit this.

Yet hence arises a grave mischief. The sacredness which attaches to the act of creation,—the act of thought,—is transferred to the record. The poet chanting, was felt to be a divine man: henceforth the chant is divine also. The writer was a just and wise spirit; henceforward it is settled, the book is perfect; as love of the hero corrupts into worship of his statue. Instantly, the book becomes noxious: the guide is a tyrant. The sluggish and perverted mind of the multitude, slow to open to the incursions of Reason, having once so opened, having once received this book, stands upon it, and makes an outcry, if it is disparaged. Colleges are built on it. Books are written on it by thinkers, not by Man Thinking; by men of talent, that is, who start wrong, who set out from accepted dogmas, not from their own sight of principles. Meek young men grow up in libraries, believing it their duty to accept the views, which Cicero, which Locke, which Bacon, have given, forgetful

that Cicero, Locke and Bacon were only young men in libraries, when they wrote these books.

Hence, instead of Man Thinking, we have the bookworm. Hence, the book-learned class, who value books, as such; not as related to nature and the human constitution, but as making a sort of Third Estate with the world and the soul. Hence, the restorers of readings, the emendators, the bibliomaniacs of all degrees.

Books are the best of things, well used; abused, among the worst. What is the right use? What is the one end, which all means go to effect? They are for nothing but to inspire. I had better never see a book, than to be warped by its attraction clean out of my own orbit, and made a satellite instead of a system. The one thing in the world, of value, is the active soul. This every man is entitled to; this every man contains within him, although, in almost all men, obstructed, and as yet unborn. The soul active sees absolute truth; and utters truth, or creates. In this action, it is genius; not the privilege of here and there a favorite, but the sound estate of every man. In its essence, it is progressive. The book, the college, the school of art, the institution of any kind, stop with some past utterance of genius. This is good, say they,—let us hold by this. They pin me down. They look backward and not forward. But genius looks forward: the eyes of man are set in his forehead: not in his hindhead: man hopes: genius creates. Whatever talents may be, if the man create not, the pure efflux of the Deity is not his;—cinders and smoke there may be, but not yet flame. There are creative manners, there are creative actions, and creative words; manners, actions, words, that is, indicative of no custom or authority, but springing spontaneous from the mind's own sense of good and fair.

On the other part, instead of being its own seer, let it receive from another mind its truth, though it were in torrents of light, without periods of solitude, inquest, and self-recovery, and a fatal disservice is done. Genius is always sufficiently the enemy of genius by over influence. The literature of every nation bear me witness. The English

dramatic poets have Shakspearized now for two hundred years.

Undoubtedly there is a right way of reading, so it be sternly subordinated. Man Thinking must not be subdued by his instruments. Books are for the scholar's idle times. When he can read God directly, the hour is too precious to be wasted in other men's transcripts of their readings. But when the intervals of darkness come, as come they must, when the sun is hid, and the stars withdraw their shining,—we repair to the lamps which were kindled by their ray, to guide our steps to the East again, where the dawn is. We hear, then we may speak. The Arabian proverb says, "A fig tree, looking on a fig tree, becometh fruitful."

It is remarkable, the character of the pleasure we derive from the best books. They impress us with the conviction, that one nature wrote and the same reads. We read the verses of one of the great English poets, of Chaucer, of Marvell, of Dryden, with the most modern joy,—with a pleasure, I mean, which is in great part caused by the abstraction of all *time* from their verses. There is some awe mixed with the joy of our surprise, when this poet, who lived in some past world, two or three hundred years ago, says that which lies close to my own soul, that which I also had wellnigh thought and said. But for the evidence thence afforded to the philosophical doctrine of the identity of all minds, we should suppose some preëstablished harmony, some foresight of souls that were to be, and some preparation of stores for their future wants, like the fact observed in insects, who lay up food before death for the young grub they shall never see.

I would not be hurried by any love of system, by any exaggeration of instincts, to underrate the Book. We all know, that, as the human body can be nourished on any food, though it were boiled grass and the broth of shoes, so the human mind can be fed by any knowledge. And great and heroic men have existed, who had almost no other information than by the printed page. I only would say, that it needs a strong head to bear that diet. One must be an inventor to read well. As the proverb says, "He that

would bring home the wealth of the Indies, must carry out the wealth of the Indies." There is then creative reading as well as creative writing. When the mind is braced by labor and invention, the page of whatever book we read becomes luminous with manifold allusion. Every sentence is doubly significant, and the sense of our author is as broad as the world. We then see, what is always true, that, as the seer's hour of vision is short and rare among heavy days and months, so is its record, perchance, the least part of his volume. The discerning will read, in his Plato or Shakspeare, only that least part,—only the authentic utterances of the oracle;—all the rest he rejects, were it never so many times Plato's and Shakspeare's.

Of course, there is a portion of reading quite indispensable to a wise man. History and exact science he must learn by laborious reading. Colleges, in like manner, have their indispensable office,—to teach elements. But they can only highly serve us, when they aim not to drill, but to create; when they gather from far every ray of various genius to their hospitable halls, and, by the concentrated fires, set the hearts of their youth on flame. Thought and knowledge are natures in which apparatus and pretension avail nothing. Gowns, and pecuniary foundations, though of towns of gold, can never countervail the least sentence or syllable of wit. Forget this, and our American colleges will recede in their public importance, whilst they grow rich every year.

III. There goes in the world a notion, that the scholar should be a recluse, a valetudinarian,—as unfit for any handiwork or public labor, as a penknife for an axe. The so-called "practical men" sneer at speculative men, as if, because they speculate or *see*, they could do nothing. I have heard it said that the clergy,—who are always, more universally than any other class, the scholars of their day,—are addressed as women; that the rough, spontaneous conversation of men they do not hear, but only a mincing and diluted speech. They are often virtually disfranchised; and, indeed, there are advocates for their celibacy. As far as this is true of the studious classes, it is not just and wise. Action

is with the scholar subordinate, but it is essential. Without it, he is not yet man. Without it, thought can never ripen into truth. Whilst the world hangs before the eye as a cloud of beauty, we cannot even see its beauty. Inaction is cowardice, but there can be no scholar without the heroic mind. The preamble of thought, the transition through which it passes from the unconscious to the conscious, is action. Only so much do I know, as I have lived. Instantly we know whose words are loaded with life, and whose not.

The world,—this shadow of the soul, or *other me*, lies wide around. Its attractions are the keys which unlock my thoughts and make me acquainted with myself. I run eagerly into this resounding tumult. I grasp the hands of those next me, and take my place in the ring to suffer and to work, taught by an instinct, that so shall the dumb abyss be vocal with speech. I pierce its order; I dissipate its fear; I dispose of it within the circuit of my expanding life. So much only of life as I know by experience, so much of the wilderness have I vanquished and planted, or so far have I extended my being, my dominion. I do not see how any man can afford, for the sake of his nerves and his nap, to spare any action in which he can partake. It is pearls and rubies to his discourse. Drudgery, calamity, exasperation, want, are instructors in eloquence and wisdom. The true scholar grudges every opportunity of action past by, as a loss of power.

It is the raw material out of which the intellect moulds her splendid products. A strange process too, this, by which experience is converted into thought, as a mulberry leaf is converted into satin. The manufacture goes forward at all hours.

The actions and events of our childhood and youth, are now matters of calmest observation. They lie like fair pictures in the air. Not so with our recent actions,—with the business which we now have in hand. On this we are quite unable to speculate. Our affections as yet circulate through it. We no more feel or know it, than we feel the feet, or the hand, or the brain of our body. The new deed is yet a part of life,—remains for a time immersed in our unconscious life. In some contemplative hour, it detaches

itself from the life like a ripe fruit, to become a thought of the mind. Instantly, it is raised, transfigured; the corruptible has put on incorruption. Henceforth it is an object of beauty, however base its origin and neighborhood. Observe, too, the impossibility of antedating this act. In its grub state, it cannot fly, it cannot shine, it is a dull grub. But suddenly, without observation, the selfsame thing unfurls beautiful wings, and is an angel of wisdom. So is there no fact, no event in our private history, which shall not, sooner or later, lose its adhesive, inert form, and astonish us by soaring from our body into the empyrean. Cradle and infancy, school and playground, the fear of boys, and dogs, and ferules, the love of little maids and berries, and many another fact that once filled the whole sky, are gone already; friend and relative, profession and party, town and country, nation and world, must also soar and sing.

Of course, he who has put forth his total strength in fit actions, has the richest return of wisdom. I will not shut myself out of this globe of action, and transplant an oak into a flower-pot, there to hunger and pine; nor trust the revenue of some single faculty, and exhaust one vein of thought, much like those Savoyards, who, getting their livelihood by carving shepherds, shepherdesses, and smoking Dutchmen, for all Europe, went out one day to the mountain to find stock, and discovered that they had whittled up the last of their pine-trees. Authors we have, in numbers, who have written out their vein, and who, moved by a commendable prudence, sail for Greece or Palestine, follow the trapper into the prairie, or ramble round Algiers, to replenish their merchantable stock.

If it were only for a vocabulary, the scholar would be covetous of action. Life is our dictionary. Years are well spent in country labors; in town,—in the insight into trades and manufactures; in frank intercourse with many men and women; in science; in art; to the one end of mastering in all their facts a language by which to illustrate and embody our perceptions. I learn immediately from any speaker how much he has already lived, through the poverty or the splendor of his speech. Life lies behind us as the quarry

from whence we get tiles and copestones for the masonry of to-day. This is the way to learn grammar. Colleges and books only copy the language which the field and the work-yard made.

But the final value of action, like that of books, and better than books, is, that it is a resource. That great principle of Undulation in nature, that shows itself in the inspiring and expiring of the breath; in desire and satiety; in the ebb and flow of the sea; in day and night; in heat and cold; and as yet more deeply ingrained in every atom and every fluid, is known to us under the name of Polarity,—these “fits of easy transmission and reflection,” as Newton called them, are the law of nature because they are the law of spirit.

The mind now thinks; now acts; and each fit reproduces the other. When the artist has exhausted his materials, when the fancy no longer paints, when thoughts are no longer apprehended, and books are a weariness,—he has always the resource *to live*. Character is higher than intellect. Thinking is the function. Living is the functionary. The stream retreats to its source. A great soul will be strong to live, as well as strong to think. Does he lack organ or medium to impart his truths? He can still fall back on this elemental force of living them. This is a total act. Thinking is a partial act. Let the grandeur of justice shine in his affairs. Let the beauty of affection cheer his lowly roof. Those “far from fame,” who dwell and act with him, will feel the force of his constitution in the doings and passages of the day better than it can be measured by any public and designed display. Time shall teach him, that the scholar loses no hour which the man lives. Herein he unfolds the sacred germ of his instinct, screened from influence. What is lost in seemliness is gained in strength. Not out of those, on whom systems of education have exhausted their culture, comes the helpful giant to destroy the old or to build the new, but out of unhandselled savage nature, out of terrible Druids and berserkirs, come at last Alfred and Shakspeare.

I hear therefore with joy whatever is beginning to be said of the dignity and necessity of labor to every citizen. There is

virtue yet in the hoe and the spade, for learned as well as for unlearned hands. And labor is everywhere welcome; always we are invited to work; only be this limitation observed, that a man shall not for the sake of wider activity sacrifice any opinion to the popular judgments and modes of action.

I have now spoken of the education of the scholar by nature, by books, and by action. It remains to say somewhat of his duties.

They are such as become Man Thinking. They may all be comprised in self-trust. The office of the scholar is to cheer, to raise, and to guide men by showing them facts amidst appearances. He plies the slow, unhonored, and unpaid task of observation. Flamsteed and Herschel, in their glazed observatories, may catalogue the stars with the praise of all men, and, the results being splendid and useful, honor is sure. But he, in his private observatory, cataloguing obscure and nebulous stars of the human mind, which as yet no man has thought of as such,—watching days and months, sometimes, for a few facts; correcting still his old records;—must relinquish display and immediate fame. In the long period of his preparation, he must betray often an ignorance and shiftlessness in popular arts, incurring the disdain of the able who shoulder him aside. Long he must stammer in his speech; often forego the living for the dead. Worse yet, he must accept,—how often! poverty and solitude. For the ease and pleasure of treading the old road, accepting the fashions, the education, the religion of society, he takes the cross of making his own, and of course, the self-accusation, the faint heart, the frequent uncertainty and loss of time, which are the nettles and tangling vines in the way of the self-relying and self-directed; and the state of virtual hostility in which he seems to stand to society, and especially to educated society. For all this loss and scorn, what offset? He is to find consolation in exercising the highest functions of human nature. He is one, who raises himself from private considerations, and breathes and lives on public and illustrious thoughts. He is the world's eye. He is the world's heart. He is to resist the vulgar prosperity that retrogrades ever

to barbarism, by preserving and communicating heroic sentiments, noble biographies, melodious verse, and the conclusions of history. Whatsoever oracles the human heart, in all emergencies, in all solemn hours, has uttered as its commentary on the world of actions,—these he shall receive and impart. And whatsoever new verdict Reason from her inviolable seat pronounces on the passing men and events of to-day—this he shall hear and promulgate.

These being his functions, it becomes him to feel all confidence in himself, and to defer never to the popular cry. He and he only knows the world. The world of any moment is the merest appearance. Some great decorum, some fetish of a government, some ephemeral trade, or war, or man, is cried up by half mankind and cried down by the other half, as if all depended on this particular up or down. The odds are that the whole question is not worth the poorest thought which the scholar has lost in listening to the controversy. Let him not quit his belief that a popgun is a popgun, though the ancient and honorable of the earth affirm it to be the crack of doom. In silence, in steadiness, in severe abstraction, let him hold by himself; add observation to observation, patient of neglect, patient of reproach; and bide his own time,—happy enough, if he can satisfy himself alone, that this day he has seen something truly. Success treads on every right step. For the instinct is sure, that prompts him to tell his brother what he thinks. He then learns, that in going down into the secrets of his own mind, he has descended into the secrets of all minds. He learns that he who has mastered any law in his private thoughts, is master to that extent of all men whose language he speaks, and of all into whose language his own can be translated. The poet, in utter solitude remembering his spontaneous thoughts and recording them, is found to have recorded that, which men in crowded cities find true for themselves also. The orator distrusts at first the fitness of his frank confessions,—his want of knowledge of the persons he addresses,—until he finds that he is the complement of his hearers;—that they drink his words because he fulfils for them their own nature; the deeper he dives into his privatest

secretest presentiment, to his wonder he finds, this is the most acceptable, most public, and universally true. The people delight in it; the better part of every man feels, This is my music; this is myself.

In self-trust, all the virtues are comprehended. Free should the scholar be,—free and brave. Free even to the definition of freedom, “without any hindrance that does not arise out of his own constitution.” Brave; for fear is a thing, which a scholar by his very function puts behind him. Fear always springs from ignorance. It is a shame to him if his tranquillity, amid dangerous times, arise from the presumption, that, like children and women, his is a protected class; or if he seek a temporary peace by the diversion of his thoughts from politics or vexed questions, hiding his head like an ostrich in the flowering bushes, peeping into microscopes, and turning rhymes, as a boy whistles to keep his courage up. So is the danger a danger still; so is the fear worse. Manlike let him turn and face it. Let him look into its eye and search its nature, inspect its origin,—see the whelping of this lion, which lies no great way back; he will then find in himself a perfect comprehension of its nature and extent; he will have made his hands meet on the other side, and can henceforth defy it, and pass on superior. The world is his, who can see through its pretension. What deafness, what stone-blind custom, what overgrown error you behold, is there only by sufferance,—by your sufferance. See it to be a lie, and you have already dealt it its mortal blow.

Yes, we are the cowed,—we the trustless. It is a mischievous notion that we are come late into nature; that the world was finished a long time ago. As the world was plastic and fluid in the hands of God, so it is ever to so much of his attributes as we bring to it. To ignorance and sin, it is flint. They adapt themselves to it as they may; but in proportion as a man has any thing in him divine, the firmament flows before him and takes his signet and form. Not he is great who can alter matter, but he who can alter my state of mind. They are the kings of the world who give the color of their present thought to all nature and all art and persuade men by the cheerful serenity of their carrying

the matter, that this thing which they do, is the apple which the ages have desired to pluck, now at last ripe, and inviting nations to the harvest. The great man makes the great thing. Wherever Macdonald sits, there is the head of the table. Linnæus makes botany the most alluring of studies, and wins it from the farmer and the herd-woman; Davy, chemistry; and Cuvier, fossils. The day is always his, who works in it with serenity and great aims. The unstable estimates of men crowd to him whose mind is filled with a truth, as the heaped waves of the Atlantic follow the moon. For this self-trust, the reason is deeper than can be fathomed,—darker than can be enlightened. I might not worry with me the feeling of my audience in stating my own belief. But I have already shown the ground of my hope, adverting to the doctrine that man is one. I believe man has been wronged; he has wronged himself. He has almost lost the light, that can lead him back to his prerogatives. Men are become of no account. Men in history, men in the world of to-day are bugs, are spawn, and are called "the mass" and "the herd." In a century, in a millennium, one or two men; that is to say,—one or two approximations to the right state of every man. All the rest behold in the hero or the poet their own green and crude being,—ripened, less, and are content to be less, so *that* may attain to its full nature. What a testimony,—full of grandeur, full of pity, borne to the demands of his own nature, by the poor clansman, the poor partisan, who rejoices in the glory of his chief. The poor and the low find some amends to their immense moral capacity, for their acquiescence in a political and social inferiority. They are content to be brushed like flies from the path of a great person, so that justice shall be done by him to that common nature which it is the dearest desire of all to see enlarged and glorified. They sun themselves in the great man's light, and feel it to be their own element. They cast the dignity of man from their downward selves upon the shoulders of a hero, and will perish to add one drop of blood to make that great heart beat, those sinews combat and conquer. He lives for us, and we live in him.

Men such as they are, very naturally seek money or power; and power because it is as good as money,—the “spoils,” so called, “of office.” And why not? for they aspire to the highest, and this, in their sleep-walking, they dream is highest. Wake them, and they shall quit the false good, and leap to the true, and leave governments to clerks and desks. This revolution is to be wrought by the gradual domestication of the idea of Culture. The main enterprise of the world for splendor, for extent, is the upbuilding of a man. Here are the materials strown along the ground. The private life of one man shall be a more illustrious monarchy, —more formidable to its enemy, more sweet and serene in its influence to its friend, than any kingdom in history. For a man, rightly viewed, comprehendeth the particular natures, of all men. Each philosopher, each bard, each actor, has only done for me, as by a delegate, what one day I can do for myself. The books which once we valued more than the apple of the eye, we have quite exhausted. What is that but saying, that we have come up with the point of view which the universal mind took through the eyes of one scribe; we have been that man, and have passed on. First, one; then, another; we drain all cisterns, and waxing greater by all these supplies, we crave a better and more abundant food. The man has never lived that can feed us ever. The human mind cannot be enshrined in a person, who shall set a barrier on any one side to this unbounded, unboundable empire. It is one central fire, which, flaming now out of the lips of Etna, lightens the capes of Sicily; and, now out of the throat of Vesuvius, illuminates the towers and vineyards of Naples. It is one light which beams out of a thousand stars. It is one soul which animates all men.

But I have dwelt perhaps tediously upon this abstraction of the Scholar. I ought not to delay longer to add what I have to say, of nearer reference to the time and to this country.

Historically, there is thought to be a difference in the ideas which predominate over successive epochs, and there are data for marking the genius of the Classic, of the Ro-

romantic, and now of the Reflective or Philosophical age. With the views I have intimated of the oneness or the identity of the mind through all individuals, I do not much dwell on these differences. In fact, I believe each individual passes through all three. The boy is a Greek; the youth, romantic; the adult, reflective. I deny not, however, that a revolution in the leading idea may be distinctly enough traced.

Our age is bewailed as the age of Introversion. Must that needs be evil? We, it seems, are critical; we are embarrassed with second thoughts; we cannot enjoy anything or hankering to know whereof the pleasure consists; we are veiled with eyes; we see with our feet; the time is infected with Hamlet's unhappiness,—

"Sicklied o'er with the pale cast of thought."

Is it so bad then? Sight is the last thing to be pitied. Would we be blind? Do we fear lest we should outsee nature and God, and drink truth dry? I look upon the discontent of the literary class, as a mere announcement of the fact, that they find themselves not in the state of mind of their fathers, and regret the coming state as untried; as a boy dreads the water before he has learned that he can swim. If there is any period one would desire to be born in, is it not the age of Revolution; when the old and the new stand side by side, and admit of being compared; when the energies of all men are searched by fear and by hope; when the historic glories of the old can be compensated by the possibilities of the new era? This time, like all times, is a very good one, if we but know what to do with it.

I read with joy some of the auspicious signs of the coming days, as they glimmer already through poetry and art, through philosophy and science, through church and state. One of these signs is the fact, that the same movement which effected the elevation of what was called the lowest class in the state, assumed in literature a very marked and benign an aspect. Instead of the sublime and beautiful; the near, the low, the common, was explored and poetized. That, which had been negligently trodden under foot by those who were harnessing and provisioning themselves for

long journeys into far countries, is suddenly found to be richer than all foreign parts. The literature of the poor, the feelings of the child, the philosophy of the street, the meaning of household life, are the topics of the time. It is a great stride. It is a sign—is it not? of new vigor, when the extremities are made active, when currents of warm life run into the hands and the feet. I ask not for the great, the remote, the romantic; what is doing in Italy or Arabia; what is Greek art, or Provençal minstrelsy; I embrace the common, I explore and sit at the feet of the familiar, the low. Give me insight into to-day, and you may have the antique and future worlds. What would we really know the meaning of? The meal in the firkin; the milk in the pan; the ballad in the street; the news of the boat; the glance of the eye; the form and the gait of the body;—show me the ultimate reason of these matters; show me the sublime presence of the highest spiritual cause lurking, as always it does lurk, in these suburbs and extremities of nature; let me see every trifle bristling with the polarity that ranges it instantly on an eternal law; and the shop, the plough, and the ledger, referred to the like cause by which light undulates and poets sing;—and the world lies no longer a dull miscellany and lumber-room, but has form and order; there is no trifle; there is no puzzle; but one design unites and animates the farthest pinnacle and the lowest trench.

This idea has inspired the genius of Goldsmith, Burns, Cowper, and, in a newer time, of Goethe, Wordsworth, and Carlyle. This idea they have differently followed and with various success. In contrast with their writing, the style of Pope, of Johnson, of Gibbon, looks cold and pedantic. This writing is blood-warm. Man is surprised to find that things near are not less beautiful and wondrous than things remote. The near explains the far. The drop is a small ocean. A man is related to all nature. This perception of the worth of the vulgar is fruitful in discoveries. Goethe, in this very thing the most modern of the moderns, has shown us, as none ever did, the genius of the ancients.

There is one man of genius, who has done much for this philosophy of life, whose literary value has never yet been

rightly estimated;—I mean Emanuel Swedenborg. The most imaginative of men, yet writing with the precision of a mathematician, he endeavored to engraft a purely philosophical Ethics on the popular Christianity of his time. Such an attempt, of course, must have difficulty, which no genius could surmount. But he saw and showed the connection between nature and the affections of the soul. He pierced the emblematic or spiritual character of the visible, audible, tangible world. Especially did his shade-loving muse hover over and interpret the lower parts of nature; he showed the mysterious bond that allies moral evil to the foul material forms, and has given in epical parables a theory of insanity, of beast, of unclean and fearful things.

Another sign of our times, also marked by an analogous political movement, is, the new importance given to the single person. Everything that tends to insulate the individual,—to surround him with barriers of natural respect, so that each man shall feel the world is his, and man shall treat with man as a sovereign state with a sovereign state,—tends to true union as well as greatness. "I learned," said the melancholy Pestalozzi, "that no man in God's wide earth is either willing or able to help any other man." Help must come from the bosom alone. The scholar is that man who must take up into himself all the ability of the time, all the contributions of the past, all the hopes of the future. He must be an university of knowledges. If there be one lesson more than another, which should pierce his ear, it is, The world is nothing, the man is all; in yourself is the law of all nature, and you know not yet how a globule of sap ascends; in yourself slumbers the whole of Reason; it is for you to know all, it is for you to dare all. Mr. President and Gentlemen, this confidence in the unsearched might of man belongs, by all motives, by all prophecy, by all preparation, to the American Scholar. We have listened too long to the courtly muses of Europe. The spirit of the American freeman is already suspected to be timid, imitative, tame. Public and private avarice make the air we breathe thick and fat. The scholar is decent, indolent, complaisant. See already the tragic consequence. The mind of this country, taught to

aim at low objects, eats upon itself. There is no work for any but the decorous and the complaisant. Young men of the fairest promise, who begin life upon our shores, inflated by the mountain winds, shined upon by all the stars of God, find the earth below not in unison with these,—but are hindered from action by the disgust which the principles on which business is managed inspire, and turn drudges, or die of disgust,—some of them suicides. What is the remedy? They did not yet see, and thousands of young men as hopeful now crowding to the barriers for the career, do not yet see, that, if the single man plant himself indomitably on his instincts, and there abide, the huge world will come round to him. Patience,—patience;—with the shades of all the good and great for company; and for solace, the perspective of your own infinite life; and for work, the study and the communication of principles, the making those instincts prevalent, the conversion of the world. Is it not the chief disgrace in the world, not to be an unit;—not to be reckoned one character;—not to yield that peculiar fruit which each man was created to bear, but to be reckoned in the gross, in the hundred, or the thousand, of the party, the section, to which we belong; and our opinion predicted geographically, as the north, or the south? Not so, brothers, and friends,—please God, ours shall not be so. We will walk on our own feet; we will work with our own hands; we will speak our own minds. The study of letters shall be no longer a name for pity, for doubt, and for sensual indulgence. The dread of man and the love of man shall be a wall of defence and a wreath of joy around all. A nation of men will for the first time exist, because each believes himself inspired by the Divine Soul which also inspires all men.

### MAN THE REFORMER

*A Lecture read before the Mechanics' Apprentices' Library Association, Boston, January 25, 1841*

MR. PRESIDENT, AND GENTLEMEN,

I WISH to offer to your consideration some thoughts on the particular and general relations of man as a reformer. I shall assume that the aim of each young man in this association is the very highest that belongs to a rational mind. Let it be granted, that our life, as we lead it, is common and mean; that some of those offices and functions for which we were mainly created are grown so rare in society, that the memory of them is only kept alive in old books and in dim traditions; that prophets and poets, that beautiful and perfect men, we are not now, no, nor have even seen such; that some sources of human instruction are almost unnamed and unknown among us; that the community in which we live will hardly bear to be told that every man should be open to ecstasy or a divine illumination, and his daily walk elevated by intercourse with the spiritual world. Grant all this, as we must, yet I suppose none of my auditors will deny that we ought to seek to establish ourselves in such disciplines and courses as will deserve that guidance and clearer communication with the spiritual nature. And further, I will not dissemble my hope, that each person whom I address has felt his own call to cast aside all evil customs, timidities, and limitations, and to be in his place a free and helpful man, a reformer, a benefactor, not content to slip along through the world like a footman or a spy, escaping by his nimbleness and apologies as many knocks as he can, but a brave and upright man, who must find or cut a straight road to everything excellent in the earth, and not only go

honorably himself, but make it easier for all who follow him, to go in honor and with benefit.

In the history of the world the doctrine of Reform had never such scope as at the present hour. Lutherans, HERNHUTTERS, Jesuits, Monks, Quakers, Knox, Wesley, Swedenborg, Bentham, in their accusations of society, all respected something,—church or state, literature or history, domestic usages, the market town, the dinner table, coined money. But now all these and all things else hear the trumpet, and must rush to judgment,—Christianity, the laws, commerce, schools, the farm, the laboratory; and not a kingdom, town, statute, rite, calling, man, or woman, but is threatened by the new spirit.

What if some of the objections whereby our institutions are assailed are extreme and speculative, and the reformers tend to idealism; that only shows the extravagance of the abuses which have driven the mind into the opposite extreme. It is when your facts and persons grow unreal and fantastic by too much falsehood, that the scholar flies for refuge to the world of ideas, and aims to recruit and replenish nature from that source. Let ideas establish their legitimate sway again in society, let life be fair and poetic, and the scholars will gladly be lovers, citizens, and philanthropists.

It will afford no security from the new ideas, that the old nations, the laws of centuries, the property and institutions of a hundred cities, are built on other foundations. The demon of reform has a secret door into the heart of every lawmaker, of every inhabitant of every city. The fact, that a new thought and hope have dawned in your breast, should apprise you that in the same hour a new light broke in upon a thousand private hearts. That secret which you would fain keep,—as soon as you go abroad, lo! there is one standing on the doorstep, to tell you the same. There is not the most bronzed and sharpened money-catcher, who does not, to your consternation, almost, quail and shake the moment he hears a question prompted by the new ideas. We thought he had some semblance of ground to stand upon, that such as he at least would die hard; but he

trembles and flees. Then the scholar says, "Cities and coaches shall never impose on me again; for, behold, every solitary dream of mine is rushing to fulfilment. That fancy I had, and hesitated to utter because you would laugh,—the broker, the attorney, the market-man are saying the same thing. Had I waited a day longer to speak, I had been too late. Behold, State Street thinks, and Wall Street doubts, and begins to prophesy!"

It cannot be wondered at, that this general inquest into abuses should arise in the bosom of society, when one considers the practical impediments that stand in the way of virtuous young men. The young man, on entering life, finds the way to lucrative employments blocked with abuses. The ways of trade are grown selfish to the borders of theft, and supple to the borders (if not beyond the borders) of fraud. The employments of commerce are not intrinsically unfit for a man, or less genial to his faculties, but these are now in their general course so vitiated by derelictions and abuses at which all connive, that it requires more vigor and resources than can be expected of every young man, to right himself in them; he is lost in them; he cannot move hand or foot in them. Has he genius and virtue? the less does he find them fit for him to grow in, and if he would thrive in them, he must sacrifice all the brilliant dreams of boyhood and youth as dreams; he must forget the prayers of his childhood; and must take on him the harness of routine and obsequiousness. If not so minded, nothing is left him but to begin the world anew, as he does who puts the spade into the ground for food. We are all implicated, of course, in this charge; it is only necessary to ask a few questions as to the progress of the articles of commerce from the fields where they grew, to our houses, to become aware that we eat and drink and wear perjury and fraud in a hundred commodities. How many articles of daily consumption are furnished us from the West Indies; yet it is said, that, in the Spanish islands, the venality of the officers of the government has passed into usage, and that no article passes into our ships which has not been fraudulently cheapened. In the Spanish islands, every agent or factor of the Americans,

unless he be a consul, has taken oath that he is a Catholic, or has caused a priest to make that declaration for him. The abolitionist has shown us our dreadful debt to the Southern negro. In the island of Cuba, in addition to the ordinary abominations of slavery, it appears, only men are bought for the plantations, and one dies in ten every year, of these miserable bachelors, to yield us sugar. I leave for those who have the knowledge the part of sifting the oaths of our custom-houses; I will not inquire into the oppression of the sailors; I will not pry into the usages of our retail trade. I content myself with the fact, that the general system of our trade, (apart from the blacker traits which, I hope, are exceptions denounced and unshared by all reputable men,) is a system of selfishness; is not dictated by the high sentiments of human nature; is not measured by the exact law of reciprocity; much less by the sentiments of love and heroism, but is a system of distrust, of concealment, of superior keenness, not of giving but of taking advantage. It is not that which a man delights to unlock to a noble friend; which he meditates on with joy and self-approval in his hour of love and aspiration; but rather what he then puts out of sight, only showing the brilliant result, and atoning for the manner of acquiring, by the manner of expending it. I do not charge the merchant or the manufacturer. The sins of our trade belong to no class, to no individual. One plucks, one distributes, one eats. Every body partakes, every body confesses,—with cap and knee volunteers his confession, yet none feels himself accountable. He did not create the abuse; he cannot alter it. What is he? an obscure private person who must get his bread. That is the vice,—that no one feels himself called to act for man, but only as a fraction of man. It happens therefore that all such ingenuous souls as feel within themselves the irrepressible strivings of a noble aim, who by the law of their nature must act simply, find these ways of trade unfit for them, and they come forth from it. Such cases are becoming more numerous every year.

But by coming out of trade you have not cleared yourself. The trail of the serpent reaches into all the lucrative professions and practices of man. Each has its own wrongs.

Each finds a tender and very intelligent conscience a disqualification for success. Each requires of the practitioner a certain shutting of the eyes, a certain dapperness and compliance, an acceptance of customs, a sequestration from the sentiments of generosity and love, a compromise of private opinion and lofty integrity. Nay, the evil custom reaches into the whole institution of property, until our laws which establish and protect it, seem not to be the issue of love and reason, but of selfishness. Suppose a man is so unhappy as to be born a saint, with keen perceptions, but with the conscience and love of an angel, and he is to get his living in the world; he finds himself excluded from all lucrative works; he has no farm, and he cannot get one; for, to earn money enough to buy one, requires a sort of concentration toward money, which is the selling himself for a number of years, and to him the present hour is as sacred and inviolable as any future hour. Of course, whilst another man has no land, my title to mine, your title to yours, is at once vitiated. Inextricable seem to be the twinings and tendrils of this evil, and we all involve ourselves in it the deeper by forming connections, by wives and children, by benefits and debts.

Considerations of this kind have turned the attention of many philanthropic and intelligent persons to the claims of manual labor, as a part of the education of every young man. If the accumulated wealth of the past generation is thus tainted,—no matter how much of it is offered to us,—we must begin to consider if it were not the nobler part to renounce it, and to put ourselves into primary relations with the soil and nature, and abstaining from whatever is dishonest and unclean, to take each of us bravely his part, with his own hands, in the manual labor of the world.

But it is said, "What! will you give up the immense advantages reaped from the division of labor, and set every man to make his own shoes, bureau, knife, wagon, sails, and needle? This would be to put men back into barbarism by their own act." I see no instant prospect of a virtuous revolution; yet I confess, I should not be pained at a change which threatened a loss of some of the luxuries or conven-

iences of society, if it proceeded from a preference of the agricultural life out of the belief, that our primary duties as men could be better discharged in that calling. Who could regret to see a high conscience and a purer taste exercising a sensible effect on young men in their choice of occupation, and thinning the ranks of competition in the labors of commerce, of law, and of state? It is easy to see that the inconvenience would last but a short time. This would be great action, which always opens the eyes of men. When many persons shall have done this, when the majority shall admit the necessity of reform in all these institutions, their abuses will be redressed, and the way will be open again to the advantages which arise from the division of labor, and a man may select the fittest employment for his peculiar talent, again, without compromise.

But quite apart from the emphasis which the times give to the doctrine, that the manual labor of society ought to be shared among all the members, there are reasons proper to every individual, why he should not be deprived of it. The use of manual labor is one which never grows obsolete, and which is inapplicable to no person. A man should have a farm or a mechanical craft for his culture. We must have a basis for our higher accomplishments, our delicate entertainments of poetry and philosophy, in the work of our hands. We must have an antagonism in the tough world for all the variety of our spiritual faculties, or they will not be born. Manual labor is the study of the external world. The advantage of riches remains with him who procured them, not with the heir. When I go into my garden with a spade, and dig a bed, I feel such an exhilaration and health, that I discover that I have been defrauding myself all this time in letting others do for me what I should have done with my own hands. But not only health, but education is in the work. Is it possible that I who get indefinite quantities of sugar, hominy, cotton, buckets, crockery ware, and letter paper, by simply signing my name once in three months to a cheque in favor of John Smith and Co., traders, get the fair share of exercise to my faculties by that act, which nature intended for me in making all these far-

etched matters important to my comfort? It is Smith himself, and his carriers, and dealers, and manufacturers, it is the sailor, the hidedrogher, the butcher, the negro, the hunter, and the planter, who have intercepted the sugar of the sugar, and the cotton of the cotton. They have got the education, I only the commodity. This were all very well if I were necessarily absent, being detained by work of my own, like theirs, work of the same faculties; then should I be sure of my hands and feet, but now I feel some shame before my wood-chopper, my ploughman, and my cook, for they have some sort of self-sufficiency, they can contrive without my aid to bring the day and year round, but I depend on them, and have not earned by use a right to my arms and feet.

Consider further the difference between the first and second owner of property. Every species of property is preyed on by its own enemies, as iron by rust; timber by rot; cloth by moths; provisions by mould, putridity, or vermin; money by thieves; an orchard by insects; a planted field by weeds and the inroad of cattle; a stock of cattle by hunger; a road by rain and frost; a bridge by freshets. And whoever takes any of these things into his possession, takes the charge of defending them from this troop of enemies, or of keeping them in repair. A man who supplies his own want, who builds a raft or a boat to go a-fishing, finds it easy to caulk it, or put in a thole-pin, or mend the rudder. What he gets only as fast as he wants for his own ends, does not embarrass him, or take away his sleep with looking after. But when he comes to give all the goods he has year after year collected, in one estate to his son, house, orchard, ploughed land, cattle, bridges, hardware, wooden-ware, carpets, cloths, provisions, books, money, and cannot give him the skill and experience which made or collected these, and the method and place they have in his own life, the son finds his hands full,—not to use these things,—but to look after them and defend them from their natural enemies. To him they are not means, but masters. Their enemies will not remit; rust, mould, vermin, rain, sun, freshet, fire, will seize their own, fill him with vexation, and he is con-

verted from the owner into a watch-man or a watch-dog to this magazine of old and new chattels. What a change! Instead of the masterly good humor, and sense of power, and fertility of resource in himself; instead of those strong and learned hands, those piercing and learned eyes, that supple body, and that mighty and prevailing heart, which the father had, whom nature loved and feared, whom snow and rain, water and land, beast and fish seemed all to know and to serve, we have now a puny, protected person, guarded by walls and curtains, stoves and down beds, coaches, and men-servants and women-servants from the earth and the sky, and who, bred to depend on all these, is made anxious by all that endangers those possessions, and is forced to spend so much time in guarding them, that he has quite lost sight of their original use, namely, to help him to his ends,—to the prosecution of his love; to the helping of his friend, to the worship of his God, to the enlargement of his knowledge, to the serving of his country, to the indulgence of his sentiment, and he is now what is called a rich man,—the menial and runner of his riches.

Hence it happens that the whole interest of history lies in the fortunes of the poor. Knowledge, Virtue, Power are the victories of man over his necessities, his march to the dominion of the world. Every man ought to have this opportunity to conquer the world for himself. Only such persons interest us, Spartans, Romans, Saracens, English, Americans, who have stood in the jaws of need, and have by their own wit and might extricated themselves, and made man victorious.

I do not wish to overstate this doctrine of labor, or insist that every man should be a farmer, any more than that every man should be a lexicographer. In general, one may say, that the husbandman's is the oldest, and most universal profession, and that where a man does not yet discover in himself any fitness for one work more than another, this may be preferred. But the doctrine of the Farm is merely this, that every man ought to stand in primary relations with the work of the world, ought to do it himself, and not to suffer the accident of his having a purse in his

ocket, or his having been bred to some dishonorable and injurious craft, to sever him from those duties; and for this reason, that labor is God's education; that he only is a sincere learner, he only can become a master, who learns the secrets of labor, and who by real cunning extorts from nature its sceptre.

Neither would I shut my ears to the plea of the learned professions, of the poet, the priest, the lawgiver, and men of study generally; namely, that in the experience of all men of that class, the amount of manual labor which is necessary to the maintenance of a family, indisposes and disqualifies for intellectual exertion. I know, it often, perhaps usually, happens, that where there is a fine organization for poetry and philosophy, that individual finds himself impelled to wait on his thoughts, to waste several days that he may enhance and glorify one; and is better taught by a moderate and dainty exercise, such as rambling in the fields, rowing, skating, hunting, than by the downright ruggedness of the farmer and the smith. I would not quite forget the venerable counsel of the Egyptian mysteries, which declared that "there were two pairs of eyes in man, and it is requisite that the pair which are beneath should be closed, when the pair that are above them perceive, and that when the pair above are closed, those which are beneath should be opened." Yet I will suggest that no separation from labor can be without some loss of power and of truth to the seer himself; that, I doubt not, the faults and vices of our literature and philosophy, their too great fineness, feminacy, and melancholy, are attributable to the enervated and sickly habits of the literary class. Better that a book should not be quite so good, and the bookmaker poorer and better, and not himself often a ludicrous contrast to all that he has written.

But granting that for ends so sacred and dear, some taxation must be had, I think, that if a man find in himself a strong bias to poetry, to art, to the contemplative life, leaving him to these things with a devotion incompatible with good husbandry, that man ought to reckon early with himself, and, respecting the compensations of the Universe,

ought to ransom himself from the duties of economy, by a certain rigor and privation in his habit. For privileges so rare and grand, let him not stint to pay a great tax. Let him be a canobite, a pauper, and if needs be, celibate also. Let him learn to eat his meals standing, and to relish the taste of fair water and black bread. He may leave to others the costly conveniences of housekeeping, and large hospitality, and the possession of works of art. Let him feel that genius is a hospitality, and that he who can create works of art needs not collect them. He must live in a chamber, and postpone his self-indulgence, forewarned and forearmed against that frequent misfortune of men of genius,—the taste for luxury. This is the tragedy of genius,—attempting to drive along the ecliptic with one horse of the heavens and one horse of the earth, there is only discord and ruin and downfall to chariot and charioteer.

The duty that every man should assume his own vows should call the institutions of society to account, and examine their fitness to him, gains in emphasis, if we look at our modes of living. Is our housekeeping sacred and honorable? Does it raise and inspire us, or does it cripple us instead? I ought to be armed by every part and function of my household by all my social function, by my economy, by my feasting, by my voting, by my traffic. Yet I am almost no party to any of these things. Custom does it for me, gives me no power therefrom, and runs me in debt to boot. We spend our incomes for paint and paper, for a hundred trifles, I know not what, and not for the things of a man. Our expense is almost all for conformity. It is for cake that we run in debt; 't is not the intellect, not the heart, not beauty, not worship, that costs so much. Why needs any man be rich? Why must he have horses, fine garments, handsome apartments, access to public houses, and places of amusement? Only for want of thought. Give his mind a new image, and he flees into a solitary garden or garret to enjoy it, and is richer with that dream, than the fee of a county could make him. But we are first thoughtless, and then find that we are moneyless. We are first sensual, and then must be rich. We dare not trust our wit for making

our house pleasant to our friend, and so we buy ice-creams. He is accustomed to carpets, and we have not sufficient character to put floor-cloths out of his mind whilst he stays at the house, and so we pile the floor with carpets. Let the house rather be a temple of the Furies of Lacedæmon, formidable and holy to all, which none but a Spartan may enter or so much as behold. As soon as there is faith, as soon as there is society, comfits and cushions will be left to slaves. Expense will be inventive and heroic. We shall sit hard and lie hard, we shall dwell like the ancient Romans in narrow tenements, whilst our public edifices, like theirs, will be worthy for their proportion of the landscape in which we set them, for conversation, for art, for music, for worship. We shall be rich to great purposes; poor only for selfish ones.

Now what help for these evils? How can the man who has learned but one art, procure all the conveniences of life most cheaply? Shall we say all we think?—Perhaps with his own hands. Suppose he collects or makes them ill;—yet he has learned their lesson. If he cannot do that.—Then perhaps he can go without. Immense wisdom and riches are in that. It is better to go without, than to have them at too great a cost. Let us learn the meaning of economy. Economy is a high, humane office, a sacrament, when its aim is grand; when it is the prudence of simple tastes, when it is practised for freedom, or love, or devotion. Much of the economy which we see in houses, is of a base origin, and best kept out of sight. Parched corn eaten to-day that may have roast fowl to my dinner on Sunday, is a baseless; but parched corn and a house with one apartment, that I may be free of all perturbations, that I may be serene and docile to what the mind shall speak, and girt and road-ready for the lowest mission of knowledge or goodwill, is frugality for gods and heroes.

Can we not learn the lesson of self-help? Society is full of infirm people, who incessantly summon others to serve them. They contrive everywhere to exhaust for their single comfort the entire means and appliances of that luxury which our invention has yet attained. Sofas, ottomans,

stoves, wine, game-fowl, spices, perfumes, rides, the theatre, entertainments,—all these they want, they need, and whatever can be suggested more than these, they crave also, as if it was the bread which should keep them from starving; and if they miss any one, they represent themselves as the most wronged and most wretched persons on earth. One must have been born and bred with them to know how to prepare a meal for their learned stomach. Meantime, they never bestir themselves to serve another person; not they! they have a great deal more to do for themselves than they can possibly perform, nor do they once perceive the cruel joke of their lives, but the more odious they grow, the sharper is the tone of their complaining and craving. Can anything be so elegant as to have few wants and to serve them one's self, so as to have somewhat left to give, instead of being always prompt to grab? It is more elegant to answer one's own needs, than to be richly served; inelegant perhaps it may look to-day, and to a few, but it is an elegance forever and to all.

I do not wish to be absurd and pedantic in reform. I do not wish to push my criticism on the state of things around me to that extravagant mark, that shall compel me to suicide, or to an absolute isolation from the advantages of civil society. If we suddenly plant our foot, and say,—I will neither eat nor drink nor wear nor touch any food or fabric which I do not know to be innocent, or deal with any person whose whole manner of life is not clear and rational, we shall stand still. Whose is so? Not mine; not thine; not his. But I think we must clear ourselves each one by the interrogation, whether we have earned our bread to-day by the hearty contribution of our energies to the common benefit? and we must not cease to *tend* to the correction of these flagrant wrongs, by laying one stone aright every day.

But the idea which now begins to agitate society has a wider scope than our daily employments, our households, and the institutions of property. We are to revise the whole of our social structure, the state, the school, religion, marriage, trade, science, and explore their foundations in

our own nature; we are to see that the world not only suited the former men, but fits us, and to clear ourselves of every usage which has not its roots in our own mind. What is a man born for, but to be a Reformer, a Re-maker of what man has made; a renouncer of lies; a restorer of truth and good, imitating that great Nature which embosoms all, and which sleeps no moment on an old past, but every hour repairs herself, yielding us every morning a new day, and with every pulsation a new life? Let him renounce everything which is not true to him, and put all his practices back on their first thoughts, and do nothing for which he has not the whole world for his reason. If there are inconveniences, and what is called ruin in the way, because we have so enervated and maimed ourselves, yet it would be like dying of perfumes to sink in the effort to attach the deeds of every day to the holy and mysterious processes of life.

The power, which is at once spring and regulator in all efforts of reform, is the conviction that there is an infinite worthiness in man which will appear at the call of worth, and that all particular reforms are the removing of some impediment. Is it not the highest duty that man should be honored in us? I ought not to allow any man, because he has broad lands, to feel that he is rich in my presence. I ought to make him feel that I can do without his riches, that I cannot be bought,—neither by comfort, neither by pride,—and though I be utterly penniless, and receiving bread from him, that he is the poor man beside me. And yet at the same time, a woman or a child discovers a sentiment of piety, or a juster way of thinking than mine, I ought to confess it by my respect and obedience, though it go to alter my whole way of life.

The Americans have many virtues, but they have not Faith and Hope. I know no two words whose meaning is more lost sight of. We use these words as if they were as solete as Selah and Amen. And yet they have the broadest meaning, and the most cogent application to Boston in 1841. The Americans have no faith. They rely on the power of a dollar; they are deaf to a sentiment. They think

you may talk the north wind down as easily as raise society; and no class more faithless than the scholars or intellectual men. Now if I talk with a sincere wise man, and my friend, with a poet, with a conscientious youth who is still under the dominion of his own wild thoughts, and not yet harnessed in the team of society to drag with us all in the ruts of custom, I see at once how paltry is all this generation of unbelievers, and what a house of cards their institutions are, and I see what one brave man, what one great thought executed might effect. I see that the reason of the distrust of the practical man in all theory, is his inability to perceive the means whereby we work. Look, he says, at the tools with which this world of yours is to be built. As we cannot make a planet, with atmosphere, rivers, and forests, by means of the best carpenters' or engineers' tools, with chemist's laboratory and smith's forge to boot,—so neither can we ever construct that heavenly society you prate of out of foolish, sick, selfish men and women, such as we know them to be. But the believer not only beholds his heaven to be possible, but already to begin to exist,—not by the men or materials the statesman uses, but by men transfigured and raised above themselves by the power of principles. To principles something else is possible that transcends all the power of expedients.

Every great and commanding moment in the annals of the world is the triumph of some enthusiasm. The victories of the Arabs after Mahomet, who, in a few years, from a small and mean beginning, established a larger empire than that of Rome, is an example. They did they knew not what. The naked Derar, horsed on an idea, was found an overmatch for a troop of Roman cavalry. The women fought like men and conquered the Roman men. They were miserably equipped, miserably fed. They were Temperance troops. There was neither brandy nor flesh needed to feed them. They conquered Asia, and Africa, and Spain, on barley. The Caliph Omar's walking stick struck more terror into those who saw it, than another man's sword. His diet was barley bread: his sauce was salt; and oftentimes by way of abstinence he ate his bread without salt. His drink was water.

His palace was built of mud; and when he left Medina to go to the conquest of Jersuallem, he rode on a red camel, with a wooden platter hanging at his saddle, with a bottle of water and two sacks, one holding barley, and the other dried fruits.

But there will dawn ere long on our politics, on our modes of living, a nobler morning than that Arabian faith, in the sentiment of love. This is the one remedy for all ills, the panacea of nature. We must be lovers, and at once the impossible becomes possible. Our age and history, for these thousand years, has not been the history of kindness, but of selfishness. Our distrust is very expensive. The money we spend for courts and prisons is very ill laid out. We make, by distrust, the thief, and burglar, and incendiary, and by our court and jail we keep him so. An acceptance of the sentiment of love throughout Christendom for a season, would bring the felon and the outcast to our side in tears, with the devotion of his faculties to our service. See this wide society of laboring men and women. We allow ourselves to be served by them, we live apart from them, and meet them without a salute in the streets. We do not greet their talents, nor rejoice in their good fortune, nor foster their hopes, nor in the assembly of the people vote for what is dear to them. Thus we enact the part of the selfish noble and king from the foundation of the world. See, this tree always bears one fruit. In every household, the peace of a pair is poisoned by the malice, slyness, indolence, and alienation of domestics. Let any two matrons meet, and observe how soon their conversation turns on the troubles from their "*help*," as our phrase is. In every knot of laborers, the rich man does not feel himself among his friends,—and at the polls he finds them arrayed in a mass in distinct opposition to him. We complain that the politics of masses of the people are controlled by designing men, and led in opposition to manifest justice and the common weal, and to their own interest. But the people do not wish to be represented or ruled by the ignorant and base. They only vote for these, because they were asked with the voice and semblance of kindness. They will not vote for them long.

They inevitably prefer wit and probity. To use an Egyptian metaphor, it is not their will for any long time "to raise the nails of wild beasts, and to depress the heads of the sacred birds." Let our affection flow out to our fellows; it would operate in a day the greatest of all revolutions. It is better to work on institutions by the sun than by the wind. The state must consider the poor man, and all voices must speak for him. Every child that is born must have a just chance for his bread. Let the amelioration in our laws of property proceed from the concession of the rich, not from the grasping of the poor. Let us begin by habitual imparting. Let us understand that the equitable rule is, that no one should take more than his share, let him be ever so rich. Let me feel that I am to be a lover. I am to see to it that the world is the better for me, and to find my reward in the act. Love would put a new face on this weary old world in which we dwell as pagans and enemies too long, and it would warm the heart to see how fast the vain diplomacy of statesmen, the impotence of armies, and navies, and lines of defence, would be superseded by this unarmed child. Love will creep where it cannot go, will accomplish that by imperceptible methods,—being its own lever, fulcrum, and power,—which force could never achieve. Have you not seen in the woods, in a late autumn morning, a poor fungus or mushroom,—a plant without any solidity, nay, that seemed nothing but a soft mush or jelly,—by its constant, total, and inconceivably gentle pushing, manage to break its way up through the frosty ground, and actually to lift a hard crust on its head? It is the symbol of the power of kindness. The virtue of this principle in human society in application to great interests is obsolete and forgotten. Once or twice in history it has been tried in illustrious instances, with signal success. This great, overgrown, dead Christendom of ours still keeps alive at least the name of a lover of mankind. But one day all men will be lovers; and every calamity will be dissolved in the universal sunshine.

Will you suffer me to add one trait more to this portrait of man the reformer? The mediator between the spiritual

and the actual world should have a great prospective prudence. An Arabian poet describes his hero by saying,

"Sunshine was he  
In the winter day;  
And in the midsummer  
Coolness and shade."

He who would help himself and others, should not be a subject of irregular and interrupted impulses of virtue, but a continent, persisting, immovable person,—such as we have seen a few scattered up and down in time for the blessing of the world, men who have in the gravity of their nature a quality which answers to the fly-wheel in a mill, which distributes the motion equably over all the wheels, and hinders it from falling unequally and suddenly in destructive shocks. It is better that joy should be spread over all the day in the form of strength, than that it should be concentrated into ecstasies, full of danger and followed by reactions. There is a sublime prudence, which is the very highest that we know of man, which, believing in a vast future,—sure of more to come than is yet seen,—postpones always the present hour to the whole life; postpones talent to genius, and special results to character. As the merchant gladly takes money from his income to add to his capital, so is the great man very willing to lose particular powers and talents, so that he gain in the elevation of his life. The opening of the spiritual senses disposes men ever to greater sacrifices, to leave their signal talents, their best means and skill of procuring a present success, their power and their fame,—to cast all things behind, in the insatiable thirst for divine communications. A purer fame, a greater power rewards the sacrifice. It is the conversion of our harvest into seed. As the farmer casts into the ground the finest ears of his grain, the time will come when we too shall hold nothing back, but shall eagerly convert more than we now possess into means and powers, when we shall be willing to sow the sun and the moon for seeds.

## XVII

### THE CONSERVATIVE

*A Lecture delivered at the Masonic Temple, Boston,  
December 9, 1841*

THE two parties which divide the state, the party of Conservatism and that of Innovation, are very old, and have disputed the possession of the world ever since it was made. This quarrel is the subject of civil history. The conservative party established the reverend hierarchies and monarchies of the most ancient world. The battle of patrician and plebeian, of parent state and colony, of old usage and accommodation to new facts, of the rich and the poor reappears in all countries and times. The war rages not only in battle-fields, in natural councils, and ecclesiastical synods, but agitates every man's bosom with opposing advantages every hour. On rolls the old world meantime and now one, now the other gets the day, and still the fight renews itself as if for the first time, under new names and hot personalities.

Such an irreconcilable antagonism, of course, must have a correspondent depth of seat in the human constitution. It is the opposition of Past and Future, of Memory and Hope, of the Understanding and the Reason. It is the primal antagonism, the appearance in trifles of the two poles of nature.

There is a fragment of old fable which seems somehow to have been dropped from the current mythologies, which may deserve attention, as it appears to relate to this subject.

Saturn grew weary of sitting alone, or with none but the great Uranus or Heaven beholding him, and he created an oyster. Then he would act again, but he made nothing more but went on creating the race of oysters. Then Uranus cried, "A new work, O Saturn! the old is not good again."

Saturn replied. "I fear. There is not only the alternative of making and not making, but also of unmaking. Seest thou the great sea, how it ebbs and flows? so is it with me; my power ebbs; and if I put forth my hands, I shall not do, but undo. Therefore I do what I have done; I hold what I have got; and so I resist Night and Chaos."

"O Saturn," replied Uranus, "thou canst not hold thine own, but by making more. Thy oysters are barnacles and rockles, and with the next flowing of the tide, they will be pebbles and sea-foam."

"I see," rejoins Saturn, "thou art in league with Night, thou art become an evil eye; thou spakest from love; now thy words smite me with hatred. I appeal to Fate, must there not be rest?"—"I appeal to Fate also," said Uranus, "must there not be motion?"—But Saturn was silent, and went on making oysters for a thousand years.

After that, the word of Uranus came into his mind like a ray of the sun, and he made Jupiter; and then he feared again; and nature froze, the things that were made went backward, and, to save the world, Jupiter slew his father Saturn.

This may stand for the earliest account of a conversation in politics between a Conservative and a Radical, which has come down to us. It is ever thus. It is the counteraction of the centripetal and the centrifugal forces. Innovation is the salient energy; Conservatism the pause on the last movement. "That which is was made by God," saith Conservatism. "He is leaving that, he is entering this other;" rejoins Innovation.

There is always a certain meanness in the argument of conservatism, joined with a certain superiority in its fact. It affirms because it holds. Its fingers clutch the fact, and it will not open its eyes to see a better fact. The castle, which conservatism is set to defend, is the actual state of things, good and bad. The project of innovation is the best possible state of things. Of course, conservatism always has the worst of the argument, is always apologizing, pleading a necessity, pleading that to change would be to deteriorate; it must saddle itself with the mountainous load of violence

and vice of society, must deny the possibility of good, deny ideas, and suspect and stone the prophet; whilst innovation is always in the right, triumphant, attacking, and sure of final success. Conservatism stands on man's confessed limitations; reform on his indisputable infinitude, conservatism on circumstance; liberalism on power; one goes to make an adroit member of the social frame; the other to postpone all things to the man himself; conservatism is debonair and social; reform is individual and imperious. We are reformers in spring and summer; in autumn and winter, we stand by the old; reformers in the morning, conservers at night. Reform is affirmative, conservatism negative; conservatism goes for comfort, reform for truth. Conservatism is more candid to behold another's worth; reform more disposed to maintain and increase its own. Conservatism makes no poetry, breathes no prayer, has no invention; it is all memory. Reform has no gratitude, no prudence, no husbandry. It makes a great difference to your figure and to your thought, whether your foot is advancing or receding. Conservatism never puts the foot forward; in the hour when it does that, it is not establishment, but reform. Conservatism tends to universal seeming and treachery, believes in a negative fate; believes that man's temper governs them; that for me, it avails not to trust in principles; they will fail me; I must bend a little; it distrusts nature; it thinks there is a general law without a particular application,—law for all that does not include any one. Reform in its antagonism inclines to asinine resistance, to kick with hoofs; it runs to egotism and bloated self-conceit; it runs to a bodiless pretension, to unnatural refining and elevation, which ends in hypocrisy and sensual reaction.

And so whilst we do not go beyond general statements, it may be safely affirmed of these two metaphysical antagonists, that each is a good half, but an impossible whole. Each exposes the abuses of the other, but in a true society, in a true man, both must combine. Nature does not give the crown of its approbation, namely, beauty, to any action or emblem or actor, but to one which combines both these elements; not to the rock which resists the waves from age

to age, nor to the wave which lashes incessantly the rock, but the superior beauty is with the oak which stands with its hundred arms against the storms of a century, and grows every year like a sapling; or the river which ever flowing, yet is found in the same bed from age to age; or, grandest of all, the man who has subsisted for years amid the changes of nature, yet has distanced himself, so that when you remember what he was, and see what he is, you say, What strides! what a disparity is here!

Throughout nature the past combines in every creature with the present. Each of the convolutions of the sea-shell, each node and spine marks one year of the fish's life, what was the mouth of the shell for one season, with the addition of new matter by the growth of the animal, becoming an ornamental node. The leaves and a shell of soft wood are all that the vegetation of this summer has made, but the solid columnar stem, which lifts that bank of foliage into the air to draw the eye and to cool us with its shade, is the gift and legacy of dead and buried years.

In nature, each of these elements being always present, each theory has a natural support. As we take our stand on Necessity, or on Ethics, shall we go for the conservative, or for the reformer. If we read the world historically, we shall say, Of all the ages the present hour and circumstance is the cumulative result; this is the best throw of the dice of nature that has yet been, or that is yet possible. If we see it from the side of Will, or the Moral Sentiment, we shall accuse the Past and the Present, and require the impossible of the Future.

But although this bifold fact lies thus united in real nature, and so united that no man can continue to exist in whom both these elements do not work, yet men are not philosophers, but are rather very foolish children, who, by reason of their partiality, see everything in the most absurd manner, and are the victims at all times of the nearest object. There is even no philosopher who is a philosopher at all times. Our experience, our perception is conditioned by the need to acquire in parts and in succession, that is, with every truth certain falsehood. As this is the invariable method of our

training, we must give it allowance, and suffer men to learn as they have done for six millenniums, a word at a time, to pair off into insane parties, and learn the amount of truth each knows, by the denial of an equal amount of truth. For the present, then, to come at what sum is attainable to us, we must even hear the parties plead as parties.

That which is best about conservatism, that which, though it cannot be expressed in detail, inspires reverence in all, is the Inevitable. There is the question not only, what the conservative says for himself? but, why must he say it? What insurmountable fact binds him to that side? Here is the fact which men call Fate, and fate in dread degrees, fate behind fate, not to be disposed of by the consideration that the Conscience commands this or that, but necessitating the question, whether the faculties of man will play him true in resisting the facts of universal experience? For although the commands of the Conscience are *essentially* absolute, they are *historically* liminary. Wisdom does not seek a literal rectitude, but an useful, that is, a conditioned one, such a one as the faculties of man and the constitution of things will warrant. The reformer, the partisan loses himself in driving to the utmost some specialty of right conduct, until his own nature and all nature resists him; but Wisdom attempts nothing enormous and disproportioned to its powers, nothing which it cannot perform or nearly perform. We have all a certain intellection or presentiment of reform existing in the mind, which does not yet descend into the character, and those who throw themselves blindly on this lose themselves. Whatever they attempt in that direction, fails, and reacts suicidally on the actor himself. This is the penalty of having transcended nature. For the existing world is not a dream, and cannot with impunity be treated as a dream; neither is it a disease; but it is the ground on which you stand, it is the mother of whom you were born. Reform converses with possibilities, perchance with impossibilities; but here is sacred fact. This also was true, or it could not be: it had life in it, or it could not have existed; it has life in it, or it could not continue. Your schemes may be feasible, or may not be, but this has the

endorsement of nature and a long friendship and cohabitation with the powers of nature. This will stand until a better cast of dice is made. The contest between the Future and the Past is one between Divinity entering, and Divinity departing. You are welcome to try your experiments, and, if you can, to displace the actual order by that ideal republic you announce, for nothing but God will expel God. But plainly the burden of the proof must lie with the projector. We hold to this, until you can demonstrate something better.

The system of property and law goes back for its origin to barbarous and sacred times; it is the fruit of the same mysterious cause as the mineral or animal world. There is a natural sentiment and prepossession in favor of age, of ancestors, of barbarous and aboriginal usages, which is a homage to the element of necessity and divinity which is in them. The respect for the old names of places, of mountains, and streams, is universal. The Indian and barbarous name can never be supplanted without loss. The ancients tell us that the gods loved the Ethiopians for their stable customs; and the Egyptians and Chaldeans, whose origin could not be explored, passed among the junior tribes of Greece and Italy for sacred nations.

Moreover, so deep is the foundation of the existing social system, that it leaves no one out of it. We may be partial, but Fate is not. All men have their root in it. You who quarrel with the arrangements of society, and are willing to embroil all, and risk the indisputable good that exists, for the chance of better, live, move and have your being in this, and your deeds contradict your words every day. For as you cannot jump from the ground without sensing the resistance of the ground, nor put out the boat to sea, without shoving from the shore, nor attain liberty without rejecting obligation, so you are under the necessity of sensing the Actual order of things, in order to disuse it; to live by it, whilst you wish to take away its life. The past has baked your loaf, and in the strength of its bread you could break up the oven. But you are betrayed by your own nature. You also are conservatives. However men

please to style themselves, I see no other than a conservative party. You are not only identical with us in your needs, but also in your methods and aims. You quarrel with my conservatism, but it is to build up one of your own; it will have a new beginning, but the same course and end, the same trials, the same passions; among the lovers of the new I observe that there is a jealousy of the newest, and that the seceder from the seceder is as damnable as the pope himself.

On these and the like grounds of general statement, conservatism plants itself without danger of being displaced. Especially before this *personal* appeal, the innovator must confess his weakness, must confess that no man is to be found good enough to be entitled to stand champion for the principle. But when this great tendency comes to practical encounters, and is challenged by young men, to whom it is no abstraction, but a fact of hunger, distress, and exclusion from opportunities, it must needs seem injurious. The youth, of course, is an innovator by the fact of his birth. There he stands, newly born on the planet, a universal beggar, with all the reason of things, one would say, on his side. In his first consideration how to feed, clothe, and warm himself, he is met by warnings on every hand, that this thing and that thing have owners, and he must go elsewhere. Then he says; If I am born into the earth, where is my part? have the goodness, gentlemen of this world, to show me my wood-lot, where I may fell my wood, my field where to plant my corn, my pleasant ground where to build my cabin.

"Touch any wood, or field, or house-lot, on your peril," cry all the gentlemen of this world; "but you may come and work in ours, for us and we will give you a piece of bread."

And what is that peril?

Knives and muskets, if we meet you in the act: imprisonment, if we find you afterward.

And by what authority, kind gentlemen?

By our law.

And your law,—is it just?

As just for you as it was for us. We wrought for others under this law, and got our lands so.

I repeat the question, Is your law just?

Not quite just, but necessary. Moreover, it is juster now than it was when we were born; we have made it milder and more equal.

I will none of your law, returns the youth; it encumbers me. I cannot understand, or so much as spare time to read that needless library of your laws. Nature has sufficiently provided me with rewards and sharp penalties, to bind me not to transgress. Like the Persian noble of old, I ask "that I may neither command nor obey." I do not wish to enter into your complex social system. I shall serve those whom I can, and they who can will serve me. I shall seek those whom I love, and shun those whom I love not, and what more can all your laws render me?

With equal earnestness and good faith, replies to this plaintiff an upholder of the establishment, a man of many virtues:

Your opposition is feather-brained and over-fine. Young man, I have no skill to talk with you, but look at me; I have risen early and sat late, and toiled honestly, and painfully for very many years. I never dreamed about methods; I laid my bones to, and drudged for the good I possess; it was not got by fraud, nor by luck, but by work, and you must show me a warrant like these stubborn facts in your own fidelity and labor, before I suffer you, on the faith of a few fine words, to ride into my estate, and claim to scatter it as your own.

Now you touch the heart of the matter, replies the former. To that fidelity and labor, I pay homage. I am unworthy to arraign your manner of living, until I too have been tried. But I should be more unworthy, if I did not tell you why I cannot walk in your steps. I find this vast network, which you call property, extended over the whole planet. I cannot occupy the bleakest crag of the White Hills or the Alleghany Range, but some man or corporation steps up to me to show me that it is his. Now, though I am very peaceable, and on my private account could well enough die, since it appears there was some mistake in my creation, and that I have been *missent* to this earth, where all the

seats were already taken,—yet I feel called upon in behalf of rational nature, which I represent, to declare to you my opinion, that, if the Earth is yours, so also is it mine. All your aggregate existences are less to me a fact than is my own; as I am born to the earth, so the Earth is given to me, what I want of it to till and to plant; nor could I, without pusillanimity, omit to claim so much. I must not only have a name to live, I must live. My genius leads me to build a different manner of life from any of yours. I cannot then spare you the whole world. I love you better. I must tell you the truth practically; and take that which you call yours. It is God's world and mine; yours as much as you want, mine as much as I want. Besides, I know your ways; I know the symptoms of the disease. To the end of your power, you will serve this lie which cheats you. Your want is a gulf which the possession of the broad earth would not fill. Yonder sun in heaven you would pluck down from shining on the universe, and make him a property and privacy, if you could; and the moon and the north star you would quickly have occasion for in your closet and bed-chamber. What you do not want for use, you crave for ornament, and what your convenience could spare, your pride cannot.

On the other hand, precisely the defence which was set up for the British Constitution, namely, that with all its admitted defects, rotten boroughs and monopolies, it worked well, and substantial justice was somehow done; the wisdom and the worth did get into parliament, and every interest did by right, or might, or sleight, get represented:—the same defence is set up for the existing institutions. They are not the best; they are not just; and in respect to you, personally, O brave young man! they cannot be justified. They have, it is most true, left you no acre for your own, and no law but our law, to the ordaining of which, you were no party. But they do answer the end, they are really friendly to the good; unfriendly to the bad; they second the industrious, and the kind; they foster genius. They really have so much flexibility as to afford your talent and character, on the whole, the same chance of demonstration and success

which they might have, if there was no law and no property.

It is trivial and merely superstitious to say that nothing is given you, no outfit, no exhibition; for in this institution of *credit*, which is as universal as honesty and promise in the human countenance, always some neighbor stands ready to be bread and land and tools and stock to the young adventurer. And if in any one respect they have come short, see what ample retribution of good they have made. They have lost no time and spared no expense to collect libraries, museums, galleries, colleges, palaces, hospitals, observatories, cities. The ages have not been idle, nor kings slack, nor the rich niggardly. Have we not atoned for this small offence (which we could not help) of leaving you no right in the soil, by this splendid indemnity of ancestral and national wealth? Would you have been born like a gypsy in a hedge, and preferred your freedom on a heath, and the range of a planet which had no shed or boscage to cover you from sun and wind,—to this towered and citied world? to this world of Rome, and Memphis, and Constantinople, and Vienna, and Paris, and London, and New York? For thee Naples, Florence, and Venice, for thee the fair Mediterranean, the sunny Adriatic; for thee both Indies smile; for thee the hospitable North opens its heated palaces under the polar circle; for thee roads have been cut in every direction across the land, and fleets of floating palaces with every security for strength, and provision for luxury, swim by sail and by steam through all the waters of this world. Every island for thee has a town; every town a hotel. Though thou wast born landless, yet to thy industry and thrift and small condescension to the established usage,—scores of servants are swarming in every strange place with cap and knee to thy command, scores, nay hundreds and thousands, for thy wardrobe, thy table, thy chamber, thy library, thy leisure; and every whim is anticipated and served by the best ability of the whole population of each country. The king on the throne governs for thee, and the judge judges; the barrister pleads, the farmer tills, the joiner hammers, the postman rides. Is it not exaggerating a trifle to insist on a formal acknowledgment of your claims, when these substantial

advantages have been secured to you? Now can your children be educated, your labor turned to their advantage, and its fruit secured to them after your death. It is frivolous to say, you have no acre, because you have not a mathematically measured piece of land. Providence takes care that you shall have a place, that you are waited for, and come accredited; and, as soon as you put your gift to use, you shall have acre or acre's worth according to your exhibition of desert,—acre, if you need land;—acre's worth, if you prefer to draw, or carve, or make shoes, or wheels, to the tilling of the soil.

Besides, it might temper your indignation at the supposed wrong which society has done you, to keep the question before you, how society got into this predicament? Who put things on this false basis? No single man, but all men. No man voluntarily and knowingly; but it is the result of that degree of culture there is in the planet. The order of things is as good as the character of the population permits. Consider it as the work of a great and beneficent and progressive necessity, which, from the first pulsation of the first animal life, up to the present high culture of the best nations, has advanced thus far. Thank the rude foster-mother though she has taught you a better wisdom than her own, and has set hopes in your heart which shall be history in the next ages. You are yourself the result of this manner of living, this foul compromise, this vituperated Sodom. It nourished you with care and love on its breast, as it had nourished many a lover of the right, and many a poet, and prophet, and teacher of men. Is it so irremediably bad? Then again, if the mitigations are considered, do not all the mischiefs virtually vanish? The form is bad, but see you not how every personal character reacts on the form, and makes it new? A strong person makes the law and custom null before his own will. Then the principle of love and truth reappears in the strictest courts of fashion and property. Under the richest robes, in the darlings of the selectest circles of European or American aristocracy, the strong heart will beat with love of mankind, with impatience of accidental distinctions, with the desire to achieve its own

fate, and make every ornament it wears authentic and real.

Moreover, as we have already shown that there is no pure reformer, so it is to be considered that there is no pure conservative, no man who from the beginning to the end of his life maintains the defective institutions; but he who sets his face like a flint against every novelty, when approached in the confidence of conversation, in the presence of friendly and generous persons, has also his gracious and relenting motions, and espouses for the time the cause of man; and even if this be a short-lived emotion, yet the remembrance of it in private hours mitigates his selfishness and compliance with custom.

The Friar Bernard lamented in his cell on Mount Cenis the crimes of mankind, and rising one morning before day from his bed of moss and dry leaves, he gnawed his roots and berries, drank of the spring, and set forth to go to Rome to reform the corruption of mankind. On his way he encountered many travelers who greeted him courteously; and the cabins of the peasants and the castles of the lords supplied his few wants. When he came at last to Rome, his piety and good will easily introduced him to many families of the rich, and on the first day he saw and talked with gentle mothers with their babes at their breasts, who told him how much love they bore their children, and how they were perplexed in their daily walk lest they should fail in their duty to them. "What!" he said, "and this on rich embroidered carpets, on marble floors, with cunning sculpture, and carved wood, and rich pictures, and piles of books about you?"—"Look at our pictures and books, they said, and we will tell you, good Father, how we spent the last evening. These are stories of godly children and holy families and romantic sacrifices made in old or in recent times by great and not mean persons; and last evening, our family was collected, and our husbands and brothers discoursed sadly on what we could save and give in the hard times." Then came in the men and they said, "What cheer, brother? Does thy convent want gifts?" Then the friar Bernard went home swiftly with other thoughts than he brought, saying, "This way of life is wrong, yet these

Romans, whom I prayed God to destroy, are lovers, they are lovers; what can I do?"

The reformer concedes that these mitigations exist, and that, if he proposed comfort, he should take sides with the establishment. Your words are excellent, but they do not tell the whole. Conservatism is affluent and openhanded but there is a cunning juggle in riches. I observe that they take somewhat for everything they give. I look bigger, but am less; I have more clothes but am not so warm; more armor, but less courage; more books, but less wit. What you say of your planted, builded, and decorated world, is true enough, and I gladly avail myself of its convenience; yet I have remarked that what holds in particular, holds in general, that the plant Man does not require for his most glorious flowering this pomp of preparation and convenience, but the thoughts of some beggarly Homer who strolled, God knows when, in the infancy and barbarism of the old world; the gravity and sense of some slave Moses who leads away his fellow slaves from their masters; the contemplation of some Scythian Anacharsis; the erect formidable valor of some Dorian townsmen in the town of Sparta; the vigor of Clovis the Frank, and Alfred the Saxon, and Alaric the Goth, and Mahomet, Ali, and Omar the Arabians, Saladin the Kurd, and Othman the Turk, sufficed to build what you call society, on the spot and in the instant when the sound mind in a sound body appeared. Rich and fine is your dress, O conservatism! your horses are of the best blood; your roads are well cut and well paved; your pantry is full of meats and your cellar of wines, and a very good state and condition are you for gentlemen and ladies to live under; but every one of these goods steals away a drop of my blood. I want the necessity of supplying my own wants. All this costly culture of pours is not necessary. Greatness does not need it. Yonder peasant, who sits neglected there in a corner, carries a whole revolution of man and nature in his head, which shall be a sacred history to some future ages. For man is the end of nature; nothing so easily organizes itself in every part of the universe as he; no moss, no lichen is so easily born; and he takes along with him and puts out from him-

self the whole apparatus of society and condition *extempore*, as an army encamps in a desert, and where all was just now blowing sand, creates a white city in an hour, a government, a market, a place for feasting, for conversation, and for love.

These considerations, urged by those whose characters and whose fortunes are yet to be formed, must needs command the sympathy of all reasonable persons. But beside that charity which should make all adult persons interested for the youth, and engage them to see that he has a free field and fair play on his entrance into life, we are bound to see that the society, of which we compose a part, does not permit the formation or continuance of views and practices injurious to the honor and welfare of mankind. The objection to conservatism, when embodied in a party, is, that in its love of acts, it hates principles; it lives in the senses, not in truth; it sacrifices to despair; it goes for availability in its candidate, not for worth; and for expediency in its measures, and not for the right. Under pretence of allowing for friction, it makes so many additions and supplements to the machine of society, that it will play smoothly and softly, but will no longer grind any grist.

The conservative party in the universe concedes that the radical would talk sufficiently to the purpose, if we were still in the garden of Eden; he legislates for man as he ought to be; his theory is right, but he makes no allowance for friction; and this omission makes his whole doctrine false. The idealist retorts, that the conservative falls into a far more noxious error in the other extreme. The conservative assumes sickness as a necessity, and his social frame is a hospital, his total legislation is for the present distress, a universe in slippers and flannels, with bib and papspoon, swallowing pills and herb-tea. Sickness gets organized as well as health, the vice as well as the virtue. Now that a vicious system of trade has existed so long, it has stereotyped itself in the human generation, and misers are born. And now that sickness has got such a foothold, leprosy has grown cunning, has got into the ballot-box, the lepers out-vote the clean; society has resolved itself into a Hospital

Committee, and all its laws are quarantine. If any man resist, and set up a foolish hope he has entertained as good against the general despair, society frowns on him, shuts him out of her opportunities, her granaries, her refectories, her water and bread, and will serve him a sexton's turn. Conservatism takes as low a view of every part of human action and passion. Its religion is just as bad; a lozenge for the sick; a dolorous tune to beguile the distemper; mitigations of pain by pillows and anodynes; always mitigations, never remedies; pardons for sins, funeral honors,—never self-help, renovation, and virtue. Its social and political action has no better aim; to keep out wind and weather, to bring the day and year about, and make the world last our day; not to sit on the world and steer it; not to sink the memory of the past in the glory of a new and more excellent creation; a timid cobbler and patcher, it degrades whatever it touches. The cause of education is urged in this country with the utmost earnestness,—on what ground? why on this, that the people have the power, and if they are not instructed to sympathize with the intelligent, reading, trading, and governing class, inspired with a taste for the same competitions and prizes, they will upset the fair pageant of Judicature, and perhaps lay a hand on the sacred muniments of wealth itself, and new distribute the land. Religion is taught in the same spirit. The contractors who were building a road out of Baltimore, some years ago, found the Irish laborers quarrelsome and refractory, to a degree that embarrassed the agents, and seriously interrupted the progress of the work. The corporation were advised to call off the police, and build a Catholic chapel; which they did; the priest presently restored order, and the work went on prosperously. Such hints, be sure, are too valuable to be lost. If you do not value the Sabbath, or other religious institutions, give yourself no concern about maintaining them. They have already acquired a market value as conservators of property; and if priest and church-member should fail, the chambers of commerce and the presidents of the Banks, the very innholders and landlords of the country would muster with fury to their support.

Of course, religion in such hands loses its essence. Instead of that reliance, which the soul suggests on the eternity of truth and duty, men are misled into a reliance on institutions, which, the moment they cease to be the instantaneous creations of the devout sentiment, are worthless. Religion among the low becomes low. As it loses its truth, it loses credit with the sagacious. They detect the falsehood of the preaching, but when they say so, all good citizens cry, Hush; do not weaken the state, do not take off the strait-jacket from dangerous persons. Every honest fellow must keep up the hoax the best he can; must patronize providence and piety, and wherever he sees anything that will keep men amused, school or churches or poetry, or picture-galleries or music, or what not, he must cry "Hist-a-boy," and urge the game on. What a compliment we pay to the good SPIRIT with our superserviceable zeal!

But not to balance reasons for and against the establishment any longer, and if it still be asked in this necessity of partial organization, which party on the whole has the highest claims on our sympathy? I bring it home to the private heart, where all such questions must have their final arbitrament. How will every strong and generous mind choose its ground,—with the defenders of the old? or with the seekers of the new? Which is that state which promises to edify a great, brave, and beneficent man; to throw him on his resources, and tax the strength of his character? On which part will each of us find himself in the hour of health and of aspiration?

I understand well the respect of mankind for war, because that breaks up the Chinese stagnation of Society, and demonstrates the personal merits of all men. A state of war or anarchy, in which law has little force, so far as valuable that it puts every man on trial. The man of principle is known as such, and even in the fury of faction is respected. In the civil wars of France, Montaigne alone, among all the French gentry, kept his castle gates unbarred, and made his personal integrity as good at least as a regiment. The man of courage and resources is shown, and the effeminate and base person. Those who rise above war, and those who

fall below it, it easily discriminates, as well as those, who, accepting its rude conditions, keep their own head by their own sword.

But in peace and a commercial state we depend, not as we ought, on our knowledge and all men's knowledge that we are honest men, but we cowardly lean on the virtue of others. For it is always at last the virtue of some men in the society, which keeps the law in any reverence and power. Is there not something shameful that I should owe my peaceful occupancy of my house and field, not to the knowledge of my countrymen that I am useful, but to their respect for sundry other reputable persons, I know not whom, whose joint virtues still keep the law in good order?

It will never make any difference to a hero what the laws are. His greatness will shine and accomplish itself unto the end, whether they second him or not. If he have earned his bread by drudgery, and in the narrow and crooked ways which were all an evil law had left him, he will make it at least honorable by his expenditure. Of the past he will take no heed; for its wrongs he will not hold himself responsible: he will say, all the meanness of my progenitors shall not bereave me of the power to make this hour and company fair and fortunate. Whatsoever streams of power and commodity flow to me, shall of me acquire healing virtue, and become fountains of safety. Cannot I too descend a Redeemer into nature? Whosoever hereafter shall name my name, shall not record a malefactor, but a benefactor in the earth. If there be power in good intention, in fidelity, and in toil, the north wind shall be purer, the stars in heaven shall glow with a kindlier beam, that I have lived. I am primarily engaged to myself to be a public servant of all the gods, to demonstrate to all men that there is intelligence and good will at the heart of things, and ever higher and yet higher leadings. These are my engagements; how can your law further or hinder me in what I shall do to men? On the other hand, these dispositions establish their relations to me. Wherever there is worth, I shall be greeted. Wherever there are men, are the objects of my study and love. Sooner or later all men will be my friends, and will testify

in all methods the energy of their regard. I cannot thank your law for my protection. I protect it. It is not in its power to protect me. It is my business to make myself revered. I depend on my honor, my labor, and my dispositions, for my place in the affections of mankind, and not on any conventions or parchments of yours.

But if I allow myself in derelictions, and become idle and dissolute, I quickly come to love the protection of a strong law, because I feel no title in myself to my advantages. To the intemperate and covetous person no love flows; to him mankind would pay no rent, no dividend, if force were once relaxed; nay, if they could give their verdict, they would say, that his self-indulgence and his oppression deserved punishment from society, and not that rich board and lodging he now enjoys. The law acts as a screen of his unworthiness, and makes him worse the longer it protects him.

In conclusion, to return from this alternation of partial views, to the high platform of universal and necessary history, it is a happiness for mankind that innovation has got on so far, and has so free a field before it. The boldness of the hope men entertain transcends all former experience. It calms and cheers them with the picture of a simple and equal life of truth and piety. And this hope flowered on what tree? It was not imported from the stock of some celestial plant, but grew here on the wild crab of conservatism. It is much that this old and vituperated system of things has borne so fair a child. It predicts that amidst a planet peopled with conservatives, one Reformer may yet be born.

## XVIII

### THE TRANSCENDENTALIST

*A Lecture read at the Masonic Temple, Boston,  
January, 1842*

THE first thing we have to say respecting what are called *new views* here in New England, at the present time, is, that they are not new, but the very oldest of thoughts cast into the mould of these new times. The light is always identical in its composition, but it falls on a great variety of objects, and by so falling is first revealed to us, not in its own form, for it is formless, but in theirs; in like manner, thought only appears in the objects it classifies. What is popularly called Transcendentalism among us, is Idealism; Idealism as it appears in 1842. As thinkers, mankind have ever divided into two sects, Materialists and Idealists; the first class founding on experience, the second on consciousness; the first class beginning to think from the data of the senses, the second class perceive that the senses are not final, and say, the senses give us representations of things, but what are the things themselves, they cannot tell. The materialist insists on facts, on history, on the force of circumstances, and the animal wants of man; the idealist on the power of Thought and of Will, on inspiration, on miracle, on individual culture. These two modes of thinking are both natural, but the idealist contends that his way of thinking is in higher nature. He concedes all that the other affirms, admits the impressions of sense, admits their coherency, their use and beauty, and then asks the materialist for his grounds of assurance, that things are as his senses represent them. But I, he says, affirm facts not affected by the illusions of sense, facts which are of the same nature as the faculty which reports them, and not liable to doubt;

facts which in their first appearance to us assume a native superiority to material facts, degrading these into a language by which the first are to be spoken; facts which it only needs a retirement from the senses to discern. Every materialist will be an idealist; but an idealist can never go backward and be a materialist.

The idealist, in speaking of events, sees them as spirits. He does not deny the sensuous fact: by no means; but he will not see that alone. He does not deny the presence of this table, this chair, and the walls of this room, but he looks at these things as the reverse side of the tapestry, as the *other end*, each being a sequel or completion of a spiritual fact which nearly concerns him. This manner of looking at things, transfers every object in nature from an independent and anomalous position without there, into the consciousness. Even the materialist Condillac, perhaps the most logical expounder of materialism, was constrained to say, "Though we should soar into the heavens, though we should sink into the abyss, we never go out of ourselves; it is always our own thought that we perceive." What more could an idealist say?

The materialist, secure in the certainty of sensation, mocks at fine-spun theories, at star-gazers and dreamers, and believes that his life is solid, that he at least takes nothing for granted, but knows where he stands, and what he does. Yet how easy it is to show him, that he also is a phantom walking and working amid phantoms, and that he need only ask a question or two beyond his daily questions, to find his solid universe growing dim and impalpable before his sense. The sturdy capitalist, no matter how deep and square on blocks of Quincy granite he lays the foundations of his banking-house or Exchange, must set it, at last, not on a cube corresponding to the angles of his structure, but on a mass of unknown materials and solidity, red-hot or white-hot, perhaps, at the core, which rounds off to an almost perfect sphericity, and lies floating in soft air, and goes spinning away, dragging bank and banker with it at a rate of thousands of miles the hour, he knows not whither,—a bit of bullet, now glimmering, now darkling through a

small cubic space on the edge of an unimaginable pit of emptiness. And this wild balloon, in which his whole venture is embarked, is a just symbol of his whole state and faculty. One thing, at least, he says is certain, and does not give me the headache, that figures do not lie; the multiplication table has been hitherto found unimpeachable truth; and moreover, if I put a gold eagle in my safe, I find it again to-morrow;—but for these thoughts, I know not whence they are. They change and pass away. But ask him why he believes that an uniform experience will continue uniform, or on what grounds he founds his faith in his figures, and he will perceive that his mental fabric is built up on just as strange and quaking foundations as his proud edifice of stone.

In the order of thought, the materialist takes his departure from the external world, and esteems a man as one product of that. The idealist takes his departure from his consciousness, and reckons the world an appearance. The materialist respects sensible masses, Society, Government, social art, and luxury, every establishment, every mass, whether majority of numbers, or extent of space, or amount of objects, every social action. The idealist has another measure, which is metaphysical, namely, the *rank* which things themselves take in his consciousness; not at all, the size or appearance. Mind is the only reality, of which man and all other natures are better or worse reflectors. Nature, literature, history, are only subjective phenomena. Although in his action overpowered by the laws of action, and so, warmly coöperating with men, even preferring them to himself, yet when he speaks scientifically, or after the order of thought, he is constrained to degrade persons into representatives of truths. He does not respect labor, or the products of labor, namely, property, otherwise than as a manifold symbol, illustrating with wonderful fidelity of details the laws of being; he does not respect government, except as far as it reiterates the law of his mind; nor the church; nor charities; nor arts, for themselves; but hears, as at a vast distance, what they say, as if his consciousness would speak to him through a pantomimic scene. His thought,—that is the Universe. His experience inclines him

to behold the procession of facts you call the world, as flowing perpetually outward from an invisible, unsounded center in himself, center alike of him and of them, and necessitating him to regard all things as having a subjective or relative existence, relative to that aforesaid Unknown Center of him.

From this transfer of the world into the consciousness, this beholding of all things in the mind, follow easily his whole ethics. It is simpler to be self-dependent. The height, the deity of man is, to be self-sustained, to need no gift, no foreign force. Society is good when it does not violate me; but best when it is likeliest to solitude. Everything real is self-existent. Everything divine shares the self-existence of Deity. All that you call the world is the shadow of that substance which you are, the perpetual creation of the powers of thought, of those that are dependent and of those that are independent of your will. Do not cumber yourself with fruitless pains to mend and remedy remote effects; let the soul be erect, and all things will go well. You think me the child of my circumstances; I make my circumstance. Let any thought or motive of mine be different from that they are, the difference will transform my condition and economy. I—this thought which is called I,—is the mould into which the world is poured like melted wax. The mould is invisible, but the world betrays the shape of the mould. You call it the power of circumstance, but it is the power of me. Am I in harmony with myself? my position will seem to you just and commanding. Am I vicious and insane? my fortunes will seem to you obscure and descending. As I am, so shall I associate, and so shall I act; Cæsar's history will paint out Cæsar. Jesus acted so, because he thought so. I do not wish to overlook or to gainsay any reality; I say, I make my circumstance: but if you ask me, Whence am I? I feel like other men my relation to that Fact which cannot be spoken, or defined, or even thought, but which exists, and will exist.

The Transcendentalist adopts the whole connection of spiritual doctrine. He believes in miracle, in the perpetual openness of the human mind to new influx of light and

power; he believes in inspiration, and in ecstasy. He wishes that the spiritual principle should be suffered to demonstrate itself to the end, in all possible applications to the state of man, without the admission of anything unspiritual; that is, anything positive, dogmatic, personal. Thus, the spiritual measure of inspiration is the depth of the thought, and never, who said it? And so he resists all attempts to palm other rules and measures on the spirit than its own.

In action, he easily incurs the charge of antinomianism by his avowal that he, who has the Lawgiver, may with safety not only neglect, but even contravene every written commandment. In the play of Othello, the expiring Desdemona absolves her husband of the murder, to her attendant Emilia. Afterwards, when Emilia charges him with the crime, Othello exclaims,

"You heard her say herself it was not I."

Emilia replies,

"The more angel she, and thou the blacker devil."

Of this fine incident, Jacobi, the Transcendental moralist, makes use, with other parallel instances, in his reply to Fichte. Jacobi, refusing all measure of right and wrong except the determinations of the private spirit, remarks that there is no crime but has sometimes been a virtue. "I," he says, "am that atheist, that godless person who, in opposition to an imaginary doctrine of calculation, would lie as the dying Desdemona lied; would lie and deceive, as Pylades when he personated Orestes; would assassinate like Timoleon; would perjure myself like Epaminondas, and John de Witt; I would resolve on suicide like Cato; I would commit sacrilege with David; yea, and pluck ears of corn on the Sabbath, for no other reason than that I was fainting for lack of food. For, I have assurance in myself, that, in pardoning these faults according to the letter, man exerts the sovereign right which the majesty of his being confers on him; he sets the seal of his divine nature to the grace he accords."<sup>1</sup>

Coleridge's Translation.

In like manner, if there is anything grand and daring in human thought or virtue, any reliance on the vast, the unknown; any presentiment, any extravagance of faith, the spiritualist adopts it as most in nature. The oriental mind has always tended to this largeness. Buddhism is an expression of it. The Buddhist who thanks no man, who says, "do not flatter your benefactors," but who, in his conviction that every good deed can by no possibility escape its reward, will not deceive the benefactor by pretending that he has done more than he should, is a Transcendentalist.

You will see by this sketch that there is no such thing as a Transcendental *party*; that there is no pure Transcendentalist; that we know of none but prophets and heralds of such a philosophy; that all who by strong bias of nature have leaned to the spiritual side in doctrine, have stopped short of their goal. We have had many harbingers and forerunners; but of a purely spiritual life, history has afforded no example. I mean, we have yet no man who has leaned entirely on his character, and eaten angel's food, who, trusting to his sentiments, found life made of miracles; who, working for universal aims, found himself fed, he knew not how: clothed, sheltered, and weaponed, he knew not how, and yet it was done by his own hands. Only in the instinct of the lower animals, we find the suggestion of the methods of it, and something higher than our understanding. The squirrel hoards nuts, and the bee gathers honey, without knowing what they do, and they are thus provided for without selfishness or disgrace.

Shall we say, then, that Transcendentalism is the Saturnalia or excess of Faith; the presentiment of a faith proper to man in his integrity, excessive only when his imperfect obedience hinders the satisfaction of his wish. Nature is transcendental, exists primarily, necessarily, ever works and advances, yet takes no thought for the morrow. Man owns the dignity of the life which throbs around him in chemistry, and tree, and animal, and in the involuntary functions of his own body; yet he is balked when he tries to fling himself into this enchanted circle, where all is done without degradation. Yet genius and virtue predict in man the same

absence of private ends, and of condescension to circumstances, united with every trait and talent of beauty and power.

This way of thinking, falling on Roman times, made Stoic philosophers; falling on despotic times, made patriotic Catos and Brutuses; falling on superstitious times, made prophets and apostles; on popish times, made protestants and ascetic monks, preachers of Faith against the preachers of Works; on prelatical times, made Puritans and Quakers; and falling on Unitarian and commercial times, makes the peculiar shades of Idealism which we know.

It is well known to most of my audience, that the Idealism of the present day acquired the name of Transcendental, from the use of that term by Immanuel Kant, of Königsberg, who replied to the sceptical philosophy of Locke, which insisted that there was nothing in the intellect which was not previously in the experience of the senses, by showing that there was a very important class of ideas, or imperative forms, which did not come by experience, but through which experience was acquired; that these were intuitions of the mind itself; and he denominated them *Transcendental* forms. The extraordinary profoundness and precision of that man's thinking have given vogue to his nomenclature, in Europe and America, to that extent, that whatever belongs to the class of intuitive thought, is popularly called at the present day *Transcendental*.

Although, as we have said, there is no pure Transcendentalist, yet the tendency to respect the intuitions, and to give them, at least in our creed, all authority over our experience, has deeply colored the conversation and poetry of the present day; and the history of genius and of religion in these times, though impure, and as yet not incarnated in any powerful individual, will be the history of this tendency.

It is a sign of our times, conspicuous to the coarsest observer, that many intelligent and religious persons withdraw themselves from the common labors and competitions of the market and the caucus, and betake themselves to a certain solitary and critical way of living, from which no

solid fruit has yet appeared to justify their separation. They hold themselves aloof; they feel the disproportion between their faculties and the work offered them, and they prefer to ramble in the country and perish of *ennui*, to the degradation of such charities and such ambitions as the city can propose to them. They are striking work, and crying out for somewhat worthy to do! What they do, is done only because they are overpowered by the humanities that speak on all sides; and they consent to such labor as is open to them, though to their lofty dream the writing of Iliads or Hamlets, or the building of cities or empires seems drudgery.

Now every one must do after his kind, be he asp or angel, and these must. The question, which a wise man and a student of modern history will ask, is, what that kind is? And truly, as in ecclesiastical history we take so much pains to know what the Gnostics, what the Essenes, what the Manichees, and what the Reformers believed, it would not misbecome us to inquire nearer home, what these companions and contemporaries of ours think and do, at least so far as these thoughts and actions appear to be not accidental and personal, but common to many, and the inevitable flower of the Tree of Time. Our American literature and spiritual history are, we confess, in the optative mood; but whoso knows these seething brains, these admirable radicals, these unsocial worshippers, these talkers who talk the sun and moon away, will believe that this heresy cannot pass away without leaving its mark.

They are lonely; the spirit of their writing and conversation is lonely; they repel influences; they shun general society; they incline to shut themselves in their chamber in the house, to live in the country rather than in the town, and to find their tasks and amusements in solitude. Society, so be sure, does not like this very well; it saith, Whoso goes to walk alone, accuses the whole world; he declareth all to be unfit to be his companions; it is very uncivil, nay, insulting; Society will retaliate. Meantime, this retirement does not proceed from any whim on the part of these separatists; but if any one will take pains to talk with them, he will find that this part is chosen both from temperament

and from principle; with some unwillingness, too, and as a choice of the less of two evils; for these persons are not by nature melancholy, sour, and unsocial,—they are not stockish or brute,—but joyous, susceptible, affectionate; they have even more than others a great wish to be loved. Like the young Mozart, they are rather ready to cry ten times a day, “But are you sure you love me?” Nay, if they tell you their whole thought, they will own that love seems to them the last and highest gift of nature; that there are persons whom in their hearts they daily thank for existing,—persons whose faces are perhaps unknown to them, but whose fame and spirit have penetrated their solitude,—and for whose sake they wish to exist. To behold the beauty of another character, which inspires a new interest in our own; to behold the beauty lodged in a human being, with such vivacity of apprehension that I am instantly forced home to inquire if I am not deformity itself: to behold in another the expression of a love so high that it assures itself,—assures itself also to me against every possible casualty except my unworthiness;—these are degrees on the scale of human happiness, to which they have ascended; and it is a fidelity to this sentiment which has made common association distasteful to them. They wish a just and even fellowship, or none. They cannot gossip with you, and they do not wish, as they are sincere and religious, to gratify any mere curiosity which you may entertain. Like fairies, they do not wish to be spoken of. Love me, they say, but do not ask who is my cousin and my uncle. If you do not need to hear my thought, because you can read it in my face and behavior, then I will tell it you from sunrise to sunset. If you cannot divine it, you would not understand what I say. I will not molest myself for you. I do not wish to be profaned.

And yet, it seems as if this loneliness, and not this love, would prevail in their circumstances, because of the extravagant demand they make on human nature. That, indeed, constitutes a new feature in their portrait, that they are the most exacting and extortionate critics. Their quarrel with every man they meet, is not with his kind, but with his

degree. There is not enough of him,—that is the only fault. They prolong their privilege of childhood in this wise, of doing nothing,—but making immense demands on all the gladiators in the lists of action and fame. They make us feel the strange disappointment which overcasts every human youth. So many promising youths, and never a finished man! The profound nature will have a savage rudeness; the delicate one will be shallow, or the victim of sensibility; the richly accomplished will have some capital absurdity; and so every piece has a crack. 'T is strange, but this masterpiece is a result of such an extreme delicacy, that the most unobserved flaw in the boy will neutralize the most aspiring genius, and spoil the work. Talk with a seaman of the hazards to life in his profession, and he will ask you, "Where are the old sailors? do you not see that all are young men?" And we, on this sea of human thought, in like manner inquire, Where are the old idealists? where are they who represented to the last generation that extravagant hope, which a few happy aspirants suggest to ours? In looking at the class of counsel, and power, and wealth, and at the matronage of the land, amidst all the prudence and all the triviality, one asks, Where are they who represented genius, virtue, the invisible and heavenly world, to these? Are they dead,—taken in early ripeness to the gods,—as ancient wisdom foretold their fate, Or did the high idea die out of them, and leave their unperfumed body as its tomb and tablet, announcing to all that the celestial inhabitant, who once gave them beauty, had departed? Will it be better with the new generation? We easily predict a fair future to each new candidate who enters the lists, but we are frivolous and volatile, and by low aims and ill example do what we can to defeat this hope. Then these youths bring us a rough but effectual aid. By their unconcealed dissatisfaction, they expose our poverty, and the insignificance of man to man. A man is a poor liminary benefactor. He ought to be a shower of benefits—a great influence, which should never let his brother go, but should refresh old merits continually with new ones; so that, though absent, he should never be out of my mind, his name never far

from my lips; but if the earth should open at my side, or my last hour were come, his name should be the prayer I should utter to the Universe. But in our experience, man is cheap, and friendship wants its deep sense. We affect to dwell with our friends in their absence, but we do not; when deed, word, or letter comes not, they let us go. These exacting children advertise us of our wants. There is no compliment, no smooth speech with them; they pay you only this one compliment, of insatiable expectation; they aspire, they severely exact, and if they only stand fast in this watch-tower, and persist in demanding unto the end, and without end, then are they terrible friends, whereof poet and priest cannot choose but stand in awe; and what if they eat clouds, and drink wind, they have not been without service to the race of man.

With this passion for what is great and extraordinary, it cannot be wondered at, that they are repelled by vulgarity and frivolity in people. They say to themselves, It is better to be alone than in bad company. And it is really a wish to be met,—the wish to find society for their hope and religion,—which prompts them to shun what is called society. They feel that they are never so fit for friendship, as when they have quitted mankind, and taken themselves to friend. A picture, a book, a favorite spot in the hills or the woods, which they can people with the fair and worthy creation of the fancy, can give them often forms so vivid, that these for the time shall seem real, and society the illusion.

But their solitary and fastidious manners not only withdraw them from the conversation, but from the labors of the world; they are not good citizens, not good members of society; unwillingly they bear their part of the public and private burdens; they do not willingly share in the public charities, in the public religious rites, in the enterprises of education, of missions foreign or domestic, in the abolition of the slave-trade, or in the temperance society. They do not even like to vote. The philanthropists inquire whether Transcendentalism does not mean sloth: they had as lief hear that their friend is dead, as that he is a Transcendentalist; for then is he paralyzed, and can never do anything for

humanity. What right, cries the good world, has the man of genius to retreat from work, and indulge himself? The popular literary creed seems to be, "I am a sublime genius; I ought not therefore to labor." But genius is the power to labor better and more availably. Deserve thy genius; exalt it. The good, the illuminated, sit apart from the rest, censuring their dullness and vices, as if they thought that, by sitting very grand in their chairs, the very brokers, attorneys, and congressmen would see the error of their ways, and flock to them. But the good and wise must learn to act, and carry salvation to the combatants and demagogues in the dusty arena below.

On the part of these children, it is replied, that life and their faculty seem to them gifts too rich to be squandered on such trifles as you propose to them. What you call your fundamental institutions, your great and holy causes, seem to them great abuses, and, when nearly seen, paltry matters. Each "Cause," as it is called,—say Abolition, Temperance, say Calvinism, or Unitarianism,—becomes speedily a little shop, where the article, let it have been at first never so subtle and ethereal, is now made up into portable and convenient cakes, and retailed in small quantities to suit purchasers. You make very free use of these words, "great" and "holy" but few things appear to them such. Few persons have any magnificence of nature to inspire enthusiasm, and the philanthropies and charities have a certain air of quackery. As to the general course of living, and the daily employments of men, they cannot see much virtue in these, since they are parts of this vicious circle; and as no great ends are answered by the men, there is nothing noble in the arts by which they are maintained. Nay, they have made the experiment, and found that, from the liberal professions to the coarsest manual labor, and from the courtesies of the academy and the college to the conventions of the cotillon-room and the morning call, there is a spirit of cowardly compromise and seeming, which intimates a frightful skepticism, a life without love, and an activity without an aim.

Unless the action is necessary, unless it is adequate.

I do not wish to perform it. I do not wish to do one thing but once. I do not love routine. Once possessed of the principle, it is equally easy to make four or forty thousand applications of it. A great man will be content to have indicated in any the slightest manner his perception of the reigning Idea of his time, and will leave to those who like it the multiplication of examples. When he has hit the white, the rest may shatter the target. Everything admonishes us how needlessly long life is. Every moment of a hero so raises and cheers us, that a twelvemonth is an age. All that the brave Xanthus brings home from his wars, is the recollection that, at the storming of Samos, "in the heat of the battle, Pericles smiled on me, and passed on to another detachment." It is the quality of the moment, not the number of days, of events, or of actors, that imports.

New, we confess, and by no means happy, is our condition: if you want the aid of our labor, we ourselves stand in greater want of the labor. We are miserable with inaction. We perish of rest and rust: but we do not like your work.

"Then," says the world, "show me your own."

"We have none."

"What will you do, then?" cries the world.

"We will wait."

"How long?"

"Until the Universe rises up and calls us to work."

"But whilst you wait, you grow old and useless."

"Be it so: I can sit in a corner and *perish*, (as you call it,) but I will not move until I have the highest command. If no call should come for years, for centuries, then I know that the want of the Universe is the attestation of faith by my abstinence. Your virtuous projects, so called, do not cheer me. I know that which shall come will cheer me. If I cannot work, at least I need not lie. All that is clearly due to-day is not to lie. In other places, other men have encountered sharp trials, and have behaved themselves well. The martyrs were sawn asunder, or hung alive on meat-hooks. Cannot we screw our courage to patience and truth, and without complaint, or even with good-humor, await our turn of action in the Infinite Counsels?"

But, to come a little closer to the secret of these persons, we must say, that to them it seems a very easy matter to answer the objections of the man of the world, but not so easy to dispose of the doubts and objections that occur to themselves. They are exercised in their own spirit with queries, which acquaint them with all adversity, and with the trials of the bravest heroes. When I asked them concerning their private experience, they answered somewhat in this wise: It is not to be denied that there must be some wide difference between my faith and other faith; and mine is a certain brief experience, which surprised me in the highway or in the market, in some place, at some time,—whether in the body or out of the body, God knoweth,—and made me aware that I had played the fool with fools all this time, but that law existed for me and for all; that to me belong trust, a child's trust and obedience, and the worship of ideas, and I should never be fool more. Well in the space of an hour, probably, I was let down from this height; I was at my old tricks, the selfish member of a selfish society. My life is superficial, takes no root in the deep world; I ask, When shall I die, and be relieved of the responsibility of seeing an Universe which I do not use? I wish to exchange this flash-of-lightning faith for continuous day-light, this fever-glow for a benign climate.

These two states of thought diverge every moment, and stand in wild contrast. To him who looks at his life from these moments of illumination, it will seem that he skulks and plays a mean, shiftless, and subaltern part in the world. That is to be done which he has not skill to do, or to be said which others can say better, and he lies by, or occupies his hands with some plaything, until his hour comes again. Much of our reading, much of our labor, seems mere waiting: it was not that we were born for. Any other could do it as well, or better. So little skill enters into these works, so little do they mix with the divine life, that it really signifies little what we do, whether we turn a grindstone, or ride, or run, or make fortunes, or govern the state. The worst feature of this double consciousness is, that the two lives, of the understanding and of the soul, which we lead, really

show very little relation to each other, never meet and measure each other: one prevails now, all buzz and din, and the other prevails then, all infinitude and paradise; and, with the progress of life, the two discover no greater disposition to reconcile themselves. Yet, what is my faith? What am I? What but a thought of serenity and independence, an abode in the deep blue sky? Presently the clouds shut down again; yet we retain the belief that this petty web we weave will at last be overshot and reticulated with veins of the blue, and that the moments will characterize the days. Patience, then, is for us, is it not? Patience and still patience. When we pass, as presently we shall, into some new infinitude, out of this Iceland of negations, it will please us to reflect that, though we had few virtues or consolations, we bore with our indigence, nor once strove to repair it with hypocrisy or false heat of any kind.

But this class are not sufficiently characterized, if we omit to add that they are lovers and worshipers of Beauty. In the eternal trinity of Truth, Goodness, and Beauty, each in its perfection including the three, they prefer to make Beauty the sign and head. Something of the same taste is observable in all the moral movements of the time, in the religious and benevolent enterprises. They have a liberal, even an æsthetic spirit. A reference to Beauty in action sounds, to be sure, a little hollow and ridiculous in the ears of the old church. In politics, it has often sufficed, when they treated of justice, if they kept the bounds of selfish calculation. If they granted restitution, it was prudence which granted it. But the justice which is now claimed for the black, and the pauper, and the drunkard is for Beauty,—is for a necessity to the soul of the agent, not of the beneficiary. I say, this is the tendency, not yet the realization. Our virtue totters and trips, does not yet walk firmly. Its representatives are austere; they preach and denounce; their rectitude is not yet a grace. They are still liable to that slight taint of burlesque which, in our strange world, attaches to the zealot. A saint should be as dear as the apple of the eye. Yet we are tempted to smile, and we flee from the working to the speculative reformer, to escape that same

slight ridicule. Alas for these days of derision and criticism! We call the Beautiful the highest, because it appears to us the golden mean, escaping the dowdiness of the good, and the heartlessness of the true.—They are lovers of nature also, and find an indemnity in the inviolable order of the world for the violated order and grace of man.

There is, no doubt, a great deal of well-founded objection to be spoken or felt against the sayings and doings of this class, some of whose traits we have selected; no doubt, they will lay themselves open to criticism and to lampoons, and as ridiculous stories will be told of them as of any. There will be cant and pretension; there will be subtilty and moonshine. These persons are of unequal strength, and do not all prosper. They complain that everything around them must be denied; and if feeble, it takes all their strength to deny, before they can begin to lead their own life. Grave seniors insist on their respect to this institution, and that usage; to an obsolete history; to some vocation, or college, or etiquette, or beneficiary, or charity, or morning or evening call, which they resist, as what does not concern them. But it costs such sleepless nights, alienations and misgivings,—they have so many moods about it;—these old guardians never change *their* minds; they have but one mood on their subject, namely, that Antony is very perverse,—that it is quite as much as Antony can do, to assert his rights, abstain from what he thinks foolish, and keep his temper. He can not help the reaction of this injustice in his own mind. He is braced-up and stilted; all freedom and flowing genius, all sallies of wit and frolic nature are quite out of the question; it is well if he can keep from lying, injustice, and suicide. This is no time for gayety and grace. His strength and spirits are wasted in rejection. But the strong spirits overpower those around them without effort. Their thought and emotion comes in like a flood, quite withdraws them from all notice of these carping critics; they surrender themselves with glad heart to the heavenly guide, and only by implication reject the clamorous nonsense of the hour. Grave serious talk to the deaf,—church and old book mumble and ritualize to an unheeding, preoccupied and

advancing mind, and thus they by happiness of greater momentum lose no time, but take the right road at first.

But all these of whom I speak are not proficient; they are novices; they only show the road in which man should travel, when the soul has greater health and prowess. Yet let them feel the dignity of their charge, and deserve a larger power. Their heart is the ark in which the fire is concealed, which shall burn in a broader and universal flame. Let them obey the Genius then most when his impulse is wildest; then most when he seems to lead to uninhabitable deserts of thought and life; for the path which the hero travels alone is the highway of health and benefit to mankind. What is the privilege and nobility of our nature, but its persistency, through its power to attach itself to what is permanent?

Society also has its duties in reference to this class, and must behold them with what charity it can. Possibly some benefit may yet accrue from them to the state. In our Mechanics' Fair, there must be not only bridges, ploughs, carpenter's planes, and baking troughs, but also some few finer instruments,—raingauges, thermometers, and telescopes; and in society, besides farmers, sailors, and weavers, there must be a few persons of purer fire kept specially as gauges and meters of character; persons of a fine, detecting instinct, who betray the smallest accumulations of wit and feeling in the bystander. Perhaps too there might be room for the excitors and monitors; collectors of the heavenly spark with power to convey the electricity to others. Or, as the storm-tossed vessel at sea speaks the frigate or "line packet" to learn its longitude, so it may not be without its advantage that we should now and then encounter rare and gifted men, to compare the points of our spiritual compass, and verify our bearings from superior chronometers.

Amidst the downward tendency and proneness of things, when every voice is raised for a new road or another statute, or a subscription of stock, for an improvement in dress, or in dentistry, for a new house or a larger business, for a political party, or the division of an estate,—will you not tolerate one or two solitary voices in the land, speaking for thoughts

and principles not marketable or perishable? Soon these improvements and mechanical inventions will be superseded; these modes of living lost out of memory; these cities rotted, ruined by war, by new inventions, by new seats of trade, or the geologic changes:—all gone, like the shells which sprinkle the sea-beach with a white colony to-day, forever renewed to be forever destroyed. But the thoughts which these few hermits strove to proclaim by silence, as well as by speech, not only by what they did, but by what they forbore to do, shall abide in beauty and strength to reorganize themselves in nature, to invest themselves anew in other, perhaps higher endowed and happier mixed clay than ours, in fuller union with the surrounding system.

## XIX

### MONTAIGNE; OR, THE SKEPTIC

EVERY fact is related on one side to sensation, and, on the other, to morals. The game of thought is, on the appearance of one of these two sides, to find the other; given the upper, to find the under side. Nothing so thin, but has these two faces; and, when the observer has seen the obverse, he turns it over to see the reverse.

Life is a pitching of this penny,—heads or tails. We never tire of this game, because there is still a slight shudder of astonishment at the exhibition of the other face, at the contrast of the two faces. A man is flushed with success, and bethinks himself what this good luck signifies. He drives his bargain in the street; but it occurs, that he also is bought and sold. He sees the beauty of a human face, and searches the cause of that beauty, which must be more beautiful. He builds his fortunes, maintains the laws, cherishes his children; but he asks himself, why? and where-to? This head and this tail are called, in the language of philosophy, Infinite and Finite; Relative and Absolute; Apparent and Real; and many fine names beside.

Each man is born with a predisposition to one or the other of these sides of nature; and it will easily happen that men will be found devoted to one or the other. One class has the perception of difference, and is conversant with facts and surfaces; cities and persons; and the bringing certain things to pass;—the men of talent and action. Another class have the perception of identity, and are men of faith and philosophy, men of genius.

Each of these riders drives too fast. Plotinus believes only in philosophers; Fenelon, in saints; Pindar and Byron, in poets. Read the haughty language in which Plato and the

Platonists speak of all men who are not devoted to their own shining abstractions: other men are rats and mice. The literary class is usually proud and exclusive. The correspondence of Pope and Swift describes mankind around them as monsters; and that of Goethe and Schiller, in our own time, is scarcely more kind.

It is easy to see how this arrogance comes. The genius is a genius by the first look he casts on any object. Is his eye creative? Does he not rest in angles and colors, but beholds the design,—he will presently undervalue the actual object. In powerful moments, his thought has dissolved the works of art and nature into their causes, so that the works appear heavy and faulty. He has a conception of beauty which the sculptor cannot embody. Picture, statue, temple, railroad, steam-engine, existed first in an artist's mind, without flaw, mistake, or friction, which impair the executed models. So did the church, the state, college, court, social circle, and all the institutions. It is not strange that these men, remembering what they have seen and hoped of ideas, should affirm disdainfully the superiority of ideas. Having at some time seen that the happy soul will carry all the arts in power, they say, Why cumber ourselves with superfluous realizations? and, like dreaming beggars, they assume to speak and act as if these values were already substantiated.

On the other part, the men of toil and trade and luxury,—the animal world, including the animal in the philosopher and poet also,—and the practical world, including the painful drudgeries which are never excused to philosopher or poet any more than to the rest,—weigh heavily on the other side. The trade in our streets believes in no metaphysical causes, thinks nothing of the force which necessitated traders and a trading planet to exist: no, but sticks to cotton, sugar, wool, and salt. The ward meetings, on election days, are not softened by any misgiving of the value of these bal-lotings. Hot life is streaming in a single direction. To the men of this world, to the animal strength and spirits, to the men of practical power, whilst immersed in it, the man of ideas appears out of his reason. They alone have reason.

Things always bring their own philosophy with them, that is, prudence. No man acquires property without acquiring with it a little arithmetic, also. In England, the richest country that ever existed, property stands for more, compared with personal ability, than in any other. After dinner, a man believes less, denies more: verities have lost some charm. After dinner, arithmetic is the only science: ideas are disturbing, incendiary, follies of young men, repudiated by the solid portion of society: and a man comes to be valued by his athletic and animal qualities. Spence relates, that Mr. Pope was with Sir Godfrey Kneller, one day, when his nephew, a Guinea trader, came in. "Nephew," said Sir Godfrey, "you have the honor of seeing the two greatest men in the world." "I don't know how great men you may be," said the Guinea man, "but I don't like your looks. I have often bought a man much better than both of you, all muscles and bones, for ten guineas." Thus, the men of the senses revenge themselves on the professors, and repay scorn for scorn. The first had leaped to conclusions not yet ripe, and say more than is true; the others make themselves merry with the philosopher, and weigh man by the pound.—They believe that mustard bites the tongue, that pepper is hot, friction-matches are incendiary, revolvers to be avoided, and suspenders hold up pantaloons; that there is much sentiment in a chest of tea; and a man will be eloquent, if you give him good wine. Are you tender and scrupulous,—you must eat more mince-pie. They hold that Luther had milk in him when he said,

"Wer nicht liebt Wein, Weib, und Gesang  
Der bleibt ein Narr sein Leben lang;"

and when he advised a young scholar perplexed with fore-ordination and free-will, to get well drunk. "The nerves," says Cabanis, "they are the man." My neighbor, a jolly farmer, in the tavern bar-room, thinks that the use of money is sure and speedy spending. "For his part," he says, "he puts his down his neck, and gets the good of it."

The inconvenience of this way of thinking is, that it runs into indifferentism and then into disgust. Life is eating us

up. We shall be fables presently. Keep cool: it will be all one a hundred years hence. Life's well enough; but we shall be glad to get out of it, and they will all be glad to have us. Why should we fret and drudge? Our meat will taste to-morrow as it did yesterday, and we may at last have had enough of it. "Ah," said my languid gentleman at Oxford, "there's nothing new or true,—and no matter."

With a little more bitterness, the cynic moans: our life is like an ass led to market by a bundle of hay being carried before him: he sees nothing but the bundle of hay. "There is so much trouble in coming into the world," said Lord Bolingbroke, "and so much more, as well as meanness, in going out of it, that 'tis hardly worth while to be here at all." I knew a philosopher of this kidney, who was accustomed briefly to sum up his experience of human nature in saying, "Mankind is a damned rascal:" and the natural corollary is pretty sure to follow,—"The world lives by humbug, and so will I."

The abstractionist and the materialist thus mutually exasperating each other, and the scoffer expressing the worst of materialism, there arises a third party to occupy the middle ground between these two, the skeptic, namely. He finds both wrong by being in extremes. He labors to plant his feet, to be the beam of the balance. He will not go beyond his card. He sees the one-sidedness of these men of the street; he will not be a Gibeonite; he stands for the intellectual faculties, a cool head, and whatever serves to keep it cool: no unadvised industry, no unrewarded self-devotion, no loss of the brains in toil. Am I an ox, or a dray?—You are both in extremes, he says. You that will have all solid, and a world of pig-lead, deceive yourselves grossly. You believe yourselves rooted and grounded on adamant; and yet, if we uncover the last facts of our knowledge, you are spinning like bubbles in a river, you know not whither or whence, and you are bottomed and capped and wrapped in delusions.

Neither will he be betrayed to a book, and wrapped in a gown. The studious class are their own victims: they are thin and pale, their feet are cold, their heads are hot, the night is without sleep, the day a fear of interruption,—

pallor, squalor, hunger, and egotism. If you come near them, and see what conceits they entertain,—they are abstractionists, and spend their days and nights in dreaming some dreams; in expecting the homage of society to some precious scheme built on a truth, but destitute of proportion in its presentment, of justness in its application, and of all energy of will in the schemer to embody and vitalize it.

But I see plainly, he says, that I cannot see. I know that human strength is not in extremes, but in avoiding extremes. I, at least, will shun the weakness of philosophizing beyond my depth. What is the use of pretending to powers we have not? What is the use of pretending to assurances we have not, respecting the other life? Why exaggerate the power of virtue? Why be an angel before your time? These strings, wound up too high, will snap. If there is a wish for immortality, and no evidence, why not say just that? If there are conflicting evidences, why not state them? If there is not ground for a candid thinker to make up his mind, yea or nay,—why not suspend the judgment? I weary of these dogmatizers. I tire of these hacks of routine, who deny the dogmas. I neither affirm nor deny. I stand here to try the case. I am here to consider, *σκεπτεῖν*, to consider how it is. I will try to keep the balance true. Of what use to take the chair, and glibly rattle off theories of societies, religion, and nature, when I know that practical objections lie in the way, insurmountable by me and by my mates? Why so talkative in public, when each of my neighbors can pin me to my seat by arguments I cannot refute? Why pretend that life is so simple a game, when we know how subtle and elusive the Proteus is? Why think to shut up all things in your narrow coop, when we know there are not one or two only, but ten, twenty, a thousand things, and unlike? Why fancy that you have all the truth in your keeping? There is much to say on all sides.

Who shall forbid a wise skepticism, seeing that there is no practical question on which any thing more than an approximate solution can be had? Is not marriage an open question, when it is alleged, from the beginning of the world,

that such as are in the institution wish to get out, and such as are out wish to get in? And the reply of Socrates, to him who asked whether he should choose a wife, still remains reasonable, "that, whether he should choose one or not, he would repent it." Is not the state a question? All society is divided in opinion on the subject of the state. Nobody loves it; great numbers dislike it, and suffer conscientious scruples to allegiance: and the only defence set up, is, the fear of doing worse in disorganizing. Is it otherwise with the church? Or, to put any of the questions which touch mankind nearest,—shall the young man aim at a leading part in law, in politics, in trade? It will not be pretended that a success in either of these kinds is quite coincident with what is best and inmost in his mind. Shall he, then, cutting the stays that hold him fast to the social state, put out to sea with no guidance but his genius? There is much to say on both sides. Remember the open question between the present order of "competition," and the friends of "attractive and associated labor." The generous minds embrace the proposition of labor shared by all; it is the only honesty; nothing else is safe. It is from the poor man's sweat alone, that strength and virtue come: and yet, on the other side, it is alleged that labor impairs the form, and breaks the spirit of man, and the laborers cry unanimously, "We have no thoughts." Culture, how indispensable! I cannot forgive you the want of accomplishment; and yet, culture will instantly destroy that chiefest beauty of spontaneousness. Excellent is culture for a savage; but once let him read in the book, and he is no longer able not to think of Plutarch's heroes. In short, since true fortitude of understanding consists "in not letting what we know be embarrassed by what we do not know," we ought to secure those advantages which we can command, and not risk them by clutching after the airy and unattainable. Come, no chimeras! Let us go abroad, let us mix in affairs; let us learn, and get, and have, and climb. "Men are a sort of moving plants, and, like trees, receive a great part of their nourishment from the air. If they keep too much at home, they pine." Let us have a robust, manly life, let us know

what we know, for certain; what we have, let it be solid, and seasonable, and our own. A world in the hand is worth two in the bush. Let us have to do with real men and women, and not with skipping ghosts.

This, then, is the right ground of the skeptic,—this of consideration, of self-containing; not at all of unbelief; not at all of universal denying, nor of universal doubting,—doubting even that he doubts; least of all, of scoffing and profligate jeering at all that is stable and good. These are no more his moods than are those of religion and philosophy. He is the considerer, the prudent, taking in sail, counting stock, husbanding his means, believing that a man has too many enemies, than that he can afford to be his own; that we cannot give ourselves too many advantages, in this unequal conflict, with powers so vast and unwearable ranged on one side, and this little, conceited, vulnerable popinjay that a man is, bobbing up and down into every danger, on the other. It is a position taken up for better defence, as of more safety, and one that can be maintained; and it is one of more opportunity and range: as, when we build a house, the rule is, to set it not too high nor too low, under the wind, but out of the dirt.

The philosophy we want is one of fluxions and mobility. The Spartan and Stoic schemes are too stark and stiff for our occasion. A theory of Saint John, and of non-resistance, seems, on the other hand, too thin and aerial. We want some coat woven of elastic steel, stout as the first, and limber as the second. We want a ship in these billows we inhabit. An angular, dogmatic house would be rent to chips and splinters, in this storm of many elements. No, it must be tight, and fit to the form of man, to live at all; as a shell is the architecture of a house founded on the sea. The soul of man must be the type of our scheme, just as the body of man is the type after which a dwelling-house is built. Adaptiveness is the peculiarity of human nature. We are golden averages, volitant stabilities, compensated or periodic errors, houses founded on the sea. The wise skeptic wishes to have a near view of the best game, and the chief players; what is best in the planet; art and nature, places

and events, but mainly men. Every thing that is excellent in mankind,—a form of grace, an arm of iron, lips of persuasion, a brain of resources, every one skilful to play and win,—he will see and judge.

The terms of admission to this spectacle, are, that he have a certain solid and intelligible way of living of his own; some method of answering the inevitable needs of human life; proof that he has played with skill and success; that he has evinced the temper, stoutness, and the range of qualities which, among his contemporaries and countrymen, entitle him to fellowship and trust. For, the secrets of life are not shown except to sympathy and likeness. Men do not confide themselves to boys, or coxcombs, or pedants, but to their peers. Some wise limitation, as the modern phrase is; some condition between the extremes, and having itself a positive quality; some stark and sufficient man, who is not salt or sugar, but sufficiently related to the world to do justice to Paris or London, and, at the same time, a vigorous and original thinker, whom cities can not overawe, but who uses them,—is the fit person to occupy this ground of speculation.

These qualities meet in the character of Montaigne. And yet, since the personal regard which I entertain for Montaigne may be unduly great, I will, under the shield of this prince of egotists, offer, as an apology for electing him as the representative of skepticism, a word or two to explain how my love began and grew for this admirable gossip.

A single odd volume of Cotton's translation of the *Essays* remained to me from my father's library, when a boy. It lay long neglected, until, after many years, when I was newly escaped from college, I read the book, and procured the remaining volumes. I remember the delight and wonder in which I lived with it. It seemed to me as if I had myself written the book, in some former life, so sincerely it spoke to my thought and experience. It happened, when in Paris, in 1833, that, in the cemetery of Père la Chaise, I came to the tomb of Augustus Collignon, who died in 1830, aged sixty-eight years, and who, said the monument, "lived to do right, and had formed himself to virtue on the *Essays* of Mon-

taigne." Some years later, I became acquainted with an accomplished English poet, John Sterling; and, in prosecuting my correspondence, I found that, from a love of Montaigne, he had made a pilgrimage to his château, still standing near Castellan, in Perigord, and, after two hundred and fifty years, had copied from the walls of his library the inscriptions which Montaigne had written there. That Journal of Mr. Sterling's, published in the Westminster Review, Mr. Hazlitt has reprinted in the *Prolegomena* to his edition of the Essays. I heard with pleasure that one of the newly-discovered autographs of William Shakspeare was in a copy of Florio's translation of Montaigne. It is the only book which we certainly know to have been in the poet's library. And, oddly enough, the duplicate copy of Florio, which the British Museum purchased, with a view of protecting the Shakspeare autograph (as I was informed in the Museum) turned out to have the autograph of Ben Jonson in the fly-leaf. Leigh Hunt relates of Lord Byron, that Montaigne was the only great writer of past times whom he read with avowed satisfaction. Other coincidences, not needful to be mentioned here, concurred to make this old Gascon still new and immortal for me.

In 1571, on the death of his father, Montaigne, then thirty-eight years old, retired from the practice of law, at Bordeaux, and settled himself on his estate. Though he had been a man of pleasure, and sometimes a courtier, his studious habits now grew on him, and he loved the compass, staidness, and independence, of the country gentleman's life. He took up his economy in good earnest, and made his farm yield the most. Downright and plain-dealing, and abhorring to be deceived or to deceive, he was esteemed in the country for his sense and probity. In the civil wars of the League, which converted every house into a fort, Montaigne kept his gates open, and his house without defence. All parties freely came and went, his courage and honor being universally esteemed. The neighboring lords and gentry brought jewels and papers to him for safe-keeping. Gibbon reckons in these bigoted times, but two men of liberality in France,—Henry IV. and Montaigne.

Montaigne is the frankest and honestest of all writers. His French freedom runs into grossness; but he has anticipated all censures by the bounty of his own confessions. In his times, books were written to one sex only, and almost all were written in Latin; so that, in a humorist, a certain nakedness of statement was permitted, which our manners, of a literature addressed equally to both sexes, do not allow. But, though a biblical plainness, coupled with a most uncanonical levity, may shut his pages to many sensitive readers, yet the offence is superficial. He parades it: he makes the most of it; nobody can think or say worse of him than he does. He pretends to most of the vices; and, if there be any virtue in him, he says, it got in by stealth. There is no man, in his opinion, who has not deserved hanging five or six times; and he pretends no exception in his own behalf. "Five or six as ridiculous stories," too, he says, "can be told of me, as of any man living." But, with all this really superfluous frankness, the opinion of an invincible probity grows into every reader's mind.

"When I the most strictly and religiously confess myself, I find that the best virtue I have has in it some tincture of vice; and I am afraid that Plato, in his purest virtue (I, who am as sincere and perfect a lover of virtue of that stamp as any other whatever), if he had listened, and laid his ear close to himself, would have heard some jarring sound of human mixture; but faint and remote, and only to be perceived by himself."

Here is an impatience and fastidiousness at color or pretence of any kind. He has been in courts so long as to have conceived a furious disgust at appearances; he will indulge himself with a little cursing and swearing; he will talk with sailors and gypsies, use flash and street ballads: he has stayed in-doors till he is deadly sick: he will to the open air, though it rain bullets. He has seen too much of gentlemen of the long robe, until he wishes for cannibals; and is so nervous, by factitious life, that he thinks, the more barbarous man is, the better he is. He likes his saddle. You may read theology, and grammar, and metaphysics elsewhere. Whatever you get here, shall smack of the earth and

of real life, sweet, or smart, or stinging. He makes no hesitation to entertain you with the records of his disease; and his journey to Italy is quite full of that matter. He took and kept this position of equilibrium. Over his name he drew an emblematic pair of scales, and wrote *Que scais je?* under it. As I look at his effigy opposite the title-page, I seem to hear him say, "You may play old Poz, if you will; you may rail and exaggerate,—I stand here for truth, and will not, for all the states, and churches, and revenues, and personal reputations of Europe, overstate the dry fact, as I see it; I will rather mumble and prose about what I certainly know,—my house and barns; my father, my wife, and my tenants; my old lean bald pate; my knives and forks; what meats I eat, and what drinks I prefer; and a hundred straws just as ridiculous,—than I will write, with a fine crow-quill, a fine romance. I like gray days, and autumn and winter weather. I am gray and autumnal myself, and think an undress, and old shoes that do not pinch my feet, and old friends who do not constrain me, and plain topics where I do not need to strain myself and pump my brains, the most suitable. Our condition as men is risky and ticklish enough. One can not be sure of himself and his fortune an hour, but he may be whisked off into some pitiable or ridiculous plight. Why should I vapor and play the philosopher, instead of ballasting, the best I can, this dancing balloon? So, at least, I live within compass, keep myself ready for action, and can shoot the gulf, at last, with decency. If there be anything farcical in such a life, the blame is not mine: let it lie at fate's and nature's door."

The Essays, therefore, are an entertaining soliloquy on every random topic that comes into his head; treating every thing without ceremony, yet with masculine sense. There have been men with deeper insight; but, one would say, never a man with such abundance of thoughts: he is never dull, never insincere, and has the genius to make the reader care for all that he cares for.

The sincerity and marrow of the man reaches to his sentences. I know not any where the book that seems less written. It is the language of conversation transferred to

a book. Cut these words, and they would bleed: they are vascular and alive. One has the same pleasure in it that we have in listening to the necessary speech of men about their work, when any unusual circumstance gives momentary importance to the dialogue. For blacksmiths and teamsters do not trip in their speech; it is a shower of bullets. It is Cambridge men who correct themselves, and begin again at every half sentence, and, moreover, will pun, and refine too much, and swerve from the matter to the expression. Montaigne talks with shrewdness, knows the world, and books, and himself, and uses the positive degree: never shrieks, or protests, or prays: no weakness, no convulsion, no superlative; does not wish to jump out of his skin, or play any antics, or annihilate space or time; but is stout and solid; tastes every moment of the day; likes pain, because it makes him feel himself, and realize things; as we pinch ourselves to know that we are awake. He keeps the plain; he rarely mounts or sinks; likes to feel solid ground, and the stones underneath. His writing has no enthusiasms, no aspiration; contented, self-respecting, and keeping the middle of the road. There is but one exception,—in his love for Socrates. In speaking of him, for once his cheek flushes, and his style rises to passion.

Montaigne died of a quinsy, at the age of sixty, in 1592. When he came to die, he caused a mass to be celebrated in his chamber. At the age of thirty-three, he had been married. "But," he says, "might I have had my own will, I would not have married Wisdom herself, if she would have had me: but 'tis to much purpose to evade it, the common custom and use of life will have it so. Most of my actions are guided by example, not choice." In the hour of death he gave the same weight to custom. *Que sçais je?* What do I know.

This book of Montaigne the world has endorsed, by translating it into all tongues, and printing seventy-five editions of it in Europe: and that, too, a circulation somewhat chosen, namely, among courtiers, soldiers, princes, men of the world, and men of wit and generosity.

Shall we say that Montaigne has spoken wisely, and given

the right and permanent expression of the human mind, on the conduct of life?

We are natural believers. Truth, or the connection between cause and effect, alone interests us. We are persuaded that a thread runs through all things: all worlds are strung on it, as beads: and men, and events, and life, come to us, only because of that thread: they pass and repass, only that we may know the direction and continuity of that line. A book or statement which goes to show that there is no line, but random and chaos, a calamity out of nothing, a prosperity and no account of it, a hero born from a fool, a fool from a hero,—dispirits us. Seen or unseen, we believe the tie exists. Talent makes counterfeit ties; genius finds the real ones. We hearken to the man of science, because we anticipate the sequence in natural phenomena which he uncovers. We love whatever affirms, connects, preserves; and dislike what scatters or pulls down. One man appears whose nature is to all men's eyes conserving and constructive: his presence supposes a well-ordered society, agriculture, trade, large institutions, and empire. If these did not exist, they would begin to exist through his endeavors. Therefore, he cheers and comforts men, who feel all this in him very readily. The nonconformist and the rebel say all manner of unanswerable things against the existing republic, but discover to our sense no plan of house or state of their own. Therefore, though the town and state, and way of living, which our counsellor contemplated, might be a very modest or musty prosperity, yet men rightly go for him, and reject the reformer, so long as he comes only with axe and crowbar.

But though we are natural conservers and causationists, and reject a sour, dumpish unbelief, the skeptical class, which Montaigne represents, have reason, and every man, at some time, belongs to it. Every superior mind will pass through this domain of equilibration,—I should rather say, will know how to avail himself of the checks and balances in nature, as a natural weapon against the exaggeration and formalism of bigots and blockheads.

Skepticism is the attitude assumed by the student in re-

lation to the particulars which society adores, but which he sees to be reverend only in their tendency and spirit. The ground occupied by the skeptic is the vestibule of the temple. Society does not like to have any breath of question blown on the existing order. But the interrogation of custom at all points is an inevitable stage in the growth of every superior mind, and is the evidence of its perception of the flowing power which remains itself in all changes.

The superior mind will find itself equally at odds with the evils of society, and with the projects that are offered to relieve them. The wise skeptic is a bad citizen; no conservative; he sees the selfishness of property, and the drowsiness of institutions. But neither is he fit to work with any democratic party that ever was constituted; for parties wish every one committed, and he penetrates the popular patriotism. His politics are those of the "Soul's Errand" of Sir Walter Raleigh; or of Krishna, in the Bhagavat. "There is none who is worthy of my love or hatred;" while he sentences law, physic, divinity, commerce, and custom. He is a reformer: yet he is no better member of the philanthropic association. It turns out that he is not the champion of the operative, the pauper, the prisoner, the slave. It stands in his mind, that our life in this world is not of quite so easy interpretation as churches and school-books say. He does not wish to take ground against these benevolences, to play the part of devil's attorney, and blazon every doubt and sneer that darkens the sun for him. But he says, There are doubts.

I meant to use the occasion, and celebrate the calendar-day of our Saint Michel de Montaigne, by counting and describing these doubts or negations. I wish to ferret them out of their holes, and sun them a little. We must do with them as the police do with old rogues, who are shown up to the public at the marshall's office. They will never be so formidable, when once they have been identified and registered. But I mean honestly by them,—that justice shall be done to their terrors. I shall not take Sunday objections, made up on purpose to be put down. I shall take the worst I can find. whether I can dispose of them or they of me.

I do not press the skepticism of the materialist. I know, the quadruped opinion will not prevail. 'Tis of no importance what bats and oxen think. The first dangerous symptom I report, is, the levity of intellect; as if it were fatal to earnestness to know much. Knowledge is the knowing that we can not know. The dull pray; the geniuses are light mockers. How respectable is earnestness on every platform! but intellect kills it. Nay, San Carlo, my subtle and admirable friend, one of the most penetrating of men, finds that all direct ascension, even of lofty piety, leads to this ghastly insight, and sends back the votary orphaned. My astonishing San Carlo thought the lawgivers and saints infected. They found the ark empty; saw, and would not tell; and tried to choke off their approaching followers, by saying, "Action, action, my dear fellows, is for you!" Bad as was to me this detection by San Carlo, this frost in July, this blow from a brick, there was still a worse, namely, the cloy or satiety of the saints. In the mount of vision, ere they have yet risen from their knees, they say, "We discover that this our homage and beatitude is partial and deformed; we must fly for relief to the suspected and reviled Intellect, to the Understanding, the Mephistopheles, to the gymnastics of talent."

This is hobgoblin the first; and, though it has been the subject of much elegy, in our nineteenth century, from Byron, Goethe, and other poets of less fame, not to mention many distinguished private observers,—I confess it is not very affecting to my imagination; for it seems to concern the shattering of baby-houses and crockery-shops. What flutters the church of Rome, or of England, or of Geneva, or of Boston, may yet be very far from touching any principle of faith. I think that the intellect and moral sentiment are unanimous; and that, though philosophy extirpates bugbears, yet it supplies the natural checks of vice, and polarity to the soul. I think that the wiser a man is, the more stupendous he finds the natural and moral economy, and lifts himself to a more absolute reliance.

There is the power of moods, each setting at nought all but its own tissue of facts and beliefs. There is the power

of complexions, obviously modifying the dispositions and sentiments. The beliefs and unbeliefs appear to be structural; and, as soon as each man attains the poise and vivacity which allow the whole machinery to play, he will not need extreme examples, but will rapidly alternate all opinions in his own life. Our life is March weather, savage and serene in one hour. We go forth austere, dedicated, believing in the iron links of Destiny, and will not turn on our heel to save our life: but a book, or a bust, or only the sound of a name, shoots a spark through the nerves, and we suddenly believe in will: my finger-ring shall be the seal of Solomon: fate is for imbeciles: all is possible to the resolved mind. Presently, a new experience gives a new turn to our thoughts: common sense resumes its tyranny: we say, "Well, the army, after all, is the gate to fame, manners, and poetry: and, look you,—on the whole, selfishness plants best, prunes best, makes the best commerce, and the best citizen." Are the opinions of a man on right and wrong, on fate and causation, at the mercy of a broken sleep or an indigestion? Is his belief in God and Duty no deeper than a stomach evidence? And what guaranty for the permanence of his opinions? I like not the French celerity,—a new church and state once a week.—This is the second negation; and I shall let it pass for what it will. As far as it asserts rotation of states of mind, I suppose it suggests its own remedy, namely, in the record of larger periods. What is the mean of many states; of all the states? Does the general voice of ages affirm any principle, or is no community of sentiment discoverable in distant times and places, And when it shows the power of self-interest, I accept that as a part of the divine law, and must reconcile it with aspiration the best I can.

The word Fate, or Destiny, expresses the sense of mankind, in all ages,—that the laws of the world do not always befriend, but often hurt and crush us. Fate, in the shape of *Kinde* or nature, grows over us like grass. We paint Time with a scythe; Love and Fortune, blind; and Destiny, deaf. We have too little power of resistance against this ferocity which champs us up. What front can we make against

these unavoidable, victorious, maleficent forces? What can I do against the influence of Race, in my history? What can I do against hereditary and constitutional habits, against scrofula, lymph, impotence? against climate, against barbarism, in my country? I can reason down or deny every thing, except this perpetual Belly: feed he must and will, and I cannot make him respectable.

But the main resistance which the affirmative impulse finds, and one including all others, is in the doctrine of the Illusionists. There is a painful rumor in circulation, that we have been practised upon in all the principal performances of life, and free agency is the emptiest name. We have been sopped and drugged with the air, with food, with woman, with children, with sciences, with events, which leave us exactly where they found us. The mathematics, 'tis complained, leave the mind where they find it: so do all sciences; and so do all events and actions. I find a man who has passed through all the sciences, the churl he was; and, through all the offices, learned, civil, and social, can detect the child. We are not the less necessitated to dedicate life to them. In fact, we may come to accept it as the fixed rule and theory of our state of education, that God is a substance, and his method is illusion. The eastern sages owned the goddess Yoganidra, the great illusory energy of Vishnu, by whom, as utter ignorance, the whole world is beguiled.

Or, shall I state it thus?—The astonishment of life, is, the absence of any appearance of reconciliation between the theory and practice of life. Reason, the prized reality, the Law, is apprehended, now and then, for a serene and profound moment, amidst the hubbub of cares and works which have no direct bearing on it;—is then lost, for months or years, and again found, for an interval, to be lost again. If we compute it in time, we may, in fifty years, have half a dozen reasonable hours. But what are these cares and works the better? A method in the world we do not see, but this parallelism of great and little, which never react on each other, nor discover the smallest tendency to converge.

Experiences, fortunes, governings, readings, writings are nothing to the purpose; as when a man comes into the room, it does not appear whether he has been fed on yams or buffalo,—he has contrived to get so much bone and fibre as he wants, out of rice or out of snow. So vast is the disproportion between the sky of law and the pismire of performance under it, that, whether he is a man of worth or a sot, is not so great a matter as we say. Shall I add, as one juggle of this enchantment, the stunning non-intercourse law which makes coöperation impossible? The young spirit pants to enter society. But all the ways of culture and greatness lead to solitary imprisonment. He has been often baulked. He did not expect a sympathy with his thought from the village, but he went with it to the chosen and intelligent, and found no entertainment for it, but mere misapprehension, distaste, and scoffing. Men are strangely mistimed and misapplied; and the excellence of each is an inflamed individualism which separates him more.

There are these, and more than these diseases of thought, which our ordinary teachers do not attempt to remove. Now shall we, because a good nature inclines us to virtue's side, say, There are no doubts,—and lie for the right? Is life to be led in a brave or in a cowardly manner? and is not the satisfaction of the doubts essential to all manliness? Is the name of virtue to be a barrier to that which is virtue? Can you not believe that a man of earnest and burly habit may find small good, in tea, essays, and catechism, and want a rougher instruction, want men, labor, trade, farming, war, hunger, plenty, love, hatred, doubt, and terror, to make things plain to him; and has he not a right to insist on being convinced in his own way? When he is convinced, he will be worth the pains.

Belief consists in accepting the affirmations of the soul; unbelief, in denying them. Some minds are incapable of skepticism. The doubts they profess to entertain are rather a civility or accommodation to the common discourse of their company. They may well give themselves leave to speculate, for they are secure of a return. Once admitted to the heaven of thought, they see no relapse into night, but

infinite invitation on the other side. Heaven is within heaven, and sky over sky, and they are encompassed with divinities. Others there are, to whom the heaven is brass, and it shuts down to the surface of the earth. It is a question of temperament, or of more or less immersion in nature. The last class must needs have a reflex or parasite faith; not a sight of realities, but an instinctive reliance on the seers and believers of realities. The manners and thoughts of believers astonish them, and convince them that these have seen something which is hid from themselves. But their sensual habit would fix the believer to his last position, whilst he as inevitably advances; and presently the unbeliever, for love of belief, burns the believer.

Great believers are always reckoned infidels, impracticable, fantastic, atheistic, and really men of no account. The spiritualist finds himself driven to express his faith by a series of skepticisms. Charitable souls come with their projects, and ask his coöperation. How can he hesitate? It is the rule of mere comity and courtesy to agree where you can, and to turn your sentence with something auspicious, and not freezing and sinister. But he is forced to say, "O, these things will be as they must be: what can you do? These particular griefs and crimes are the foliage and fruit of such trees as we see growing. It is vain to complain of the leaf or the berry: cut it off; it will bear another just as bad. You must begin your cure lower down." The generousities of the day prove an intractable element for him. The people's questions are not his; their methods are not his; and, against all the dictates of good nature, he is driven to say, he has no pleasure in them.

Even the doctrines dear to the hope of man, of the divine Providence, and of the immortality of the soul, his neighbors cannot put the statement so that he shall affirm it. But he denies out of more faith, and not less. He denies out of honesty. He had rather stand charged with the imbecility of skepticism, than with untruth. I believe, he says, in the moral design of the universe; it exists hospitably for the weal of souls; but your dogmas seem to me caricatures:

why should I make believe them? Will any say, this is cold and infidel? The wise and magnanimous will not say so. They will exult in his far-sighted good-will, that can abandon to the adversary all the ground of tradition and common belief, without losing a jot of strength. It sees to the end of all transgression. George Fox saw "that there was an ocean of darkness and death; but withal, an infinite ocean of light and love which flowed over that of darkness."

The final solution in which skepticism is lost is in the moral sentiment, which never forfeits its supremacy. All moods may be safely tried, and their weight allowed to all objections: the moral sentiment as easily outweighs them all, as any one. This is the drop which balances the sea. I play with the miscellany of facts, and take those superficial views which we call skepticism; but I know that they will presently appear to me in that order which makes skepticism impossible. A man of thought must feel the thought that is parent of the universe: that the masses of nature do undulate and flow.

This faith avails to the whole emergency of life and objects. The world is saturated with deity and with law. He is content with just and unjust, with sots and fools, with the triumph of folly and fraud. He can behold with serenity the yawning gulf between the ambition of man and his power of performance, between the demand and supply of power, which makes the tragedy of all souls.

Charles Fourier announced that "the attractions of man are proportioned to his destinies"; in other words, that every desire predicts its own satisfaction. Yet, all experience exhibits the reverse of this; the incompetency of power is the universal grief of young and ardent minds. They accuse the divine providence of a certain parsimony. It has shown the heaven and earth to every child, and filled him with a desire for the whole; a desire raging, infinite; a hunger, as of space to be filled with planets; a cry of famine, as of devils for souls. Then for the satisfaction,—to each man is administered a single drop, a bead of dew of vital power *per day*,—a cup as large as space, and one drop of the water

of life in it. Each man woke in the morning, with an appetite that could eat the solar system like a cake; a spirit for action and passion without bounds; he could lay his hand on the morning star: he could try conclusions with gravitation or chemistry; but, on the first motion to prove his strength—hands, feet, senses, gave way, and would not serve him. He was an emperor deserted by his states, and left to whistle by himself, or thrust into a mob of emperors, all whistling: and still the sirens sang, "The attractions are proportioned to the destinies." In every house, in the heart of each maiden, and of each boy, in the soul of the soaring saint, this chasm is found,—between the largest promise of ideal power, and the shabby experience.

The expansive nature of truth comes to our succor, elastic, not to be surrounded. Man helps himself by larger generalizations. The lesson of life is practically to generalize; to believe what the years and the centuries say against the hours; to resist the usurpation of particulars; to penetrate to their catholic sense. Things seem to say one thing, and say the reverse. The appearance is immoral; the result is moral. Things seem to tend downward, to justify despondency, to promote rogues, to defeat the just; and, by knaves, as by martyrs, the just cause is carried forward. Although knaves win in every political struggle, although society seems to be delivered over from the hands of one set of criminals into the hands of another set of criminals, as fast as the government is changed, and the march of civilization is a train of felonies, yet, general ends are somehow answered. We see, now, events forced on, which seem to retard or retrograde the civility of ages. But the world-spirit is a good swimmer, and storms and waves cannot drown him. He snaps his finger at laws: and so, throughout history, heaven seems to affect low and poor means. Through the years and the centuries, through evil agents, through toys and atoms, a great and beneficent tendency irresistibly streams.

Let a man learn to look for the permanent in the mutable and fleeting; let him learn to bear the disappearance of things he was wont to reverence, without losing his

reverence; let him learn that he is here, not to work, but to be worked upon; and that, though abyss open under abyss, and opinion displace opinion, all are at last contained in the Eternal cause.—

“If my bark sink 'tis to another sea.”

## XX

### NAPOLEON; OR, THE MAN OF THE WORLD

AMONG the eminent persons of the nineteenth century, Bonaparte is far the best known, and the most powerful; and owes his predominance to the fidelity with which he expresses the tone of thought and belief, the aims of the masses of active and cultivated men. It is Swedenborg's theory, that every organ is made up of homogeneous particles: or, as it is sometimes expressed, every whole is made of similars; that is, the lungs are composed of infinitely small lungs; the liver, of infinitely small livers; the kidney, of little kidneys, &c. Following this analogy, if any man is found to carry with him the power and affections of vast numbers, if Napoleon is France, if Napoleon is Europe, it is because the people whom he sways are little Napoleons.

In our society, there is a standing antagonism between the conservative and the democratic classes; between those who have made their fortunes, and the young and the poor who have fortunes to make; between the interests of dead labor,—that is, the labor of hands long ago still in the grave, which labor is now entombed in money stocks, or in land and buildings owned by idle capitalists,—and the interests of living labor, which seeks to possess itself of land, and buildings, and money stocks. The first class is timid, selfish, illiberal, hating innovation, and continually losing numbers by death. The second class is selfish also, encroaching, bold, self-relying, always outnumbering the other, and recruiting its numbers every hour by births. It desires to keep open every avenue to the competition of all, and to multiply avenues;—the class of business men in America, in England, in France, and throughout Europe; the class of industry and skill. Napoleon is its representative. The instinct of

active, brave, able men, throughout the middle class every where, has pointed out Napoleon as the incarnate Democrat. He had their virtues, and their vices; above all, he had their spirit or aim. That tendency is material, pointing at a sensual success, and employing the richest and most various means to that end; conversant with mechanical powers, highly intellectual, widely and accurately learned and skilful, but subordinating all intellectual and spiritual forces into means to a material success. To be the rich man, is the end. "God has granted," says the Koran, "to every people a prophet in its own tongue." Paris, and London and New York, the spirit of commerce, of money, and material power, were also to have their prophet; and Bonaparte was qualified and sent.

Every one of the million readers of anecdotes, or memoirs, or lives of Napoleon, delights in the page, because he studies in it his own history. Napoleon is thoroughly modern, and, at the highest point of his fortunes, has the very spirit of the newspapers. He is no saint,—to use his own word, "no apuchin," and he is no hero, in the high sense. The man in the street finds in him the qualities and powers of other men in the street. He finds him, like himself, by birth a citizen, who, by very intelligible merits, arrived at such a commanding position, that he could indulge all those tastes which the common man possesses, but is obliged to conceal and deny: good society, good books, fast travelling, dress, dinners, servants without number, personal weight, the execution of his ideas, the standing in the attitude of a benefactor to all persons about him, the refined enjoyments of pictures, statues, music, palaces, and conventional honors,—precisely what is agreeable to the heart of every man in the nineteenth century,—this powerful man possessed.

It is true that a man of Napoleon's truth of adaptation to the mind of the masses around him, becomes not merely representative, but actually a monopolizer and usurper of other minds. Thus Mirabeau plagiarized every good thought, every good word, that was spoken in France. Dumont relates, that he sat in the gallery of the Convention, and heard Mirabeau make a speech. It struck Dumont that he

could fit it with a peroration, which he wrote in pencil immediately, and showed to Lord Elgin, who sat by him. Lord Elgin approved it, and Dumont, in the evening, showed it to Mirabeau. Mirabeau read it, pronounced it admirable, and declared he would incorporate it into his harangue, to-morrow, to the Assembly. "It is impossible," said Dumont, "as, unfortunately, I have shown it to Lord Elgin." "If you have shown it to Lord Elgin, and to fifty persons beside, I shall still speak it to-morrow:" and he did speak it, with much effect, at the next day's session. For Mirabeau, with his overpowering personality, felt that these things, which his presence inspired, were as much his own, as if he had said them, and that his adoption of them gave them their weight. Much more absolute and centralizing was the successor to Mirabeau's popularity, and to much more than his predominance in France. Indeed, a man of Napoleon's stamp almost ceases to have a private speech and opinion. He is so largely receptive, and is so placed, that he comes to be a bureau for all the intelligence, wit, and power, of the age and country. He gains the battle: he makes the code: he makes the system of weights and measures; he levels the Alps; he builds the road. All distinguished engineers, savans, statistes, report to him: so likewise, do all good heads in every kind: he adopts the best measures, sets his stamp on them, and not these alone, but on every happy and memorable expression. Every sentence spoken by Napoleon, and every line of his writing, deserves reading, as it is the sense of France.

Bonaparte was the idol of common men, because he had in transcendent degree the qualities and powers of common men. There is a certain satisfaction in coming down to the lowest ground of politics, for we get rid of cant and hypocrisy. Bonaparte wrought, in common with that great class he represented, for power and wealth,—but Bonaparte, specially, without any scruple as to the means. All the sentiments which embarrass men's pursuits of these objects, he set aside. The sentiments were for women and children. Fontanes, in 1804, expressed Napoleon's own sense, when, in behalf of the Senate, he addressed him,—“Sire, the desire of perfection is the worst disease that ever afflicted the human

mind." The advocates of liberty, and of progress, are "ideologists;"—a word of contempt often in his mouth;—"Necker is an ideologist:" "Lafayette is an ideologist."

An Italian proverb, too well known, declares that, "if you would succeed, you must not be too good." It is an advantage, within certain limits, to have renounced the dominion of the sentiments of piety, gratitude, and generosity; since, what was an impassable bar to us, and still is to others, becomes a convenient weapon for our purposes; just as the river which was a formidable barrier, winter transforms into the smoothest of roads.

Napoleon renounced, once for all, sentiments and affections, and would help himself with his hands and his head. With him is no miracle, and no magic. He is a worker in brass, in iron, in wood, in earth, in roads, in buildings, in money, and in troops, and a very consistent and wise master-workman. He is never weak and literary, but acts with the solidity and the precision of natural agents. He has not lost his native sense and sympathy with things. Men give way before such a man, as before natural events. To be sure, there are men enough who are immersed in things, as farmers, smiths, sailors, and mechanics generally; and we know how real and solid such men appear in the presence of scholars and grammarians: but these men ordinarily lack the power of arrangement, and are like hands without a head. But Bonaparte superadded to this mineral and animal force, insight and generalization, so that men saw in him combined the natural and the intellectual power, as if the sea and land had taken flesh and begun to cipher. Therefore the land and sea seem to presuppose him. He came into his own, and they received him. This ciphering operative knows what he is working with, and what is the product. He knew the properties of gold and iron, of wheels and ships, of troops and diplomatists, and required that each should do after its kind.

The art of war was the game in which he exerted his arithmetic. It consisted, according to him, in having always more forces than the enemy, on the point where the enemy is attacked, or where he attacks: and his whole talent is

strained by endless manœuvre and evolution, to march always on the enemy at an angle, and destroy his forces in detail. It is obvious that a very small force, skilfully and rapidly manœuvring, so as always to bring two men against one at the point of engagement, will be an overmatch for a much larger body of men.

The times, his constitution, and his early circumstances, combined to develop this pattern democrat. He had the virtues of his class, and the conditions for their activity. That common sense, which no sooner respects any end, than it finds the means to effect it; the delight in the use of means; in the choice, simplification, and combining of means; the directness and thoroughness of his work; the prudence with which all was seen, and the energy with which all was done, make him the natural organ and head of what I may almost call, from its extent, the *modern* party.

Nature must have far the greatest share in every success, and so in his. Such a man was wanted, and such a man was born; a man of stone and iron, capable of sitting on horseback sixteen or seventeen hours, of going many days together without rest or food, except by snatches, and with the speed and spring of a tiger in action; a man not embarrassed by any scruples; compact, instant, selfish, prudent, and of a perception which did not suffer itself to be balked or misled by any pretences of others, or any superstition, or any heat or haste of his own. "My hand of iron," he said, "was not at the extremity of my arm: it was immediately connected with my head." He respected the power of nature and fortune, and ascribed to it his superiority, instead of valuing himself, like inferior men, on his opinionativeness and waging war with nature. His favorite rhetoric lay in allusion to his star: and he pleased himself, as well as the people, when he styled himself the "Child of Destiny." "They charge me," he said, "with the commission of great crimes: men of my stamp do not commit crimes. Nothing has been more simple than my elevation: 'tis in vain to ascribe it to intrigue or crime: it was owing to the peculiarity of the times, and to my reputation of having fought well against the enemies of my country. I

have always marched with the opinion of great masses, and with events. Of what use, then, would crimes be to me?" Again he said, speaking of his son, "My son can not replace me; I could not replace myself. I am the creature of circumstances."

He had a directness of action never before combined with so much comprehension. He is a realist, terrific to all talkers, and confused truth-obscuring persons. He sees where the matter hinges, throws himself on the precise point of resistance, and slights all other considerations. He is strong in the right manner, namely, by insight. He never blundered into victory, but won his battles in his head, before he won them on the field. His principal means are in himself. He asks counsel of no other. In 1796, he writes to the Directory: "I have conducted the campaign without consulting any one. I should have done no good, if I had been under the necessity of conforming to the notions of another person. I have gained some advantages over superior forces, and when totally destitute of every thing, because, in the persuasion that your confidence was reposed in me, my actions were as prompt as my thoughts."

History is full, down to this day, of the imbecility of kings and governors. They are a class of persons much to be pitied, for they know not what they should do. The weavers strike for bread; and the king and his ministers, not knowing what to do, meet them with bayonets. But Napoleon understood his business. Here was a man who, in each moment and emergency, knew what to do next. It is an immense comfort and refreshment to the spirits, not only of kings, but of citizens. Few men have any next; they live from hand to mouth, without plan, and are ever at the end of their line, and, after each action, wait for an impulse from abroad. Napoleon had been the first man of the world, if his ends had been purely public. As he is, he inspires confidence and vigor by the extraordinary unity of his action. He is firm, sure, self-denying, self-postponing, sacrificing every thing to his aim,—money, troops, generals, and his own safety also, to his aim; not misled, like common adventurers, by the splendor of his own means. "Incidents

ought not to govern policy," he said, "but policy, incidents." "To be hurried away by every event, is to have no political system at all." His victories were only so many doors, and he never for a moment lost sight of his way onward, in the dazzle and uproar of the present circumstance. He knew what to do, and he flew to his mark. He would shorten a straight line to come at his object. Horrible anecdotes may, no doubt, be collected from his history, of the price at which he bought his successes; but he must not therefore be set down as cruel; but only as one who knew no impediment to his will; not bloodthirsty, not cruel,—but woe to what thing or person stood in his way! Not bloodthirsty, but not sparing of blood,—and pitiless. He saw only the object: the obstacle must give way. "Sire, General Clarke can not combine with General Junot, for the dreadful fire of the Austrian battery."—"Let him carry the battery."—"Sire, every regiment that approaches the heavy artillery is sacrificed: Sire, what orders?"—"Forward, forward!" Seruzier, a colonel of artillery, gives, in his *Military Memoirs*, the following sketch of a scene after the battle of Austerlitz.—"At the moment in which the Russian army was making its retreat, painfully, but in good order, on the ice of the lake, the Emperor Napoleon came riding at full speed toward the artillery. 'You are losing time,' he cried; 'fire upon those masses; they must be engulfed; fire upon the ice!' The order remained unexecuted for ten minutes. In vain several officers and myself were placed on the slope of a hill to produce the effect: their balls and mine rolled upon the ice, without breaking it up. Seeing that, I tried a simple method of elevating light howitzers. The almost perpendicular fall of the heavy projectiles produced the desired effect. My method was immediately followed by the adjoining batteries, and in less than no time we buried" some<sup>1</sup> "thousands of Russians and Austrians under the waters of the lake."

In the plenitude of his resources, every obstacle seemed to vanish. "There shall be no Alps," he said; and he built his perfect roads, climbing by graded galleries their steepest

<sup>1</sup> As I quote at second hand, and cannot procure Seruzier, I dare not adopt the high figure I find.

precipices, until Italy was as open to Paris as any town in France. He laid his bones to, and wrought for his crown. Having decided what was to be done, he did that with might and main. He put out all his strength. He risked every thing, and spared nothing, neither ammunition, nor money, nor troops, nor generals, nor himself.

We like to see every thing do its office after its kind, whether it be a milch-cow or a rattlesnake; and, if fighting be the best mode of adjusting national differences (as large majorities of men seem to agree), certainly Bonaparte was right in making it thorough. "The grand principle of war," he said, "was, that an army ought always to be ready, by day and by night, and at all hours, to make all the resistance it is capable of making." He never economized his ammunition, but, on a hostile position, rained a torrent of iron,—shells, balls, grape-shot,—to annihilate all defence. On any point of resistance, he concentrated squadron on squadron in overwhelming numbers, until it was swept out of existence. To a regiment of horse-chasseurs at Lobenstein, two days before the battle of Jena, Napoleon said, "My lads, you must not fear death; when soldiers brave death, they drive him into the enemy's ranks." In the fury of assault, he no more spared himself. He went to the edge of his possibility. It is plain that in Italy he did what he could, and all that he could. He came, several times, within an inch of ruin; and his own person was all but lost. He was flung into the marsh at Arcola. The Austrians were between him and his troops in the *mêlée*, and he was brought off with desperate efforts. At Lonato, and at other places, he was on the point of being taken prisoner. He fought sixty battles. He had never enough. Each victory was a new weapon. "My power would fall, were I not to support it by new achievements. Conquest has made me what I am, and conquest must maintain me." He felt, with every wise man, that as much life is needed for conservation as for creation. We are always in peril, always in a bad plight, just on the edge of destruction, and only to be saved by invention and courage.

This vigor was guarded and tempered by the coldest

prudence and punctuality. A thunderbolt in the attack, he was found invulnerable in his intrenchments. His very attack was never the inspiration of courage, but the result of calculation. His idea of the best defence consists in being still the attacking party. "My ambition," he says, "was great, but was of a cold nature." In one of his conversations with Las Casas, he remarked, "As to moral courage, I have rarely met with the two-o'clock-in-the-morning kind: I mean unprepared courage, that which is necessary on an unexpected occasion; and which, in spite of the most unforeseen events, leaves full freedom of judgment and decision:" and he did not hesitate to declare that he was himself eminently endowed with this "two-o'clock-in-the-morning courage, and that he had met with few persons equal to himself in this respect."

Every thing depended on the nicety of his combinations, and the stars were not more punctual than his arithmetic. His personal attention descended to the smallest particulars. "At Montebello, I ordered Kellermann to attack with eight hundred horse, and with these he separated the six thousand Hungarian grenadiers, before the very eyes of the Austrian cavalry. This cavalry was half a league off, and required a quarter of an hour to arrive on the field of action; and I have observed, that it is always these quarters of an hour that decide the fate of a battle." "Before he fought a battle, Bonaparte thought little about what he should do in case of success, but a great deal about what he should do in case of a reverse of fortune." The same prudence and good sense mark all his behavior. His instructions to his secretary at the Tuilleries are worth remembering. "During the night, enter my chamber as seldom as possible. Do not awake me when you have any good news to communicate; with that there is no hurry. But when you bring bad news, rouse me instantly, for then there is not a moment to be lost." It was a whimsical economy of the same kind which dictated his practice, when general in Italy, in regard to his burdensome correspondence. He directed Bourienne to leave all letters unopened for three weeks, and then observed with satisfaction how large a part of the corre-

spondence had thus disposed of itself, and no longer required an answer. His achievement of business was immense, and enlarges the known powers of man. There have been many working kings, from Ulysses to William of Orange, but none who accomplished a tithe of this man's performance.

To these gifts of nature, Napoleon added the advantage of having been born to a private and humble fortune. In his latter days, he had the weakness of wishing to add to his crowns and badges the prescription of aristocracy: but he knew his debts to his austere education, and made no secret of his contempt for the born kings, and for "the hereditary asses," as he coarsely styled the Bourbons. He said that, "in their exile, they had learned nothing, and forgot nothing." Bonaparte had passed through all the degrees of military service, but also was citizen before he was emperor, and so has the key to citizenship. His remarks and estimates discover the information and justness of measurement of the middle class. Those who had to deal with him, found that he was not to be imposed upon, but could cipher as well as another man. This appears in all parts of his Memoirs, dictated at St. Helena. When the expenses of the empress, of his household, of his palaces, had accumulated great debts, Napoleon examined the bills of the creditors himself, detected overcharges and errors, and reduced the claims by considerable sums.

His grand weapon, namely, the millions whom he directed, he owed to the representative character which clothed him. He interests us as he stands for France and for Europe; and he exists as captain and king, only as far as the Revolution, or the interest of the industrious masses, found an organ and a leader in him. In the social interests, he knew the meaning and value of labor, and threw himself naturally on that side. I like an incident mentioned by one of his biographers at St. Helena. "When walking with Mrs. Balcombe, some servants, carrying heavy boxes, passed by on the road, and Mrs. Balcombe desired them, in rather an angry tone, to keep back. Napoleon interfered, saying, 'Respect the burden, Madam.'" In the time of the empire,

he directed attention to the improvement and embellishment of the markets of the capital. "The market-place," he said, "is the Louvre of the common people." The principal works that have survived him are his magnificent roads. He filled the troops with his spirit, and a sort of freedom and companionship grew up between him and them, which the forms of his court never permitted between the officers and himself. They performed, under his eye, that which no others could do. The best document of his relation to his troops is the order of the day on the morning of the battle of Austerlitz, in which Napoleon promises the troops that he will keep his person out of reach of fire. This declaration, which is the reverse of that ordinarily made by generals and sovereigns on the eve of a battle, sufficiently explains the devotion of the army to their leader.

But though there is in particulars this identity between Napoleon and the mass of the people, his real strength lay in their conviction that he was their representative in his genius and aims, not only when he courted, but when he controlled and even when he decimated them by his conscriptions. He knew, as well as any Jacobin in France, how to philosophize on liberty and equality; and, when allusion was made to the precious blood of centuries, which was spilled by the killing of the Duc d'Enghien, he suggested "Neither is my blood ditch-water." The people felt that no longer the throne was occupied, and the land sucked of its nourishment, by a small class of legitimates, secluded from all community with the children of the soil, and holding the ideas and superstitions of a long-forgotten state of society. Instead of that vampire, a man of themselves held, in the Tuilleries, knowledge and ideas like their own, opening, of course, to them and their children, all places of power and trust. The day of sleepy, selfish policy, ever narrowing the means and opportunities of young men, was ended, and a day of expansion and demand was come. A market for all the powers and productions of man was opened; brilliant prizes glittered in the eyes of youth and talent. The old, iron-bound, feudal France was changed into a young Ohio or New York; and those who smarted under the immediate

rigors of the new monarch, pardoned them, as the necessary severities of the military system which had driven out the oppressor. And even when the majority of the people had begun to ask, whether they had really gained any thing under the exhausting levies of men and money of the new master,—the whole talent of the country, in every rank and kindred, took his part, and defended him as its natural patron. In 1814, when advised to rely on the higher classes, Napoleon said to those around him, "Gentlemen, in the situation in which I stand, my only nobility is the rabble of the Faubourgs."

Napoleon met this natural expectation. The necessity of his position required a hospitality to every sort of talent, and its appointment to trusts; and his feeling went along with this policy. Like every superior person, he undoubtedly felt a desire for men and compeers, and a wish to measure his power with other masters, and an impatience of fools and underlings. In Italy, he sought for men, and found none. "Good God!" he said, "how rare men are! There are eighteen millions in Italy, and I have with difficulty found two,—Dandolo and Melzi." In later years, with larger experience, his respect for mankind was not increased. In a moment of bitterness, he said, to one of his oldest friends, "Men deserve the contempt with which they inspire me. I have only to put some gold lace on the coat of my virtuous republicans, and they immediately become just what I wish them." This impatience at levity was, however, an oblique tribute of respect to those able persons who commanded his regard, not only when he found them friends and coadjutors, but also when they resisted his will. He could not confound Fox and Pitt, Carnot, Lafayette, and Bernadotte with the dangles of his court; and, in spite of the detraction which his systematic egotism dictated toward the great captains who conquered with and for him, ample acknowledgments are made by him to Lannes, Duroc, Kleber, Dessaix, Massena, Murat, Ney, and Augerau. If he felt himself their patron, and the founder of their fortunes, as when he said, "I made my generals out of mud," he could not hide his satisfaction in receiving from them a

seconding and support commensurate with the grandeur of his enterprise. In the Russian campaign, he was so much impressed by the courage and resources of Marshal Ney, that he said, "I have two hundred millions in my coffers, and I would give them all for Ney." The characters which he has drawn of several of his marshals are discriminating, and, though they did not content the insatiable vanity of French officers, are, no doubt, substantially just. And, in fact, every species of merit was sought and advanced under his government. "I know," he said, "the depth and draught of water of every one of my generals." Natural power was sure to be well received at his court. Seventeen men, in his time, were raised from common soldiers to the rank of king, marshal, duke, or general; and the crosses of his Legion of Honor were given to personal valor, and not to family connection. "When soldiers have been baptized in the fire of a battle-field, they have all one rank in my eyes."

When a natural king becomes a titular king, everybody is pleased and satisfied. The Revolution entitled the strong populace of the Faubourg St. Antoine, and every horse-boy and powder-monkey in the army, to look on Napoleon, as flesh of his flesh, and the creature of *his* party: but there is something in the success of grand talent which enlists an universal sympathy. For, in the prevalence of sense and spirit over stupidity and malversation, all reasonable men have an interest; and, as intellectual beings, we feel the air purified by the electric shock, when material force is overthrown by intellectual energies. As soon as we are removed out of the reach of local and accidental partialities, man feels that Napoleon fights for him; these are honest victories; this strong steam-engine does our work. Whatever appeals to the imagination, by transcending the ordinary limits of human ability, wonderfully encourages and liberates us. This capacious head, revolving and disposing sovereignly trains of affairs, and animating such multitudes of agents; this eye, which looked through Europe; this prompt invention; this inexhaustible resource;—what events! what romantic pictures! what strange situations!—when spying the Alps, by a sunset in the Sicilian sea; drawing up his

army for battle, in sight of the Pyramids, and saying to his troops, "From the tops of those pyramids, forty centuries look down on you;" fording the Red Sea; wading in the gulf of the Isthmus of Suez. On the shore of Ptolemais, gigantic projects agitated him. "Had Acre fallen, I should have changed the face of the world." His army, on the night of the battle of Austerlitz, which was the anniversary of his inauguration as Emperor, presented him with a bouquet of forty standards taken in the fight. Perhaps it is a little puerile, the pleasure he took in making these contrasts glaring; as when he pleased himself with making kings wait in his antechambers, at Tilsit, at Paris, and at Erfurt.

We cannot, in the universal imbecility, indecision, and indolence of men, sufficiently congratulate ourselves on this strong and ready actor, who took occasion by the beard, and showed us how much may be accomplished by the mere force of such virtues as all men possess in less degrees; namely, by punctuality, by personal attention, by courage, and thoroughness. "The Austrians," he said, "do not know the value of time." I should cite him, in his earlier years, as a model of prudence. His power does not consist in any wild or extravagant force; in any enthusiasm, like Mahomet's; or singular power of persuasion; but in the exercise of common sense on each emergency, instead of abiding by rules and customs. The lesson he teaches is that which vigor always teaches,—that there is always room for it. To what heaps of cowardly doubts is not that man's life an answer. When he appeared, it was the belief of all military men that there could be nothing new in war; as it is the belief of men to-day, that nothing new can be undertaken in politics, or in church, or in letters, or in trade, or in farming, or in our social manners and customs; and as it is, at all times, the belief of society that the world is used up. But Bonaparte knew better than society; and, moreover, knew that he knew better. I think all men know better than they do; know that the institutions we so volubly commend are go-carts and baubles; but they dare not trust their presentiments. Bonaparte relied on his own sense, and did not care to bean for other people's. The world treated his novelties

just as it treats everybody's novelties,—made infinite objection; mustered all the impediments; but he snapped his finger at their objections. "What creates great difficulty," he remarks, "in the profession of the land-commander, is the necessity of feeding so many men and animals. If he allows himself to be guided by the commissaries, he will never stir, and all his expeditions will fail." An example of his common sense is what he says of the passage of the Alps in winter, which all writers, one repeating after the other, had described as impracticable. "The winter," says Napoleon, "is not the most unfavorable season for the passage of lofty mountains. The snow is then firm, the weather settled, and there is nothing to fear from avalanches, the real and only danger to be apprehended in the Alps. On those high mountains, there are often very fine days in December, of a dry cold, with extreme calmness in the air." Read his account, too, of the way in which battles are gained. "In all battles, a moment occurs, when the bravest troops, after having made the greatest efforts, feel inclined to run. That terror proceeds from a want of confidence in their own courage; and it only requires a slight opportunity, a pretence, to restore confidence to them. The art is to give rise to the opportunity, and to invent the pretence. At Arcola, I won the battle with twenty-five horsemen. I seized that moment of lassitude, gave every man a trumpet, and gained the day with this handful. You see that two armies are two bodies which meet, and endeavor to frighten each other: a moment of panic occurs, and that moment must be turned to advantage. When a man has been present in many actions, he distinguishes that moment without difficulty; it is as easy as casting up an addition."

This deputy of the nineteenth century added to his gifts a capacity for speculation on general topics. He delighted in running through the range of practical, of literary, and of abstract questions. His opinion is always original, and to the purpose. On the voyage to Egypt, he liked, after dinner, to fix on three or four persons to support a proposition, and as many to oppose it. He gave a subject, and the discussions turned on questions of religion, the different kinds of

government, and the art of war. One day, he asked, whether the planets were inhabited? On another, what was the age of the world? Then he proposed to consider the probability of the destruction of the globe, either by water or by fire; at another time, the truth or fallacy of presentiments, and the interpretation of dreams. He was very fond of talking of religion. In 1806, he conversed with Fournier, bishop of Montpellier, on matters of theology. There were two points on which they could not agree, viz., that of hell, and that of salvation out of the pale of the church. The Emperor told Josephine, that he disputed like a devil on these two points, on which the bishop was inexorable. To the philosophers he readily yielded all that was proved against religion as the work of men and time; but he would not hear of materialism. One fine night, on deck, amid a clatter of materialism, Bonaparte pointed to the stars, and said, "You may talk as long as you please, gentlemen, but who made all that?" He delighted in the conversation of men of science, particularly of Monge and Berthollet; but the men of letters he slighted; "they were manufacturers of phrases." Of medicine, too, he was fond of talking, and with those of its practitioners whom he most esteemed,—with Corvisart at Paris, and with Antonomarchi at St. Helena. "Believe me," he said to the last, "we had better leave off all of these remedies: life is a fortress which neither you nor I know anything about. Why throw obstacles in the way of its defence? Its own means are superior to all the apparatus of your laboratories. Corvisart candidly agreed with me, that all your filthy mixtures are good for nothing. Medicine is a collection of uncertain prescriptions, the results of which, taken collectively, are more fatal than useful to mankind. Water, air, and cleanliness, are the chief articles in my pharmacopeia."

His Memoirs, dictated to Count Montholon and General Gourgaud, at St. Helena, have great value, after all the deduction that, it seems, is to be made from them on account of his known disingenuousness. He has the good-nature of strength and conscious superiority. I admire his simple, clear narrative of his battles;—good as Cæsar's; his good-

natured and sufficiently respectful account of Marshal Wurmser and his other antagonists, and his own equality as a writer to his varying subject. The most agreeable portion is the Campaign in Egypt.

He had hours of thought and wisdom. In intervals of leisure, either in the camp or the palace, Napoleon appeared as a man of genius, directing on abstract questions the native appetite for truth, and the impatience of words, he was wont to show in war. He could enjoy every play of invention as a romance, a *bon mot*, as well as a stratagem in a campaign. He delighted to fascinate Josephine and her ladies, in a dimly lighted apartment, by the terrors of a fiction, to which his voice and dramatic power lent every addition.

I call Napoleon the agent or attorney of the middle class of modern society; of the throng who fill the markets, shops, counting-houses, manufactories, ships, of the modern world aiming to be rich. He was the agitator, the destroyer of prescription, the internal improver, the liberal, the radical, the inventor of means, the opener of doors and markets, the subverter of monopoly and abuse. Of course, the rich and aristocratic did not like him. England, the center of capital and Rome and Austria, centers of tradition and genealogy opposed him. The consternation of the dull and conservative classes, the terror of the foolish old men and old women of the Roman conclave,—who in their despair took hold of any thing, and would cling to red-hot iron,—the vain attempts of statistes to amuse and deceive him, of the emperor of Austria to bribe him; and the instinct of the young, ardent, and active men, every where, which pointed him out as the giant of the middle class, make his history bright and commanding. He had the virtues of the masses of his constituents: he had also their vices. I am sorry that this brilliant picture has its reverse. But that is the fatal quality which we discover in our pursuit of wealth, that it is treacherous, and is bought by the breaking or weakening of the sentiments: and it is inevitable that we should find the same fact in the history of this champion, who proposed to himself simply a brilliant career, without any stipulation or scruple concerning the means.

Bonaparte was singularly destitute of generous sentiments. The highest-placed individual in the most cultivated age and population of the world,—he has not the merit of common truth and honesty. He is unjust to his generals; egotistic, and monopolizing; meanly stealing the credit of their great actions from Kellermann, from Bernadotte; intriguing to involve his faithful Junot in hopeless bankruptcy, in order to drive him to a distance from Paris, because the familiarity of his manners offends the new pride of his throne. He is a boundless liar. The official paper, his “*Moniteurs*,” and all his bulletins, are proverbs for saying what he wished to be believed; and worse,—he sat, in his premature old age, in his lonely island, coldly falsifying facts, and dates, and characters, and giving to history a theatrical *éclat*. Like all Frenchmen, he has a passion for stage effect. Every action that breathes of generosity is poisoned by this calculation. His star, his love of glory, his doctrine of the immortality of the soul are all French. “I must dazzle and astonish. If I were to give the liberty of the press, my power could not last three days.” To make a great noise is his favorite design. “A great reputation is a great noise: the more there is made, the farther off it is heard. Laws, institutions, monuments, nations, all fall; but the noise continues, and resounds in after ages.” His doctrine of immortality is simply fame. His theory of influence is not flattering. “There are two levers for moving men,—interest and fear. Love is a silly infatuation, depend upon it. Friendship is but a name. I love nobody. I do not even love my brothers: perhaps Joseph, a little, from habit, and because he is my elder; and Duroc, I love him too; but why?—because his character pleases me: he is stern and resolute, and, I believe, the fellow never shed a tear. For my part, I know very well that I have no true friends. As long as I continue to be what I am, I may have as many pretended friends as I please. Leave sensibility to women: but men should be firm in heart and purpose, or they should have nothing to do with war and government.” He was thoroughly unscrupulous. He would steal, slander, assassinate, drown, and poison, as his interest dictated. He had no generosity; but mere vulgar hatred: he was intensely

selfish: he was perfidious: he cheated at cards: he was a prodigious gossip; and opened letters; and delighted in his infamous police; and rubbed his hands with joy when he had intercepted some morsel of intelligence concerning the men and women about him, boasting that "he knew every thing;" and interfered with the cutting the dresses of the women; and listened after the hurrahs and the compliments of the street, incognito. His manners were coarse. He treated women with low familiarity. He had the habit of pulling their ears and pinching their cheeks, when he was in good humor, and of pulling the ears and whiskers of men, and of striking and horse-play with them, to his last days. It does not appear that he listened at key-holes, or, at least, that he was caught at it. In short, when you have penetrated through all the circles of power and splendor, you were not dealing with a gentleman, at last; but with an imposter and a rogue: and he fully deserves the epithet of *Jupiter Scapin*, or a sort of Scamp Jupiter.

In describing the two parties into which modern society divides itself,—the democrat and the conservative,—I said, Bonaparte represents the democrat, or the party of men of business, against the stationary or conservative party. I omitted then to say, what is material to the statement, namely, that these two parties differ only as young and old. The democrat is a young conservative; the conservative is an old democrat. The aristocrat is the democrat ripe, and gone to seed,—because both parties stand on the one ground of the supreme value of property, which one endeavors to get, and the other to keep. Bonaparte may be said to represent the whole history of this party, its youth and its age; yes, and with poetic justice, its fate, in his own. The counter-revolution, the counter-party, still waits for its organ and representative, in a lover and a man of truly public and universal aims.

Here was an experiment, under the most favorable conditions, of the powers of intellect without conscience. Never was such a leader so endowed, and so weaponed; never leader found such aids and followers. And what was

the result of this vast talent and power, of these immense armies, burned cities, squandered treasures, immolated millions of men, of this demoralized Europe? It came to no result. All passed away, like the smoke of his artillery, and left no trace. He left France smaller, poorer, feebler, than he found it; and the whole contest for freedom was to be begun again. The attempt was, in principle, suicidal. France served him with life, and limb, and estate, as long as it could identify its interest with him; but when men saw that after victory was another war; after the destruction of armies, new conscriptions; and they who had toiled so desperately were never nearer to the reward,—they could not spend what they had earned, nor repose on their down-beds, nor strut in their châteaux,—they deserted him. Men found that his absorbing egotism was deadly to all other men. It resembled the torpedo, which inflicts a succession of shocks on any one who takes hold of it, producing spasms which contract the muscles of the hand, so that the man cannot open his fingers; and the animal inflicts new and more violent shocks, until he paralyzes and kills his victim. So, this exorbitant egotist narrowed, impoverished, and absorbed the power and existence of those who served him; and the universal cry of France, and of Europe, in 1814, was, “enough of him;” “*assez de Bonaparte.*”

It was not Bonaparte's fault. He did all that in him lay, to live and thrive without moral principle. It was the nature of things, the eternal law of man and of the world, which balked and ruined him; and the result, in a million experiments, will be the same. Every experiment, by multitudes or by individuals, that has a sensual and selfish aim, will fail. The pacific Fourier will be as inefficient as the pernicious Napoleon. As long as our civilization is essentially one of property, of fences, of exclusiveness, it will be mocked by delusions. Our riches will leave us sick; there will be bitterness in our laughter, and our wine will burn our mouth. Only that good profits, which we can taste with all doors open, and which serves all men.

## XXI

### THE POET

A moody child and wildly wise  
Pursued the game with joyful eyes,  
Which chose, like meteors, their way,  
And rived the dark with private ray:  
They overleapt the horizon's edge,  
Searched with Apollo's privilege;  
Through man, and woman, and sea, and star,  
Saw the dance of nature forward far;  
Through worlds, and races, and terms, and times,  
Saw musical order, and paring rhymes.

Olympian bards who sung  
Divine ideas below,  
Which always find us young,  
And always keep us so.

THOSE who are esteemed umpires of taste are often persons who have acquired some knowledge of admired pictures or sculptures, and have an inclination for whatever is elegant; but if you inquire whether they are beautiful souls, and whether their own acts are like fair pictures, you learn that they are selfish and sensual. Their cultivation is local, as if you should rub a log of dry wood in one spot to produce fire, all the rest remaining cold. Their knowledge of the fine arts is some study of rules and particulars, or some limited judgment of color or form, which is exercised for amusement or for show. It is a proof of the shallowness of the doctrine of beauty, as it lies in the minds of our amateurs, that men seem to have lost the perception of the instant dependence of form upon soul. There is no doctrine of forms in our philosophy. We were put into our bodies, as fire is put into a pan, to be carried about; but there is no accurate adjustment between the spirit and the organ, much less is the latter the germination of the former.

So in regard to other forms, the intellectual men do not believe in any essential dependence of the material world on thought and volition. Theologians think it a pretty air-castle to talk of the spiritual meaning of a ship or a cloud, of a city or a contract, but they prefer to come again to the solid ground of historical evidence; and even the poets are contented with a civil and conformed manner of living, and to write poems from the fancy, at a safe distance from their own experience. But the highest minds of the world have never ceased to explore the double meaning, or, shall I say, the quadruple, or the centuple, or much more manifold meaning, of every sensuous fact: Orpheus, Empedocles, Heraclitus, Plato, Plutarch, Dante, Swedenborg, and the masters of sculpture, picture, and poetry. For we are not pans and barrows, nor even porters of the fire and torch-bearers, but children of the fire, made of it, and only the same divinity transmuted, and at two or three removes, when we know least about it. And this hidden truth, that the fountains whence all this river of Time, and its creatures, flows, are intrinsically ideal and beautiful, draws us to the consideration of the nature and functions of the Poet, or the man of Beauty, to the means and materials he uses, and to the general aspect of his art in the present time.

The breadth of the problem is great, for the poet is representative. He stands among partial men for the complete man, and apprises us not of his wealth, but of the common-wealth. The young man reveres men of genius, because, to speak truly, they are more himself than he is. They receive of the soul as he also receives, but they more. Nature enhances her beauty, to the eye of loving men, from their belief that the poet is beholding her shows at the same time. He is isolated among his contemporaries, by truth and by his art, but with this consolation in his pursuits, that they will draw all men sooner or later. For all men live by truth, and stand in need of expression. In love, in art, in avarice, in politics, in labor, in games, we study to utter our painful secret. The man is only half himself, the other half is his expression.

Notwithstanding this necessity to be published, adequate

expression is rare. I know not how it is that we need an interpreter; but the great majority of men seem to be minors, who have not yet come into possession of their own, or mutes, who cannot report the conversation they have had with nature. There is no man who does not anticipate a supersensual utility in the sun, and stars, earth, and water. These stand and wait to render him a peculiar service. But there is some obstruction, or some excess of phlegm in our constitution, which does not suffer them to yield the due effect. The impressions of nature fall on us too feebly to make us artists. Every touch should thrill. Every man should be so much an artist, that he could report in conversation what had befallen him. Yet, in our experience, the rays or appulses have sufficient force to arrive at the senses, but not enough to reach the quick, and compel the reproduction of themselves in speech. The poet is the person in whom these powers are in balance, the man without impediment, who sees and handles that which others dream of, reverses the whole scale of experience, and is representative of man, in virtue of being the largest power to receive and to impart.

For the Universe has three children, born at one time, which reappear, under different names, in every system of thought, whether they be called cause, operation, and effect; or, more poetically, Jove, Pluto, Neptune; or, theologically, the Father, the Spirit, and the Son; but which we will call here, the Knower, the Doer, and the Sayer. These stand respectively for the love of truth, the love of good, and the love of beauty. These three are equal. Each is that which he is essentially, so that he cannot be surmounted or analyzed, and each of these three has the power of the others latent in him, and his own patent.

The poet is the sayer, the namer, and represents beauty. He is a sovereign, and stands on the center. For the world is not painted, or adorned, but is from the beginning beautiful; and God has not made some beautiful things, but Beauty is the creator of the universe. Therefore the poet is not any permissive potentate, but is emperor in his own right. Criticism is infested with a cant of materialism, which as-

sumes that manual skill and activity is the first merit of all men, and disparages such as say and do not, overlooking the fact, that some men, namely, poets, are natural sayers, sent into the world to the end of expression, and it confounds them with those whose province is action, but who quit it to imitate the sayers. But Homer's words are as costly and admirable to Homer, as Agamemnon's victories are to Agamemnon. The poet does not wait for the hero or the sage, but, as they act and think primarily, so he writes primarily what will and must be spoken, reckoning the others, though primaries also, yet, in respect to him, secondaries and servants; as sitters or models in the studio of a painter, or as assistants who bring building materials to an architect.

For poetry was all written before time was, and whenever we are so finely organized that we can penetrate into that region where the air is music, we hear those primal warblings, and attempt to write them down, but we lose ever and anon a word, or a verse, and substitute something of our own, and thus miswrite the poem. The men of more delicate ear write down these cadences more faithfully, and these transcripts, though imperfect, become the songs of the nations. For nature is as truly beautiful as it is good, or as it is reasonable, and must as much appear, as it must be done, or be known. Words and deeds are quite indifferent modes of the divine energy. Words are also actions, and actions are a kind of words.

The sign and credentials of the poet are, that he announces that which no man foretold. He is the true and only doctor; he knows and tells; he is the only teller of news, for he was present and privy to the appearance which he describes. He is a beholder of ideas, and an utterer of the necessary and causal. We do not speak now of men of poetical talents, or of industry and skill in metre, but of the true poet. I took part in a conversation the other day, concerning a recent writer of lyrics, a man of subtle mind, whose head appeared to be a music-box of delicate tunes and rhythms, and whose skill, and command of language, we could not sufficiently praise. But when the question

arose, whether he were not only a lyrist, but a poet, we were obliged to confess that he is plainly a contemporary, not an eternal man. He does not stand out of our low limitations, like a Chimborazo under the line, running up from the torrid base through all the climates of the globe, with belts of the herbage of every latitude on its high and mottled sides; but this genius is the landscape garden of a modern house, adorned with fountains and statues, with well-bred men and women standing and sitting in the walks and terraces. We hear, through all the varied music, the ground-tone of conventional life. Our poets are men of talents who sing, and not the children of music. The argument is secondary, the finish of the verses is primary.

For it is not metres, but a metre-making argument, that makes a poem,—a thought so passionate and alive, that, like the spirit of a plant or an animal, it has an architecture of its own, and adorns nature with a new thing. The thought and the form are equal in the order of time, but in the order of genesis the thought is prior to the form. The poet has a new thought: he has a whole new experience to unfold; he will tell us how it was with him, and all men will be the richer in his fortune. The experience of each new age requires a new confession, and the world seems always waiting for its poet. I remember, when I was young, how much I was moved one morning by tidings that genius had appeared in a youth who sat near me at table. He had left his work, and gone rambling none knew whither, and had written hundreds of lines, but could not tell whether that which was in him was therein told: he could tell nothing but that all was changed—man, beast, heaven, earth, and sea. How gladly we listened! how credulous! Society seemed to be compromised. We sat in the aurora of a sunrise which was to put out all the stars. Boston seemed to be at twice the distance it had the night before, or was much farther than that. Rome,—what was Rome? Plutarch and Shakspeare were in the yellow leaf, and Homer no more should be heard of. It is much to know that poetry has been written this very day, under this very roof, by your side. What! that wonderful spirit has not expired! these

stony moments are still sparkling and animated! I had fancied that the oracles were all silent, and nature had spent her fires, and behold! all night, from every pore, these fine auroras have been streaming. Every one has some interest in the advent of the poet, and no one knows how much it may concern him. We know that the secret of the world is profound, but who or what shall be our interpreter, we know not. A mountain ramble, a new style of face, a new person, may put the key into our hands. Of course, the value of genius to us is in the veracity of its report. Talent may frolic and juggle; genius realizes and adds. Mankind, in good earnest, have gone so far in understanding themselves and their work, and the foremost watchman on the peak announces his news. It is the truest word ever spoken, and the phrase will be the fittest, most musical, and the unerring voice of the world for the time.

All that we call sacred history attests that the birth of a poet is the principal event in chronology. Man, never so often deceived, still watches for the arrival of a brother who can hold him steady to a truth, until he has made it his own. With what joy I begin to read a poem, which I confide in as an inspiration! And now my chains are to be broken; I shall mount above these clouds and opaque airs in which I live,—opaque, though they seem transparent,—and from the heaven of truth I shall see and comprehend my relations. That will reconcile me to life, and renovate nature, to see trifles animated by a tendency, and to know what I am doing. Life will no more be a noise; now I shall see men and women, and know the signs by which they may be discerned from fools and satans. This day shall be better than my birth-day: then I became an animal: now I am invited into pure science. Such is the hope, but the fruition is postponed. Oftener it falls, that this winged man, who will carry me into the heaven, whirls me into the clouds, then leaps and frisks about with me from cloud to cloud, still affirming that he is bound heavenward; and I, being myself a novice, am slow in perceiving that he does not know the way into the heavens, and is merely bent that I should admire his skill to rise, like a fowl or a flying-

fish, a little way from the ground or the water; but the all-piercing, all-feeding, and ocular air of heaven, that man shall never inhabit. I tumble down again soon into my old nooks, and lead the life of exaggerations as before, and have lost my faith in the possibility of any guide who can lead me thither where I would be.

But leaving these victims of vanity, let us, with new hope, observe how nature, by worthier impulses, has insured the poet's fidelity to his office of announcing and affirming, by the beauty of things, which becomes a new and higher beauty when expressed. Nature offers all her creatures to him as a picture-language. Being used as a type, a second wonderful value appears in the object, far better than its old value, as the carpenter's stretched cord, if you hold your ear close enough, is musical in the breeze. "Things more excellent than every image," says Jamblichus, "are expressed through images." Things admit of being used as symbols, because nature is a symbol, in the whole, and in every part. Every line we can draw in the sand has expression; and there is no body without its spirit or genius. All form is an effort of character; all condition, of the quality of the life; all harmony, of health; (and, for this reason, a perception of beauty should be sympathetic, or proper, only to the good). The beautiful rests on the foundations of the necessary. The soul makes the body, as the wise Spenser teaches:—

"So every spirit, as it is most pure,  
And hath in it the more of heavenly light,  
So it the fairer body doth procure  
To habit in, and it more fairly dight,  
With cheerful grace and amiable sight.  
For, of the soul, the body form doth take,  
For soul is form, and doth the body make."

Here we find ourselves, suddenly, not in the pleasant walks of critical speculation, but in a holy place, and should go very warily and reverently. We stand before the secret of the world,—there where Being passes into Appearance, and Unity into Variety.

The Universe is the externization of the soul. Wherever the life is, that bursts into appearance around it. Our

science is sensual, and therefore superficial. The earth, and the heavenly bodies, physics, and chemistry, we sensually treat, as if they were self-existent; but these are the retinue of that Being we have. "The mighty heaven," says Proclus, "exhibits, in its transfigurations, clear images of the splendor of intellectual perceptions; being moved in conjunction with the unapparent periods of intellectual natures." Therefore, science always goes abreast with the just elevation of the man, keeping step with religion and metaphysics; or, the state of science is an index of our self-knowledge. Since every thing in nature answers to a moral power, if any phenomenon remains brute and dark, it is because the corresponding faculty in the observer is not yet active. No wonder, then, if these waters be so deep, that we hover over them with a religious regard. The beauty of the fable proves the importance of the sense, to the poet, and to all others; or, if you please, every man is so far a poet as to be susceptible of these enchantments of nature: for all men have the thoughts of which the universe is the celebration. I find that the fascination resides in the symbol. Who loves nature? Who does not? Is it only poets, and men of leisure and cultivation, who live with her? No; but also hunters, farmers, grooms, and butchers, though they express their affection in their choice of life, and not in their choice of words. The writer wonders what the coachman or the hunter values in riding, in horses, and dogs. It is not superficial qualities. When you talk with him, he holds these at as slight a rate as you. His worship is sympathetic: he has no definitions, but he is commanded in nature, by the living power which he feels to be there present. No imitation, or playing of these things, would content him; he loves the earnest of the north-wind, of rain, of stone, and wood, and iron. A beauty not explicable is dearer than a beauty which we can see to the end of. It is nature the symbol, nature certifying the supernatural, body overflowed by life, which he worships with coarse, but sincere rites.

The inwardness, and mystery, of this attachment, drives men of every class to the use of emblems. The schools

of poets, and philosophers, are not more intoxicated with their symbols, than the populace with theirs. In our political parties, compute the power of badges and emblems. See the great ball which they roll from Baltimore to Bunker hill! In the political processions, Lowell goes in a loom and Lynn in a shoe, and Salem in a ship. Witness the cider-barrel, the log-cabin, the hickory-stick, the palmetto and all the cognizances of party. See the power of national emblems. Some stars, lilies, leopards, a crescent, a lion, an eagle, or other figure, which came into credit God knows how, on an old rag of bunting, blowing in the wind, on a fort at the ends of the earth, shall make the blood tingle under the rudest, or the most conventional exterior. The people fancy they hate poetry, and they are all poets and mystics.

Beyond this universality of the symbolic language, we are apprised of the divineness of this superior use of things (whereby the world is a temple, whose walls are covered with emblems, pictures, and commandments of the Deity,) in this, that there is no fact in nature which does not carry the whole sense of nature; and the distinctions which we make in events, and in affairs, of low and high, honest and base, disappear when nature is used as a symbol. Though makes every thing fit for use. The vocabulary of an omniscient man would embrace words and images excluded from polite conversation. What would be base, or even obscene to the obscene, becomes illustrious, spoken in a new connection of thought. The piety of the Hebrew prophet purges their grossness. The circumcision is an example of the power of poetry to raise the low and offensive. Small and mean things serve as well as great symbols. The meaner the type by which a law is expressed, the more pungent it is, and the more lasting in the memories of men: just as we choose the smallest box, or case, in which any needful utensil can be carried. Bare lists of words are found suggestive to an imaginative and excited mind; as it is related of Lord Chatham, that he was accustomed to read in Baily's Dictionary when he was preparing to speak in Parliament. The poorest experience is rich enough for all the purposes of expressing thought. Why covet a knowledge

f new facts? Day and night, house and garden, a few books, a few actions, serve us as well as would all trades and all spectacles. We are far from having exhausted the significance of the few symbols we use. We can come to use them yet with a terrible simplicity. It does not need that a poem should be long. Every word was once a poem. Every new relation is a new word. Also, we use defects and deformities to a sacred purpose,—so expressing our sense that the evils of the world are such only to the evil eye. In the old mythology, mythologists observe, defects are ascribed to divine natures, as lameness to Vulcan, blindness to Cupid, and the like, to signify exuberances.

It is dislocation and detachment from the life of God that makes things ugly, and the poet, who re-attaches things to nature and the Whole,—re-attaching even artificial things, and violations of nature, to nature, by a deeper insight,—disposes very easily of the most disagreeable facts. Readers of poetry see the factory-village, and the railway, and fancy that the poetry of the landscape is broken up by these,—for these works of art are not yet consecrated in their reading; but the poet sees them fall within the great order not less than the bee-hive, or the spider's geometrical web. Nature adopts them very fast into her vital circles, and the gliding train of cars she loves like her own. Besides, in a centered mind, it signifies nothing how many mechanical conventions you exhibit. Though you add millions, and never so surprising, the fact of mechanics has not gained a grain's weight. The spiritual fact remains unalterable, by many or by few particulars; as no mountain is of any appreciable height to break the curve of the sphere. A shrewd country-boy goes to the city for the first time, and the complacent citizen is not satisfied with his little wonder. It is not that he does not see all the fine houses, and know that he never saw such before, but he disposes of them as easily as the poet finds place for the railway. The chief value of the new fact, is to enhance the great and constant fact of Life, which can dwarf any and every circumstance, and to which the belt of wampum, and the commerce of America. are alike.

The world being thus put under the mind for verb and noun, the poet is he who can articulate it. For, though life is great, and fascinates, and absorbs,—and though all men are intelligent of the symbols through which it is named,—yet they cannot originally use them. We are symbols, and inhabit symbols; workmen, work, and tools, words and things, birth and death, all are emblems; but we sympathize with the symbols, and, being infatuated with the economical uses of things, we do not know that they are thoughts. The poet, by an ulterior intellectual perception, gives them a power which makes their old use forgotten, and puts eyes, and a tongue, into every dumb and inanimate object. He perceives the independence of the thought on the symbol,—the stability of the thought, the accidentality and fugitiveness of the symbol. As the eyes of Lynceus were said to see through the earth, so the poet turns the world to glass, and shows us all things in their right series and procession. For, through that better perception, he stands one step nearer to things, and sees the flowing or metamorphosis; perceives that thought is multiform; that within the form of every creature is a force impelling it to ascend into a higher form: and, following with his eyes the life, uses the forms which express that life, and so his speech flows with the flowing of nature. All the facts of the animal economy, sex, nutriment, gestation, birth, growth, are symbols of the passage of the world into the soul of man, to suffer there a change, and reappear a new and higher fact. He uses forms according to the life, and not according to the form. This is true science. The poet alone knows astronomy, chemistry, vegetation, and animation; for he does not stop at these facts, but employs them as signs. He knows why the field of space was strown with these flowers we call suns and moons and stars; why the great deep is adorned with animals, with men, and gods; for, in every word he speaks he rides on them as the horses of thought.

By virtue of this science the poet is the Namer or Language-maker, naming things sometimes after their appearance, sometimes after their essence, and giving to

every one its own name and not another's thereby rejoicing the intellect, which delights in detachment or boundary. The poets made all the words, and therefore language is the archives of history, and, if we must say it, a sort of tomb of the muses. For, though the origin of most of our words is forgotten, each word was at first a stroke of genius, and obtained currency, because for the moment it symbolized the world to the first speaker and to the hearer. The etymologist finds the deadest word to have been once a brilliant picture. Language is fossil poetry. As the limestone of the continent consists of infinite masses of the shells of animalcules, so language is made up of images, or tropes, which now, in their secondary use, have long ceased to remind us of their poetic origin. But the poet names the thing because he sees it, or comes one step nearer to it than any other. This expression, or naming, is not art, but a second nature, grown out of the first, as a leaf out of a tree. What we call nature, is a certain self-regulated motion or change; and nature does all things by her own hands, and does not leave another to baptize her, but baptizes herself; and this through the metamorphosis again. I remember that a certain poet described it to me thus:

Genius is the activity which repairs the decays of things, whether wholly or partly of a material and finite kind. Nature, through all her kingdoms, insures herself. Nobody cares for planting the poor fungus: so she shakes down from the gills of one agaric, countless spores any one of which, being preserved, transmits new billions of spores to-morrow, or next day. The new agaric of this hour has a chance which the old one had not. This atom of seed is thrown into a new place, not subject to the accidents which destroyed its parent two rods off. She makes a man: and having brought him to ripe age, she will no longer run the risk of losing this wonder at a blow, but she detaches from him a new self, that the kind may be safe from accidents to which the individual is exposed. So when the soul of the poet has come to ripeness of thought, she detaches and sends away

from it its poems or songs,—a fearless, sleepless, deathless progeny, which is not exposed to the accidents of the kingdom of time: a fearless, vivacious offspring, clad with wings (such was the virtue of the soul out of which they came), which carry them fast and far, and infix them irrevocably into the hearts of men. These wings are the beauty of the poet's soul. The songs, thus flying immortal from their mortal parent, are pursued by clamorous flights of censures, which swarm in far greater numbers, and threaten to devour them; but these last are not winged. At the end of a very short leap they fall plump down, and rot, having received from the souls out of which they came no beautiful wings. But the melodies of the poet ascend, and leap, and pierce into the deeps of infinite time.

So far the bard taught me, using his freer speech. But nature has a higher end, in the production of new individuals, than security, namely, *ascension*, or, the passage of the soul into higher forms. I knew, in my younger days, the sculptor who made the statue of the youth which stands in the public garden. He was, as I remember, unable to tell, directly, what made him happy, or unhappy, but by wonderful indirections he could tell. He rose one day, according to his habit, before the dawn, and saw the morning break, grand as the eternity out of which it came, and, for many days after, he strove to express this tranquillity, and, lo! his chisel had fashioned out of marble, the form of a beautiful youth, Phosphorus, whose aspect is such, that, it is said, all persons who look on it become silent. The poet also resigns himself to his mood, and that thought which agitated him is expressed, but *alter idem*, in a manner totally new. The expression is organic, or, the new type which things themselves take when liberated. As, in the sun, objects paint their images on the retina of the eye, so they, sharing the aspiration of the whole universe, tend to paint a far more delicate copy of their essence in his mind. Like the metamorphosis of things into higher organic forms, is their change into melodies. Over everything stands its dæmon, or soul, and as the form of the thing is reflected by the eye, so the soul of the thing is reflected by

a melody. The sea, the mountain-ridge, Niagara, and every flower-bed, pre-exist, or super-exist in pre-cantations, which sail like odors in the air, and when any man goes by with an ear sufficiently fine, he over-hears them, and endeavors to write down the notes, without diluting or depraving them. And herein is the legitimation of criticism, in the mind's faith, that the poems are a corrupt version of some text in nature with which they ought to be made tally. A rhyme in one of our sonnets should not be less pleasing than the iterated nodes of a sea-shell, or the resembling difference of a group of flowers. The pairing of the birds is an idyl, not tedious as our idyls are; a tempest is a rough ode without falsehood or rant; a summer, with its harvest sown, reaped, and stored, is an epic song, subordinating how many admirably executed parts. Why should not the symmetry and truth that modulate these, glide into our spirits, and we participate the invention of nature?

This insight, which expresses itself by what is called Imagination, is a very high sort of seeing, which does not come by study, but by the intellect being where and what it sees, by sharing the path, or circuit of things through forms, and so making them translucid to others. The path of things is silent. Will they suffer a speaker to go with them? A spy they will not suffer; a lover, a poet, is the transcendency of their own nature,—him they will suffer. The condition of true naming, on the poet's part, is his resigning himself to the divine *aura* which breathes through forms, and accompanying that.

It is a secret which every intellectual man quickly learns, that, beyond the energy of his possessed and conscious intellect, he is capable of a new energy (as of an intellect doubled on itself), by abandonment to the nature of things; that, beside his privacy of power as an individual man, there is a great public power, on which he can draw, by unlocking, at all risks, his human doors, and suffering the ethereal tides to roll and circulate through him: then he is caught up into the life of the Universe, his speech is thunder, his thought is law, and his words are universally intelligible as the plants and animals. The poet knows that he speaks

adequately, then only when he speaks somewhat wildly, or, "with the flower of the mind;" not with the intellect, used as an organ, but with the intellect released from all service, and suffered to take its direction from its celestial life; or, as the ancients were wont to express themselves, not with intellect alone, but with the intellect inebriated by nectar. As the traveller who has lost his way, throws his reins on his horse's neck, and trusts to the instinct of the animal to find his road, so must we do with the divine animal who carries us through the world. For if in any manner we can stimulate this instinct, new passages are opened for us into nature, the mind flows into and through things hardest and highest, and the metamorphosis is possible.

This is the reason why bards love wine, mead, narcotics, coffee, tea, opium, the fumes of sandal-wood and tobacco, or whatever other species of animal exhilaration. All men avail themselves of such means as they can, to add this extraordinary power to their normal powers; and to this end they prize conversation, music, pictures, sculpture, dancing, theatres, travelling, war, mobs, fires, gaming, politics, or love, or science, or animal intoxication, which are several coarser or finer *quasi*-mechanical substitutes for the true nectar, which is the ravishment of the intellect by coming nearer to the fact. These are auxiliaries to the centrifugal tendency of a man, to his passage out into free space, and they help him to escape the custody of that body in which he is pent up, and of that jail-yard of individual relations in which he is enclosed. Hence, a great number of such as were professionally expressers of Beauty, as painters, poets, musicians, and actors, have been more than others wont to lead a life of pleasure and indulgence; all but the few who received the true nectar; and, as it was a spurious mode of attaining freedom, as it was an emancipation not into the heavens, but into the freedom of baser places, they were punished for that advantage they won, by a dissipation and deterioration. But never can any advantage be taken of nature by a trick. The spirit of the world, the great calm presence of the creator, comes not forth to the sorceries of opium or of wine. The sub-

time vision comes to the pure and simple soul in a clean and chaste body. That which we owe to narcotics is not an inspiration, but some counterfeit excitement and fury. Milton says, that the lyric poet may drink wine and live generously, but the epic poet, he who shall sing of the gods, and their descent unto men, must drink water out of a wooden bowl. For poetry is not "Devil's wine," but God's wine. It is with this as it is with toys. We fill the hands and nurseries of our children with all manner of dolls, drums, and horses, withdrawing their eyes from the plain face and sufficing objects of nature, the sun, the moon, the animals, the water, and stones, which should be their toys. So the poet's habit of living should be set on a key so low and plain, that the common influences should delight him. His cheerfulness should be the gift of the sunlight; the air should suffice for his inspiration, and he should be tipsy with water. That spirit which suffices quiet hearts, which seems to come forth to such from every dry knoll of sere grass, from every pine-stump, and half-imbedded stone, on which the dull March sun shines, comes forth to the poor and hungry, and such as are of simple taste. If thou fill thy brain with Boston and New York, with fashion and covetousness, and wilt stimulate thy jaded senses with wine and French coffee, thou shalt find no radiance of wisdom in the lonely waste of the pine-woods.

If the imagination intoxicates the poet, it is not inactive in other men. The metamorphosis excites in the beholder an emotion of joy. The use of symbols has a certain power of emancipation and exhilaration for all men. We seem to be touched by a wand, which makes us dance and run about happily, like children. We are like persons who come out of a cave or cellar into the open air. This is the effect on us of tropes, fables, oracles, and all poetic forms. Poets are thus liberating gods. Men have really got a new sense, and found within their world another world, or nest of worlds; for, the metamorphosis once seen, we divine that it does not stop. I will not now consider how much this makes the charm of algebra and the mathematics, which also have their tropes, but it is felt in every definition: as, when

Aristotle defines *space* to be an immovable vessel, in which things are contained; or, when Plato defines a *line* to be a flowing point; or, *figure* to be bound of a solid; and many the like. What a joyful sense of freedom we have, when Vitruvius announces the old opinion of artists, that no architect can build any house well who does not know something of anatomy. When Socrates, in Charmides, tells us that the soul is cured of its maladies by certain incantations, and that these incantations are beautiful reasons, from which temperance is generated in souls; when Plato calls the world an animal; and Timæus affirms that plants also are animals; or affirms a man to be a heavenly tree, growing with his root, which is his head, upward; and, as George Chapman, following him, writes,—

“So in our tree of man, whose nervie root  
Springs in his top”;

when Orpheus speaks of hoariness as “that white flower which marks extreme old age;” when Proclus calls the universe the statue of the intellect; when Chaucer, in his praise of “Gentilesse,” compares good blood in mean condition to fire, which, though carried to the darkest house betwixt this and the mount of Caucasus, will yet hold its natural office, and burn as bright as if twenty thousand men did it behold; when John saw, in the apocalypse, the ruin of the world through evil, and the stars fall from heaven, as the fig-tree casteth her untimely fruit; when Æsop reports the whole catalogue of common daily relations through the masquerade of birds and beasts;—we take the cheerful hint of the immortality of our essence, and its versatile habits and escapes, as when the gypsies say, “it is in vain to hang them, they cannot die.”

The poets are thus liberating gods. The ancient British bards had for the title of their order, “Those who are free throughout the world.” They are free, and they make free. An imaginative book renders us much more service at first, by stimulating us through its tropes, than afterward, when we arrive at the precise sense of the author. I think nothing is of any value in books, excepting the transcendental and

extraordinary. If a man is inflamed and carried away by his thought, to that degree that he forgets the authors and the public, and heeds only this one dream, which holds him like an insanity, let me read his paper, and you may have all the arguments, and histories, and criticism. All the value which attaches to Pythagoras, Paracelsus, Cornelius Agrippa, Cardan, Kepler, Swedenborg, Schelling, Oken, or any other who introduces questionable facts into his cosmogony, as angels, devils, magic, astrology, palmistry, mesmerism, and so on, is the certificate we have of departure from routine, and that here is a new witness. That also is the best success in conversation, the magic of liberty, which puts the world, like a ball, in our hands. How cheap even the liberty then seems; how mean to study, when an emotion communicates to the intellect the power to sap and upheave nature: how great the perspective! nations, times, systems, enter and disappear, like threads in tapestry of large figure and many colors; dream delivers us to dream, and, while the drunkenness lasts, we will sell our bed, our philosophy, our religion, in our opulence.

There is good reason why we should prize this liberation. The fate of the poor shepherd; who, blinded and lost in the snow-storm, perishes in a drift within a few feet of his cottage door, is an emblem of the state of man. On the brink of the waters of life and truth, we are miserably dying. The inaccessibleness of every thought but that we are in, is wonderful. What if you come near to it,—you are as remote when you are nearest as when you are farthest. Every thought is also a prison; every heaven is also a prison. Therefore we love the poet, the inventor, who in any form, whether in an ode, or in an action, or in looks and behavior, has yielded us a new thought. He unlocks our chains, and admits us to a new scene.

This emancipation is dear to all men; and the power to impart it, as it must come from greater depth and scope of thought, is a measure of intellect. Therefore all books of the imagination endure, all which ascend to that truth, that the writer sees nature beneath him, and uses it as his exponent. Every verse or sentence, possessing this

virtue, will take care of its own immortality. The religions of the world are the ejaculations of a few imaginative men.

But the quality of the imagination is to flow, and not to freeze. The poet did not stop at the color, or the form, but read their meaning; neither may he rest in this meaning, but he makes the same objects exponents of his new thought. Here is the difference betwixt the poet and the mystic, that the last nails a symbol to one sense, which was a true sense for a moment, but soon becomes old and false. For all symbols are fluxional; all language is vehicular and transitive, and is good, as ferries and horses are, for conveyance, not as farms and houses are, for homestead. Mysticism consists in the mistake of an accidental and individual symbol for a universal one. The morning-redness happens to be the favorite meteor to the eyes of Jacob Behmen, and comes to stand to him for truth and faith; and, he believes, it should stand for the same realities to every reader. But the first reader prefers as naturally the symbol of a mother and child, or a gardener and his bulb, or a jeweller polishing a gem. Either of these, or of a myriad more, are equally good to the person to whom they are significant. Only they must be held lightly, and be very willingly translated into the equivalent terms which others use. And the mystic must be steadily told,—All that you say is just as true without the tedious use of that symbol as with it. Let us have a little algebra, instead of this trite rhetoric,—universal signs, instead of these village symbols,—and we shall both be gainers. The history of hierarchies seems to show, that all religious error consisted in making the symbol too stark and solid, and, at last, nothing but an excess of the organ of language.

Swedenborg, of all men in the recent ages, stands eminently for the translator of nature into thought. I do not know the man in history to whom things stood so uniformly for words. Before him the metamorphosis continually plays. Every thing on which his eye rests, obeys the impulses of moral nature. The figs become grapes whilst he eats them. When some of his angels affirmed a truth, the

laurel twig which they held blossomed in their hands. The noise which at a distance, appeared like gnashing and thumping, on coming nearer was found to be the voice of disputants. The men, in one of his visions, seen in heavenly light, appeared like dragons, and seemed in darkness; but to each other they appeared as men, and, when the light from heaven shone into their cabin, they complained of the darkness, and were compelled to shut the window that they might see.

There was this perception in him, which makes the poet or seer, an object of awe and terror, namely, that the same man, or society of men, may wear one aspect to themselves and their companions, and a different aspect to higher intelligences. Certain priests, whom he describes as conversing very learnedly together, appeared to the children, who were at some distance, like dead horses; and many the like misappearances. And instantly the mind inquires, whether these fishes under the bridge, yonder oxen in the pasture, those dogs in the yard, are immutably fishes, oxen, and dogs, or only so appear to me, and perchance to themselves appear upright men; and whether I appear as a man to all eyes. The Brahmins and Pythagoras propounded the same question, and if any poet has witnessed the transformation, he doubtless found it in harmony with various experiences. We have all seen changes as considerable in wheat and caterpillars. He is the poet, and shall draw us with love and terror, who sees, through the flowing vest, the firm nature, and can declare it.

I look in vain for the poet whom I describe. We do not, with sufficient plainness, or sufficient profoundness, address ourselves to life, nor dare we chaunt our own times and social circumstance. If we filled the day with bravery, we should not shrink from celebrating it. Time and nature yield us many gifts, but not yet the timely man, the new religion, the reconciler, whom all things await. Dante's praise is, that he dared to write his autobiography in colossal cipher, or into universality. We have yet had no genius in America, with tyrannous eye, which knew the value of our incomparable materials, and saw, in the bar-

barism and materialism of the times, another carnival of the same gods whose picture it so much admires in Homer; then in the middle age; then in Calvinism. Banks and tariffs, the newspaper and caucus, methodism and unitarianism, are flat and dull to dull people, but rest on the same foundations of wonder as the town of Troy and the temple of Delphi and are as swiftly passing away. Our logrolling, our stumps and their politics, our fisheries, our Negroes, and Indians, our boats, and our repudiations, the wrath of rogues, and the pusillanimity of honest men, the northern trade, the southern planting, the western clearing, Oregon and Texas, are yet unsung. Yet America is a poem in our eyes; its ample geography dazzles the imagination, and it will not wait long for metres. If I have not found that excellent combination of gifts in my countrymen which I seek, neither could I aid myself to fix the idea of the poet by reading now and then in Chalmers's collection of five centuries of English poets. These are wits, more than poets, though there have been poets among them. But when we adhere to the ideal of the poet, we have our difficulties even with Milton and Homer. Milton is too literary, and Homer too literal and historical.

But I am not wise enough for a national criticism, and must use the old largeness a little longer, to discharge my errand from the muse to the poet concerning his art.

Art is the path of the creator to his work. The paths, or methods, are ideal and eternal, though few men ever see them,—not the artist himself, for years, or for a lifetime, unless he come into the conditions. The painter, the sculptor, the composer, the epic rhapsodist, the orator, all partake one desire, namely, to express themselves symmetrically, and abundantly, not dwarfishly and fragmentarily. They found or put themselves in certain conditions, as, the painter and sculptor before some impressive human figures; the orator, into the assembly of the people; and the others, in such scenes as each has found exciting to his intellect; and each presently feels the new desire. He hears a voice, he sees a beckoning. Then he is apprised, with wonder, what herds of dæmons hem him in. He can no more rest; he

says, with the old painter, "By God, it is in me, and must go forth of me." He pursues a beauty, half seen, which flies before him. The poet pours out verses in every solitude. Most of the things he says are conventional, no doubt; but by and by he says something which is original and beautiful. That charms him. He would say nothing else but such things. In our way of talking, we say, "That is yours, this is mine;" but the poet knows well that it is not his; that it is as strange and beautiful to him as to you, he would fain hear the like eloquence at length. Once having tasted this immortal ichor, he cannot have enough of it, and, as an admirable creative power exists in these intellections, it is of the last importance that these things get spoken. What a little of all we know is said! What drops of all the sea of our science are baled up! and by what accident it is that these are exposed, when so many secrets sleep in nature! Hence the necessity of speech and song; hence these throbs and heart-beatings in the orator, at the door of the assembly, to the end, namely, that thought may be ejaculated as Logos, or Word.

Doubt not, O poet, but persist. Say, "It is in me, and shall out." Stand there, barked and dumb, stuttering and stammering, hissed and hooted, stand and strive, until, at last, rage draw out of thee that *dream*-power which every night shows thee is thine own;—a power transcending all limit and privacy, and by virtue of which a man is the conductor of the whole river of electricity. Nothing walks, or creeps, or grows, or exists, which must not in turn arise and walk before him as exponent of his meaning. Comes he to that power, his genius is no longer exhaustible. All the creatures, by pairs and by tribes, pour into his mind as into a Noah's ark, to come forth again to people a new world. This is like the stock of air for our respiration, or for the combustion of our fire-place, not a measure of gallons, but the entire atmosphere if wanted. And therefore the rich poets, as Homer, Chaucer, Shakspeare, and Raphael, have obviously no limits to their works, except the limits of their lifetime, and resemble a mirror carried through the street, ready to render an image of every created thing.

O poet! a new nobility is conferred in groves and pastures, and not in castles, or by the sword-blade, any longer. The conditions are hard, but equal. Thou shalt leave the world, and know the muse only. Thou shalt not know any longer the time, customs, graces, politics, or opinions of men, but shalt take all from the muse. For the time of towns is tolled from the world by funeral chimes, but in nature the universal hours are counted by succeeding tribes of animals and plants, and by growth of joy on joy. God wills also that thou abdicate a manifold and duplex life, and that thou be content that others speak for thee. Others shall be thy gentlemen, and shall represent all courtesy and worldly life for thee; others shall do the great and resounding actions also. Thou shalt lie close hid with nature, and canst not be afforded to the Capitol or the Exchange. The world is full of renunciations and apprenticeships, and this is thine; thou must pass for a fool and a churl for a long season. This is the screen and sheath in which Pan has protected his well-beloved flower, and thou shalt be known only to thine own, and they shall console thee with tenderest love. And thou shalt not be able to rehearse the names of thy friends in thy verse, for an old shame before the holy ideal. And this is the reward: that the ideal shall be real to thee, and the impressions of the actual world shall fall like summer rain, copious, but not troublesome, to thy invulnerable essence. Thou shalt have the whole land for thy park and manor, the sea for thy bath and navigation, without tax and without envy; the woods and the rivers thou shalt own; and thou shalt possess that wherein others are only tenants and boarders. Thou true land-lord! sea-lord! air-lord! Wherever snow falls, or water flows, or birds fly, wherever day and night meet in twilight, wherever the blue heaven is hung by clouds, or sown with stars, wherever are forms with transparent boundaries, wherever are outlets into celestial space, wherever is danger, and awe and love, there is Beauty, plenteous as rain, shed for thee, and though thou shouldst walk the world over, thou shalt not be able to find a condition inopportune or ignoble.

## XXII

### THE YOUNG AMERICAN

*A Lecture read before the Mercantile Library Association,  
Boston, February 7, 1844.*

GENTLEMEN,

It is remarkable, that our people have their intellectual culture from one country, and their duties from another. This false state of things is newly in a way to be corrected. America is beginning to assert itself to the senses and to the imagination of her children, and Europe is receding in the same degree. This their reaction on education gives a new importance to the internal improvements and to the politics of the country. Who has not been stimulated to reflection by the facilities now in progress of construction for travel and the transportation of goods in the United States?

This rage for road building is beneficent for America, where vast distance is so main a consideration in our domestic politics and trade, inasmuch as the great political promise of the invention is to hold the Union staunch, whose days seemed already numbered by the mere inconvenience of transporting representatives, judges, and officers across such tedious distances of land and water. Not only is distance annihilated, but when, as now, the locomotive and the steamboat, like enormous shuttles, shoot every day across the thousand various threads of national descent and employment, and bind them fast in one web, an hourly assimilation goes forward, and there is no danger that local peculiarities and hostilities should be preserved.

1. But I hasten to speak of the utility of these improvements in creating an American sentiment. An unlooked-for consequence of the railroad, is the increased acquaintance it has given the American people with the

boundless resources of their own soil. If this invention has reduced England to a third of its size, by bringing people so much nearer, in this country it has given a new celerity to *time*, or anticipated by fifty years the planting of tracts of land, the choice of water privileges, the working of mines, and other natural advantages. Railroad iron is a magician's rod, in its power to evoke the sleeping energies of land and water.

The railroad is but one arrow in our quiver, though it has great value as a sort of yard-stick, and surveyor's line. The bountiful continent is ours, state on state, and territory on territory, to the waves of the Pacific sea;

"Our garden is the immeasurable earth,  
The heaven's blue pillars are Medea's house."

The task of surveying, planting, and building upon this immense tract, requires an education and a sentiment commensurate thereto. A consciousness of this fact is beginning to take the place of the purely trading spirit and education which sprang up whilst all the population lived on the fringe of sea-coast. And even on the coast, prudent men have begun to see that every American should be educated with a view to the values of land. The arts of engineering and of architecture are studied; scientific agriculture is an object of growing attention; the mineral riches are explored; limestone, coal, slate, and iron; and the value of timber-lands is enhanced.

Columbus alleged as a reason for seeking a continent in the West, that the harmony of nature required a great tract of land in the western hemisphere, to balance the known extent of land in the eastern; and it now appears that we must estimate the native values of this broad region to redress the balance of our own judgments, and appreciate the advantages opened to the human race in this country, which is our fortunate home. The land is the appointed remedy for whatever is false and fantastic in our culture. The continent we inhabit is to be physic and food for our mind, as well as our body. The land, with its tranquillizing, sanative influences, is to repair the errors of a scholastic and tra-

ditional education, and bring us into just relations with men and things.

The habit of living in the presence of these invitations of natural wealth is not inoperative; and this habit, combined with the moral sentiment which, in the recent years, has interrogated every institution, usage, and law, has, naturally, given a strong direction to the wishes and aims of active young men to withdraw from cities, and cultivate the soil. This inclination has appeared in the most unlooked for quarters, in men supposed to be absorbed in business, and in those connected with the liberal professions. And, since the walks of trade were crowded, whilst that of agriculture cannot easily be, inasmuch as the farmer who is not wanted by others can yet grow his own bread, whilst the manufacturer or the trader, who is not wanted, cannot,—this seemed a happy tendency. For, beside all the moral benefit which we may expect from the farmer's profession, when a man enters it considerably, this promised the conquering of the soil, plenty, and beyond this, the adorning of the country with every advantage and ornament which labor, ingenuity, and affection for a man's home, could suggest.

Meantime, with cheap land, and the pacific disposition of the people, every thing invites to the arts of agriculture, of gardening, and domestic architecture. Public gardens, on the scale of such plantations in Europe and Asia, are now unknown to us. There is no feature of the old countries that strikes an American with more agreeable surprise than the beautiful gardens of Europe; such as the Boboli in Florence, the Villa Borghese in Rome, the Villa d'Este in Tivoli, the gardens at Munich, and at Frankfort on the Main: works easily imitated here, and which might well make the land dear to the citizen, and inflame patriotism. It is the fine art which is left for us, now that sculpture, painting, and religious and civil architecture have become effete, and have passed into second childhood. We have twenty degrees of latitude wherein to choose a seat, and the new modes of travelling enlarge the opportunity of selection, by making it easy to cultivate very distant tracts, and yet remain in strict intercourse with the centers of trade and population.

And the whole force of all the arts goes to facilitate the decoration of lands and dwellings. A garden has this advantage, that it makes it indifferent where you live. A well-laid garden makes the face of the country of no account; let that be low or high, grand or mean, you have made a beautiful abode worthy of man. If the landscape is pleasing, the garden shows it,—if tame, it excludes it. A little grove, which any farmer can find, or cause to grow near his house, will, in a few years, make cataracts and chains of mountains quite unnecessary to his scenery; and he is so contented with his alleys, woodlands, orchards, and river, that Niagara, and the Notch of the White Hills, and Nantasket Beach, are superfluities. And yet the selection of a fit house-lot has the same advantage over an indifferent one, as the selection to a given employment of a man who has a genius for that work. In the last case, the culture of years will never make the most painstaking apprentice his equal; no more will gardening give the advantage of a happy site to a house in a hole or on a pinnacle. In America, we have hitherto little to boast in this kind. The cities drain the country of the best part of its population: the flower of the youth, of both sexes, goes into the towns, and the country is cultivated by a so much inferior class. The land,—travel a whole day together,—looks poverty-stricken, and the buildings plain and poor. In Europe, where society has an aristocratic structure, the land is full of men of the best stock, and the best culture, whose interest and pride it is to remain half the year on their estates, and to fill them with every convenience and ornament. Of course, these make model farms, and model architecture, and are a constant education to the eye of the surrounding population. Whatever events in progress shall go to disgust men with cities, and infuse into them the passion for country life and country pleasures, will render a service to the whole face of this continent, and will further the most poetic of all the occupations of real life, the bringing out by art the native but hidden graces of the landscape.

I look on such improvements, also, as directly tending to endear the land to the inhabitant. Any relation to the

land, the habit of tilling it, or mining it, or even hunting on it, generates the feeling of patriotism. He who keeps shop on it, or he who merely uses it as a support to his desk and ledger, or to his manufactory, values it less. The vast majority of the people of this country live by the land, and carry its quality in their manners and opinions. We in the Atlantic states, by position, have been commercial, and have, as I said, imbibed easily an European culture. Luckily for us, now that steam has narrowed the Atlantic to a strait, the nervous, rocky West is intruding a new and continental element into the national mind, and we shall yet have an American genius. How much better when the whole land is a garden, and the people have grown up in the bowers of a paradise. Without looking, then, to those extraordinary social influences which are now acting in precisely this direction, but only at what is inevitably doing around us, I think we must regard the *land* as a commanding and increasing power on the citizen, the sanative and Americanizing influence, which promises to disclose new virtues for ages to come.

2. In the second place, the uprise and culmination of the new and anti-feudal power of Commerce, is the political fact of most significance to the American at this hour. We cannot look on the freedom of this country, in connection with its youth, without a presentiment that here shall laws and institutions exist on some scale of proportion to the majesty of nature. To men legislating for the area betwixt the two oceans, betwixt the snows and the tropics, somewhat of the gravity of nature will infuse itself into the code. A heterogeneous population crowding on all ships from all corners of the world to the great gates of North America, namely, Boston, New York, and New Orleans, and thence proceeding inward to the prairie and the mountains, and quickly contributing their private thought to the public opinion, their toll to the treasury, and their vote to the election, it cannot be doubted that the legislation of this country should become more catholic and cosmopolitan than that of any other. It seems so easy for America to aspire and express the most expansive and humane spirit;

new-born, free, healthful, strong, the land of the laborer, of the democrat, of the philanthropist, of the believer, of the saint, she should speak for the human race. It is the country of the Future. From Washington, proverbially "the city of magnificent distances," through all its cities, states, and territories, it is a country of beginnings, of projects, of designs, and expectations.

Gentlemen, there is a sublime and friendly Destiny by which the human race is guided,—the race never dying, the individual never spared,—to results affecting masses and ages. Men are narrow and selfish, but the Genius or Destiny is not narrow, but beneficent. It is not discovered in their calculated and voluntary activity, but in what befalls, with or without their design. Only what is inevitable interests us, and it turns out that love and good are inevitable, and in the course of things. That Genius has infused itself into nature. It indicates itself by a small excess of good, a small balance in brute facts always favorable to the side of reason. All the facts in any part of nature shall be tabulated, and the results shall indicate the same security and benefit; so slight as to be hardly observable, and yet it is there. The sphere is flattened at the poles, and swelled at the equator; a form flowing necessarily from the fluid state, yet *the* form, the mathematician assures us, required to prevent the protuberances of the continent, or even of lesser mountains cast up at any time by earthquakes, from continually deranging the axis of the earth. The census of the population is found to keep an invariable equality in the sexes, with a trifling predominance in favor of the male, as if to counterbalance the necessarily increased exposure of male life in war, navigation, and other accidents. Remark the unceasing effort throughout nature at somewhat better than the actual creatures: *amelioration in nature*, which alone permits and authorizes amelioration in mankind. The population of the world is a conditional population; these are not the best, but the best that could live in the existing state of soils, gases, animals, and morals: the best that could *yet* live; there shall be a better, please God. This Genius, or Destiny, is of the sternest administration, though

rumors exist of its secret tenderness. It may be styled a cruel kindness, serving the whole even to the ruin of the member; a terrible communist, reserving all profits to the community, without dividend to individuals. Its law is, you shall have everything as a member, nothing to yourself. For Nature is the noblest engineer, yet uses a grinding economy, working up all that is wasted to-day into to-morrow's creation;—not a superfluous grain of sand, for all the ostentation she makes of expense and public works. It is because Nature thus saves and uses, laboring for the general, that we poor particulars are so crushed and straitened, and find it so hard to live. She flung us out in her plenty, but we cannot shed a hair, or a paring of a nail but instantly she snatches at the shred, and appropriates it to the general stock. Our condition is like that of the poor wolves: if one of the flock wound himself, or so much as limp, the rest eat him up incontinently.

That serene Power interposes the check upon the caprices and officiousness of our wills. Its charity is not our charity. One of its agents is our will, but that which expresses itself in our will, is stronger than our will. We are very forward to help it, but it will not be accelerated. It resists our meddling, eleemosynary contrivances. We devise sumptuary and relief laws, but the principle of population is always reducing wages to the lowest pittance on which human life can be sustained. We legislate against forestalling and monopoly; we would have a common granary for the poor; but the selfishness which hoards the corn for high prices, is the preventive of famine; and the law of self-preservation is surer policy than any legislation can be. We concoct eleemosynary systems, and it turns out that our charity increases pauperism. We inflate our paper currency, we repair commerce with unlimited credit, and are presently visited with unlimited bankruptcy.

It is easy to see that the existing generation are conspiring with a beneficence, which, in its working for coming generations, sacrifices the passing one, which infatuates the most selfish men to act against their private interest for the public welfare. We build railroads, we know not for

what or for whom: but one thing is certain, that we who build will receive the very smallest share of benefit. Benefits will accrue; they are essential to the country, but that will be felt not until we are no longer countrymen. We do the like in all matters:—

“Man’s heart the Almighty to the Future set  
By secret and inviolable springs.”

We plant trees, we build stone houses, we redeem the waste, we make prospective laws, we found colleges and hospitals for remote generations. We should be mortified to learn that the little benefit we chanced in our own persons to receive was the utmost they would yield.

The history of commerce, is the record of this beneficent tendency. The patriarchal form of government readily becomes despotic, as each person may see in his own family. Fathers wish to be the fathers of the minds of their children, and behold with impatience a new character and way of thinking, presuming to show itself in their own son or daughter. This feeling, which all their love and pride in the powers of their children cannot subdue, becomes petulance and tyranny when the head of the clan, the emperor of an empire, deals with the same difference of opinion in his subjects. Difference of opinion is the one crime which kings never forgive. An empire is an immense egotism. “I am the State,” said the French Louis. When a French ambassador mentioned to Paul of Russia, that a man of consequence in St. Petersburg was interesting himself in some matter, the Czar interrupted him—“There is no man of consequence in this empire, but he with whom I am actually speaking; and so long only as I am speaking to him, is he of any consequence.” And Nicholas, the present emperor, is reported to have said to his council, “The age is embarrassed with new opinions; rely on me, gentlemen, I shall oppose an iron will to the progress of liberal opinions.”

It is easy to see that this patriarchal or family management gets to be rather troublesome to all but the papa; the sceptre comes to be a crowbar. And this unpleasant egotism, Feudalism opposes, and finally destroys. The king is

mpelled to call in the aid of his brothers and cousins, and mote relations, to help him keep his overgrown house in order; and this club of noblemen always comes at last to have will of their own; they combine to brave the sovereign, and call in the aid of the people. Each chief attaches as many followers as he can, by kindness, maintenance, and gifts; and as long as war lasts, the nobles, who must be soldiers, rule very well. But when peace comes, the nobles prove very whimsical and uncomfortable masters; their policies turn out to be insulting and degrading to the commoner. Feudalism grew to be a bandit and brigand.

Meantime Trade had begun to appear: Trade, a plant which grows wherever there is peace, as soon as there is peace, and as long as there is peace. The luxury and necessity of the noble fostered it. And as quickly as men go to foreign parts, in ships or caravans, a new order of things springs up; new command takes place, new servants and new masters. Their information, their wealth, the correspondence, have made them quite other men than left their native shore. *They* are nobles now, and by another patent than the king's. Feudalism had been good, had broken the power of the kings, and had some good traits of its own; but had grown mischievous, it was time for it to die, and, as they say of dying people, all its faults came out. Trade is the strong man that broke it down, and raised a new and unknown power in its place. It is a new agent in the world, and one of great function; it is a very intellectual force. This replaces physical strength, and instals computation, communication, information, science, in its room. It calls out all force of a certain kind that slumbered in the former dynasties. It is now in the midst of its career. Feudalism is ended yet. Our governments still partake largely of that element. Trade goes to make the governments insignificant, and to bring every kind of faculty of every individual that can in any manner serve any person, *on sale*. Instead of a huge Army and Navy, and Executive Departments, it converts Government into an Intelligence-office, where every man may find what he wishes to buy, and exchange what he has to sell, not only produce and manufactures,

but art, skill, and intellectual and moral values. This is the good and this the evil of trade, that it would put every thing into market, talent, beauty, virtue, and man himself.

By this means, however, it has done its work. It has its faults, and will come to an end, as the others do. The philosopher and lover of man have much harm to say of trade; but the historian will see that trade was the principle of Liberty; that trade planted America and destroyed Feudalism; that it makes peace and keeps peace, and it will abolish slavery. We complain of its oppression of the poor, and of its building up a new aristocracy on the ruins of the aristocracy it destroyed. But the aristocracy of trade has no permanence, is not entailed, was the result of toil and talent, the result of merit of some kind, and is continually falling, like the waves of the sea, before new claims of the same sort. Trade is an instrument in the hands of that friendly Power which works for us in our own despite. We design it thus and thus; it turns out otherwise and far better. This beneficent tendency, omnipotent without violence, exists and works. Every line of history inspires a confidence that we shall not go far wrong; that things mend. That is the moral of all we learn, that it warrants Hope, the prolific mother of reforms. Our part is plainly not to throw ourselves across the track, to block improvement, and sit till we are stone, but to watch the uprise of successive mornings, and to conspire with the new works of new days. Government has been a fossil; it should be a plant. I conceive that the office of statute law should be to express, and not to impede the mind of mankind. New thoughts, new things. Trade was one instrument, but Trade is also but for a time, and must give way to somewhat broader and better, whose signs are already dawning in the sky.

3. I pass to speak of the signs of that which is the sequel of trade.

In consequence of the revolution in the state of society wrought by trade, Government in our times is beginning to wear a clumsy and cumbrous appearance. We have already seen our way to shorter methods. The time is full of good

signs. Some of them shall ripen to fruit. All this beneficent socialism is a friendly omen, and the swelling cry of voices for the education of the people, indicates that Government has other offices than those of banker and executioner. Witness the new movements in the civilized world, the Communism of France, Germany, and Switzerland; the Trades' Unions; the English League against the Corn Laws; and the whole *Industrial Statistics*, so called. In Paris, the blouse, the badge of the operative, has begun to make its appearance in the saloons. Witness, too, the spectacle of three Communities which have within a very short time sprung up within this Commonwealth, besides several others undertaken by citizens of Massachusetts within the territory of other States. These proceeded from a variety of motives, from an impatience of many usages in common life, from a wish for greater freedom than the manners and opinions of society permitted, but in great part from a feeling that the true offices of the State, the State had let fall to the ground; that in the scramble of parties for the public purse, the main duties of government were omitted,—the duty to instruct the ignorant, to supply the poor with work and with good guidance. These communists preferred the agricultural life as the most favorable condition for human culture; but they thought that the farm, as we manage it, did not satisfy the right ambition of man. The farmer, after sacrificing pleasure, taste, freedom, thought, love, to his work, turns out often a bankrupt, like the merchant. This result might well seem astounding. All this drudgery, from cockerowing to starlight, for all these years, to end in mortgages and the auctioneer's flag, and removing from bad to worse. It is time to have the thing looked into, and with a sifting criticism ascertain who is the fool. It seemed a great deal worse, because the farmer is living in the same town with men who pretend to know exactly what he wants. On one side, is agricultural chemistry, coolly exposing the nonsense of our pendthrift agriculture and ruinous expense of manures, and offering, by means of a teaspoonful of artificial guano, to turn a sandbank into corn; and, on the other, the farmer, not only eager for the information, but with bad crops

and in debt and bankruptcy, for want of it. Here are Etzlers and mechanical projectors, who, with the Fourierists, undoubtingly affirm that the smallest union would make every man rich;—and, on the other side, a multitude of poor men and women seeking work, and who cannot find enough to pay their board. The science is confident, and surely the poverty is real. If any means could be found to bring these two together!

This was one design of the projectors of the Associations which are now making their first feeble experiments. They were founded in love, and in labor. They proposed, as you know, that all men should take a part in the manual toil, and proposed to amend the condition of men, by substituting harmonious for hostile industry. It was a noble thought of Fourier, which gives a favorable idea of his system, to distinguish in his Phalanx a class as the Sacred Band, by whom, whatever duties were disagreeable, and likely to be omitted, were to be assumed.

At least, an economical success seemed certain for the enterprise, and that agricultural association must, sooner or later, fix the price of bread, and drive single farmers into association, in self-defence; as the great commercial and manufacturing companies had already done. The Community is only the continuation of the same movement which made the joint-stock companies for manufactures, mining, insurance, banking, and so forth. It has turned out cheaper to make calico by companies; and it is proposed to plant corn, and to bake bread by companies.

Undoubtedly, abundant mistakes will be made by these first adventurers, which will draw ridicule on their schemes. I think, for example, that they exaggerate the importance of a favorite project of theirs, that of paying talent and labor at one rate, paying all sorts of service at one rate, say ten cents the hour. They have paid it so; but not an instant would a dime remain a dime. In one hand it became an eagle as it fell, and in another hand a copper cent. For the whole value of the dime is in knowing what to do with it. One man buys with it a land-title of an Indian, and makes his posterity princes; or buys corn enough to feed

the world; or pen, ink, and paper, or a painter's brush, by which he can communicate himself to the human race as if he were fire; and the other buys barley candy. Money is of no value; it cannot spend itself. All depends on the skill of the spender. Whether, too, the objection almost universally felt by such women in the community as were mothers, to an associate life, to a common table, and a common nursery, &c., setting a higher value on the private family with poverty, than on an association with wealth, will not prove insuperable, remains to be determined.

But the Communities aimed at a higher success in securing to all their members an equal and thorough education. And on the whole, one may say, that aims so generous, and so forced on them by the times, will not be relinquished, even if these attempts fail, but will be prosecuted until they succeed.

This is the value of the Communities; not what they have done, but the revolution which they indicate as on the way. Yes, Government must educate the poor man. Look across the country from any hillside around us, and the landscape seems to crave Government. The actual differences of men must be acknowledged, and met with love and wisdom. These rising grounds which command the champaign below, seem to ask for lords, true lords, *land*-lords, who understand the land and its uses, and the applicabilities of men, and whose government would be what it should, namely, mediation between want and supply. How gladly would each citizen pay a commission for the support and continuation of good guidance. None should be a governor who has not talent for governing. Now many people have a native skill for carving out business for many hands; a genius for the disposition of affairs; and are never happier than when difficult practical questions, which embarrass other men, are to be solved. All lies in light before them; they are in their element. Could any means be contrived to appoint only these! There really seems a progress towards such a state of things, in which this work shall be done by these natural workmen; and this, not certainly through any increased discretion shown by the citizens at elections, but by the gradual

contempt into which official government falls, and the increasing disposition of private adventurers to assume its fallen functions. Thus the costly Post Office is likely to go into disuse before the private transportation-shop of Harnden and his competitors. The currency threatens to fall entirely into private hands. Justice is continually administered more and more by private reference, and not by litigation. We have feudal governments in a commercial age. It would be but an easy extension of our commercial system, to pay a private emperor a fee for services, as we pay an architect, an engineer, or a lawyer. If any man has talent for righting wrong, for administering difficult affairs, for counselling poor farmers how to turn their estates to good husbandry, for combining a hundred enterprises to general benefit, let him in the country-town, or in Court-street, put up his sign-board, Mr. Smith, *Governor*, Mr. Johnson, *Working king*.

How can our young men complain of the poverty of things in New England, and not feel that poverty as a demand on their charity to make New England rich? Where is he who, seeing a thousand men useless and unhappy, and making the whole region forlorn by their inaction, and conscious himself of possessing the faculty they want, does not hear his call to go and be their king?

We must have kings, and we must have nobles. Nature provides such in every society,—only let us have the real instead of the titular. Let us have our leading and our inspiration from the best. In every society some men are born to rule, and some to advise. Let the powers be well directed, directed by love, and they would everywhere be greeted with joy and honor. The chief is the chief all the world over; not only his cap and his plume. It is only the dislike of the pretender, which makes men sometimes unjust to the accomplished man. If society were transparent the noble would everywhere be gladly received and appreciated and would not be asked for his day's work, but would be felt as benefit, inasmuch as he was noble. That were his duty and stint,—to keep himself pure and purifying, the leaven of his nation. I think I see place and duty

or a nobleman in every society; but it is not to drink wine and ride in a fine coach, but to guide and adorn life for the multitude by forethought, by elegant studies, by perseverance, self-devotion, and the remembrance of the humble old friend, by making his life secretly beautiful.

I call upon you, young men, to obey your heart, and be the nobility of this land. In every age of the world, there has been a leading nation, one of a more generous sentiment, whose eminent citizens were willing to stand for the interests of general justice and humanity, at the risk of being called, by the men of the moment, chimerical and fantastic. Which should be that nation but these States? Which should lead that movement, if not New England? Who should lead the leaders, but the Young American? The people, and the world, is now suffering from the want of religion and honor in its public mind. In America, out of doors all seems a market; in doors, an air-tight stove of conventionalism. Every body who comes into our houses savors of these habits; the men, of the market; the women, of the custom. I find no expression in our state papers or legislative debate, in our lyceums or churches, specially in our newspapers, of a high national feeling, no lofty counsels that might stir the blood. I speak of those organs which can be presumed to speak a popular sense. They recommend conventional virtues, whatever will earn and preserve property; always the capitalist; the college, the church, the hospital, the theatre, the hotel, the road, the ship, of the capitalist,—whatever goes to secure, adorn, enlarge these, is good; what jeopardizes any of these, is damnable. The "opposition" papers, so called, are on the same side. They attack the great capitalist, but with the aim to make a capitalist of the poor man. The opposition is against those who have money, from those who wish to have money. But no one announces to us in journal, or in pulpit, or in the street, the secret of heroism,

"Man alone

Can perform the impossible?"

I shall not need to go into an enumeration of our national

defects and vices which require this Order of Censors in the state. I might not set down our most proclaimed offenses as the worst. It is not often the worst trait that occasions the loudest outcry. Men complain of their suffering, and not of the crime. I fear little from the bad effect of Repudiation; I do not fear that it will spread. Stealing is a suicidal business; you cannot repudiate but once. But the bold face and tardy repentance permitted to this local mischief, reveal a public mind so preoccupied with the love of gain, that the common sentiment of indignation at fraud does not act with its natural force. The more need of a withdrawal from the crowd, and a resort to the fountain of right, by the brave. The timidity of our public opinion, is our disease, or, shall I say, the publicness of opinion, the absence of private opinion. Good-nature is plentiful, but we want justice, with heart of steel, to fight down the proud. The private mind has the access to the totality of goodness and truth, that it may be a balance to a corrupt society; and to stand for the private verdict against popular clamor, is the office of the noble. If a humane measure is propounded in behalf of the slave, or of the Irishman, or the Catholic, or for the succor of the poor, that sentiment, that project, will have the homage of the hero. That is his nobility, his oath of knighthood, to succor the helpless and oppressed; always to throw himself on the side of weakness, of youth, of hope, on the liberal, on the expansive side, never on the defensive, the conserving, the timorous, the lock and bolt system. More than our good-will we may not be able to give. We have our own affairs, our own genius, which chains us to our proper work. We cannot give our life to the cause of the debtor, of the slave, or the pauper, as another is doing; but to one thing we are bound, not to blaspheme the sentiment and the work of that man, not to throw stumbling-blocks in the way of the abolitionist, the philanthropist, as the organs of influence and opinion are swift to do. It is for us to confide in the beneficent Supreme Power, and not to rely on our money, and on the state because it is the guard of money. At this moment, the terror of old people and of vicious people, is lest the Union of these States be

destroyed: as if the Union had any other real basis than the good pleasure of a majority of the citizens to be united. But the wise and just man will always feel that he stands on his own feet; that he imparts strength to the state, not receives security from it; and that if all went down, he and such as he would quite easily combine in a new and better constitution. Every great and memorable community has consisted of formidable individuals, who, like the Roman or the Spartan, lent his own spirit to the state and made it great. Yet only by the supernatural is a man strong; nothing is so weak as an egotist. Nothing is mightier than we, when we are vehicles of a truth before which the state and the individual are alike ephemeral.

Gentlemen, the development of our American internal resources, the extension to the utmost of the commercial system, and the appearance of new moral causes which are to modify the state, are giving an aspect of greatness to the Future, which the imagination fears to open. One thing is plain for all men of common sense and common conscience, that here, here in America, is the home of man. After all the deductions which are to be made for our pitiful politics, which stake every gravest national question on the silly die, whether James or whether Jonathan shall sit in the chair and hold the purse; after all the deduction is made for our frivolities and insanities, there still remains an organic simplicity and liberty, which, when it loses its balance, redresses itself presently, which offers opportunity to the human mind not known in any other region.

It is true, the public mind wants self-respect. We are full of vanity, of which the most signal proof is our sensitiveness to foreign and especially English censure. One cause of this is our immense reading, and that reading chiefly confined to the productions of the English press. It is also true, that, to imaginative persons in this country, there is somewhat bare and bald in our short history, and unsettled wilderness. They ask, who would live in a new country, that can live in an old? and it is not strange that our youths and maidens should burn to see the picturesque extremes of an antiquated country. But it is one thing to visit the pyr-

amids, and another to wish to live there. Would they like tithes to the clergy, and sevenths to the government, and horse-guards, and licensed press, and grief when a child is born, and threatening, starved weavers, and a pauperism now constituting one-thirteenth of the population? Instead of the open future expanding here before the eye of every boy to vastness, would they like the closing in of the future to a narrow slit of sky, and that fast contracting to be no future? One thing, for instance, the beauties of aristocracy, we commend to the study of the travelling American. The English, the most conservative people this side of India, are not sensible of the restraint, but an American would seriously resent it. The aristocracy, incorporated by law and education, degrades life for the unprivileged classes. It is a questionable compensation to the embittered feeling of a proud commoner, the reflection that a fop, who, by the magic of title, paralyzes his arm, and plucks from him half the graces and rights of a man, is himself also an aspirant excluded with the same ruthlessness from higher circles, since there is no end to the wheels within wheels of this spiral heaven. Something may be pardoned to the spirit of loyalty when it becomes fantastic; and something to the imagination, for the baldest life is symbolic. Philip II. of Spain rated his ambassador for neglecting serious affairs in Italy, whilst he debated some point of honor with the French ambassador; "You have left a business of importance for a ceremony." The ambassador replied, "Your majesty's self is but a ceremony." In the East, where the religious sentiment comes in to the support of the aristocracy, and in the Romish church also, there is a grain of sweetness in the tyranny; but in England, the fact seems to me intolerable, what is commonly affirmed, that such is the transcendent honor accorded to wealth and birth, that no man of letters, be his eminence what it may, is received into the best society, except as a lion and a show. The English have many virtues, many advantages, and the proudest history of the world; but they need all, and more than all the resources of the past to indemnify a heroic gentleman in that country for the mortifications prepared for him by the system of society,

and which seem to impose the alternative to resist or to avoid it. That there are mitigations and practical alleviations to this rigor, is not an excuse for the rule. Commanding worth, and personal power, must sit crowned in all companies, nor will extraordinary persons be slighted or affronted in any company of civilized men. But the system is an invasion of the sentiment of justice and the native rights of men, which, however decorated, must lessen the value of English citizenship. It is for Englishmen to consider, not for us; we only say, let us live in America, too thankful for our want of feudal institutions. Our houses and towns are like mosses and lichens, so slight and new; but youth is a fault of which we shall daily mend. This land, too, is as old as the Flood, and wants no ornament or privilege which nature could bestow. Here stars, here woods, here hills, here animals, here men abound, and the vast tendencies concur of a new order. If only the men are employed in conspiring with the designs of the Spirit who led us hither, and is leading us still, we shall quickly enough advance out of all hearing of other's censures, out of all regrets of our own, into a new and more excellent social state than history has recorded.

## POEMS OF EMERSON

*Charm of Contentment - perfection* *didactic*  
*silence*

### DAYS

DAMSELS of Time, the hypocritic Days,  
Muffled and dumb like barefoot dervishes, ?  
And marching single in an endless file,  
Bring diadems and fagots in their hands.  
To each they offer gifts after his will,  
Bread, kingdoms, stars, and sky that holds them all.  
I, in my pleached garden, watched the pomp,  
Forgot my morning wishes, hastily  
Took a few herbs and apples, and the Day  
Turned and departed silent. I, too late,  
Under her solemn fillet saw the scorn.

### GOOD-BYE

GOOD-BYE, proud world! I'm going home:  
Thou art not my friend, and I'm not thine.  
Long through thy weary crowds I roam;  
A river-ark on the ocean brine,  
Long I've been tossed like the driven foam;  
But now, proud world! I'm going home.

Good-bye to flattery's fawning face;  
To Grandeur with his wise grimace;  
To upstart wealth's averted eye;  
To supple Office, low and high;  
To crowded halls, to court and street;  
To frozen hearts and hasting feet;  
To those who go, and those who come;  
Good-bye, proud world! I'm going home.

I am going to my own hearth stone,  
 Bosomed in yon green hills alone,—  
 A secret nook in a pleasant land,  
 Whose groves the frolic fairies planned;  
 Where arches green, the livelong day,  
 Echo the blackbird's roundelay,  
 And vulgar feet have never trod  
 A spot that is sacred to thought and God.

O, when I am safe in my sylvan home,  
 I tread on the pride of Greece and Rome;  
 And when I am stretched beneath the pines,  
 Where the evening star so holy shines,  
 I laugh at the lore and the pride of man,  
 At the sophist schools, and the learned clan;  
 For what are they all, in their high conceit,  
 When man in the bush with God may meet?

### THE RHODORA:

ON BEING ASKED WHENCE IS THE FLOWER?

IN May, when sea-winds pierced our solitudes,  
 I found the fresh Rhodora in the woods,  
 Spreading its leafless blooms in a damp nook,  
 To please the desert and the sluggish brook.  
 The purple petals, fallen in the pool,  
 Made the black water with their beauty gay;  
 Here might the red-bird come his plumes to cool,  
 And court the flower that cheapens his array.  
 Rhodora! if the sages ask thee why  
 This charm is wasted on the earth and sky,  
 Tell them, dear, that if eyes were made for seeing,  
 Then Beauty is its own excuse for being:  
 Why thou wert there, O rival of the rose!  
 I never thought to ask, I never knew;  
 But, in my simple ignorance, suppose  
 The self-same Power that brought me there brought you.

## THE HUMBLE-BEE

BURLY, dozing humble-bee,  
Where thou art is clime for me.  
Let them sail for Porto Rique,  
Far-off heats through seas to seek;  
I will follow thee alone,  
Thou animated torrid-zone!  
Zigzag steerer, desert cheerer,  
Let me chase thy waving lines;  
Keep me nearer, me thy hearer,  
Singing over shrubs and vines.

Insect lover of the sun,  
Joy of thy dominion!  
Sailor of the atmosphere;  
Swimmer through the waves of air;  
Voyager of light and noon;  
Epicurean of June;  
Wait, I prithee, till I come  
Within earshot of thy hum,—  
All without is martyrdom.

When the south wind, in May days,  
With a net of shining haze  
Silvers the horizon wall,  
And, with softness touching all,  
Tints the human countenance  
With a color of romance,  
And, infusing subtle heats,  
Turns the sod to violets,  
Thou, in sunny solitudes,  
Rover of the underwoods,  
The green silence dost displace  
With thy mellow, breezy bass.

Hot midsummer's petted crone,  
Sweet to me thy drowsy tone

Tells of countless sunny hours,  
Long days, and solid banks of flowers;  
Of gulfs of sweetness without bound  
In Indian wildernesses found;  
Of Syrian peace, immortal leisure,  
Firmest cheer, and bird-like pleasure.

| Aught unsavory or unclean  
| Hath my insect never seen;  
But violets and bilberry bells,  
Maple-sap, and daffodels,  
Grass with green flag half-mast high,  
Succory to match the sky,  
Columbine with horn of honey,  
Scented fern, and agrimony,  
Clover, catchfly, adder's-tongue,  
And brier-roses, dwelt among;  
All beside was unknown waste,  
All was picture as he passed.

| Wiser far than human seer,  
| Yellow-breeched philosopher!  
Seeing only what is fair,  
Sipping only what is sweet,  
Thou dost mock at fate and care,  
Leave the chaff, and take the wheat.  
When the fierce northwestern blast  
Cools sea and land so far and fast,  
Thou already slumberest deep;  
Woe and want thou canst outsleep;  
Want and woe, which torture us,  
Thy sleep makes ridiculous.

### EACH AND ALL

LITTLE thinks, in the field, yon red-cloaked clown,  
Of thee from the hill-top looking down;  
The heifer that lows in the upland farm,  
Far-heard, lows not thine ear to charm;

The sexton, tolling his bell at noon,  
Deems not that great Napoleon  
Stops his horse, and lists with delight,  
Whilst his files sweep round yon Alpine height;  
Nor knowest thou what argument  
Thy life to thy neighbor's creed has lent.  
All are needed by each one;  
Nothing is fair or good alone.  
I thought the sparrow's note from heaven,  
Singing at dawn on the alder bough;  
He brought him home, in his nest, at even;  
He sings the song, but it pleases not now,  
For I did not bring home the river and sky;—  
He sang to my ear,—they sang to my eye.  
The delicate shells lay on the shore;  
The bubbles of the latest wave  
Fresh pearls to their enamel gave;  
And the bellowing of the savage sea  
Greeted their safe escape to me.  
I wiped away the weeds and foam,  
I fetched my sea-born treasures home;  
But the poor, unsightly, noisome things  
Had left their beauty on the shore,  
With the sun and the sand and the wild uproar.  
The lover watched his graceful maid,  
As 'mid the virgin train she strayed,  
Nor knew her beauty's best attire  
Was woven still by the snow-white choir.  
At last she came to his hermitage,  
Like the bird from the woodlands to the cage;—  
The gay enchantment was undone,  
A gentle wife, but fairy none.  
Then I said, "I covet truth;  
Beauty is unripe childhood's cheat;  
Leave it behind with the games of youth."—  
As I spoke, beneath my feet  
The ground-pine curled its pretty wreath,  
Tumbling over the club-moss burrs:  
I inhaled the violet's breath;

Around me stood the oaks and firs;  
Pine-cones and acorns lay on the ground;  
Over me soared the eternal sky,  
Full of light and of deity;  
Again I saw, again I heard,  
The rolling river, the morning bird;—  
Beauty through my senses stole;  
I yielded myself to the perfect whole.

### THE PROBLEM

I LIKE a church; I like a cowl;  
I love a prophet of the soul;  
And on my heart monastic aisles  
Fall like sweet strains, or pensive smiles;  
Yet not for all his faith can see  
Would I that cowed churchman be.

Why should the vest on him allure,  
Which I could not on me endure?  
Not from vain or shallow thought  
His awful Jove young Phidias brought;  
Never from lips of cunning fell  
The thrilling Delphic oracle;  
Out from the heart of nature rolled  
The burdens of the Bible old;  
The litanies of nations came,  
Like the volcano's tongue of flame,  
Up from the burning core below,—  
The canticles of love and woe;  
The hand that rounded Peter's dome,  
And groined the aisles of Christian Rome,  
Wrought in a sad sincerity;  
Himself from God he could not free;  
He builded better than he knew;—  
The conscious stone to beauty grew.  
Know'st thou what wove yon wood-bird's nest  
Of leaves, and feathers from her breast?

Or how the fish outbuilt her shell,  
Painting with morn each annual cell?  
Or how the sacred pine-tree adds  
To her old leaves new myriads?  
Such and so grew these holy piles,  
Whilst love and terror laid the tiles.  
Earth proudly wears the Parthenon,  
As the best gem upon her zone;  
And Morning opes with haste her lids,  
To gaze upon the Pyramids;  
O'er England's abbeyes bends the sky,  
As on its friends, with kindred eye;  
For, out of Thought's interior sphere  
These wonders rose to upper air;  
And Nature gladly gave them place,  
Adopted them into her race,  
And granted them an equal date  
With Andes and with Ararat.

These temples grew as grows the grass;  
Art might obey, but not surpass.  
The passive Master lent his hand  
To the vast soul that o'er him planned;  
And the same power that reared the shrine,  
Bestrode the tribes that knelt within.  
Ever the fiery Pentecost  
Girds with one flame the countless host,  
Trances the heart through chanting choirs,  
And through the priest the mind inspires.

The word unto the prophet spoken  
Was writ on tables yet unbroken;  
The words by seers or sibyls told,  
In groves of oak, or fanes of gold,  
Still floats upon the morning wind,  
Still whispers to the willing mind.  
One accent of the Holy Ghost  
The heedless world hath never lost.  
I know what say the fathers wise,—

The Book itself before me lies,  
Old *Chrysostom*, best Augustine,  
And he who blent both in his line,  
The younger *Golden Lips* or mines,  
Taylor, the Shakspeare of divines.  
His words are music to my ear,  
I see his cowed portrait dear;  
And yet, for all his faith could see,  
I would not the good bishop be.

## FORBEARANCE

HAST thou named all the birds without a gun?  
Loved the wood-rose, and left it on its stalk?  
At rich men's tables eaten bread and pulse?  
Unarmed, faced danger with a heart of trust?  
And loved so well a high behavior,  
In man or maid, that thou from speech refrained,  
Nobility more nobly to repay?  
O, be my friend, and teach me to be thine!

## From: WOODNOTES

## 1

For this present, hard  
Is the fortune of the bard,  
    Born out of time;  
All his accomplishment,  
From Nature's utmost treasure spent,  
    Booteth not him.  
When the pine tosses its cones  
To the song of its waterfall tones,  
He speeds to the woodland walks,  
To birds and trees he talks:  
Cæsar of his leafy Rome,  
There the poet is at home.

He goes to the river-side—  
Not hook nor line hath he;  
He stands in the meadows wide,—  
Nor gun nor scythe to see;  
With none has he to do,  
And none seek him,  
Nor men below,  
Nor spirits dim.  
Sure some god his eye enchants:  
What he knows nobody wants.  
In the wood he travels glad,  
Without better fortune had,  
Melancholy without bad.  
Planter of celestial plants,  
What he knows nobody wants;  
What he knows he hides, not vaunts.  
Knowledge this man prizes best  
Seems fantastic to the rest:  
Pondering shadows, colors, clouds,  
Grass-buds, and caterpillar-shrouds,  
Boughs on which the wild bees settle,  
Tints that spot the violet's petal,  
Why Nature loves the number five,  
And why the star-form she repeats:  
Lover of all things alive,  
Wonderer at all he meets,  
Wonderer chiefly at himself—  
Who can tell him what he is?  
Or how meet in human elf  
Coming and past eternities?

## 2

And such I knew, a forest seer,  
A minstrel of the natural year,  
Foreteller of the vernal ides,  
Wise harbinger of spheres and tides,  
A lover true, who knew by heart  
Each joy the mountain dales impart;  
It seemed that Nature could not raise

A plant in any secret place,  
In quaking bog, on snowy hill,  
Beneath the grass that shades the rill,  
Under the snow, between the rocks,  
In damp fields known to bird and fox,  
But he would come in the very hour  
It opened in its virgin bower,  
As if a sunbeam showed the place,  
And tell its long-descended race.  
It seemed as if the breezes brought him;  
It seemed as if the sparrows taught him;  
As if by secret sight he knew  
Where, in far fields, the orchis grew.  
Many haps fall in the field  
Seldom seen by wishful eyes,  
But all her shows did Nature yield,  
To please and win this pilgrim wise.  
He saw the partridge drum in the woods;  
He heard the woodcock's evening hymn;  
He found the tawny thrush's broods;  
And the shy hawk did wait for him;  
What others did at distance hear,  
And guessed within the thicket's gloom,  
Was showed to this philosopher,  
And at his bidding seemed to come.

## 3

In unploughed Maine he sought the lumberer's gang,  
Where from a hundred lakes young rivers sprang;  
He trode the unplanted forest floor, whereon  
The all-seeing sun for ages hath not shone;  
Where feeds the moose, and walks the surly bear,  
And up the tall mast runs the woodpecker.  
He saw beneath dim aisles, in odorous beds,  
The slight Linnaea hang its twin-born heads,  
And blessed the monument of the man of flowers,  
Which breathes his sweet fame through the northern bowers.  
He heard, when in the grove, at intervals,  
With sudden roar the aged pine-tree falls,—

ne crash, the death-hymn of the perfect tree,  
 declares the close of its green century.  
 Now lies the plant to whose creation went  
 sweet influence from every element;  
 Those living towers the years conspired to build,  
 Those giddy top the morning loved to gild.  
 Through these green tents, by eldest Nature dressed,  
 He roamed, content alike with man and beast.  
 There darkness found him he lay glad at night;  
 There the red morning touched him with its light.  
 Three moons his great heart him a hermit made,  
 So long he roved at will the boundless shade.  
 He timid it concerns to ask their way;  
 And fear what foe in caves and swamps can stray,  
 To make no step until the event is known,  
 And ills to come as evils past bemoan.  
 Not so the wise; no coward watch he keeps  
 To spy what danger on his pathway creeps;  
 To where he will, the wise man is at home,  
 His hearth the earth,—his hall the azure dome;  
 There his clear spirit leads him, there's his road,  
 By God's own light illumined and foreshowed.

[*The Pine Tree Sings*]

"Hearken once more!  
 I will tell thee the mundane lore.  
 Older am I than thy numbers wot;  
 Change I may, but I pass not.  
 Hitherto all things fast abide,  
 And anchored in the tempest ride.  
 Trenchant time behooves to hurry  
 All to yean and all to bury:  
 All the forms are fugitive,  
 But the substances survive.  
 Ever fresh the broad creation,  
 A divine improvisation,  
 From the heart of God proceeds,  
 A single will, a million deeds.

Once slept the world an egg of stone,  
And pulse, and sound, and light was none;  
And God said, 'Throb!' and there was motion,  
And the vast mass became vast ocean.  
Onward and on, the eternal Pan,  
Who layeth the world's incessant plan,  
Halteth never in one shape,  
But forever doth escape,  
Like wave or flame, into new forms  
Of gem, and air, of plants, and worms.  
I, that to-day am a pine,  
Yesterday was a bundle of grass.  
He is free and libertine,  
Pouring of his power the wine  
To every age, to every race;  
Unto every race and age  
He emptieth the beverage;  
Unto each and unto all,  
Maker and original.  
The world is the ring of his spells,  
And the play of his miracles.  
As he giveth to all to drink,  
Thus or thus they are and think.  
He giveth little or giveth much,  
To make them several or such.  
With one drop sheds form and feature;  
With the next a special nature;  
The third adds heat's indulgent spark;  
The fourth gives light which eats the dark;  
Into the fifth himself he flings,  
And conscious Law is King of kings.  
Pleaseth him, the Eternal Child,  
To play his sweet will, glad and wild;  
As the bee through the garden ranges,  
From world to world the godhead changes;  
As the sheep go feeding in the waste,  
From form to form he maketh haste;  
This vault which glows immense with light  
Is the inn where he lodges for a night.

What reck's such Traveller if the bowers  
Which bloom and fade like meadow flowers  
A bunch of fragrant lilies be,  
Or the stars of eternity?  
Alike to him the better, the worse,—  
The glowing angel, the outcast corse.  
Thou metest him by centuries,  
And lo! he passes like the breeze;  
Thou seek'st in globe and galaxy,  
He hides in pure transparency;  
Thou askest in fountains and in fires  
He is the essence that inquires.  
He is the axis of the star;  
He is the sparkle of the spar;  
He is the heart of every creature;  
He is the meaning of each feature;  
And his mind is the sky,  
Than all it holds more deep, more high."

## MONADNOC

THOUSAND minstrels woke within me,  
"Our music's in the hills;"—  
Gayest pictures rose to win me,  
Leopard-colored rills.  
"Up!—If thou knew'st who calls  
To twilight parks of beech and pine,  
High over the river intervals,  
Above the ploughman's highest line,  
Over the owner's farthest walls!  
Up! where the airy citadel  
O'erlooks the surging landscape's swell!  
Let not unto the stones the Day  
Her lily and rose, her sea and land display.  
Read the celestial sign!  
Lo! the south answers to the north;  
Bookworm, break this sloth urbane;  
A greater spirit bids thee forth

Than the gray dreams which thee detain.  
Mark how the climbing Oreads  
Beckon thee to their arcades!  
Youth, for a moment free as they,  
Teach thy feet to feel the ground,  
Ere yet arrives the wintry day  
When Time thy feet has bound.  
Take the bounty of thy birth,  
Taste the lordship of the earth."

I heard, and I obeyed,—  
Assured that he who made the claim,  
Well known, but loving not a name,  
Was not to be gainsaid.

Ere yet the summoning voice was still,  
I turned to Cheshire's haughty hill.  
From the fixed cone the cloud-rack flowed,  
Like ample banner flung abroad  
To all the dwellers in the plains  
Round about, a hundred miles,  
With salutation to the sea, and to the bordering isles.

In his own loom's garment dressed,  
By his proper bounty blessed,  
Fast abides this constant giver,  
Pouring many a cheerful river;  
To far eyes, an aerial isle  
Unploughed, which finer spirits pile,  
Which morn and crimson evening paint  
For bard, for lover, and for saint;  
The people's pride, and country's core,  
Inspirer, prophet evermore;  
Pillar which God aloft had set  
So that men might it not forget;  
It should be their life's ornament,  
And mix itself with each event;  
Gauge and calendar and dial,  
Weatherglass and chemic phial,

Garden of berries, perch of birds,  
Pasture of pool-haunting herds,  
Graced by each change of sum untold,  
Earth-baking heat, stone-cleaving cold.

The Titan heeds his sky-affairs,  
Rich rents and wide alliance shares;  
Mysteries of color daily laid  
By the sun in light and shade;  
And sweet varieties of chance,  
And the mystic seasons' dance;  
And thief-like step of liberal hours  
Thawing snow-drift into flowers.  
O wondrous craft of plant and stone  
By eldest science done and shown!

"Happy," I said, "whose home is here!  
Fair fortunes to the mountaineer!  
Boon Nature to his poorest shed  
Has royal pleasure-grounds outspread."  
Intent, I searched the region round,  
And in low hut my monarch found:—  
Woe is me for my hope's downfall!  
Is yonder squalid peasant all  
That this proud nursery could breed  
For God's vicegerency and stead?  
Time out of mind, this forge of ores;  
Quarry of spars in mountain pores;  
Old cradle, hunting-ground, and bier  
Of wolf and otter, bear and deer;  
Well-built abode of many a race;  
Tower of observance searching space;  
Factory of river and of rain;  
Link in the alps' globe-girding chain;  
By million changes skilled to tell  
What in the Eternal standeth well,  
And what obedient Nature can;—  
Is this colossal talisman

Kindly to creature, blood, and king,  
Yet speechless to the master's mind?  
I thought to find the patriots  
In whom the stock of freedom roots:  
To myself I oft recount  
Tales of many a famous mount,—  
Wales, Scotland, Uri, Hungary's dells;  
Bards, Roys, Scanderbeks, and Tells.  
Here Nature shall condense her powers,  
Her music, and her meteors,  
And lifting man to the blue deep  
Where stars their perfect courses keep,  
Like wise preceptor, lure his eye  
To sound the science of the sky,  
And carry learning to its height  
Of untried power and sane delight:  
The Indian cheer, the frosty skies,  
Rear purer wits, inventive eyes,—  
Eyes that frame cities where none be  
And hands that stablish what these see;  
And by the moral of his place  
Hint summits of heroic grace;  
Man in these crags a fastness find  
To fight pollution of the mind;  
In the wide thaw and ooze of wrong,  
Adhere like this foundation strong,  
The insanity of towns to stem  
With simpleness of stratagem.  
But if the brave old mould is broke,  
And end in churls the mountain folk,  
In tavern cheer and tavern joke,  
Sink, O mountain, in the swamp!  
Hide in thy skies, O sovereign lamp!  
Perish like leaves, the highland breed!  
No sire survive, no son succeed!  
Soft! let not the offended muse  
Toil's hard hap with scorn accuse.  
Many hamlets sought I then,  
Many farms of mountain men;

Found I not a minstrel seed,  
But men of bone, and good at need.  
Rallying round a parish steeple  
Nestle warm the highland people,  
Coarse and boisterous, yet mild,  
Strong as giant, slow as child,  
Smoking in a squalid room  
Where yet the westland breezes come.  
Close hid in those rough guises lurk  
Western magians,—here they work.  
Sweat and season are their arts,  
Their talismans are ploughs and carts;  
And well the youngest can command  
Honey from the frozen land;  
With sweet hay the wild swamp adorn,  
Change the running sand to corn;  
For wolves and foxes, lowing herds,  
And for cold mosses, cream and curds;  
Weave wood to canisters and mats;  
Drain sweet maple juice in vats;  
No bird is safe that cuts the air  
From their rifle or their snare;  
No fish, in river or in lake,  
But their long hands it thence will take;  
And the country's flinty face,  
Like wax, their fashioning skill betrays,  
To fill the hollows, sink the hills,  
Bridge gulfs, drain swamps, build dams and mills,  
And fit the bleak and howling place  
For gardens of a finer race.

The World-soul knows his own affair,  
Forelooking, when he would prepare  
For the next ages, men of mould  
Well embodied, well ensouled,  
He cools the present's fiery glow,  
Sets the life-pulse strong but slow:  
Bitter winds and fasts austere  
His quarantines and grottos, where

He slowly cures decrepit flesh,  
And brings it infantile and fresh.  
Toil and tempest are the toys  
And games to breathe his stalwart boys:  
They bide their time, and well can prove,  
If need were, their line from Jove;  
Of the same stuff, and so allayed,  
As that whereof the sun is made,  
And of the fibre, quick and strong,  
Whose throbs are love, whose thrills are song.

Now in sordid weeds they sleep,  
In dullness now their secret keep;  
Yet, will you learn our ancient speech,  
These the masters who can teach.  
Fourscore or a hundred words  
All their vocal muse affords;  
But they turn them in a fashion  
Past clerks' or statesmen's art or passion.  
I can spare the college bell,  
And the learned lecture, well;  
Spare the clergy and libraries,  
Institutes and dictionaries,  
For that hardy English root  
Thrives here, unvalued, underfoot.  
Rude poets of the tavern hearth,  
Squandering your unquoted mirth,  
Which keeps the ground, and never soars,  
While Jake retorts, and Reuben roars;  
Scoff of yeoman strong and stark,  
Goes like bullet to its mark;  
While the solid curse and jeer  
Never balk the waiting ear.  
To student ears keen relished jokes  
On truck, and stock, and farming folks,—  
Naught the mountain yields thereof,  
But savage health and sinews tough.  
On the summit as I stood,  
O'er the floor of plain and flood

Seemed to me, the towering hill  
Was not altogether still,  
But a quiet sense conveyed;  
If I err not, thus it said:—

“Many feet in summer seek,  
Betimes, my far-appearing peak;  
In the dreaded winter time,  
None save dappling shadows climb,  
Under clouds, my lonely head,  
Old as the sun, old almost as the shade.  
And comest thou  
To see strange forests and new snow,  
And tread uplifted land?  
And leavest thou thy lowland race,  
Here amid clouds to stand?  
And wouldst be my companion,  
Where I gaze, and still shall gaze,  
Through tempering nights and flashing days,  
When forests fall and man is gone,  
Over tribes and over times,  
At the burning Lyre,  
Nearing me,  
With its stars of northern fire,  
In many a thousand years?

“Ah! welcome, if thou bring  
My secret in thy brain;  
To mountain-top may Muse’s wing  
With good allowance strain.  
Gentle pilgrim, if thou know  
The gamut old of Pan,  
And how the hills began,  
The frank blessings of the hill  
Fall on thee, as fall they will.  
’Tis the law of bush and stone,  
Each can only take his own.

“Let him heed who can and will;  
Enchantment fixed me here

To stand the hurts of time, until  
In mightier chant I disappear.

“If thou trowest  
How the chemic eddies play,  
Pole to pole, and what they say;  
And that these gray crags  
Not on crags are hung,  
But beads are of a rosary  
On prayer and music strung;  
And, credulous, through the granite seeming,  
Seest the smile of Reason beaming;—  
Can thy style-discerning eye  
The hidden-working Builder spy,  
Who builds, yet makes no chips, no din,  
With hammer soft as snow-flake’s flight;—  
Knowest thou this?  
O pilgrim, wandering not amiss!  
Already my rocks lie light,  
And soon my cone will spin.

“For the world was built in order,  
And the atoms march in tune;  
Rhyme the pipe, and Time the warder,  
Cannot forget the sun, the moon.  
Orb and atom forth they prance,  
When they hear from far the rune;  
None so backward in the troop,  
When the music and the dance  
Reach his place and circumstance,  
But knows the sun-creating sound,  
And, though a pyramid, will bound.

“Monadnoc is a mountain strong,  
Tall and good my kind among;  
But well I know, no mountain can  
Measure with a perfect man.  
For it is on zodiacs writ,  
Adamant is soft to wit:

And when the greater comes again  
With my secret in his brain,  
I shall pass, as glides my shadow  
Daily over hill and meadow.

“Through all time, in light, in gloom,  
Well I hear the approaching feet  
On the flinty pathway beat  
Of him that cometh, and shall come:  
Of him who shall as lightly bear  
My daily load of woods and streams,  
As doth this round sky-cleaving boat  
Which never strains its rocky beams:  
Whose timbers, as they silent float,  
Alps and Caucasus uprear,  
And the long Alleghanies here,  
And all town-sprinkled lands that be,  
Sailing through stars with all their history.

“Every morn I lift my head,  
Gaze o’er New England underspread,  
South from Saint Lawrence to the Sound,  
From Katskill east to the sea-bound.  
Anchored fast for many an age,  
I await the bard and sage,  
Who, in large thoughts, like fair pearl-seed,  
Shall string Monadnoc like a bead.  
Comes that cheerful troubadour,  
This mound shall throb his face before,  
As when, with inward fires and pain,  
It rose a bubble from the plain.  
When he cometh, I shall shed,  
From this wellspring in my head,  
Fountain-drop of spicier worth  
Than all vintage of the earth.  
There’s fruit upon my barren soil  
Costlier far than wine or oil.  
There’s a berry blue and gold,—  
Autumn-ripe, its juices hold

Sparta's stoutness, Bethlehem's heart,  
Asia's rancor, Athens' art,  
Slowsure Britain's secular might,  
And the German's inward sight.  
I will give my son to eat  
Best of Pan's immortal meat,  
Bread to eat, and juice to drink;  
So the thoughts that he shall think  
Shall not be forms of stars, but stars,  
Nor pictures pale, but Jove and Mars  
He comes, but not of that race bred  
Who daily climb my specular head.  
Oft as morning wreathes my scarf,  
Fled the last plumule of the Dark,  
Pants up hither the spruce clerk  
From South Cove and City Wharf.  
I take him up my rugged sides,  
Half-repentant, scant of breath,—  
Bead-eyes my granite chaos show,  
And my midsummer snow;  
Open the daunting map beneath,—  
All his county, sea and land,  
Dwarfed to measure of his hand;  
His day's ride is a furlong space,  
His city-tops a glimmering haze.  
I plant his eyes on the sky-hoop bounding:  
'See there the grim gray rounding  
Of the bullet of the earth  
Whereon ye sail,  
Tumbling steep  
In the uncontinented deep.'  
He looks on that, and he turns pale.  
'Tis even so; this treacherous kite,  
Farm-furrowed, town-incrusted sphere  
Thoughtless of its anxious freight,  
Plunges eyeless on forever;  
And he, poor parasite,  
Cooped in a ship he cannot steer,—  
Who is the captain he knows not,

Port or pilot trows not,—  
Risk or ruin he must share.  
I scowl on him with my cloud,  
With my north wind chill his blood;  
I lame him, clattering down the rocks;  
And to live he is in fear.  
Then, at last, I let him down  
Once more into his dapper town,  
To chatter, frightened, to his clan,  
And forget me if he can."

As in the old poetic fame  
The gods are blind and lame,  
And the simular despite  
Betrays the more abounding might,  
So call not waste that barren cone  
Above the floral zone,  
Where forests starve:  
It is pure use;—  
What sheaves like those which here we glean and bind  
Of a Celestial Ceres and the Muse?

Ages are thy days,  
Thou grand expresser of the present tense,  
And type of permanence!  
Firm ensign of the fatal Being,  
Amid these coward shapes of joy and grief,  
That will not bide the seeing!

Hither we bring  
Our insect miseries to thy rocks;  
And the whole flight, with pestering wing,  
Vanish, and end their murmuring,—  
Vanish beside these dedicated blocks,  
Which who can tell what mason laid?  
Spoils of a front none need restore,  
Replacing frieze and architrave;—  
Yet flowers each stone rosette and metropole brave;  
Still is the haughty pile erect  
Of the old building Intellect.

Complement of human kind,  
Having us at vantage still,  
Our sumptuous indigence,  
O barren mound, thy plenties fill!  
We fool and prate;  
Thou art silent and sedate.  
To myriad kinds and times one sense  
The constant mountain doth dispense;  
Shedding on all its snows and leaves,  
One joy it joys, one grief it grieves.  
Thou seest, O watchman tall,  
Our towns and races grow and fall,  
And imagest the stable good  
For which we all our lifetime grope,  
In shifting form the formless mind,  
And though the substance us elude,  
We in thee the shadow find.  
Thou, in our astronomy  
An opaquer star,  
Seen haply from afar,  
Above the horizon's hoop,  
A moment, by the railway troop,  
As o'er some bolder height they speed,—  
By circumspect ambition,  
By errant gain,  
By feasters and the frivolous,—  
Recallest us,  
And makest sane.  
Mute orator! well skilled to plead,  
And send conviction without phrase,  
Thou dost supply  
The shortness of our days,  
And promise, on thy Founder's truth,  
Long morrow to this mortal youth.

## FABLE

THE mountain and the squirrel  
Had a quarrel;

And the former called the latter "Little Prig."  
Bun replied,  
"You are doubtless very big;  
But all sorts of things and weather  
Must be taken in together,  
To make up a year  
And a sphere.  
And I think it no disgrace  
To occupy my place.  
If I'm not so large as you,  
You are not so small as I,  
And not half so sry,  
I'll not deny you make  
A very pretty squirrel track;  
Talents differ; all is well and wisely put;  
If I cannot carry forests on my back,  
Neither can you crack a nut."

### THE SNOW-STORM

ANNOUNCED by all the trumpets of the sky,  
Arrives the snow, and, driving o'er the fields,  
Seems nowhere to alight; the whited air  
Hides hills and woods, the river, and the heaven,  
And veils the farm-house at the garden's end.  
The sled and traveller stopped, the courier's feet  
Delayed, all friends shut out, the housemates sit  
Around the radiant fire-place, enclosed  
In a tumultuous privacy of storm.

Come see the north wind's masonry.  
Out of an unseen quarry evermore  
Furnished with tile, the fierce artificer  
Curves his white bastions with projected roof  
Round every windward stake, or tree, or door.  
Speeding, the myriad-handed, his wild work  
So fanciful, so savage, nought cares he  
For number or proportion. Mockingly,  
On coop or kennel he hangs Parian wreaths;

A swan-like form invests the hidden thorn;  
 Fills up the farmer's lane from wall to wall,  
 Maugre the farmer's sighs; and, at the gate,  
 A tapering turret overtops the work.  
 And when his hours are numbered, and the world  
 Is all his own, retiring, as he were not,  
 Leaves, when the sun appears, astonished Art  
 To mimic in slow structures, stone by stone,  
 Built in an age, the mad wind's night-work,  
 The frolic architecture of the snow.

"*Like a swan-like form invests the hidden thorn, what we have seen in the light*

### BRAHMA (Breather)

IF the red slayer think he slays,  
 Or if the slain think he is slain,  
 They know not well the subtle ways  
 I keep, and pass, and turn again.

Far or forgot to me is near;  
 Shadow and sunlight are the same;  
 The vanquished gods to me appear;  
 And one to me are shame and fame.

They reckon ill who leave me out;  
 When me they fly, I am the wings;  
 I am the doubter and the doubt,  
 And I the hymn the Brahmin sings.

The strong gods pine for my abode,  
 And pine in vain the sacred Seven;  
 But thou, meek lover of the good!  
 Find me, and turn thy back on heaven.

### THE SPHINX

THE Sphinx is drowsy,  
 Her wings are furled;  
 Her ear is heavy,  
 She broods on the world.

"Who'll tell me my secret,  
The ages have kept?—  
I waited the seer,  
While they slumbered and slept;—

"The fate of the man-child;  
The meaning of man;  
Known fruit of the unknown;  
Daedalian plan;  
Out of sleeping a waking,  
Out of waking a sleep;  
Life death overtaking;  
Deep underneath deep?

"Erect as a sunbeam,  
Upspringeth the palm;  
The elephant browses,  
Undaunted and calm;  
In beautiful motion  
The thrush plies his wings:  
Kind leaves of his covert,  
Your silence he sings.

"The waves, unashamed,  
In difference sweet,  
Play glad with the breezes,  
Old playfellows meet;  
The journeying atoms,  
Primordial wholes,  
Firmly draw, firmly drive,  
By their animate poles.

"Sea, earth, air, sound, silence,  
Plant, quadruped, bird,  
By one music enchanted,  
One deity stirred,—  
Each the other adorning,  
Accompany still;  
Night veileth the morning,  
The vapor the hill.

"The babe by its mother  
Lies bathèd in joy;  
Glide its hours uncounted,—  
The sun is its toy;  
Shines the peace of all being,  
Without cloud in its eyes;  
And the sun of the world  
In soft miniature lies.

"But man crouches and blushes,  
Absconds and conceals;  
He creepeth and peepeth,  
He palters and steals;  
Infirm, melancholy,  
Jealous glancing around,  
An oaf, an accomplice,  
He poisons the ground.

"Out spoke the great mother,  
Beholding his fear;—  
At the sound of her accents  
Cold shuddered the sphere:—  
'Who has drugged my boy's cup?  
Who has mixed my boy's bread?  
Who, with sadness and madness,  
Has turned the man-child's head?'"

I heard a poet answer  
Aloud and cheerfully,  
"Say on, sweet Sphinx! thy dirges  
Are pleasant songs to me;  
Deep love lieth under  
These pictures of time;  
They fade in the light of  
Their meaning sublime.

"The fiend that man harries  
Is love of the Best;  
Yawns the pit of the Dragon,  
Lit by rays from the Blest.

The Lethe of nature  
Can't trance him again,  
Whose soul sees the perfect,  
Which his eyes seek in vain.

"Profounder, profounder,  
Man's spirit must dive;  
To his aye-rolling orbit  
No goal will arrive;  
The heavens that now draw him  
With sweetness untold,  
Once found,—for new heavens  
He spurneth the old.

"Pride ruined the angels,  
Their shame them restores;  
And the joy that is sweetest  
Lurks in stings of remorse.  
Have I a lover  
Who is noble and free?—  
I would he were nobler  
Than to love me.

"Eterne alternation  
Now follows, now flies;  
And under pain, pleasure,—  
Under pleasure, pain lies.  
Love works at the center,  
Heart-heaving alway;  
Forth speed the strong pulses  
To the borders of day.

"Dull Sphinx, Jove keep thy five wits:  
Thy sight is growing blear;  
Rue, myrrh, and cummin for the Sphinx—  
Her muddy eyes to clear!"—  
The old Sphinx bit her thick lip,—  
Said, "Who taught thee me to name?  
I am thy spirit, yoke-fellow,  
Of thine eye I am eyebeam.

"Thou art the unanswered question;  
Could'st see thy proper eye,  
Always it asketh, asketh;  
And each answer is a lie.  
So take thy quest through nature,  
It through thousand natures ply;  
Ask on, thou clothed eternity;  
Time is the false reply."

Uprose the merry Sphinx,  
And crouched no more in stone;  
She melted into purple cloud,  
She silvered in the morn;  
She spired into a yellow flame;  
She flowered in blossoms red;  
She flowed into a foaming wave:  
She stood Monadoc's head.

Through a thousand voices  
Spoke the universal dame:  
"Who telleth one of my meanings  
Is master of all I am."

### THE VISIT

ASKEST, "How long thou shalt stay?"  
Devastator of the day!  
Know, each substance, and relation,  
Thorough nature's operation,  
Hath its unit, bound, and metre;  
And every new compound  
Is some product and repeater.—  
Product of the earlier found.  
But the unit of the visit,  
The encounter of the wise,—  
Say, what other metre is it  
Than the meeting of the eyes?

Nature poureth into nature  
Through the channels of that feature.  
Riding on the ray of sight,  
Fleeter far than whirlwinds go,  
Or for service, or delight,  
Hearts to hearts their meaning show,  
Sum their long experience,  
And import intelligence.  
Single look has drained the breast;  
Single moment years confessed.  
The duration of a glance  
Is the term of convenience,  
And, though thy rede be church or state,  
Frugal multiples of that.  
Speeding Saturn cannot halt;  
Linger—thou shalt rue the fault;  
If Love his moment overstay,  
Hatred's swift repulsions play.

### THE WORLD-SOUL

THANKS to the morning light,  
Thanks to the foaming sea,  
To the uplands of New Hampshire,  
To the green-haired forest free;  
Thanks to each man of courage,  
To the maids of holy mind;  
To the boy with his games undaunted,  
Who never looks behind.

Cities of proud hotels,  
Houses of rich and great,  
Vice nestles in your chambers,  
Beneath your roofs of slate.  
It cannot conquer folly,  
Time-and-space-conquering steam,  
And the light-outspeeding telegraph  
Bears nothing on its beam.

The politics are base;  
The letters do not cheer;  
And 'tis far in the deeps of history,  
The voice that speaketh clear.  
Trade and the streets ensnare us,  
Our bodies are weak and worn;  
We plot and corrupt each other,  
And we despoil the unborn.

Yet there in the parlor sits  
Some figure of noble guise,—  
Our angel, in a stranger's form,  
Or woman's pleading eyes;  
Or only a flashing sunbeam  
In at the window-pane;  
Or music pours on mortals  
Its beautiful disdain.

The inevitable morning  
Finds them who in cellars be;  
And be sure the all-loving Nature  
Will smile in a factory.  
Yon ridge of purple landscape,  
Yon sky between the walls,  
Hold all the hidden wonders,  
In scanty intervals.

Alas! the Sprite that haunts us  
Deceives our rash desire;  
It whispers of the glorious gods,  
And leaves us in the mire.  
We cannot learn the cipher  
That's writ upon our cell;  
Stars help us by a mystery  
Which we could never spell.

If but one hero knew it,  
The world would blush in flame;  
The sage, till he hit the secret,  
Would hang his head for shame.

But our brothers have not read it,  
Not one has found the key;  
And henceforth we are comforted,—  
We are but such as they.

Still, still the secret presses;  
The nearing clouds draw down;  
The crimson morning flames into  
The fopperies of the town.  
Within, without the idle earth,  
Stars weave eternal rings;  
The sun himself shines heartily,  
And shares the joy he brings.

And what if Trade sow cities  
Like shells along the shore,  
And thatch with towns the prairie broad,  
With railways ironed o'er?—  
They are but sailing foam-bells  
Along Thought's causing stream,  
And take their shape and sun-color  
From him that sends the dream.

For Destiny does not like  
To yield to men the helm;  
And shoots his thought, by hidden nerves,  
Throughout the solid realm.  
The patient Daemon sits,  
With roses and a shroud;  
He has his way, and deals his gifts,—  
But ours is not allowed.

He is no churl nor trifler,  
And his viceroy is none,—  
Love-without-weakness,—  
Of Genius sire and son.  
And his will is not thwarted;  
The seeds of land and sea  
Are the atoms of his body bright,  
And his behest obey.

He serveth the servant,  
The brave he loves amain;  
He kills the cripple and the sick,  
And straight begins again.  
For gods delight in gods,  
And thrust the weak aside;  
To him who scorns their charities,  
Their arms fly open wide.

When the old world is sterile,  
And the ages are effete,  
He will from wrecks and sediment  
The fairer world complete.  
He forbids to despair;  
His cheeks mantle with mirth;  
And the unimagined good of men  
Is yearning at the birth.

Spring still makes spring in the mind,  
When sixty years are told;  
Love wakes anew this throbbing heart,  
And we are never old.  
Over the winter glaciers,  
I see the summer glow,  
And, through the wild-piled snowdrift,  
The warm rosebuds below.

#### TO J. W.

SET not thy foot on graves;  
Hear what wine and roses say;  
The mountain chase, the summer waves,  
The crowded town, thy feet may well delay.

Set not thy foot on graves;  
Nor seek to unwind the shroud  
Which charitable Time  
And Nature have allowed  
To wrap the errors of a sage sublime.

Set not thy foot on graves;  
Care not to strip the dead  
Of his sad ornament,  
His myrrh, and wine, and rings,  
His sheet of lead,  
And trophies buried:  
Go, get them where he earned them when alive;  
As resolutely dig or dive.

Life is too short to waste  
In critic peep or cynic bark,  
Quarrel or reprimand:  
'Twill soon be dark;  
Up! mind thine own aim, and  
God speed the mark!

## HAMATREYA

MINOTT, Lee, Willard, Hosmer, Meriam, Flint,  
Possessed the land which rendered to their toil  
Hay, corn, roots, hemp, flax, apples, wool, and wood.  
Each of these landlords walked amidst his farm,  
Saying, "'Tis mine, my children's, and my name's:  
How sweet the west wind sounds in my own trees!  
How graceful climb those shadows on my hill!  
I fancy these pure waters and the flags  
Know me, as does my dog: we sympathize;  
And, I affirm, my actions smack of the soil."  
Where are these men? Asleep beneath their grounds;  
And strangers, fond as they, their furrows plough.  
Earth laughs in flowers, to see her boastful boys  
Earth-proud, proud of the earth which is not theirs;  
Who steer the plough, but cannot steer their feet  
Clear of the grave.  
They added ridge to valley, brook to pond,  
And sighed for all that bounded their domain.  
This suits me for a pasture; that's my park;  
We must have clay, lime, gravel, granite-ledge,  
And misty lowland, where to go for peat.

The land is well,—lies fairly to the south.  
'Tis good, when you have crossed the sea and back,  
To find the sitfast acres where you left them.”  
Ah! the hot owner sees not Death, who adds  
Him to his land, a lump of mould the more.  
Hear what the Earth says:—

## EARTH-SONG

“Mine and yours;  
Mine, not yours.  
Earth endures;  
Stars abide—  
Shine down on the old sea;  
Old are the shores;  
But where are the old men?  
I who have seen much,  
Such have I never seen.

“The lawyer’s deed  
Ran sure,  
In tail,  
To them, and to their heirs  
Who shall succeed,  
Without fail,  
Forevermore.

“Here is the land,  
Shaggy with wood,  
With its old valley,  
Mound, and flood.  
But the heritors?  
Fled like the flood’s foam,—  
The lawyer, and the laws,  
And the kingdom,  
Clean swept herefrom.

“They called me theirs,  
Who so controlled me;  
Yet every one  
Wished to stay, and is gone.

How am I theirs,  
If they cannot hold me,  
But I hold them?"

When I heard the Earth-song,  
I was no longer brave;  
My avarice cooled  
Like lust in the chill of the grave.

### THRENODY

THE South-wind brings  
Life, sunshine, and desire,  
And on every mount and meadow  
Breathes aromatic fire;  
But over the dead he has no power,  
The lost, the lost, he cannot restore;  
And, looking over the hills, I mourn  
The darling who shall not return.  
I see my empty house,  
I see my trees repair their boughs;  
And he, the wondrous child,  
Whose silver warble wild  
Outvalued every pulsing sound  
Within the air's cerulean round,—  
The hyacinthine boy, for whom  
Morn well might break the April bloom,—  
The gracious boy, who did adorn  
The world whereinto he was born,  
And by his countenance repay  
The favor of the loving Day,—  
Has disappeared from the Day's eye;  
Far and wide she cannot find him;  
My hopes pursue, they cannot bind him.  
Returned this day, the south-wind searches,  
And finds young pines and budding birches;  
But finds not the budding man;  
Nature, who lost, cannot remake him;  
Fate let him fall, Fate can't retake him;  
Nature, Fate, men, him seek in vain.

And whither now, my truant wise and sweet,  
O, whither tend thy feet?  
I had the right, few days ago,  
Thy steps to watch, thy place to know;  
How have I forfeited the right?  
Hast thou forgot me in a new delight?  
I hearken for thy household cheer,  
O eloquent child!  
Whose voice, an equal messenger,  
Conveyed thy meaning mild.  
What though the pains and joys  
Whereof it spoke were toys  
Fitting his age and ken,  
Yet fairest dames and bearded men,  
Who heard the sweet request,  
So gentle, wise, and grave,  
Bended with joy to his behest,  
And let the world's affairs go by,  
Awhile to share his cordial game,  
Or mend his wicker wagon-frame,  
Still plotting how their hungry ear  
That winsome voice again might hear;  
For his lips could well pronounce  
Words that were persuasions.

Gentlest guardians marked serene  
His early hope, his liberal mien;  
Took counsel from his guiding eyes  
To make this wisdom earthly wise.  
Ah, vainly do these eyes recall  
The school-march, each day's festival,  
When every morn my bosom glowed  
To watch the convoy on the road;  
The babe in willow wagon closed,  
With rolling eyes and face composed;  
With children forward and behind,  
Like Cupids studiously inclined;  
And he the chieftain paced beside,  
The center of the troop allied,

With sunny face of sweet repose,  
To guard the babe from fancied foes.  
The little captain innocent  
Took the eye with him as he went;  
Each village senior paused to scan  
And speak the lovely caravan.  
From the window I look out  
To mark thy beautiful parade,  
Stately marching in cap and coat  
To some tune by fairies played;—  
A music heard by thee alone  
To works as noble led thee on.  
Now Love and Pride, alas! in vain,  
Up and down their glances strain.  
The painted sled stands where it stood;  
The kennel by the corded wood;  
The gathered sticks to stanch the wall  
Of the snow-tower, when snow should fall;  
The ominous hole he dug in the sand,  
And childhood's castles built or planned;  
His daily haunts I well discern,—  
The poultry-yard, the shed, the barn,—  
And every inch of garden ground  
Paced by the blessed feet around,  
From the roadside to the brook  
Whereinto he loved to look.  
Step the meek birds where erst they ranged;  
The wintry garden lies unchanged;  
The brook into the stream runs on;  
But the deep-eyed boy is gone.

On that shaded day,  
Dark with more clouds than tempests are,  
When thou didst yield thy innocent breath  
In birdlike heavings unto death,  
Night came, and Nature had not thee;  
I said, "We are mates in misery."  
The morrow dawned with needless glow;  
Each snowbird chirped, each fowl must crow;

Each trampler started; but the feet  
Of the most beautiful and sweet  
Of human youth had left the hill  
And garden,—they were bound and still.  
There's not a sparrow or a wren,  
There's not a blade of autumn grain,  
Which the four seasons do not tend,  
And tides of life and increase lend;  
And every chick of every bird,  
And weed and rock-moss is preferred.  
O ostrich-like forgetfulness!  
O loss of larger in the less!  
Was there no star that could be sent,  
No watcher in the firmament,  
No angel from the countless host  
That loiters round the crystal coast,  
Could stoop to heal that only child,  
Nature's sweet marvel undefiled,  
And keep the blossom of the earth,  
Which all her harvests were not worth?  
Not mine,—I never called thee mine,  
But Nature's heir,—if I repine,  
And seeing rashly torn and moved  
Not what I made, but what I loved,  
Grow early old with grief that thou  
Must to the wastes of Nature go,—  
'Tis because a general hope  
Was quenched, and all must doubt and grope.  
For flattering planets seemed to say  
This child should ill of ages stay,  
By wondrous tongue, and guided pen,  
Bring the flown Muses back to men.  
Perchance not he but Nature ailed,  
The world and not the infant failed.  
It was not ripe yet to sustain  
A genius of so fine a strain,  
Who gazed upon the sun and moon  
As if he came unto his own,  
And, pregnant with his grander thought,

Brought the old order into doubt.  
His beauty once their beauty tried;  
They could not feed him, and he died,  
And wandered backward as in scorn,  
To wait an æon to be born.

Ill day which made this beauty waste,  
Plight broken, this high face defaced!  
Some went and came about the dead;  
And some in books of solace read;  
Some to their friends the tidings say;  
Some went to write, some went to pray;  
One tarried here, there hurried one;  
But their heart abode with none.  
Covetous death bereaved us all,  
To aggrandize one funeral.  
The eager fate which carried thee  
Took the largest part of me:  
For this losing is true dying;  
This is lordly man's down-lying,  
This his slow but sure reclining,  
Star by star his world resigning.

O child of paradise,  
Boy who made dear his father's home,  
In whose deep eyes  
Men read the welfare of the times to come,  
I am too much bereft.  
The world dishonored thou hast left.  
O truth's and nature's costly lie!  
O trusted broken prophecy!  
O richest fortune sourly crossed!  
Born for the future, to the future lost!

The deep Heart answered, "Weepest thou?  
Worthier cause for passion wild  
If I had not taken the child.  
And deemest thou as those who pore,  
With aged eyes, short way before,—

Think'st Beauty vanished from the coast,  
Of matter, and thy darling lost?  
Taught he not thee—the man of eld,  
Whose eyes within his eyes beheld  
Heaven's numerous hierarchy span  
The mystic gulf from God to man?  
To be alone wilt thou begin  
When worlds of lovers hem thee in?  
To-morrow when the masks shall fall  
That dizen Nature's carnival,  
The pure shall see by their own will,  
Which overflowing Love shall fill,  
'Tis not within the force of fate  
The fate-conjoined to separate.  
But thou, my votary, weepst thou?  
I gave thee sight—where is it now?  
I taught thy heart beyond the reach  
Of ritual, bible, or of speech;  
Wrote in thy mind's transparent table,  
As far as the incommunicable;  
Taught thee each private sign to raise,  
Lit by the supersolar blaze.  
Past utterance, and past belief,  
And past the blasphemy of grief,  
The mysteries of Nature's heart;  
And though no Muse can these impart,  
Throb thine with Nature's throbbing breast,  
And all is clear from east to west.

“I came to thee as to a friend;  
Dearest, to thee I did not send  
Tutors, but a joyful eye,  
Innocence that matched the sky,  
Lovely locks, a form of wonder,  
Laughter rich as woodland thunder,  
That thou might'st entertain apart  
The richest flowering of all art:  
And, as the great all-loving Day  
Through smallest chambers takes its way,

That thou might'st break thy daily bread  
With prophet, savior, and head;  
That thou might'st cherish for thine own  
The riches of sweet Mary's Son,  
Boy-Rabbi, Israel's paragon.

And thoughtest thou such guest  
Would in thy hall take up his rest?  
Would rushing life forget her laws,  
Fate's glowing revolution pause?  
High omens ask diviner guess;  
Not to be conned to tediousness.  
And know my higher gifts unbind  
The zone that girds the incarnate mind.  
When the scanty shores are full  
With Thought's perilous, whirling pool;  
When frail Nature can no more,  
Then the Spirit strikes the hour:  
My servant Death, with solving rite,  
Pours finite into infinite.

"Wilt thou freeze love's tidal flow,  
Whose streams through nature circling go?  
Nail the wild star to its track  
On the half-climbed zodiac?  
Light is light which radiates,  
Blood is blood which circulates,  
Life is life which generates,  
And many-seeming life is one,—  
Wilt thou transfix and make it none?  
Its onward force too starkly pent  
In figure, bone, and lineament?  
Wilt thou, uncalled, interrogate,  
Talker! the unreplying Fate?  
Nor see the genius of the whole  
Ascendant in the private soul,  
Beckon it when to go and come,  
Self-announced its hour of doom?  
Fair the soul's recess and shrine,

Magic-built to last a season;  
Masterpiece of love benign,  
Fairer that expansive reason  
Whose omen 'tis, and sign.  
Wilt thou not ope thy heart to know  
What rainbows teach, and sunsets show?  
Verdict which accumulates  
From lengthening scroll of human fates,  
Voice of earth to earth returned,  
Prayers of saints that inly burned,—  
Saying, *What is excellent,*  
*As God lives, is permanent;*  
*Hearts are dust, heart's loves remain;*  
*Heart's love will meet thee again.*  
Revere the Maker; fetch thine eye  
Up to his style, and manners of the sky.  
Not of adamant and gold  
Built he heaven stark and cold;  
No, but a nest of bending reeds,  
Flowering grass, and scented weeds;  
Or like a traveller's fleeing tent,  
Or bow above the tempest bent;  
Built of tears and sacred flames,  
And virtue reaching to its aims;  
Built of furtherance and pursuing,  
Not of spent deeds, but of doing.  
Silent rushes the swift Lord  
Through ruined systems still restored,  
Broadsowing, bleak, and void to bless,  
Plants with worlds the wilderness;  
Waters with tears of ancient sorrow  
Apples of Eden ripe to-morrow.  
House and tenant go to ground,  
Lost in God, in Godhead found.

## ODE TO BEAUTY

Who gave thee, O Beauty,  
The keys of this breast,—  
Too credulous lover  
Of blest and unblest?  
Say, when in lapsed ages  
Thee knew I of old?  
Or what was the service  
For which I was sold?  
When first my eyes saw thee,  
I found me thy thrall,  
By magical drawings,  
Sweet tyrant of all!  
I drank at thy fountain  
False waters of thirst;  
Thou intimate stranger,  
Thou latest and first!  
Thy dangerous glances  
Make women of men;  
New-born we are melting  
Into nature again.

Lavish, lavish promiser,  
Nigh persuading gods to err!  
Guest of million painted forms,  
Which in turn thy glory warms!  
The frailest leaf, the mossy bark,  
The acorn's cup, the raindrop's arc,  
The swinging spider's silver line,  
The ruby of the drop of wine,  
The shining pebble of the pond,  
Thou inscribest with a bond,  
In thy momentary play,  
Would bankrupt nature to repay.  
Ah, what avails it  
To hide or to shun  
Whom the Infinite One

Hath granted his throne?  
The heaven high over  
Is the deep's lover;  
The sun and sea,  
Informed by thee,  
Before me run,  
And draw me on,  
Yet fly me still,  
As Fate refuses  
To me the heart Fate for me chooses.  
Is it that my opulent soul  
Was mingled from the generous whole;  
Sea-valleys and the deep of skies  
Furnish several supplies;  
And the sands whereof I'm made  
Draw me to them, self-betrayed?  
I turn the proud portfolios  
Which hold the grand designs  
Of Salvator, of Guercino,  
And Piranesi's lines.  
I hear the lofty paeans  
Of the masters of the shell,  
Who heard the starry music  
And recount the numbers well;  
Olympian bards who sung  
Divine Ideas below,  
Which always find us young,  
And always keep us so.  
Oft, in streets or humblest places,  
I detect far-wandered graces,  
Which, from Eden wide astray,  
In lowly homes have lost their way.  
Thee gliding through the sea of form,  
Like the lightning through the storm,  
Somewhat not to be possessed,  
Somewhat not to be caressed,  
No feet so fleet could ever find,  
No perfect form could ever bind.  
Thou eternal fugitive,

Hovering over all that live,  
Quick and skilful to inspire  
Sweet, extravagant desire,  
Starry space and lily-bell  
Filling with thy roseate smell,  
Wilt not give the lips to taste  
Of the nectar which thou hast.

All that's good and great with thee  
Works in close conspiracy;  
Thou hast bribed the dark and lonely  
To report thy features only,  
And the cold and purple morning  
Itself with thoughts of thee adorning;  
The leafy dell, the city mart,  
Equal trophies of thine art;  
E'en the flowing azure air  
Thou hast touched for my despair;  
And if I languish into dreams,  
Again I meet the ardent beams.  
Queen of things! I dare not die  
In Being's deeps past ear and eye;  
Lest there I find the same deceiver,  
And be the sport of Fate forever.  
Dread Power, but dear! if God thou be,  
Unmake me quite, or give thyself to me!

### GIVE ALL TO LOVE

GIVE all to love;  
Obey thy heart;  
Friends, kindred, days,  
Estate, good-fame,  
Plans, credit, and the Muse,—  
Nothing refuse.

'Tis a brave master;  
Let it have scope:  
Follow it utterly,  
Hope beyond hope:

High and more high  
It dives into noon,  
With wing unspent,  
Untold intent;  
But it is a god,  
Knows its own path,  
And the outlets of the sky.

It was not for the mean;  
It requireth courage stout,  
Souls above doubt,  
Valor unbending;  
Such 'twill reward,—  
They shall return  
More than they were,  
And ever ascending

Leave all for love;  
Yet, hear me, yet,  
One word more thy heart behoved,  
One pulse more of firm endeavor,—  
Keep thee to-day,  
To-morrow, forever,  
Free as an Arab  
Of thy beloved.

Cling with life to the maid;  
But when the surprise,  
First vague shadow of surmise  
Flits across her bosom young  
Of a joy apart from thee,  
Free be she, fancy-free;  
Nor thou detain her vesture's hem,  
Nor the palest rose she flung  
From her summer diadem.

Though thou loved her as thyself,  
As a self of purer clay,  
Though her parting dims the day,  
Stealing grace from all alive;  
Heartily know,  
When half-gods go,  
The gods arrive.

## INITIAL, DAEMONIC, AND CELESTIAL LOVE

## I

## THE INITIAL LOVE

VENUS, when her son was lost,  
Cried him up and down the coast,  
In hamlets, palaces, and parks,  
And told the truant by his marks,—  
Golden curls, and quiver, and bow.  
This befell long ago.  
Time and tide are strangely changed,  
Men and manners much deranged:  
None will now find Cupid latent  
By this foolish antique patent.  
He came late along the waste,  
Shod like a traveller for haste;  
With malice dared me to proclaim him,  
That the maids and boys might name him.

Boy no more, he wears all coats,  
Frocks, and blouses, capes, capotes;  
He bears no bow, or quiver, or wand,  
Nor chaplet on his head or hand.  
Leave his weeds and heed his eyes,—  
All the rest he can disguise.  
In the pit of his eye's a spark  
Would bring back day if it were dark;  
And, if I tell you all my thought,  
Though I comprehend it not,  
In those unfathomable orbs  
Every function he absorbs.  
He doth eat, and drink, and fish, and shoot,  
And write, and reason, and compute,  
And ride, and run, and have, and hold,  
And whine, and flatter, and regret,  
And kiss, and couple, and beget,

By those roving eyeballs bold.  
Undaunted are their courages,  
Right Cossacks in their forages;  
Fleeter they than any creature,—  
They are his steeds, and not his feature;  
Inquisitive, and fierce, and fasting,  
Restless, predatory, hasting;  
And they pounce on other eyes  
As lions on their prey;  
And round their circles is writ,  
Plainer than the day,  
Underneath, within, above,—  
Love—love—love—love.  
He lives in his eyes;  
There doth digest, and work, and spin,  
And buy, and sell, and lose, and win;  
He rolls them with delighted motion,  
Joy-tides swell their mimic ocean.  
Yet holds he them with tautest rein.  
That they may seize and entertain  
The glance that to their glance opposes,  
Like fiery honey sucked from roses.  
He palmistry can understand,  
Imbibing virtue by his hand  
As if it were a living root;  
The pulse of hands will make him mute;  
With all his force he gathers balms  
Into those wise, thrilling palms.

Cupid is a casuist,  
A mystic, and a cabalist,—  
Can your lurking thought surprise,  
And interpret your device,  
He is versed in occult science,  
In magic, and in clairvoyance;  
Oft he keeps his fine ear strained,  
And Reason on her tiptoe pained  
For aëry intelligence,  
And for strange coincidence.

But it touches his quick heart  
When Fate by omens takes his part,  
And chance-dropped hints from Nature's sphere  
Deeply soothe his anxious ear.

Heralds high before him run;  
He has ushers many a one;  
He spreads his welcome where he goes,  
And touches all things with his rose.  
All things wait for and divine him,—  
How shall I dare to malign him,  
Or accuse the god of sport?  
I must end my true report,  
Painting him from head to foot,  
In as far as I took note,  
Trusting well the matchless power  
Of this young-eyed emperor  
Will clear his fame from every cloud,  
With the bards and with the crowd.  
He is wilful, mutable,  
Shy, untamed, inscrutable,  
Swifter-fashioned than the fairies,  
Substance mixed of pure contraries;  
His vice some elder virtue's token,  
And his good is evil-spoken.  
Failing sometimes of his own,  
He is headstrong and alone;  
He affects the wood and wild,  
Like a flower-hunting child;  
Buries himself in summer waves,  
In trees, with beasts, in mines, and caves;  
Loves nature like a horned cow,  
Bird, or deer, or caribou.

Shun him, nymphs, on the fleet horses!  
He has a total world of wit;  
O how wise are his discourses!  
But he is the arch-hypocrite,

And, through all science and all art,  
Seeks alone his counterpart.  
He is a Pundit of the East,  
He is an augur and a priest,  
And his soul will melt in prayer,  
But word and wisdom is a snare;  
Corrupted by the present toy  
He follows joy, and only joy.  
There is no mask but he will wear;  
He invented oaths to swear;  
He paints, he carves, he chants, he prays,  
And holds all stars in his embrace,  
Godlike,—but 'tis for his fine pelf,  
The social quintessence of self.  
Well said I he is hypocrite,  
And folly the end of his subtle wit!  
He takes a sovran privilege  
Not allowed to any liege;  
For he does go behind all law,  
And right into himself does draw;  
For he is sovereignly allied,—  
Heaven's oldest blood flows in his side,—  
And interchangeably at one  
With every king on every throne,  
That no god dare say him nay,  
Or see the fault, or seen betray:  
He has the Muses by the heart,  
And the Parcae all are of his part.  
His many signs cannot be told;  
He has not one mode, but manifold,  
Many fashions and addresses,  
Piques, reproaches, hurts, caresses,  
Arguments, lore, poetry,  
Action, service, badinage;  
He will preach like a friar,  
And jump like Harlequin;  
He will read like a crier,  
And fight like a Paladin.  
Boundless is his memory;

Plans immense his term prolong;  
He is not of counted age,  
Meaning always to be young.  
And his wish is intimacy,  
Intimater intimacy,  
And a stricter privacy;  
The impossible shall yet be done,  
And, being two, shall still be one.  
As the wave breaks to foam on shelves,  
Then runs into a wave again,  
So lovers melt their sundered selves,  
Yet melted would be twain.

## II

## THE DAEMONIC AND THE CELESTIAL LOVE

MAN was made of social earth,  
Child and brother from his birth,  
Tethered by a liquid cord  
Of blood through veins of kindred poured.  
Next his heart the fireside band  
Of mother, father, sister, stand:  
Names from awful childhood heard  
Throbs of a wild religion stirred;—  
Virtue, to love, to hate them, vice;  
Till dangerous Beauty came, at last,  
Till Beauty came to snap all ties;  
The maid, abolishing the past,  
With lotus wine obliterates  
Dear memory's stone-incarved traits,  
And, by herself, supplants alone  
Friends year by year more inly known.  
When her calm eyes opened bright,  
All were foreign in their light.  
It was ever the self-same tale,  
The first experience will not fail;  
Only two in the garden walked,  
And with snake and seraph talked.

But God said,  
"I will have a purer gift;  
There is smoke in the flame;  
New flowerets bring, new prayers uplift,  
And love without a name.  
Fond children, ye desire  
To please each other well;  
Another round, a higher,  
Ye shall climb on the heavenly stair,  
And selfish preference forbear;  
And in right deserving,  
And without a swerving  
Each from your proper state,  
Weave roses for your mate.

"Deep, deep are loving eyes,  
Flowed with naphtha fiery sweet;  
And the point is paradise,  
Where their glances meet:  
Their reach shall yet be more profound,  
And a vision without bound:  
The axis of those eyes sun-clear  
Be the axis of the sphere:  
So shall the lights ye pour amain  
Go, without check or intervals,  
Through from the empyrean walls  
Unto the same again."

Close, close to men,  
Like undulating layer of air,  
Right above their heads,  
The potent plain of Daemons spreads.  
Stands to each human soul its own,  
For watch and ward, and furtherance,  
In the snares of Nature's dance;  
And the lustre and the grace  
To fascinate each youthful heart,  
Beaming from its counterpart,

Translucent through the mortal covers,  
Is the Daemon's form and face.  
To and fro the Genius hies,—  
A gleam which plays and hovers  
Over the maiden's head,  
And dips sometimes as low as to her eyes.  
Unknown, albeit lying near,  
To men, the path of the Daemon sphere;  
And they that swiftly come and go  
Leave no track on the heavenly snow.  
Sometimes the airy synod bends,  
And the mighty choir descends,  
And the brains of men thenceforth,  
In crowded and in still resorts,  
Teem with unwonted thoughts:  
As, when a shower of meteors  
Cross the orbit of the earth,  
And, lit by fringent air,  
Blaze near and far,  
Mortals deem the planets bright  
Have slipped their sacred bars,  
And the lone seaman all the night  
Sails, astonished, amid stars.

Beauty of a richer vein,  
Graces of a subtler strain,  
Unto men these moonmen lend,  
And our shrinking sky extend,  
So is man's narrow path  
By strength and terror skirted;  
Also (from the song the wrath  
Of the Genii be averted!  
The Muse the truth uncolored speaking)  
The Daemons are self-seeking:  
Their fierce and limitary will  
Draws men to their likeness still.  
The erring painter made Love blind,—  
Highest Love who shines on all;  
Him, radiant, sharpest-sighted god,

None can bewilder;  
Whose eyes pierce  
The universe,  
Path-finder, road-builder,  
Mediator, royal giver;  
Rightly seeing, rightly seen,  
Of joyful and transparent mien.  
'Tis a sparkle passing  
From each to each, from thee to me,  
To and fro perpetually;  
Sharing all, daring all,  
Levelling, displacing  
Each obstruction, it unites  
Equals remote, and seeming opposites.  
And ever and for ever Love  
Delights to build a road:  
Unheeded Danger near him strides,  
Love laughs, and on a lion rides.  
But Cupid wears another face,  
Born into Daemons less divine:  
His roses bleach apace,  
His nectar smacks of wine.  
The Daemon ever builds a wall,  
Himself encloses and includes,  
Solitude in solitudes:  
In like sort his love doth fall.  
He is an oligarch;  
He prizes wonder, fame, and mark;  
He loveth crowns;  
He scorneth drones;  
He doth elect  
The beautiful and fortunate,  
And the sons of intellect,  
And the souls of ample fate,  
Who the Future's gates unbar,—  
Minions of the Morning Star.  
In his prowess he exults,  
And the multitude insults.

His impatient looks devour  
Oft the humble and the poor;  
And, seeing his eye glare,  
They drop their few pale flowers,  
Gathered with hope to please,  
Along the mountain towers,—  
Lose courage, and despair.  
He will never be gainsaid,—  
Pitiless, will not be stayed;  
His hot tyranny  
Burns up every other tie.  
Therefore comes an hour from Jove  
Which his ruthless will defies,  
And the dogs of Fate unties.  
Shiver the palaces of glass;  
Shrivel the rainbow-colored walls,  
Where in bright Art each god and sibyl dwelt,  
Secure as in the zodiac's belt;  
And the galleries and halls,  
Wherein every siren sung,  
Like a meteor pass.  
For this fortune wanted root  
In the core of God's abysm,—  
Was a weed of self and schism;  
And ever the Daemonic Love  
Is the ancestor of wars,  
And the parent of remorse.

## III

## THE CELESTIAL LOVE

HIGHER far,  
Upward into the pure realm,  
Over sun and star,  
Over the flickering Daemon film,  
Thou must mount for love;  
Into vision where all form

In one only form dissolves;  
In a region where the wheel,  
On which all beings ride,  
Visibly revolves;  
Where the starred, eternal worm  
Girds the world with bound and term;  
Where unlike things are like;  
Where good and ill,  
And joy and moan,  
Melt into one.  
There Past, Present, Future, shoot  
Triple blossoms from one root;  
Substances at base divided  
In their summits are united;  
There the holy essence rolls,  
One through separated souls;  
And the sunny Aeon sleeps  
Folding Nature in its deeps;  
And every fair and every good,  
Known in part, or known impure,  
To men below,  
In their archetypes endure.  
The race of gods,  
Or those we erring own,  
Are shadows flitting up and down  
In the still abodes.  
The circles of that sea are laws  
Which publish and which hide the cause.

Pray for a beam  
Out of that sphere,  
Thee to guide and to redeem.  
O, what a load  
Of care and toil,  
By lying use bestowed,  
From his shoulders falls who sees  
The true astronomy,  
The period of peace.

Counsel which the ages kept  
Shall the well-born soul accept.  
As the overhanging trees  
Fill the lake with images,—  
As garment draws the garment's hem,  
Men their fortunes bring with them.  
By right or wrong,  
Lands and goods go to the strong.  
Property will brutally draw  
Still to the proprietor;  
Silver to silver creep and wind,  
And kind to kind.

Nor less the eternal poles  
Of tendency distribute souls.  
There need no vows to bind  
Whom not each other seek, but find.  
They give and take no pledge or oath,—  
Nature is the bond of both:  
No prayer persuades, no flattery fawns,—  
Their noble meanings are their pawns.  
Plain and cold is their address,  
Power have they for tenderness;  
And, so thoroughly is known  
Each other's counsel by his own,  
They can parley without meeting;  
Need is none of forms of greeting;  
They can well communicate  
In their innermost estate;  
When each the other shall avoid,  
Shall each by each be most enjoyed.

Not with scarfs or perfumed gloves  
Do these celebrate their loves;  
Not by jewels, feasts, and savors,  
Not by ribbons or by favors,  
But by the sun-spark on the sea,  
And the cloud-shadow on the lea,

The soothing lapse of morn to mirk,  
And the cheerful round of work.  
Their cords of love so public are,  
They intertwine the farthest star:  
The throbbing sea, the quaking earth,  
Yield sympathy and signs of mirth;  
Is none so high, so mean is none,  
But feels and seals this union;  
Even the fell Furies are appeased,  
The good applaud, the lost are eased.

Love's hearts are faithful, but not fond,  
Bound for the just, but not beyond;  
Not glad, as the low-loving herd,  
Of self in other still preferred,  
But they have heartily designed  
The benefit of broad mankind.  
And they serve men austerely,  
After their own genius, clearly,  
Without a false humility;  
For this is Love's nobility,—  
Not to scatter bread and gold,  
Goods and raiment bought and sold;  
But to hold fast his simple sense,  
And speak the speech of innocence,  
And with hand and body and blood,  
To make his bosom-counsel good.  
For he that feeds men serveth few;  
He serves all who dares be true.

### THE APOLOGY

THINK me not unkind and rude  
That I walk alone in grove and glen;  
I go to the god of the wood  
To fetch his word to men.

Tax not my sloth that I  
Fold my arms beside the brook;  
Each cloud that floated in the sky  
Writes a letter in my book.

Chide me not, laborious band,  
For idle flowers I brought;  
Every aster in my hand  
Goes home loaded with a thought.

There was never mystery  
But 'tis figured in the flowers;  
Was never secret history  
But birds tell it in the bowers.

One harvest from thy field  
Homeward brought the oxen strong;  
A second crop thine acres yield,  
Which I gather in a song.

## MERLIN

### I

THY trivial harp will never please  
Or fill my craving ear;  
Its chords should ring as blows the breeze,  
Free, peremptory, clear.  
No jingling serenader's art,  
Nor tinkle of piano strings,  
Can make the wild blood start  
In its mystic springs.  
The kingly bard  
Must smite the chords rudely and hard,  
As with hammer or with mace;  
That they may render back  
Artful thunder, which conveys  
Secrets of the solar track,

Sparks of the supersolar blaze.  
Merlin's blows are strokes of fate,  
Chiming with the forest tone,  
When boughs buffet boughs in the **wood**;  
Chiming with the gasp and moan  
Of the ice-imprisoned flood;  
With the pulse of manly hearts;  
With the voice of orators;  
With the din of city arts;  
With the cannonade of wars;  
With the marches of the brave;  
And prayers of might from martyr's **cave**.  
Great is the art,  
Great be the manners, of the bard.  
He shall not his brain encumber  
With the coil of rhythm and number;  
But, leaving rule and pale forethought,  
He shall aye climb  
For his rhyme.  
"Pass in, pass in," the angels say,  
"In to the upper doors,  
Nor count compartments of the **floors**,  
But mount to paradise  
By the stairway of surprise."

Blameless master of the games,  
King of sport that never shames,  
He shall daily joy dispense  
Hid in song's sweet influence.  
Things more cheerly live and **go**,  
What time the subtle mind  
Sings aloud the tune whereto  
Their pulses beat,  
And march their feet,  
And their members are **combined**.

By Sybarites beguiled,  
He shall no task decline;  
Merlin's mighty line

Extremes of nature reconciled,—  
Bereaved a tyrant of his will,  
And made the lion mild.  
Songs can the tempest still,  
Scattered on the stormy air,  
Mould the year to fair increase  
And bring in poetic peace.

He shall not seek to weave,  
In weak, unhappy times,  
Efficacious rhymes;  
Wait his returning strength.  
Bird, that from the nadir's floor  
To the zenith's top can soar,  
The soaring orbit of the muse exceeds that journey's  
length.

Nor profane affect to hit  
Or compass that, by meddling wit,  
Which only the propitious mind  
Publishes when 'tis inclined.  
There are open hours  
When the God's will sallies free,  
And the dull idiot might see  
The flowing fortunes of a thousand years;—  
Sudden, at unawares,  
Self-moved, fly-to the doors,  
Nor sword of angels could reveal  
What they conceal.

## MERLIN

### II

THE rhyme of the poet  
Modulates the king's affairs;  
Balance-loving Nature  
Made all things in pairs.

To every foot its antipode;  
Each color with its counter glowed;  
To every tone beat answering tones,  
Higher or graver;  
Flavor gladly blends with flavor;  
Leaf answers leaf upon the bough;  
And match the paired cotyledons.  
Hands to hands, and feet to feet,  
In one body grooms and brides;  
Eldest rite, two married sides  
In every mortal meet.  
Light's far furnace shines,  
Smelting balls and bars,  
Forging double stars,  
Glittering twins and trines.  
The animals are sick with love,  
Lovesick with rhyme;  
Each with all propitious time  
Into chorus wove.

Like the dancer's ordered band,  
Thoughts come also hand in hand;  
In equal couples mated,  
Or else alternated;  
Adding by their mutual gage,  
One to other, health and age.  
Solitary fancies go  
Short-lived wandering to and fro,  
Most like to bachelors,  
Or an ungiven maid,  
Not ancestors,  
With no posterity to make the lie afraid,  
Or keep truth undecayed.  
Perfect-paired as eagle's wings,  
Justice is the rhyme of things;  
Trade and counting use  
The self-same tuneful muse;  
And Nemesis,  
Who with even matches odd,

Who athwart space redresses  
The partial wrong,  
Fills the just period,  
And finishes the song.

Subtle rhymes, with ruin rife,  
Murmur in the house of life,  
Sung by the Sisters as they spin;  
In perfect time and measure they  
Build and unbuild our echoing clay,  
As the two twilights of the day  
Fold us music-drunken in.

### BACCHUS

BRING me wine, but wine which never grew  
In the belly of the grape,  
Or grew on vine whose tap-roots, reaching through  
Under the Andes to the Cape,  
Suffered no savor of the earth to scape.

Let its grapes the morn salute  
From a nocturnal root,  
Which feels the acrid juice  
Of Styx and Erebus;  
And turns the woe of Night,  
By its own craft, to a more rich delight.

We buy ashes for bread;  
We buy diluted wine;  
Give me of the true,—  
Whose ample leaves and tendrils curled  
Among the silver hills of heaven,  
Draw everlasting dew;  
Wine of wine,  
Blood of the world,  
Form of forms, and mould of statures,

That I intoxicated,  
And by the draught assimilated,  
May float at pleasure through all natures;  
The bird-language rightly spell,  
And that which roses say so well.  
Wine that is shed  
Like the torrents of the sun  
Up the horizon walls,  
Or like the Atlantic streams, which run  
When the South Sea calls.

Water and bread,  
Food which needs no transmuting,  
Rainbow-flowering, wisdom-fruited  
Wine which is already man,  
Food which teach and reason can.

Wine which Music is,—  
Music and wine are one,—  
That I, drinking this,  
Shall hear far Chaos talk with me;  
Kings unborn shall walk with me;  
And the poor grass shall plot and plan  
What it will do when it is man.  
Quickened so, will I unlock  
Every crypt of every rock.

I thank the joyful juice  
For all I know;—  
Winds of remembering  
Of the ancient being blow,  
And seeming-solid walls of use  
Open and flow.

Pour, Bacchus! the remembering wine;  
Retrieve the loss of me and mine!  
Vine for vine be antidote,  
And the grape requite the lot!  
Haste to cure the old despair,—

Reason in Nature's lotus drenched,  
 The memory of ages quenched;  
 Give them again to shine;  
 Let wine repair what this undid;  
 And where the infection slid,  
 A dazzling memory revive;  
 Refresh the faded tints,  
 Recut the aged prints,  
 And write my old adventures with the pen  
 Which on the first day drew,  
 Upon the tablets blue,  
 The dancing Pleiads and eternal men.

### GRACE

How much, Preventing God! how much I owe  
 To the defences thou hast round me set:  
 Example, custom, fear, occasion slow,—  
 These scorned bondmen were my parapet.  
 I dare not peep over this parapet.  
 To gauge with glance the roaring gulf below,  
 The depths of sin to which I had descended,  
 Had not these me against myself defended.

### MEROPS

WHAT care I, so they stand the same,—  
 Things of the heavenly mind,—  
 How long the power to give them name  
 Tarries yet behind?

Thus far to-day your favors reach,  
 O fair, appeasing presences!  
 Ye taught my lips a single speech  
 And a thousand silences.

Space grants beyond his fated road  
 No inch to the god of day;  
 And copious language still bestowed  
 One word, no more, to say.

## HYMN

SUNG AT THE COMPLETION OF THE CONCORD MONUMENT

April 19, 1836

By the rude bridge that arched the flood,  
 Their flag to April's breeze unfurled,  
 Here once the embattled farmers stood,  
 And fired the shot heard round the world.

The foe long since in silence slept;  
 Alike the conqueror silent sleeps;  
 And Time the ruined bridge has swept  
 Down the dark stream which seaward creeps.

On this green bank, by this soft stream,  
 We set to-day a votive stone;  
 That memory may their deed redeem,  
 When, like our sires, our sons are gone.

Spirit, that made those heroes dare  
 To die, or leave their children free,  
 Bid Time and Nature gently spare  
 The shaft we raise to them and thee.

He who founded the Concord Monument is so rich and so good  
 Garrison - leading reformer of Emerson's day - active  
 Example more persuasive ODE than action.  
 Reform should begin and end in the home

INSCRIBED TO W. H. CHANNING

THOUGH loath to grieve  
 The evil time's sole patriot,  
 I cannot leave  
 My honeyed thought

For the priest's cant  
Or statesman's rant.

If I refuse  
My study for their politique,  
Which at the best is trick,  
The angry Muse  
Puts confusion in my brain.

But who is he that prates  
Of the culture of mankind,  
Of better arts and life?  
Go, blindworm, go,  
Behold the famous States  
Harrying Mexico  
With rifle and with knife!

Or who, with accent bolder,  
Dare praise the freedom-loving mountaineer?  
I found by thee, O rushing Contoocook!  
And in thy valleys, Agiochook!  
The jackals of the negro-holder.

The God who made New Hampshire  
Taunted the lofty land  
With little men;—  
Small bat and wren  
House in the oak:—  
If earth-fire cleave  
The upheaved land, and bury the folk,  
The Southern crocodile would grieve.

Virtue palters; Right is hence;  
Freedom praised, but hid;  
Funeral eloquence  
Rattles the coffin-lid.

What boots thy zeal,  
O glowing friend,  
That would indignant rend

The Northland from the South?  
Wherefore? to what good end?  
Boston Bay and Bunker Hill  
Would serve things still;—  
Things are of the snake.

The horseman serves the horse,  
The neatherd serves the neat,  
The merchant serves the purse,  
The eater serves his meat;  
'Tis the day of the chattel,  
Web to weave, and corn to grind;  
Things are in the saddle,  
And ride mankind.

There are two laws discrete,  
Not reconciled,—  
Law for man, and law for thing:  
The last builds town and fleet,  
But it runs wild,  
And doth the man unking.

'Tis fit the forest fall,  
The steep be graded,  
The mountain tunnelled,  
The sand shaded,  
The orchard planted,  
The glebe tilled,  
The prairie granted,  
The steamer built.

Let man serve law for man;  
Live for friendship, live for love,  
For truth's and harmony's behoof;  
The state may follow how it can,  
As Olympus follows Jove.

Yet do not I implore  
The wrinkled shopman to my sounding woods,

Nor bid the unwilling senator  
Ask votes of thrushes in the solitudes.  
Every one to his chosen work;—  
Foolish hands may mix and mar;  
Wise and sure the issues are.  
Round they roll till dark is light,  
Sex to sex, and even to odd;—  
The over-god  
Who marries Right to Might.  
Who peoples, unpeoples,—  
He who exterminates  
Races by stronger races,  
Black by white faces,—  
Knows to bring honey  
Out of the lion;  
Grafts gentlest scion  
On pirate and Turk.

The Cossack eats Poland,  
Like stolen fruit;  
Her last noble is ruined,  
Her last poet mute:  
Straight, into double band  
The victors divide;  
Half for freedom strike and stand;—  
The astonished Muse finds thousands at her side.

### FREEDOM

ONCE I wished I might rehearse  
Freedom's pæan in my verse,  
That the slave who caught the strain  
Should throb until he snapped his chain.  
But the Spirit said, "Not so;  
Speak it not, or speak it low;  
Name not lightly to be said,  
Gift too precious to be prayed,

Passion not to be expressed  
But by heaving of the breast:  
Yet,—wouldst thou the mountain find  
Where this deity is shrined,  
Who gives to seas and sunset skies  
Their unspent beauty of surprise,  
And, when it lists him, waken can  
Brute or savage into man;  
Or, if in thy heart he shine,  
Blends the starry fates with thine,  
Draws angels nigh to dwell with thee,  
And makes thy thoughts archangels be;  
Freedom's secret wilt thou know?—  
Counsel not with flesh and blood;  
Loiter not for cloak or food;  
Right thou feelest, rush to do."

## ODE SUNG IN THE TOWN HALL

CONCORD, JULY 4, 1857

O TENDERLY the haughty day  
Fills his blue urn with fire;  
One morn is in the mighty heaven,  
And one in our desire.

The cannon booms from town to town,  
Our pulses are not less,  
The joy-bells chime their tidings down,  
Which children's voices bless.

For He that flung the broad blue fold  
O'er-mantling land and sea,  
One third part of the sky unrolled  
For the banner of the free.

The men are ripe of Saxon kind  
To build an equal state,—

To take the statute from the mind,  
And make of duty fate.

United States! the ages plead,—  
Present and Past in under-song,—  
Go put your creed into your deed,  
Nor speak with double tongue.

For sea and land don't understand,  
Nor skies without a frown  
See rights for which the one hand fights  
By the other cloven down.

Be just at home; then write your scroll  
Of honor o'er the sea,  
And bid the broad Atlantic roll,  
A ferry of the free.

And, henceforth, there shall be no chain,  
Save underneath the sea  
The wires shall murmur through the main  
Sweet songs of LIBERTY.

The conscious stars accord above,  
The waters wild below,  
And under, through the cable wove,  
Her fiery errands go.

For He that worketh high and wise,  
Nor pauses in his plan,  
Will take the sun out of the skies  
Ere freedom out of man.

### BOSTON HYMN

READ IN MUSIC HALL, JANUARY 1, 1863

THE word of the Lord by night  
To the watching Pilgrims came,

As they sat by the seaside,  
And filled their hearts with flame.

God said, I am tired of kings,  
I suffer them no more;  
Up to my ear the morning brings  
The outrage of the poor.

Think ye I made this ball  
A field for havoc and war,  
Where tyrants great and tyrants small  
Might harry the weak and poor?

My angel, his name is Freedom,—  
Choose him to be your king;  
He shall cut pathways east and west,  
And fend you with his wing.

Lo! I uncover the land  
Which I hid of old time in the West,  
As the sculptor uncovers the statue  
When he has wrought his best;

I show Columbia, of the rocks  
Which dip their foot in the seas,  
And soar to the air-borne flocks  
Of clouds, and the boreal fleece.

I will divide my goods;  
Call in the wretch and slave:  
None shall rule but the humble,  
And none but Toil shall have.

I will have never a noble,  
No lineage counted great;  
Fishers and choppers and ploughmen  
Shall constitute a state.

Go, cut down trees in the forest,  
And trim the straightest boughs:

Cut down the trees in the forest,  
And build me a wooden house.

Call the people together,  
The young men and the sires,  
The digger in the harvest field,  
Hireling, and him that hires;

And here in a pine state-house  
They shall choose men to rule  
In every needful faculty,  
In church, and state, and school.

Lo, now! if these poor men  
Can govern the land and sea,  
And make just laws below the sun,  
As planets faithful be.

And ye shall succor men;  
'Tis nobleness to serve;  
Help them who cannot help again:  
Beware from right to swerve.

I break your bonds and masterships,  
And I unchain the slave:  
Free be his heart and hand henceforth  
As wind and wandering wave.

I cause from every creature  
His proper good to flow:  
As much as he is and doeth,  
So much he shall bestow.

But laying hands on another  
To coin his labor and sweat,  
He goes in pawn to his victim  
For eternal years in debt.

To-day unbind the captive  
So only are ye unbound;

Lift up a people from the dust,  
Trump of their rescue, sound!

Pay ransom to the owner,  
And fill the bag to the brim.  
Who is the owner? The slave is owner,  
And ever was. Pay him.

O North! give him beauty for rags,  
And honor, O South! for his shame;  
Nevada! coin thy golden crags  
With Freedom's image and name.

Up! and the dusky race  
That sat in darkness long,—  
Be swift their feet as antelopes,  
And as behemoth strong.

Come, East and West and North,  
By races, as snow-flakes,  
And carry my purpose forth,  
Which neither halts nor shakes.

My will fulfilled shall be,  
For, in daylight or in dark,  
My thunderbolt has eyes to see  
His way home to the mark.

#### From: VOLUNTARIES

IN an age of fops and toys,  
Wanting wisdom, void of right,  
Who shall nerve heroic boys  
To hazard all in Freedom's fight,—  
Break sharply off their jolly games,  
Forsake their comrades gay,  
And quit proud homes and youthful dames,  
For famine, toil, and fray?

Yet on the nimble air benign  
 Speed nimbler messages,  
 That waft the breath of grace divine  
 To hearts in sloth and ease.  
 So nigh is grandeur to our dust,  
 So near is God to man,  
 When Duty whispers low, *Thou must*  
 The youth replies, *I can*.

### MUSKETAQUID

BECAUSE I was content with these poor fields,  
 Low, open meads, slender and sluggish streams,  
 And found a home in haunts which others scorned,  
 The partial wood-gods overpaid my love,  
 And granted me the freedom of their state,  
 And in their secret senate have prevailed  
 With the dear, dangerous lords that rule our life,  
 Made moon and planets parties to their bond,  
 And through my rock-like, solitary wont  
 Shot million rays of thought and tenderness.  
 For me, in showers, in sweeping showers, the spring  
 Visits the valley;—break away the clouds,—  
 Bathe in the morn's soft and silvered air,  
 And loiter willing by yon loitering stream.  
 Sparrows far off, and nearer, April's bird,  
 Blue-coated,—flying before from tree to tree,  
 Courageous, sing a delicate overture  
 To lead the tardy concert of the year.  
 Forward and nearer rides the sun of May;  
 And wide around, the marriage of the plants  
 Sweetly solemnized. Then flows amain  
 The surge of summer's beauty; dell and crag,  
 Hollow and lake, hill-side, and pine arcade,  
 Are touched with genius. Yonder ragged cliff  
 Has thousand faces in a thousand hours.

Beneath low hills, in the broad interval  
 Through which at will our Indian rivulet  
 Finds mindful still of sannup and of squaw,

Whose pipe and arrow oft the plough unburies,  
Here in pine houses built of new fallen trees,  
Supplanters of the tribe, the farmers dwell.  
Traveller, to thee, perchance, a tedious road,  
Or, it may be, a picture; to these men,  
The landscape is an armory of powers,  
Which, one by one, they know to draw and use.  
They harness beast, bird, insect, to their work;  
They prove the virtues of each bed of rock,  
And, like the chemist 'mid his loaded jars,  
Draw from each stratum its adapted use  
To drug their crops or weapon their arts withal.  
They turn the frost upon their chemic heap,  
They set the wind to winnow pulse and grain,  
They thank the spring-flood for its fertile slime,  
And, on cheap summit-levels of the snow,  
Slide with the sledge to inaccessible woods  
O'er meadows bottomless. So, year by year,  
They fight the elements with elements,  
(That one would say, meadow and forest walked,  
Transmuted in these men to rule their like,)  
And by the order in the field disclose  
The order regnant in the yeoman's brain.

What these strong masters wrote at large in miles,  
I followed in small copy in my acre;  
For there's no rood has not a star above it;  
The cordial quality of pear or plum  
Ascends as gladly in a single tree  
As in broad orchards resonant with bees;  
And every atom poises for itself,  
And for the whole. The gentle deities  
Showed me the lore of colors and of sounds,  
The innumerable tenements of beauty,  
The miracle of generative force,  
Far-reaching concords of astronomy  
Felt in the plants, and in the punctual birds;  
Better, the linked purpose of the whole,  
And, chiefest prize, found I true liberty

In the glad home plain-dealing nature gave.  
The polite found me impolite; the great  
Would mortify me, but in vain; for still  
I am a willow of the wilderness,  
Loving the wind that bent me. All my hurts  
My garden spade can heal. A woodland walk,  
A quest of river-grapes, a mocking thrush,  
A wild-rose, or rock-loving columbine,  
Salve my worst wounds.  
For thus the wood-gods murmured in my ear:  
‘Dost love our manners? Canst thou silent lie?  
Canst thou, thy pride forgot, like nature pass  
Into the winter night’s extinguished mood?  
Canst thou shine now, then darkle,  
And being latent feel thyself no less?  
As, when the all-worshipped moon attracts the eye  
The river, hill, stems, foliage, are obscure,  
Yet envies none, none are unenviable.”

## THE TEST

(Musa loquitur)

I hung my verses in the wind,  
Time and tide their faults may find.  
All were winnowed through and through,  
Five lines lasted sound and true;  
Five were smelted in a pot  
Than the South more fierce and hot;  
These the siroc could not melt,  
Fire their fiercer flaming felt,  
And the meaning was more white  
Than July’s meridian light.  
Sunshine cannot bleach the snow,  
Nor time unmake what poets know.  
Have you eyes to find the five  
Which five hundred did survive?

## FORERUNNERS

LONG I followed happy guides,  
I could never reach their sides;  
Their step is forth, and, ere the day  
Breaks up their leaguer, and away.  
Keen my sense, my heart was young,  
Right good-will my sinews strung,  
But no speed of mine avails  
To hunt upon their shining trails.  
On and away, their hasting feet  
Make the morning proud and sweet;  
Flowers they strew,—I catch the scent;  
Or tone of silver instrument  
Leaves on the wind melodious trace;  
Yet I could never see their face.  
On eastern hills I see their smokes,  
Mixed with mist by distant lochs.  
I met many travellers  
Who the road had surely kept;  
They saw not my fine revellers,—  
These had crossed them while they slept,  
Some had heard their fair report,  
In the country or the court.  
Fleetest couriers alive  
Never yet could once arrive,  
As they went or they returned,  
At the house where these sojourned.  
Sometimes their strong speed they slacken,  
Though they are not overtaken;  
In sleep their jubilant troop is near,—  
I tuneful voices overhear;  
It may be in wood or waste,—  
At unawares 'tis come and past.  
Their near camp my spirit knows  
By signs gracious as rainbows.

I thenceforward, and long after,  
Listen for their harp-like laughter,  
And carry in my heart, for days,  
Peace that hallows rudest ways.
